

## Exploration update: new tenement applications south of Pinjin, completion of SAM geophysical survey.

**Kalgoorlie Gold Mining (ASX:KAL)** ('KalGold' or 'the Company') is pleased to report that it has submitted five applications for exploration licences located in strategic areas within and adjacent to the southern part of the gold-mineralising Laverton Tectonic Zone (LTZ), south of existing Pinjin Gold Project tenure.

### Highlights:

- Five new exploration licence applications submitted within the southern part of the Laverton Tectonic Zone since the start of 2025.
  - New applications support a long-term expansion of KalGold's Pinjin footprint cementing KalGold's strategic position in the region.
- SAM geophysical survey data collection over the Lighthorse corridor and surrounds was completed on 21 June 2025. Processing of data is underway.
- Assay results for the recent aircore program are still pending as samples progress through the laboratory.

For MD and CEO Matt Painter's thoughts, please see our video on the KalGold Investor Hub at <https://investorhub.kalgoldmining.com.au/link/4r8EzP>

### Commenting on the new tenement applications, KalGold Managing Director Matt Painter said:

*"The recent discovery by the Company of primary orogenic gold mineralisation at Lighthorse in a previously untested area supports KalGold's belief that the southern part of the Laverton Tectonic Zone has significant potential to host further undiscovered gold mineralisation. With over 30 Moz of gold within structure to the north, the Company believes that there is multi-million ounce exploration potential in the south.*

*To this end, the Company has applied for five new exploration licences throughout the area. With the region almost entirely under transported cover and generally poorly explored, expanding our tenement footprint provides the Company with the opportunity to make additional gold discoveries.*

### New tenure to expand the Pinjin Gold Project

KalGold has taken a strategic approach and applied for new ground as it becomes available. All five of the new applications (Table 1) are located to the south of the current Pinjin Gold Project footprint. They supplement two earlier applications in 2024 (E 31/1377 and E 31/1378) which are located further north within the Pinjin Goldfield and continue to progress through the application process.

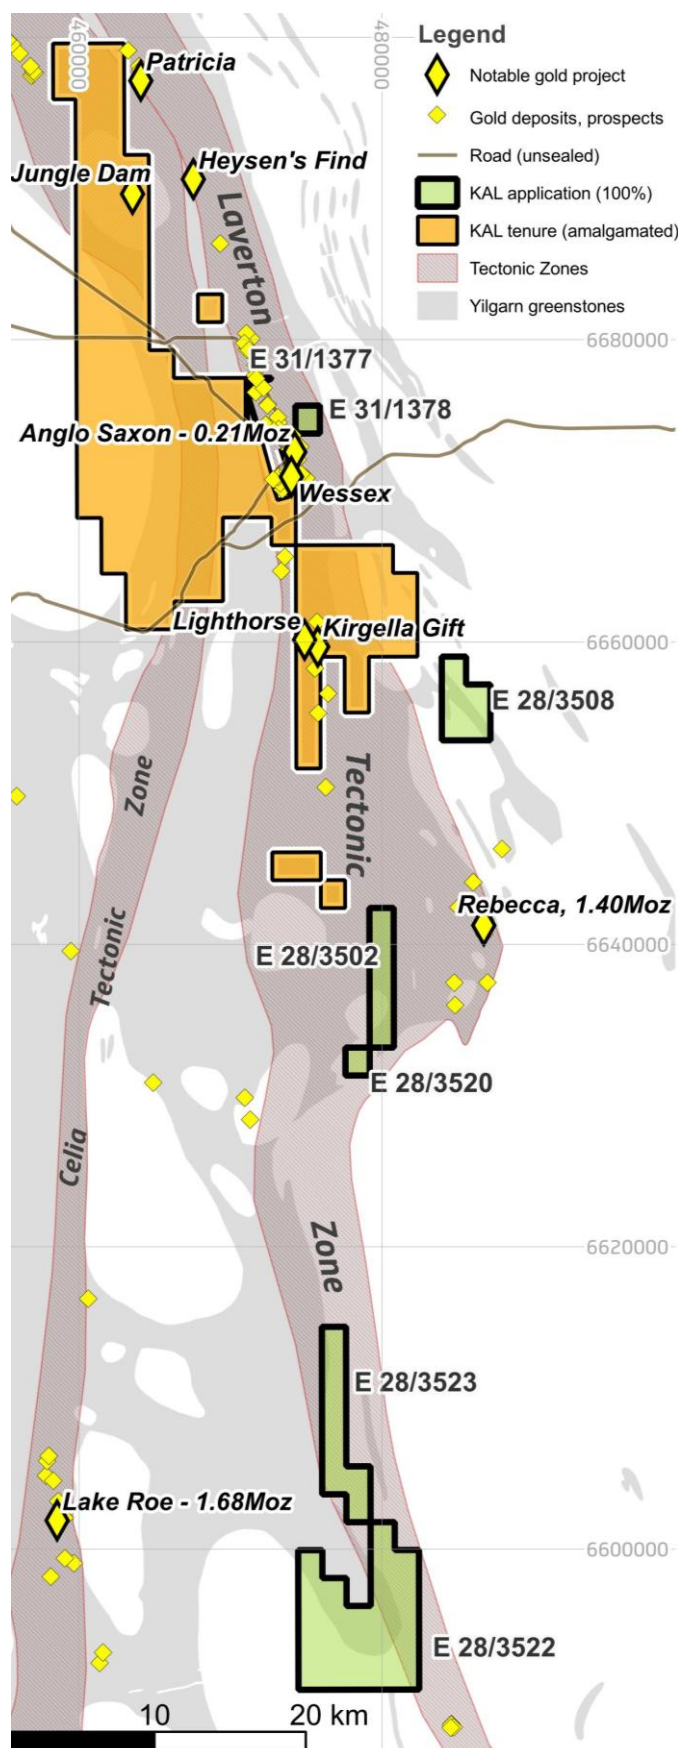

Figure 1 – KalGold existing tenure (amalgamated, orange) and applications (green) focused within and around the Laverton Tectonic Zone. Projection: MGA 94 Zone 51.

All applications fall within or adjacent to the southern part of the LTZ. First- or second-order structures that are either part of the LTZ or branch off it are key targets where they coincide with greenstone sequences and other geological contacts. Historic exploration, where it has occurred, was typically sparse and superficial.

The Company estimates a 12-18 month period for the new applications to work through statutory approvals, noting that this timing can be highly variable. Should all tenements be successfully granted, the total area covered by the Pinjin Gold Project will increase by 128.5 km<sup>2</sup> to 483.5 km<sup>2</sup>, further cementing KalGold's prominent and strategic position in the region. Strike coverage of the southern Laverton Tectonic Zone, though intermittent, will increase from ~60km to ~115km.

These new tenement applications provide opportunity to be the first company to systematically test new areas for gold mineralisation. First-pass geophysical appraisal highlights potential exploration targets on each tenement, with high-resolution target definition to commence upon tenement grant.

### SAM geophysical survey completed

SAM geophysical survey data collection over the Lighthorse corridor and surrounds was successfully completed on 21 June 2025.

Preliminary unprocessed imagery shows a significant upgrade in resolution of the dataset, potentially offering clearer definition of features that may control gold mineralisation distributions at Lighthorse, T12, T15, Kirgella Gift, and Providence. Processing and interrogation of the new data will commence shortly.

### Aircore drill program results pending

Samples from the recent aircore drill program testing extensions to the Lighthorse prospect continue to progress through laboratory analysis. Results will be released upon their receipt, incorporation and interpretation.

*Table 1 – Applications for exploration licences that will, upon grant, be incorporated into KalGold's Pinjin Gold Project. All tenements will be 100% KalGold.*

Project	Tenement	Area (km <sup>2</sup> )	Description
<b>Pinjin</b>	E 28/3502	14.8	Between KAL's E 28/3135-3136 and Ramelius Resources' Rebecca Project
	E 28/3508	14.8	Possible Rebecca sequence (host sequence to Ramelius Resources' Rebecca deposit) 9 km east of Kirgella Gift
	E 28/3520	3.0	Strike extent of sequence within E 28/3502 application adjacent to Ramelius Resources' Rebecca Project
	E 28/3522	67.8	Southernmost greenstones of the LTZ, contains tectonised granite-greenstone contact
	E 28/3523	23.6	Tectonised greenstone/granite interface in the south
<i>Previously reported applications</i>			
<b>Pinjin</b>	E 31/1377	1.6	Within Pinjin Goldfield, adjoins KAL's E 31/1262
	E 31/1378	2.9	Within Pinjin Goldfield
TOTAL Pinjin applications		128.5	

## Diamond drilling at Kirgella Gift and Providence

KalGold currently has access to \$130,000 in co-funding under the West Australian Government's Exploration Incentive Scheme (EIS) for a program of diamond drilling at Kirgella Gift and Providence (ASX: KAL 23 October 2024). Previous work by the Company has defined a JORC Code (2012) Inferred Mineral Resource of 2.34 Mt @ 1.0 g/t Au for 76,400 oz at Kirgella Gift and Providence (ASX: KAL 25 July 2024), with the EIS program designed to provide key structural data, and to test a conceptual high grade exploration target at depth between the two deposits.

A total of four holes for approximately 1,070 m are planned, with EIS funds available until the end of November 2025. Logistical planning for the program is currently underway, including securement of a sufficient supply of water to support drilling operations. Several drilling contractors have expressed an interest in the program, with drilling expected to be undertaken in Q3 2025.

## About the Pinjin Project

The Pinjin Gold Project is located in a Tier One location approximately 140 km northeast of Kalgoorlie Boulder and covers a substantial portion of the southern part of the prolific Laverton Tectonic Zone (LTZ). To the north, this major crustal structure hosts some of the Eastern Goldfields' largest gold mines and deposits.

The project is strategically located near Ramelius Resources' (ASX: RMS) Rebecca Gold Project, where a recent pre-feasibility study outlined a path to gold production by 2027.

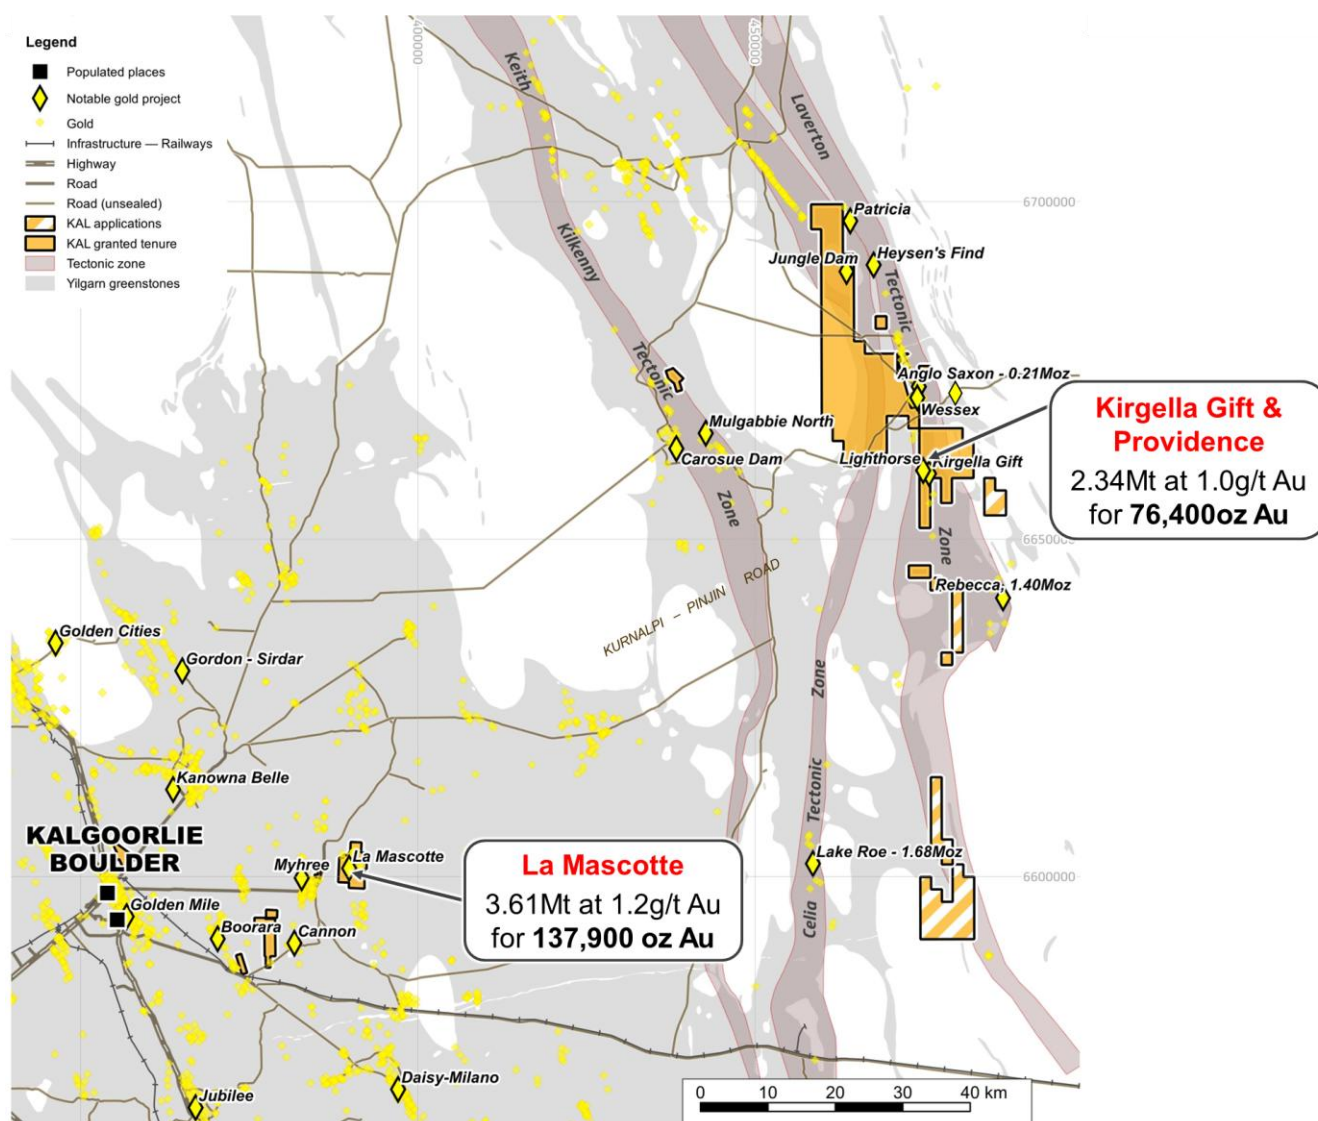

Figure 2 – Location map of the Lighthorse gold discovery at KalGold's Pinjin Project around 140 km northeast of Kalgoorlie-Boulder. The project is situated approximately 25 km north of Ramelius Resources' (ASX: RMS) Rebecca Gold Project. Also shown are KalGold's JORC Code (2012) Inferred Mineral Resources, the outcropping La Mascotte deposit 35 km east of Kalgoorlie, and the Kirgella Gift and Providence deposits from only 3m depth at Pinjin. Projection: MGA 94 Zone 51.

Authorised for lodgement by the Board of Kalgoorlie Gold Mining Limited.

## About KalGold

ASX-listed resources company Kalgoorlie Gold Mining (KalGold, ASX: KAL) is a proven, low-cost gold discoverer with a large portfolio of West Australian projects and a total gold resource in excess of 214,000 oz. KalGold prides itself on defining shallow, potentially open-pittable gold resources at very low costs, currently less than A\$4.60 per ounce of gold<sup>2</sup>. Current focus includes:

- The **Pinjin Project** within the **30 Moz Laverton Tectonic Zone** (host to Sunrise Dam, Granny Smith, Rebecca, Anglo Saxon, and Wallaby projects) is located only 25 km north along strike from Ramelius Resources (ASX: RMS) **Rebecca Gold Project**. A first JORC Code (2012) Inferred Mineral Resource Estimate at Kirgella Gift and Providence (2.34 Mt @ 1.0 g/t Au for 76,400 oz<sup>1</sup>) represents the first area targeted at Pinjin, with many more targets scheduled for testing. The company aims to define further resources as these targets are tested. Some tenure is the subject of a farm-in over two years. Between this tenure and KalGold's own tenure and applications, the Company has established a significant presence in a strategic and important gold producing region.
- The **Bulong Taurus Project**, 35 km east of Kalgoorlie-Boulder. Contains the outcropping **La Mascotte** gold deposit where KalGold has defined a JORC Code (2012) Inferred Mineral Resource Estimate of 3.61 Mt @ 1.19 g/t Au for 138,000 oz<sup>2</sup>, plus a series of satellite prospects and historic workings of the **Taurus Goldfield**. Work continues at the project.

## CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This news release contains forward-looking statements and forward-looking information within the meaning of applicable Australian securities laws, which are based on expectations, estimates and projections as of the date of this news release.

This forward-looking information includes, or may be based upon, without limitation, estimates, forecasts and statements as to management's expectations with respect to, among other things, the timing and amount of funding required to execute the Company's exploration, development and business plans, capital and exploration expenditures, the effect on the Company of any changes to existing legislation or policy, government regulation of mining operations, the length of time required to obtain permits, certifications and approvals, the success of exploration, development and mining activities, the geology of the Company's properties, environmental risks, the availability and mobility of labour, the focus of the Company in the future, demand and market outlook for precious metals and the prices thereof, progress in development of mineral properties, the Company's ability to raise funding privately or on a public market in the future, the Company's future growth, results of operations, restrictions caused by COVID-19, performance, and business prospects and opportunities. Wherever possible, words such as "anticipate", "believe", "expect", "intend", "may" and similar expressions have been used to identify such forward-looking information. Forward-looking information is based on the opinions and estimates of management at the date the information is given, and on information available to management at such time.

Forward-looking information involves significant risks, uncertainties, assumptions, and other factors that could cause actual results, performance, or achievements to differ materially from the results discussed or implied in the forward-looking information. These factors, including, but not limited to, fluctuations in currency markets, fluctuations in commodity prices, the ability of the Company to access sufficient capital on favourable terms or at all, changes in national and local government legislation, taxation, controls, regulations, political or economic developments in Australia or other countries in which the Company does business or may carry on business in the future, operational or technical difficulties in connection with exploration or development activities, employee relations, the speculative nature of mineral exploration and development, obtaining necessary licenses and permits, diminishing quantities and grades of mineral reserves, contests over title to properties, especially title to undeveloped properties, the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other geological data, environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins and flooding, limitations of insurance coverage and the possibility of project cost overruns or unanticipated costs and expenses, and should be considered carefully. Many of these uncertainties and contingencies can affect the Company's actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, the Company. Prospective investors should not place undue reliance on any forward-looking information.

Although the forward-looking information contained in this news release is based upon what management believes, or believed at the time, to be reasonable assumptions, the Company cannot assure prospective purchasers that actual results will be consistent with such forward-looking information, as there may be other factors that cause results not to be as anticipated, estimated or intended, and neither the Company nor any other person assumes responsibility for the accuracy and completeness of any such forward-looking information. The Company does not undertake, and assumes no obligation, to update or revise any such forward-looking statements or forward-looking information contained herein to reflect new events or circumstances, except as may be required by law.

No stock exchange, regulation services provider, securities commission or other regulatory authority has approved or disapproved the information contained in this news release.

## COMPETENT PERSON STATEMENT

The information in this report that relates to Exploration Targets, Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Dr Matthew Painter, a Competent Person who is a Member of the Australian Institute of Geoscientists. Dr Painter is the Managing Director and Chief Executive Officer of Kalgoorlie Gold Mining Limited (KalGold) and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr Painter consents to the inclusion in the report of the matters based on his information in the form and context in which it appears. Dr Painter holds securities in Kalgoorlie Gold Mining Limited.

## EXPLORATION RESULTS

The references in this announcement to Exploration Results were reported in accordance with Listing Rule 5.7 in the announcements titled:

- *Multi-kilometre target areas along strike at KalGold's Lighthorse discovery, 17 February 2025*
- *Lighthorse gold discovery follow-up RC drilling to commence first week of March, 13 February 2025*
- *'Lighthorse' gold discovery at Pinjin: thick, high-grade gold intercepted at new greenfields find, 7 February 2025*
- *First-pass aircore drilling at Kirgella West: broad gold anomalism and mineralisation over 1,200m strike, 18 December 2024*
- *Quarterly activities report for the quarter ending 30 September 2024, 30 October 2024*
- *More thick, shallow gold intercepts at Pinjin extend Wessex target to 2 km strike length, 9 October 2024*

- *Thick gold intercepts from initial drilling at Wessex near Anglo Saxon gold mine, 23 May 2024*
- *Providence: North plunging shallow gold mineralisation has significant potential, 7 December 2023*
- *Shallow, high-grade results extend Kirgella Gift and Providence corridor to over 1,150m of strike, 25 October 2023*
- *Thick, shear-hosted gold mineralisation intercepted at Kirgella Gift, 8 June 2023*
- *KalGold farms-in to Kirgella gold tenements and acquires Rebecca West tenure at Pinjin, 23 May 2023.*

The Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcements noted above.

## **MINERAL RESOURCE ESTIMATES**

The references in this announcement to Mineral Resource estimates were reported in accordance with Listing Rule 5.8 in the following announcements:

- *La Mascotte gold deposit: First JORC (2012) Mineral Resource of 138,000 oz Au, 7 March 2023.*
- *First Kirgella Gift Inferred Resource of 76,400 oz from 3m, 5 July 2024.*

In accordance with ASX Listing Rule 5.23, the Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcement noted above and that all material assumptions and technical parameters underpinning the Mineral Resource estimates in the previous market announcements continue to apply.
