

ASX ANNOUNCEMENT

17 October 2024

Anteris Receives \$1.4m R&D Tax Refund

Anteris Technologies Ltd (ASX: AVR) (**Anteris** or the **Company**) received \$1.4M under the Australian Government's Research and Development (R&D) Tax Incentive Scheme. The claim covers the year ended 31 December 2023.

The Australian Government's R&D Tax Incentive encourages companies to engage in R&D, by providing a refundable tax offset for eligible R&D activities, thereby assisting businesses to recover some of their costs related to R&D.

The Company will primarily use the refund in the ongoing R&D of its ADAPT®, DurAVR® THV and ComASUR® Delivery System technologies as it moves towards the FDA pivotal trial of the Company's DurAVR® THV for treating severe aortic stenosis.

About Anteris Technologies Ltd (ASX: AVR)

Anteris Technologies Ltd (ASX: AVR) is a structural heart company committed to designing, developing, and commercialising innovative medical devices. Founded in Australia, with a significant presence in Minneapolis, USA (a MedTech hub), Anteris is science-driven, with an experienced team of multidisciplinary professionals delivering transformative solutions to structural heart disease patients.

The Company's lead product, DurAVR®, is a transcatheter heart valve (THV) for treating aortic stenosis. DurAVR® THV was designed in partnership with the world's leading interventional cardiologists and cardiac surgeons. It is the first transcatheter aortic valve replacement (TAVR) to use a single piece of bioengineered tissue. This biomimetic valve is uniquely shaped to mimic the performance of a healthy human aortic valve.

DurAVR® THV is made using ADAPT® tissue, Anteris' patented anti-calcification tissue technology. ADAPT® tissue has been used clinically for over 10 years and distributed for use in over 55,000 patients worldwide.

The ComASUR® Delivery System was designed to provide controlled deployment and accurate placement of the DurAVR® THV with balloon-expandable delivery, allowing precise alignment with the heart's native commissures to achieve optimal valve positioning.

Anteris Technologies is set to revolutionise the structural heart market by delivering clinically superior solutions for significant unmet clinical needs.
