**(ASX: WOR)**

**Arafura awards contract to Worley Chemetics® for its proprietary sulphuric acid technology**

Arafura Rare Earths Limited has awarded a contract to Worley Chemetics® to install proprietary CORE-SO<sub>2</sub><sup>TM</sup> sulphuric acid technology at Arafura's Nolans Rare Earth Project in the Northern Territory of Australia. Chemetics® is a leading provider of technology and solutions for sulphuric acid and other specialty chemical facilities.

Under the contract, Chemetics® will provide technology, engineering and supply of its proprietary CORE-SO<sub>2</sub><sup>TM</sup> sulphuric acid plant along with the associated oxygen plant. The CORE-SO<sub>2</sub><sup>TM</sup> plant is designed to have a small footprint. When compared to traditional technologies, the CORE-SO<sub>2</sub><sup>TM</sup> plant reduces sulphur dioxide emissions dramatically and generates high pressure steam to enable CO<sub>2</sub>-free electrical power generation.

Arafura's Nolans Rare Earth Project supports the diversification of the rare earths global supply chains enabling Australia to play a critical role as an alternative supplier.

"We are pleased to support Arafura on this project, which is consistent with our purpose of delivering a more sustainable world," said Chris Ashton, Chief Executive Officer of Worley.

Authorized for release by Nuala O'Leary, Group Company Secretary.
