

ASX Release / 15 May 2025

Corporate Presentation

EU Critical Raw Materials Facility

EcoGraf Limited (EcoGraf or the Company) (ASX: **EGR**; FSE: **FMK**) is pleased to provide the attached corporate presentation.

The presentation was at the EU Priority Projects Showcase which was organised at a joint event by the European Commission and the Critical Raw Materials Facility in Brussels during the EIT Raw Materials Summit.

The Critical Raw Material Facility is coordinated by EIT Raw Materials and aims to build a resilient and sustainable European supply of critical raw materials strengthening global partnerships and advancing international projects to diversify Europe's raw materials supplies.

This announcement is authorised for release by Andrew Spinks, Managing Director.

Corporate Presentation

A Joint Event by the European Commission and the Critical Raw Materials Facility

EIT Raw Material Summit
Brussels
14th May 2025

Securities Disclaimer

This document is for informational purposes only and does not constitute an offer to sell, or solicit to purchase, any securities. Such offer can be made only through proper subscription documentation and only to investors meeting strict suitability requirements. Any failure to comply with these restrictions may constitute a violation of applicable securities laws.

Forward looking statements

Various statements in this document constitute statements relating to intentions, future acts and events. Such statements are generally classified as “forward looking statements” and involve known and unknown risks, uncertainties and other important factors that could cause those future acts, events and circumstances to differ materially from what is presented or implicitly portrayed herein. The Company gives no assurances that the anticipated results, performance or achievements expressed or implied in these forward-looking statements will be achieved.

Production targets and financial information

Information relating to the Bankable Feasibility Study and Pre-Development Program conducted on the Epanko Graphite Project, including production targets and forecast financial information derived from the production targets, is extracted from the ASX announcements dated 21 June 2017, 28 April 2023 and 25 July 2024, available at www.ecograf.com.au and www.asx.com.au. The Company confirms that all material assumptions underpinning the production targets and forecast financial information derived from the production targets set out in the announcements released on 21 June 2017, 28 April 2023 and 25 July 2024 continue to apply and have not materially changed.

The production targets referred to in this presentation are based on the updated Epanko Reserve (25 July 2024 announcement) which is comprised of 82% Measured Resources and 18% Indicated Resources for an initial 18-year life of mine. The Measured Resources and Indicated Resources underpinning the production target have been prepared by a competent person in accordance with the requirements in Appendix 5A (JORC Code). The Company has not used Inferred Mineral Resources as part of the production target. The study includes some Inferred Resources which are mined incidentally with the Measured and Indicated Resources and treated as waste for scheduling purposes.

Competent persons

The information in this report that relates to Mineral Resources is based on, and fairly reflects,

information compiled by Mr. David Williams and Mr. David Drabble. Mr. David Williams is a full-time employee of ERM and is a Member of the Australian Institute of Geoscientists (#4176)(RPGeo). Mr. David Drabble is a full-time employee of EcoGraf Ltd and is a Member of the Australasian Institute of Mining and Metallurgy (#307348). Mr David Williams and Mr David Drabble have sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as Competent Persons as defined in the 2012 Edition of the Australasian Code for the Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcement and all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

The information in this report that relates to the Ore Reserve has been compiled by Mr Steve O'Grady. Mr O'Grady, who is a Member of the Australasian Institute of Mining and Metallurgy (#201545), is a fulltime employee of Interline Engineering and produced the Mining Reserve estimate based on data and geological information supplied by Mr Williams. Mr O'Grady has sufficient experience that is relevant to the estimation, assessment, evaluation and economic extraction of Ore Reserve that he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcement and all material assumptions and technical parameters underpinning the estimates, including production targets and forecast financial information derived from the production targets in the relevant market announcement continue to apply and have not materially changed.

This Presentation has been approved for release by Andrew Spinks, Managing Director.

Geopolitical drivers for new anode material supply

GLOBAL MONTHLY EV SALES ('000 UNITS)¹

GLOBAL LEGISLATION

-  Tariffs, New President Executive Order for CRM's to develop sovereign capability
-  The EU Green Deal and Critical Raw Materials Act.
-  Chinese export licence controls -1 December 2023.

KEY MARKET DEVELOPMENTS

- Increased EV adoption
- Supply chain regionalization for diversity and sovereign capability
- Growing emphasis on ESG

RECYCLE

Epanko project infrastructure for Stage 1 - 73,000tpa

- Completion of various pre-development programs to support lender due diligence processes
- Process flowsheet based on rigorous testing
- Knight Piésold completed studies to ensure Tailing Storage Facility (TSF) and Water Storage Design (WSD) and operations meet GISTM requirements
- Epanko expansion supported by capability of 8-fold increase to +80Mt capacity in TSF providing 'Life of Mine' solution

TANZANIA'S MINING SECTOR: A BEACON OF GROWTH AND SUSTAINABILITY

“look at Africa for energy needs...we have everything when we talk about green energy.”

Tanzanian President, Samia Suluhu Hassan, Speaking at the 53rd World Economic Forum

President Samia Suluhu Hassan is promoting mining in Tanzania by strengthening legal frameworks, encouraging foreign investment, and supporting local participation

- Contributing 10.1% to the GDP, surpassing the 10% target set for 2025
- Attracting investment from majors, including BHP (Kabanga Nickel) and Shell (LNG project)
- Accelerating major infrastructure projects bringing power stability and transport efficiency including Julius Nyerere Hydroelectric Power Project and Standard Gauge Railway
- Empowering regional communities through local content regulations and creating employment

New Tanzanian infrastructure supporting Epanko

Great Ruaha Bridge

Improving the transportation of agriculture and mining products.

EU co-funded:
US\$62 million

Ifakara Substation

Funded through the European Union to support new business in the region.

EU funded:
US\$10 million

Julius Nyerere Hydropower Station

Providing low-cost, renewable power with recent announcement now energising grid.

Electric Train

Positioned to support new industries, given its location on the transport corridor.

UPSTREAM

MIDSTREAM

DOWNSTREAM

RECYCLE

ESG contribution to Tanzania

Positive Impact

Transformational inter-generational financial and social upliftment for the Ulanga district.

Economic growth

Direct contribution to the economy through procurement of goods and services, employment, royalties, taxes and dividends.

Multiplier effect with an estimated US\$9+ billion additional indirect benefits over 40+ years.

Employment and Training

300 to be directly employed.
4,500 indirect jobs + new industry technologies.

UPSTREAM

MIDSTREAM

DOWNSTREAM

RECYCLE

Infrastructure

POWER

- Epanko Project Stage 1 - 2.8MW power requirement
- TANESCO Ifakara substation funded by EU and opened 2024
- Finalising power supply agreement with TANESCO to connect 33kV Epanko Project line at proposed Mahenge substation

ROAD AND RAIL LOGISTICS

- Stage 1 - 73,000tpa transporting bagged graphite concentrate by truck to the Port of Dar es Salaam
- Option of locating a warehouse at Ifakara near the railway line
- Expansion study to support greater rail use

PORT

- Export through Port of Dar es Salaam
- Dar es Salaam is Tanzania's principal port with a rated capacity of 14.1Mt dry cargo.

UPSTREAM

MIDSTREAM

DOWNSTREAM

RECYCLE

Corporate commitment to leading ESG standards

Developing Epanko in compliance with the highest standards IFC Performance Standards (“IFC PS”)

- Equator Principles IV (“EP IV”)
- Global Industry Standard on Tailings Management (“GISTM”)
- Sustainable Development Goals (“SDGs”)
- Global Reporting Initiative Standards (“GRI”)
- Initiative for Responsible Mining Associations (“IRMA”) Standards¹

1. EGR aims to incorporate IRMA policy requirements into the sustainability policies. Thereafter EGR to develop a program to achieve certification.

Mechanical shaping of natural flake graphite to produce Spherical Graphite (SpG)

Priorities

Sales arrangements to support financing and development

Mechanical shaping facility

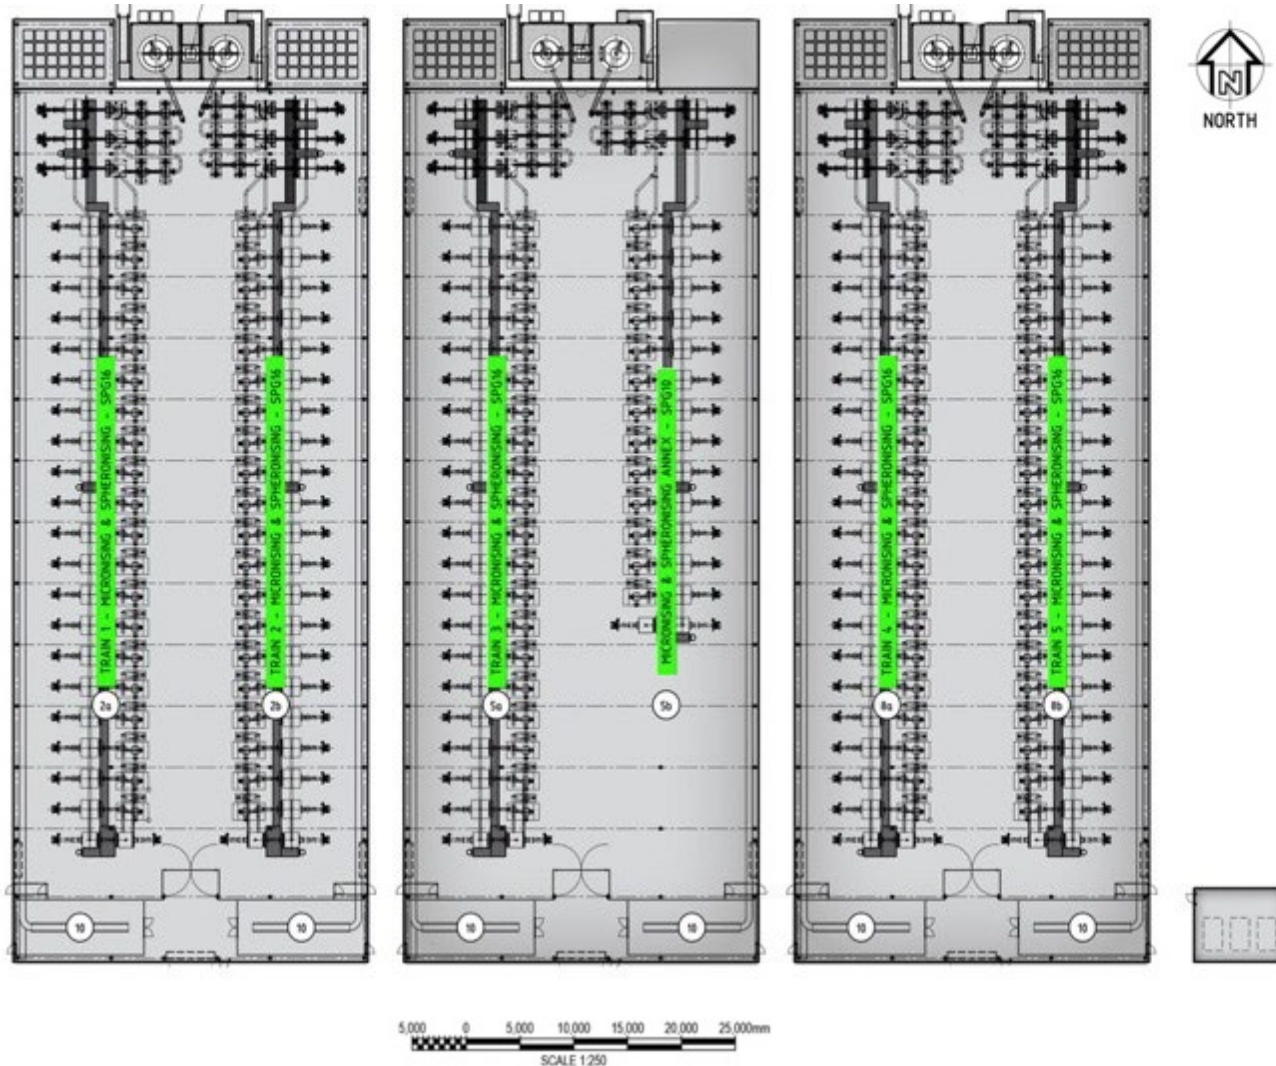

Positioning to be first value-addition development that supports Tanzanian Governments '**Vision 2030**' value-addition strategy

- Ifakara identified as the preferred location
 - 75km from mine
 - EU substation
- Energized by 2,115MW Nyerere Hydropower plant
- Optimises supply chain logistics efficiencies for EV and battery customers

Mechanical shaping facility design

MICRONISING AND SPHERONISING PLANT LAYOUT

Independent engineering study completed for 20,000tpa

Stage 1 Facility Cost **US\$58.6m**

Operating Cost **US\$419/t**

Next steps

- Secure conditional financing arrangements
- Finalise offtake agreements
- Final engineering programs, environmental and project execution planning

Beyond mineral value addition

Positive discussion with **European Union (EU) Tanzanian delegation** supporting the Midstream and Downstream development

- Discussion with **EU financing parties**
- Pursuing programs to support further **mineral value addition** from midstream materials **to develop products to support new local industries in Tanzania.**

Evaluation of new Local Tanzanian Industries

Green recarburiser for EU steel industry as 'carbon additive'

Carbon soil additives and grease manufacturing for local industries

Pencil manufacturing for local schools and industry

UPSTREAM

MIDSTREAM

DOWNSTREAM

RECYCLE

EcoGraf HFfree® Purification of SpG to produce purified SpG

Priorities

Formalise strategic partnerships
for commercial scale production

Evaluate development options in
Europe, North America and Asia

EcoGraf HFfree® purification facilities

Global expansion driven by EV demand and legislation to encourage new and sustainable critical mineral supply chains

- Product qualification facility (PQF) successfully commissioned and operated.
- HFfree process - US patent granted and 2nd Australian patent granted
- Benchmarking and engineering study confirms capital and operating cost advantages of the EcoGraf HFfree® process
- Extensive product testing with customers
- Technical and commercial cooperation agreements in place

Reder ASX announcement dated 7 May 2025

UPSTREAM

MIDSTREAM

DOWNSTREAM

RECYCLE

Product Qualification Facility (PQF)

PQF piloting facility developed for purification of Spherical Graphite (SpG)

- ✓ Confirmation of process technology to support commercial development
- ✓ PQF delivers results meeting the highest customer specifications for purified SpG
- ✓ 4N achieved through on-going purification optimisation testwork resulting in reduction of total impurity levels to less than 100ppm

Capital cost estimate to be updated in Q2 2025 for 20-25,000tpa

Ability to process other SpG feedstocks

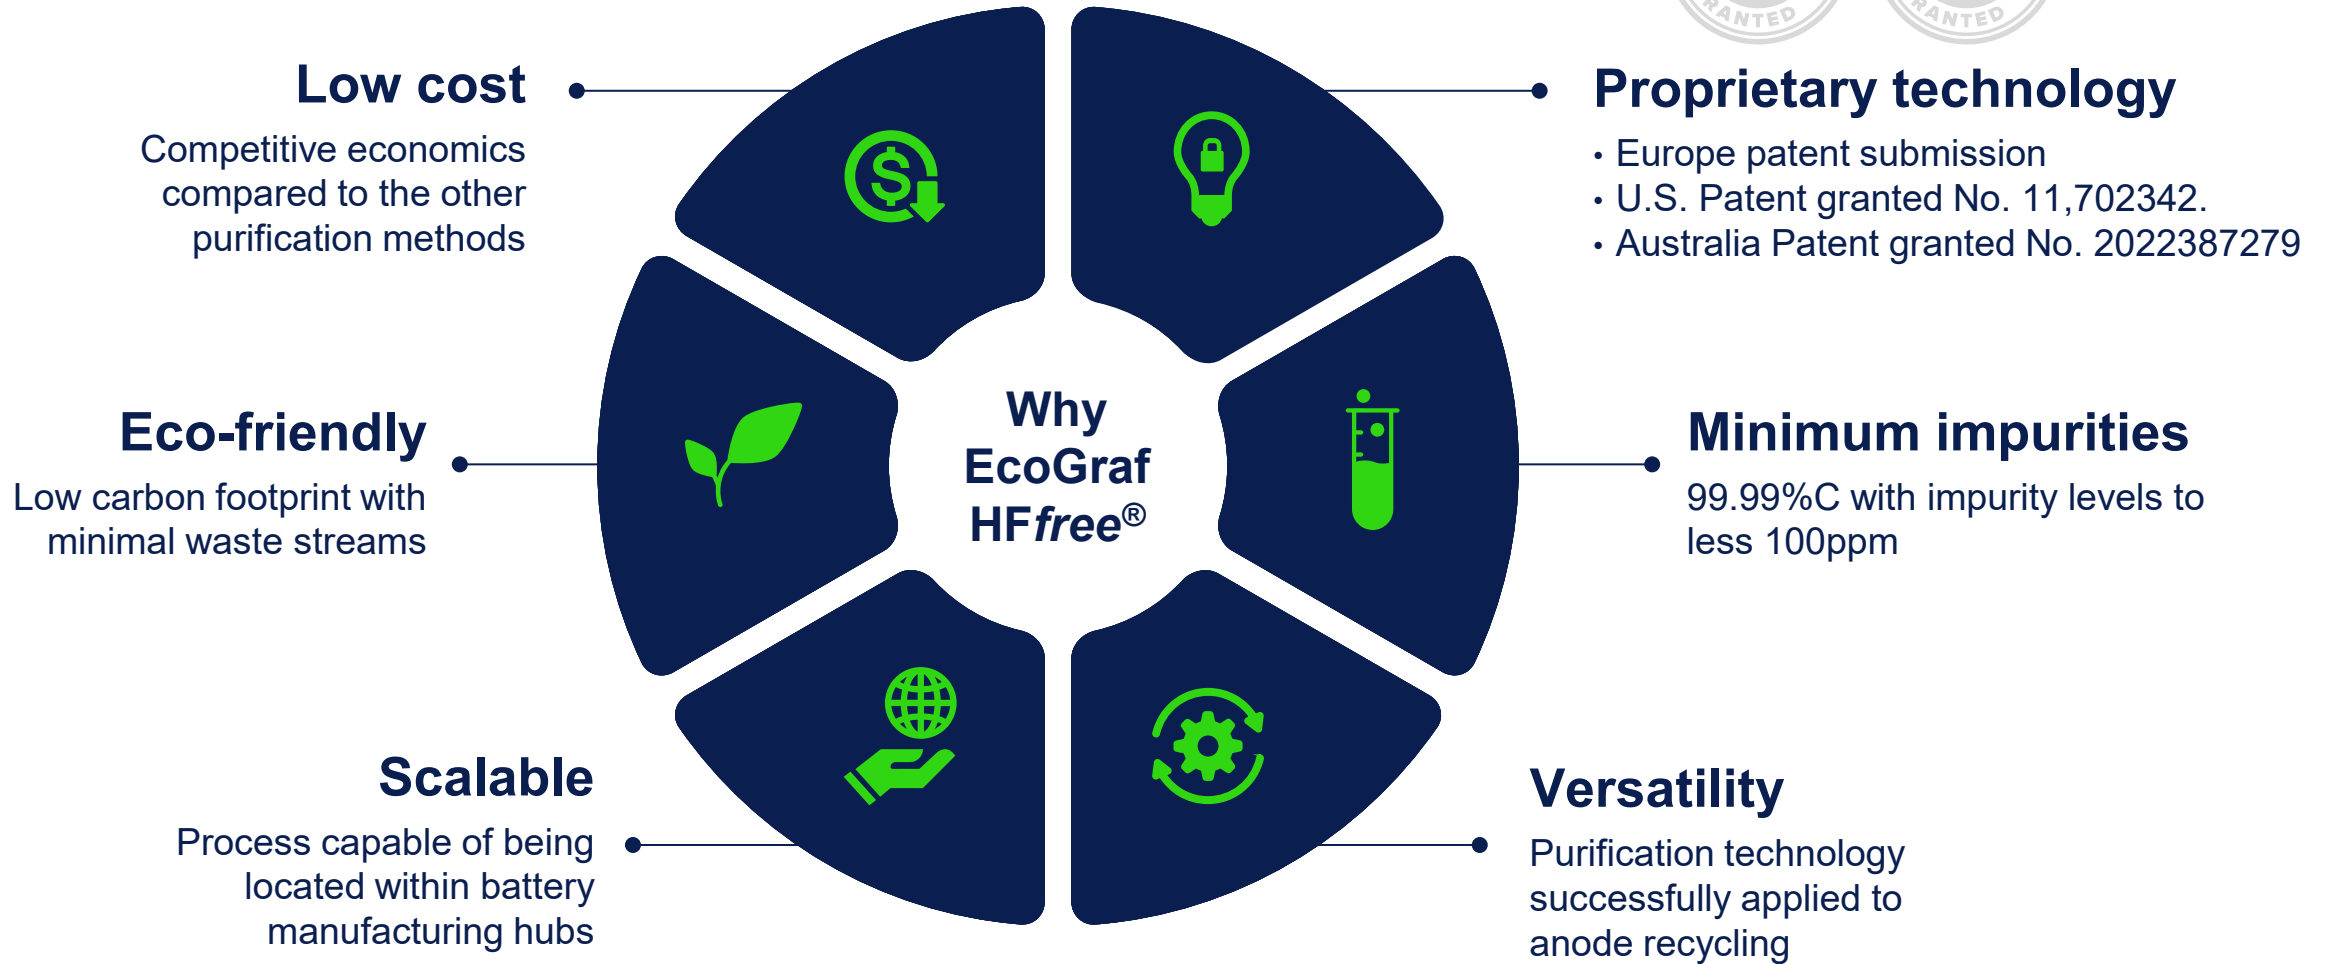

UPSTREAM
