ASX RELEASE / MEDIA RELEASE

ENVIRONMENTAL PERMITTING UPDATE

Manas Resources Limited (ASX – MSR) is pleased to announce that it has received confirmation from the Kyrgyz Republic State Agency for Environmental Protection and Forestry (SAEPF) that the OVOS recommendations, including the community consultation process for the Shambesai Gold Project, have been satisfactorily fulfilled.

The OVOS, which is the Kyrgyz Republic Environmental and Social Impact Assessment process, was the main environmental approval required for the Shambesai Gold Project to proceed through to production.

The main recommendation arising from the initial conditional OVOS approval was for Manas to conduct public consultations regarding the project development with the local community. Manas has conducted more than 70 formal consultations with local community regarding Shambesai Project's technical, social and environmental aspects since early 2012. On 19 June 2015, a wider consultation meeting was successfully held with local community members and a SAEPF representative to discuss Shambesai Gold Project OVOS. The consultation was held in compliance with Kyrgyz legal requirements including public access to the OVOS document for a 30 day long open comment period prior to the consultation.

"Finalisation of the OVOS process for the Shambesai Project is a major step towards having a fully permitted construction-ready project. Completion of the environmental permitting will significantly simplify the financing process for the project," said Mr Mark Calderwood, Executive Chairman of Manas Resources Limited.

Manas is now working on approval of the final design permits to allow construction to commence immediately on gaining full project funding. Manas is actively pursuing a number of financing opportunities.

Details of the Manas Resources 100%-owned Kyrgyz Gold Projects can be found at the Company's website www.manasresources.com.
