**Unaudited Preliminary Final Report
for the year ended 31 December 2021**

Commentary on Results

Orexlore Technologies Limited (Orexlore or the Company) was demerged from Swick Mining Services Ltd (Swick) via an in-specie distribution under the terms of the Demerger Implementation Deed dated 12 November 2021, under which Swick sold its fully owned Orexplore entities Orexplore AB and Orexplore Australia Pty Ltd to Orexplore on 23 December 2021. The substance of the transaction has been evaluated in accordance with applicable accounting standards and it has been determined that the Orexplore Group represents the continuation of Orexplore AB which acquires Orexplore Australia Pty Ltd and its subsidiaries, and Orexplore via a common control transaction.

As the acquisition date of Orexplore Australia Pty Ltd and Orexplore is 23 December 2021, the profit and loss of the acquired entities for the eight days to 31 December 2021 has been determined as immaterial and therefore the business acquisition was based on the 31 December 2021 balance sheets of the acquired entities. The consolidated statement of profit or loss and consolidated statement of cash flows for the Orexplore Group for the year ended 31 December 2021 therefore only include the statement of profit or loss and statement of cash flows of Orexplore AB. The Orexplore Group consolidated statement of financial position as at 31 December 2021 includes the full consolidated balance sheets of all Orexplore entities.

Orexlore's Prospectus dated 22 November 2021 provides further details on the historical financial performance of the Orexplore Group.

Review of Operations

Orexlore Group reported a statutory net loss after tax of \$2.64 million for the year ended 31 December 2021 (2020: net loss after tax of \$3.93 million). Orexplore Group's underlying net loss after tax including the full year results of the acquired entities Orexplore Australia Pty Ltd and Orexplore was \$5.51 million (2020: net loss after tax of \$6.09 million).

The Company's Research and Development team in Stockholm, Sweden continued to advance the Technology platform and rolled out tangible speed and functionality improvements across the platform through the successful delivery of the soft-x-ray and spiral scanning projects, in addition to advances across the Insight software platform. The R&D group also continued to deliver work into the European x-mine project, including contributions across technology development, customer engagement and collaborating closely with partners within the consortium.

Core scanning continued at both the Stockholm and Perth laboratories, including small-scale commercial engagements and strategic development projects with a range of customers focused on different emerging use case applications of the technology including exploration decision support, semi-automated core logging, core sampling optimisation, potential grade control and ore sorting optimisation. A larger scale commercial engagement of over 1000m of scanning was commenced with a customer through the Perth laboratory, in addition to the mobilisation of three GeoCore X10 units to a large international mining company's operational site in October for a strategic in-kind field-based trial.

The final months of the year focused on the completion of the demerger process, and preparation for listing in addition to advancing the site trial and building the delivery capability and capacity of the Company in preparation for 2022.
