COMMENTARY:

Mr. Anthony Nantes, Chief Executive Officer, Wisr said, “We have seen a substantial step-change in operating capability in the last six months. Our H1FY21 results delivered a significant 354% uplift in revenue while reducing overall Cash EBTDA loss by 6%, compared to this same period last financial year.”

“Investments in talent and technology, planned at the time of our January 2020 capital raise but deferred in response to COVID-19, have now been made. This means that increases in operating cost base will be more incremental in the medium term, resulting in significant operating leverage as revenue continues to grow strongly in-line with the growth of our loan book.”

“We aim to aggressively grow market share with an innovative business model that gives us multiple levers for growth in the coming quarters, and beyond, as we build a company with significant impact in this market.” finished Mr. Nantes.
