

Munda Gold Mine Mining Commenced

Highlights

- Mining of Starter Pit underway on 10 May 2025.
- Site preparation including new haul road, waste dump and ROM pads largely complete.
- Mine camp and site office operational.
- Full mining team now engaged on site.
- Currently free-dig with first blast likely within 2 weeks.

Management Comment

Managing Director, Mark English, said: “We’re off to an excellent start at Munda. The full team has slotted in perfectly and we are now moving earth from the Starter Pit.

“Site works for our haul road, ROM Pads and Waste Dump are largely complete.

“We can currently dig without blasting and anticipate the first blast will be sometime in the next two weeks as we get down into fresher material. It won’t be long before ore stockpiles build at Munda. This is an exciting time for Auric. When we bought the tenements in September 2020 it was always our intention to get into production as quickly as possible.

“Munda is our major asset. We have a target to mine 125,000 tonnes of ore from the Starter Pit and produce around 6,100 ounces of gold at a projected AISC of A\$2,635 per ounce.¹

"Gold mining is underway. The mine is our future for the next five years and we are settling in for a sustained period of gold production. It is a momentous time for Auric," said Mr English.

The Announcement

Auric Mining Limited (ASX: **AWJ**) (**Auric** or the **Company**) is pleased to advise it has commenced mining a Starter Pit at the Munda Gold Mine, 5km from Widgiemooltha, Western Australia.

Breaking ground at the Starter Pit occurred on 10 May 2025.

Site preparation is largely complete with new haul road, ROM pads and the waste dump established.

All infrastructure is in place including a mine site office and mine camp. Mining is currently free-dig in the upper, weathered portion of the Starter Pit. The first blast will likely occur within two weeks as fresher rock is accessed.

The Company is projecting 125,000 tonnes of ore will be extracted from the Starter Pit at an estimated grade of 1.8g/t Au at an AISC of A\$2,635 per ounce. The Starter Pit will take approximately five months to complete.

Munda has an estimated resource of 145,000 ounces of gold². Once the Starter Pit is finished Auric expects to complete detailed planning for a Munda Main Pit anticipated to commence in 2026.

The Company is fully funded to mine the Starter Pit at Munda from the proceeds of mining Jeffreys Find Gold Mine near Norseman.
