## **ENVIRONMENTAL AUTHORISATION STATUS**

---

In the Company’s recent AGM, which was attended by representatives from the Centre for Environmental Rights (“CER”) who posed questions in relation to the Phase 2 expansion and environmental authorisation, we want to make clear the Company’s position on the matter just as we did in the AGM:

The Company’s positive Phase 2 Environmental Authorisation (“EA”) was appealed by CER on behalf of MEJCON-SA and MACUA. The Minister dismissed 5 of their 7 grounds of appeal. The appeal has not resulted in any delays to the progress on Phase 2, nor is it likely to have any impact on the timing of Phase 2. This is due to the fact that our select drilling programme is fully authorised under the Production Right granted in 2012.

On the advice of the Minister’s supporting technical advisory team, the Minister requested that Tetra4 expand upon the Impact Assessment Reports to address areas for improvement observed in the report and in relation to the first and second grounds of appeal. Once the additional information has been incorporated a revised report is to be submitted to registered I&APs for a further review and commenting period of 30 days and thereafter re-submitted to the DMRE for approval. We are pleased with the progress and believe that the remaining information to be provided will satisfy the requirements to obtain a positive EA.
