

Resignation of Simon Marriott as Executive Director

Melbourne, Australia, 2 March, 2018: Australian metal additive manufacturing company, Titomic Limited (ASX: TTT) ("Titomic" or "Company") wishes to advise that Mr. Simon Marriott has today resigned from the Board with immediate effect.

Mr. Marriott joined Titomic in 2017 and has served with the Company both as an Executive Director and a consultant to the Company. His consulting services agreement expired this week on 28 February 2018.

Titomic Chairman, Mr. Philip Vafiadis, commented:

"The Board and Management team, strengthened by a number of recent key appointments, wishes to thank Mr. Marriott for his service to the Company and we wish him well in his future endeavors."

"We're all excited about the significant milestones which lie just ahead of us which will take Titomic to the next level and feel we have put the right team together to get us there."

About Titomic:

Titomic (ASX:TTT) is headquartered in Melbourne, Australia. The company overcomes limitations of previous additive manufacturing (3D printing) for metals to manufacture complex parts without shape or size constraints. Titomic offers design and manufacturing methods to enable speed-to-market, superior products at lower production costs and using less resources for a more sustainable future.

Titomic additive manufacturing machines that can customise build size to customer requirements offer additive manufacturing advantages at industrial scale. Multiple robots can be utilised to build larger parts, competing with traditional manufacturing solutions for industries such as aerospace and defence, sporting goods, medical, automotive, industrial equipment, construction and marine.

Other benefits of the Titomic Kinetic Fusion technology include:

- Joining dissimilar metals and composites for engineered properties in a structure
- Stronger structures without welding, folding or bending
- Reduced time to market; no tooling, industry-leading production speeds

Clients will be offered a licence to manufacture via the Titomic Kinetic Fusion technology. Titomic's revenue model will also provide clients with R&D prototyping services, Titomic equipment sales, powder and consumables supply, equipment service and maintenance.
