ABOUT MONTAKA

Montaka Global is a specialist global equities manager established in 2015 by Andrew Macken and Christopher Demasi with offices in Sydney, Melbourne and New York.

Montaka's mission is to achieve superior long-term compounding of investor capital, alongside the capital of our principals, team, and owners.

ABOUT THE FUND

The Montaka Global Fund - Active ETF can play a leading role in achieving Montaka's mission.

Investors in the Fund benefit from our deep expertise, fundamental research and detailed analysis to identify high-conviction, long-duration opportunities through a concentrated global equities portfolio.

The Fund is highly focussed on investing in long-term winners in attractive transforming markets when they are undervalued and offer outsized return potential.

Investors benefit from an easily accessible listed structure with 'live' pricing and sufficient liquidity around 'fair value'. Investors can buy and sell units on ASX (ticker: MOGL) in the same way as other listed securities, through a broker or trading account or choose to invest [directly](#) with the Fund.

The Fund aims to outperform the Index, net of fees, over the long term and targets distributions of 4.5% p.a. which can be automatically reinvested.

INVESTMENT REPORT

MARCH 2025

FUND COMMENTARY

Global equity investors experienced sharp declines in March. Periods like these are always unpleasant for investors. And they often coincide with heightened feelings of uncertainty. March was certainly one of these periods.

Rest assured, however, that Montaka's portfolio companies remain advantaged, highly profitable, and cash generative. Importantly, we assess their future prospects to remain very attractive, resulting in the aggregate earnings power of Montaka's portfolio companies growing substantially over time. We believe the reliability of this growth remains substantially underappreciated by the market today.

Business fundamentals and valuation discipline remain our twin north stars. These help us avoid distractions (and detractors) amidst the very noisy global financial markets.

The key informational building blocks we rely on to make portfolio decisions are the detailed valuation scenarios, and their probabilities, for each company assessed by Montaka's research team. As stock prices move around, as they did in March, our portfolio construction framework guides us to make the following portfolio augmentations, subject to Montaka's overarching portfolio risk controls:

- Increase allocations to those opportunities for which the long-term probability weighted upside has increased, and the downside has reduced; and
- Decrease allocations to those opportunities for which the long-term probability weighted upside has decreased, and the downside has increased.

On this basis, Montaka trimmed the positions of Spotify and S&P Global in March and added to the positions of KKR and Floor & Décor.

Some market values have become far more attractive by month-end. For investors such as Montaka, this means opportunities as we are able to look through the uncertainty of the next months and few years and instead remain focused on fundamental advantages, risks, and valuations of extremely attractive compounding businesses.
