

QUARTERLY ACTIVITIES REPORT

29 January 2021

For the quarter ended 31 December 2020

Admiralty Resources NL (ASX: ADY) is pleased to report its activities for the December 2020 quarter.

Exploration and Quarterly Activities

Soberana

Chile is currently under a National State of Catastrophe with daily curfew and strict inter-commune travel restrictions in place. The result of these COVID-19 restrictions has continued to have an impact on the commencement date of production at the Soberana site.

Production on the site will commence upon the easing of the above restrictions and ADY will continue to keep the market informed as and when further developments of the project occur.

Mariposa

During the quarter the Company has received all the necessary permits and authorisation to produce 67 MT of pellet feed per month. The Company's management in Chile is seeking an expanded production output of 150 MT per month to allow for increased output upon commencement of operations.

Additionally, the Board has been in early stage discussions with a new mine operation and management company. This negotiation is ongoing and the Company will keep the market informed of progress as tangible progress is made.

Australian Project

No activity to report during the quarter.

Corporate Activities

During the quarter, \$25,000 was paid to directors of the Company in director fees, as noted in Item 6.1 of the 5B.

About Admiralty

Admiralty Resources NL (ASX: ADY) is a public diversified mineral exploration company listed on the Australian Securities Exchange with mineral interests in Chile and in Australia.

Admiralty's flagship projects are the iron ore districts in Chile: Harper South (2,498 Ha), Pampa Tololo (3,455 Ha) and El Cojin (600 Ha). The districts are located in prime locations, with close and easy access to the Pan-American Highway (a major route), a railway and power line and operating shipping ports.

Admiralty's project in Australia is the Pyke Hill Project, a cobalt and nickel project in Western Australia, whose mining lease is 50% owned by Admiralty.

Admiralty in Chile

The **Harper South district** ("Harper South") is the most advanced district in respect to exploration. To date, six targets have been confirmed as carriers of iron mineralisation: Mariposa, La Chulula, Soberana, Negrita, La Vaca and Mal Pelo.

- **Mariposa** has a JORC 2004 compliant resource of 174.5 Mt (*as per ASX announcement on 25/1/2013*). An engineering mine plan (or Prefeasibility Study) for an initial production of one million tonnes of finished product per annum has been commissioned to Redco Mining Engineers.
- **La Chulula**. The Mineral Resource Estimate quantifies the resources at La Chulula at 96 Mt at 24% Fe for a 15% Fe cut-off in the inferred category. The La Chulula resource estimate is based on the results obtained from the reverse circulation and diamond drilling campaign completed in 2012
- **Soberana** has a JORC 2004 compliant resource of 90.2 Mt (*as per ASX announcement on 15/1/2013*).

Pampa Tololo district - A high resolution ground magnetic survey carried out in 2011 identified three targets: Cochrane, O'Brien and Simpson. A reverse circulation drilling campaign of 3,311m took place at Simpson in July/August 2012. The results of this campaign are currently being evaluated by the Company.

El Cojin district - It is the least advanced of Admiralty's projects in Chile, with the first piece of exploration work being a high-resolution ground magnetic survey carried out in 2012. The survey identified 5 targets in total with 3 of them showing great depth and high susceptibility.

Schedule of tenements

<i>Tenement Reference</i>	<i>Registered Holder</i>	<i>% Held</i>	<i>Country</i>	<i>Project Group</i>
