### 3. Chair's Letter

---

Dear Shareholder

As valued Shareholders, the Board is pleased to offer all Eligible Shareholders the opportunity to acquire one (1) New Share for every two (2) Shares held as at the Record Date at an issue price of \$0.002 per New Share, together with two (2) unquoted Attaching Options for every three (3) New Shares issued for nil additional consideration (**Entitlement Offer**). The Attaching Options have an exercise price of \$0.005 and are exercisable at any time prior to 5:00pm (Sydney time) on 30 November 2027.

If fully subscribed, the Entitlement Offer will raise approximately \$2.12 million (before expenses). However, it is highly unlikely that the Company will raise that amount and the Company is, instead, targeting to raise \$1 million.

Eligible Shareholders are also entitled to subscribe for any New Shares and Attaching Options not subscribed for by other Eligible Shareholders under the Entitlement Offer (**Shareholder Shortfall Offer**).

The issue price for the Entitlement Offer represents a discount of approximately 6.5% to the volume weighted average market price of Shares on the 15 ASX trading days on which those Shares traded up to and including 16 August 2024.

The funds raised pursuant to the Entitlement Offer (after expenses) are planned to be used to fund:

- exploration work on the Company's key projects, including:
  - the Tanami North Project (which includes projects at Tregony and Hyperion), specifically to determine the next steps towards future development of the recently updated mineral resources in this project area;
  - the Twin Bonanza Project, specifically a review of the completed studies for the project to determine the next steps for development of the deposit and a detailed review of the Old Pirate mineral resource which forms part of the Company's mineral resource inventory; and
  - advance several brownfield targets in close proximity to the Tregony and Hyperion deposits, such as the Brokenwood, Boco and Mark's Rise prospects;
- ongoing test work on the Hyperion deposit to better understand the metallurgical properties of the mineralisation;
- project development, project divestment, field capital equipment, project acquisition costs and tenement maintenance costs; and
- general working capital expenses.

As the Entitlement Offer is non-renounceable, your Entitlements will not be tradeable on the ASX or otherwise transferable. Eligible Shareholders who do not take up their Entitlements in full will not receive any value for those Entitlements that they do not take up.

Applicants for New Shares and Attaching Options pursuant to this Prospectus should be aware that there are various risks associated with an investment in New Shares and Attaching Options and the Company, including those risks summarised in section 8 of this Prospectus. Accordingly, any potential investors should consult with their professional advisers before deciding whether to apply for any New Shares and Attaching Options pursuant to this Prospectus.

The Board thanks all Shareholders for their continuing support for the Company and recommends the Entitlement Offer.

Yours sincerely

## 4. Investment Overview

---

### 4.1 Entitlement Offer

The Entitlement Offer is being undertaken as a non-renounceable entitlement offer of one (1) New Share for every two (2) Shares held by Eligible Shareholders registered as at the Record Date at an issue price of \$0.002 per New Share. Applicants will also be issued two (2) unquoted Attaching Options for every three (3) New Shares issued for nil additional consideration (**Entitlement Offer**). The Attaching Options have an exercise price of \$0.005 and are exercisable at any time prior to 5:00pm (Sydney time) on 30 November 2027.

The issue price of the New Shares represents a discount of approximately 6.5% to the volume weighted average price of the Company shares during the 15 trading day period up to, and including, 16 August 2024.

Eligible Shareholders who wish to accept the Entitlement Offer can do so in accordance with the instructions contained in section 5.1 of this Prospectus.

Eligible Shareholders will receive a personalised Application Form setting out their Entitlement.

Fractional Entitlements to New Shares under the Entitlement Offer will be rounded up to the nearest whole number. Fractional Entitlements to Attaching Options under the Entitlement Offer will be rounded down to the nearest whole number.

The Entitlement Offer is non-renounceable. Accordingly, Entitlements do not trade on the ASX nor can they be sold, transferred or otherwise disposed of.

The purpose of the Entitlement Offer is to provide the Company with funds to fund:

- exploration work on the Company's key projects, including:
  - the Tanami North Project (which includes projects at Tregony and Hyperion), specifically to determine the next steps towards future development of the recently updated mineral resources in this project area;
  - the Twin Bonanza Project, specifically a review of the completed studies for the project to determine the next steps for development of the deposit and a detailed review of the Old Pirate mineral resource which forms part of the Company's mineral resource inventory; and
  - advance several brownfield targets in close proximity to the Tregony and Hyperion deposits, such as the Brokenwood, Boco and Mark's Rise prospects;
- ongoing test work on the Hyperion deposit to better understand the metallurgical properties of the mineralisation;
- project development, project divestment, field capital equipment, project acquisition costs and tenement maintenance costs; and
- general working capital expenses.

All New Shares issued pursuant to this Prospectus will rank equally with the existing Shares on issue as at the date of allotment. The rights and liabilities attaching to the New Shares are

contained in section 6 of this Prospectus. Further details regarding the rights and liabilities attaching to the Attaching Options are contained in section 7 of this Prospectus.

There is no minimum subscription for the Entitlement Offer. Eligible Shareholders may subscribe for all or part of their Entitlement.

#### **4.2 Shareholder Shortfall Offer**

In addition to the Entitlement Offer, Eligible Shareholders may apply to receive any New Shares not subscribed for by other Eligible Shareholder under the Entitlement Offer by participating in the Shareholder Shortfall Offer.

The issue price of New Shares offered under the Shareholder Shortfall Offer is the same as the Entitlement Offer, being \$0.002 per New Share. Successful Applicants will also receive two (2) unquoted Attaching Options for every three (3) New Shares issued for nil additional consideration. The Attaching Options have an exercise price of \$0.005 and are exercisable at any time prior to 5:00pm (Sydney time) on 30 November 2027.

Eligible Shareholders who wish to apply for New Shares under the Shareholder Shortfall Offer can do so in accordance with the instructions contained in section 5.2 of this Prospectus.

Fractional Entitlements to New Shares under the Shareholder Shortfall Offer will be rounded up to the nearest whole number. Fractional Entitlements to Attaching Options under the Shareholder Shortfall Offer will be rounded down to the nearest whole number.

New Shares will only be offered in accordance with the Shareholder Shortfall Offer if the Entitlement Offer is undersubscribed and will only be issued to the extent necessary to make up any shortfall in subscriptions received in accordance with the Entitlement Offer.

It is possible that, depending on the extent to which Eligible Shareholders participate in the Entitlement Offer or Shareholder Shortfall Offer, one or more Eligible Shareholders could increase their Shareholding significantly by participating in the Entitlement Offer or Shareholder Shortfall Offer.

The control effect of the Entitlement Offer and Shareholder Shortfall Offer is set out in section 4.6 to 4.10 of this Prospectus.

#### **4.3 Public Shortfall Offer**

The Directors may offer and place the shortfall of any New Shares not subscribed for pursuant to the Entitlement Offer and Shareholder Shortfall Offer at their discretion, together with two (2) unquoted Attaching Options for every three (3) New Shares placed for nil additional consideration, at any time within three (3) months of the Closing Date, which New Shares will, in no circumstances, be issued at an issue price of less than \$0.002 (**Public Shortfall Offer**). The Attaching Options have an exercise price of \$0.005 and are exercisable at any time prior to 5:00pm (Sydney time) on 30 November 2027.

Any investors who are not currently Eligible Shareholders wishing to participate in the Public Shortfall Offer must submit an Application Form that accompanies this Prospectus and follow the instructions given to them by the Company and/or a lead manager. The Directors retain their discretion to refuse to accept applications under any Public Shortfall Offer (in whole or in part).

Fractional Entitlements to Attaching Options under the Public Shortfall Offer will be rounded down to the nearest whole number.

The Public Shortfall Offer, which is a separate offer to the Entitlement Offer and Shareholder Shortfall Offer, is made under this Prospectus and will remain open for up to three (3) months from the Closing Date. The New Shares and Attaching Options issued in accordance with the Public Shortfall Offer will rank equally with the New Shares and Attaching Options issued pursuant to the Entitlement Offer and Shareholder Shortfall Offer.

The Directors reserve the right to pay a commission of up to 6% (exclusive of GST) of any amounts subscribed under the Public Shortfall Offer through any licensed securities dealers or Australian financial services licensee in respect of any Applications lodged and accepted by the Company.

#### **4.4 Purpose of the Entitlement Offer**

The purpose of the Entitlement Offer is to raise up to approximately \$2.12 million (before expenses). As noted elsewhere, it is not expected that the Company will raise this full amount and, instead, the Company is targeting to raise \$1 million.

As noted in section 3 of this Prospectus, the funds raised pursuant to this Entitlement Offer are planned to be used to fund:

- exploration work on the Company's key projects, including:
  - the Tanami North Project (which includes projects at Tregony and Hyperion), specifically to determine the next steps towards future development of the recently updated mineral resources in this project area;
  - the Twin Bonanza Project, a review of the completed studies for the project to determine the next steps for development of the deposit and a detailed review of the Old Pirate mineral resource which forms part of the Company's mineral resource inventory; and
  - advance several brownfield targets in close proximity to the Tregony and Hyperion deposits, such as the Brokenwood, Boco and Mark's Rise prospects;
- ongoing test work on the Hyperion deposit to better understand the metallurgical properties of the mineralisation;
- project development, project divestment, field capital equipment, project acquisition costs and tenement maintenance costs; and
- general working capital expenses.

Please refer to section 4.11 of this Prospectus for further details relating to the estimated expenses of the Entitlement Offer.

#### **4.5 Key Risks**

There are various risk factors associated with an investment in the New Shares, Attaching Options and the Company. Some, but not all, of these risks are summarised in section 8 of this Prospectus. These risks, and others not specifically referred to in section 8, have the potential

to materially affect the financial performance and prospects of the Company and the value of the New Shares and Attaching Options offered under this Prospectus.

Accordingly, potential investors should consider that an investment in the Company is speculative and should consult with their professional advisers before deciding whether to apply for any New Shares and Attaching Options pursuant to this Prospectus.

**(a) Key sensitivities of the Company's Projects**

The future success of the Company is primarily dependent on the success of the exploration activities conducted on the Projects. The Projects are subject to various key sensitivities, including mineral extraction and processing, commodity prices and processing costs.

See section 8.2(a) for more information.

**(b) Funding Risk**

Exploration and development involve significant financial risk and capital development. The Company may require further capital to achieve its objective of transitioning from explorer to producer. In addition, if the Company acquires any new project, it may need to raise further capital to fund the acquisition or exploration at the project once acquired.

For the foreseeable future, it is expected that this funding will be obtained from equity financing. Any equity financing undertaken will dilute existing Shareholders. There is no guarantee that the Company will be able to secure any additional funding or will be able to secure funding on terms that are favourable or acceptable to the Company.

See section 8.2(b) for more information.

**(c) Grant and renewal of permits**

The Company's exploration activities are dependent upon the granting and maintenance (including renewal) of the Tenements or other tenements in which the Company acquires an interest.

Maintenance of the Tenements is dependent on, among other things, the Company's ability to meet the licence conditions imposed by relevant authorities including minimum annual expenditure requirements which, in turn, is dependent on the Company being sufficiently funded to meet those expenditure requirements.

See section 8.2(d) for more information.

**(d) Operation and exploration risk**

The business of mineral exploration, development and production, by its nature, involves significant risks. The Tenements are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings.

See section 8.2(e) for more information.

#### 4.6 Principal effect of the Entitlement Offer

The principal effect of the Entitlement Offer, assuming that the Entitlement Offer is fully subscribed and that no Options are exercised prior to the Record Date, will be to:

- (a) increase the Company's cash position by up to \$2.12 million (before expenses) immediately after Completion of the Entitlement Offer; and
- (b) increase the number of Shares on issue from 2,117,774,483 at the date of this Prospectus to up to 3,176,661,725 Shares (with no Attaching Options exercised).

#### 4.7 Effect on capital structure

The effect of the Entitlement Offer on the Company's capital structure, assuming that all Entitlements are accepted and that no Options are exercised prior to the Record Date, is set out below:

##### Shares

Description	Number
Shares on issue before the Entitlement Offer:	2,117,774,483
New Shares offered pursuant to the Entitlement Offer:	1,058,887,242
<b>Total Shares on issue as at Completion:</b>	<b>3,176,661,725</b>

##### Options

Description	Number
Options on issue before the Entitlement Offer:	260,539,443
Attaching Options offered pursuant to the Entitlement Offer:	705,924,828
<b>Total Options on issue as at Completion:</b>	<b>966,464,271</b>

If all Attaching Options offered pursuant to this Prospectus are exercised, the Company will also receive a further \$3,529,624 on the exercise of those Attaching Options.

#### 4.8 Dilution of Eligible Shareholders that do not accept their Entitlement

As the Entitlement Offer is an offer of one (1) New Share for every two (2) Shares held by Eligible Shareholders, the maximum dilution that will be experienced by any Eligible Shareholder that fails to subscribe for any Entitlement is approximately 15% of its existing shareholding.

Eligible Shareholders should note that if they do not accept their Entitlements in full, their shareholding in the Company are likely to be diluted as follows:

Example Shareholder	Total Shares held as at the date of this Prospectus	% as at the date of this Prospectus	Entitlement	Shares held if Entitlement not taken up	% following allotment of New Shares
Shareholder 1	1,000,000	0.0472%	500,000	1,000,000	0.0315%
Shareholder 2	2,500,000	0.1180%	1,250,000	2,500,000	0.0787%
Shareholder 3	5,000,000	0.2361%	2,500,000	5,000,000	0.1574%
Shareholder 4	10,000,000	0.4722%	5,000,000	10,000,000	0.3148%

#### 4.9 Effect on relevant interest of substantial security holders

As at 31 July 2024, the following persons were believed to have a relevant interest of 5% or more of the Company's Shares:

Substantial Holder	Shares	% <sup>1</sup>
BNP Paribas Noms Pty Ltd, APAC Resources Limited (and its Related Bodies Corporate) and Allied Properties Investments (1) Company Limited ( <b>APAC Group</b> )	938,348,574	44.31%
Jetosea Pty Ltd ACN 003 784 441	136,357,208	6.44%
J P Morgan Nominees Australia Pty Ltd	119,630,832	5.65%

As at the date of this Prospectus, the Company has not received any commitment from APAC Group, confirming that it intends to subscribe for its full or any partial Entitlement under the Entitlement Offer and participate in the Shareholder Shortfall Offer.

If the Entitlement Offer is fully subscribed and each of the above Shareholders subscribe for their full Entitlement, there will be no change to their relevant interests in the Company's Shares.

If the Entitlement Offer is not fully subscribed, the above parties' may increase their relevant interest in the Company's Shares. The extent to which each of the above may increase their respective relevant interest in the Company's Shares is dependent upon the level that other Shareholders subscribe for their full Entitlements, as well as the extent of applications received under the Shareholder Shortfall Offer.

<sup>1</sup> Based on 2,117,774,483 total Shares on issue.

#### 4.10 Effect of Entitlement Offer on Voting Power in the Company

As the Entitlement Offer does not satisfy the requirements of exception 10 of section 611 of the Corporations Act, no person, including APAC Group, shall be entitled to acquire New Shares or Attaching Options pursuant to the Entitlement Offer if to do so would result in their, or another person's, Voting Power increasing from 20% or below to more than 20%, or from a starting point above 20% to below 90%, unless a separate exception to the restrictions contained in section 606 of the Corporations Act applies.

The only such exception that may apply is exception 9 of section 611 of the Corporations Act (i.e. the "3% creep" exception).

Accordingly, given the current Voting Power of each of the three largest Shareholders, the Entitlement Offer is not expected to have any potential effect on the control of the Company.

#### 4.11 Expenses of the offers

The total expenses of the Entitlement Offer and Shareholder Shortfall Offer are estimated to be approximately \$54,000 (excluding GST) if fully subscribed and \$49,200 if subscribed to the Company's excepted subscription level. , These expenses are expected to be applied towards the items set out in the table below:

Expense	Fully subscribed Amount (\$)	Expected \$1 Million Amount (\$)

#### 4.15 Overseas shareholders

The offer of New Shares and Attaching Options pursuant to this Prospectus does not, and is not intended to, constitute an offer or invitation in any place or jurisdiction in which, or to any person to whom, it would be unlawful to make such an offer or to issue this Prospectus.

It is not reasonable for the Company to comply with the securities laws of all overseas jurisdictions in which Shareholders are resident having regard to the number of overseas Shareholders and the number and value of Shares these Shareholders would be offered and the cost of complying with the regulatory requirements in each relevant jurisdiction.

The Entitlement Offer and Shareholder Shortfall Offer is not being extended to Shareholders that are recorded in the Company's share register as having an address that is outside Australia or New Zealand.

Where the Public Shortfall Offer is extended to non Eligible Shareholders, it will only be extended to persons who are Australian and New Zealand residents and other persons to whom the Board is satisfied, in its sole discretion, that it would not be unlawful to offer New Shares or Attaching Options to, with or without any such conditions as the Board sees fit (in its sole discretion), based on the local laws of the country in which an applicant may reside.

This Prospectus is prepared under Australian law and is not a product disclosure statement prepared under New Zealand law. New Zealand law normally requires people who offer financial products to give information to investors before they invest. This requires those

offering financial products to have disclosed information that is important for investors to make an informed decision.

### **New Zealand – Warning Statement for New Zealand Investors**

This Entitlement Offer, Shareholder Shortfall Offer and Public Shortfall Offer to New Zealand investors is a regulated offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act and regulations made under that Act. In New Zealand, this is subpart 6 of Part 9 of the *Financial Markets Conduct Act 2013* and Part 9 of the *Financial Markets Conduct Regulations 2014*.

This Entitlement Offer, Shareholder Shortfall Offer and Public Shortfall Offer and the content of this Prospectus are principally governed by Australian rather than New Zealand law. In the main, the Corporations Act and the regulations made under that Act set out how the offer must be made.

There are differences in how financial products are regulated under Australian law. For example, the disclosure of fees for managed investment schemes is different under the Australian regime.

The rights, remedies and compensation arrangements available to New Zealand investors in Australian financial products may differ from the rights, remedies, and compensation arrangements for New Zealand financial products.

Both the Australian and New Zealand financial markets regulators have enforcement responsibilities in relation to this offer. If you need to make a complaint about this offer, please contact the Financial Markets Authority, New Zealand (<http://www.fma.govt.nz>). The Australian and New Zealand regulators will work together to settle your complaint.

The taxation treatment of Australian financial products is not the same as for New Zealand financial products. This is detailed further below.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser.

The Entitlement Offer, Shareholder Shortfall Offer and Public Shortfall Offer may involve a currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant.

Any amounts paid on the financial products will be in Australian dollars and not New Zealand dollars. You may incur significant fees in having any such Australian dollar funds credited to a bank account in New Zealand in New Zealand dollars.

If the financial products are able to be traded on a financial product market and you wish to trade the financial products through that market, you will have to make arrangements for a participant in that market to sell the financial products on your behalf. The financial products are not currently traded on any financial product market in New Zealand. The way in which any financial product trading market operates, the regulation of participants in that market, and the information available to you about the financial products and trading may differ from the financial product trading markets that operate in New Zealand.

Eligible Shareholders that are resident in Australia or New Zealand that hold Shares on behalf

of persons who are resident in jurisdictions other than Australia and New Zealand are responsible for ensuring that taking up any Entitlement pursuant to the Entitlement Offer does not breach regulations in the relevant overseas jurisdiction. The return of a duly completed Application will be taken by the Company to constitute a representation that there has been no breach of those regulations.

**New Zealand Taxation**

It is recommended that Applicants resident in New Zealand discuss with their accountant or financial advisor the New Zealand taxation implications for investing in any New Shares or Attaching Options. Taxation outcomes for Applicants in New Zealand will depend on their personal tax circumstances. For example, some Applicants resident in New Zealand may have income tax liability on the amount by which the exercise price of the Attaching Options is less than the prevailing share price at the time of exercise. Please obtain advice to ascertain your own taxation position before making a decision to exercise.

If you do not wish to accept any part of your Entitlement, you are not obliged to do anything.

Eligible Shareholders who do not take up their Entitlement in full will not receive any payment or value for any part of their Entitlement that they do not take up and their shareholding in the Company will be diluted.

The Directors retain the discretion to refuse applications for New Shares (in whole or in part) where the effect of issuing New Shares to the Applicant will result in the Applicant's, or another person's, Voting Power in the Company increasing from 20% or below to more than 20%, or from a starting point above 20% to below 90%.

## **5.2 Application under the Shareholder Shortfall Offer**

There is no guarantee that you will receive all, or any, of the amount of the New Shares applied for pursuant to the Shareholder Shortfall Offer.

Application monies received by the Company in excess of the amount in respect of your Entitlement will be treated as an application to apply for as many New Shares as that excess amount will pay for, in full, at the issue price of \$0.002 per New Share (up to the maximum number of New Shares available as per the discretion in section 5.3 below).

For payment methods, please refer to section 5.5.

## **5.3 Allocation of New Shares under the Shareholder Shortfall Offer**

- (a) the number of New Shares applied for by the Applicant under the Shareholder Shortfall Offer; and
- (a) if the number of New Shares available for subscription is less than the aggregate number of New Shares applied for by all unsatisfied Applicants, the number of New Shares applied for, scaled on a pro rata basis according to all unsatisfied Applicants' respective shareholdings in the Company as at the Closing Date for the Entitlement Offer.

If, following the allocation process referred to in paragraphs (a) and (b) immediately above, there are any remaining New Shares, that allocation process will be repeated continuously until all applications for New Shares have been satisfied in full or there are no further New Shares.

The Directors may to, to the extent they can do so, place the shortfall of any New Shares not subscribed for pursuant to the Entitlement Offer or Shareholder Shortfall Offer, within three (3) months following the Closing Date, and to carry out additional capital raising activities if necessary.

## **5.4 Application and allocation of Public Shortfall Offer**

Following completion of the process set out in section 5.3, the Directors may offer and place the shortfall of any New Shares not subscribed for pursuant to the Entitlement Offer or Shareholder Shortfall Offer, at their discretion, together with two (2) Attaching Options for every three (3) New Shares placed (for nil additional consideration), at any time within three (3) months of the Closing Date, which New Shares will, in no circumstances, be issued at an issue price of less than \$0.002.

Applicants may apply for New Shares and Attaching Options pursuant to the Public Shortfall Offer by completing an Application Form and following the instructions contained in the Application Form and otherwise given to them by the Company.

Where the number of New Shares and Attaching Options issued is less than the number applied for, or where no issue is made, surplus application money will be refunded, without any interest, to the Applicant as soon as practicable.

The Directors retain absolute discretion as to who may receive New Shares and Attaching Options pursuant to the Public Shortfall Offer and/ or to proceed with the Public Shortfall Offer at all. Accordingly, there is no guarantee that an Applicant under the Public Shortfall Offer will receive all or any New Shares or Attaching Options applied for pursuant to an Application lodged in accordance with the Public Shortfall Offer.

Applicants under the Public Shortfall Offer may only pay the relevant application money by electronic funds transfer and cannot do so via BPAY.

## 5.5 Payment Methods

Eligible Shareholders may make payment of your application monies in the following ways:

No interest will be paid on any application monies received or refunded.

By making payment by BPAY® or EFT:

The full details of the rights attaching to Shares are set out in the Constitution, a copy of which is available on the Company's website [www.prodigygold.com.au](http://www.prodigygold.com.au) and may also be inspected at the Company's registered office. A summary of the rights and liabilities attaching to the Shares is set out below. This summary is not exhaustive, nor does it constitute a definitive statement of a Shareholder's rights and obligations.

### **6.1 Voting rights**

At a general meeting:

- (a) on a show of hands, each Shareholder present in person and each other person present as a proxy, attorney or representative of a Shareholder has one vote; and
- (b) on a poll:

### **6.2 Dividends**

### **6.3 Transfer of Shares**

A Share is transferable:

- (a) by any method of transferring or dealing in Shares introduced by the ASX or operated in accordance with the ASX Settlement Operating Rules; or
- (b) by any other method of transfer which is approved by the Directors.

Generally, the Directors will not refuse to register a transfer unless the ASX Listing Rules require the Company to do so, or the transfer would result in a breach of the ASX Listing Rules or a restriction agreement.

### **6.4 Future increases in capital**

The issue of Shares or Attaching Options is under the control of the Directors who may:

- (a) issue, allot and cancel or otherwise dispose of shares in the Company;

- (a) Distribution of assets

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company and may for that purpose set such value as the liquidator considers fair on any property to be so divided and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

- (b) Powers of liquidator to vest property

The liquidator may, with the authority of a special resolution, vest the whole or any part of any property in trustees on such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

## **6.6 Shareholder liability**

As the Shares issued will be fully paid shares, Shareholders will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

## 7. Rights and liabilities of Attaching Options

---

Attaching Options issued in accordance with this Prospectus will be issued on the following terms and conditions.

### 7.1 Exercise Period and Expiry Date

The Attaching Options are exercisable at any time on a Business Day prior to 5:00pm (Sydney time) on 30 November 2027 (**Expiry Date**). Attaching Options not exercised by that date will lapse.

### 7.2 Exercise Price

Each Option entitles the holder with the right to be issued one Share on payment of the sum of \$0.005 per Option (**Exercise Price**) to the Company.

### 7.3 Notice of Exercise

Option holders will receive an exercise notice at the same time that they receive a holding statement in respect of the Attaching Options (**Exercise Notice**).

Option holders may not exercise less than 100,000 Attaching Options at any one time, unless the Option holder has less than 100,000 Attaching Options, in which case they may do so provided they exercise all Attaching Options then held.

Attaching Options may be exercised at any time prior to 5:00pm (Sydney time) on the Expiry Date by delivering a duly executed Exercise Notice to the Company, together with payment for the aggregate Exercise Price for the Attaching Options being exercised.

Attaching Options will be deemed to have been exercised on the date that the Company has received the aggregate Exercise Price (in cleared funds) in respect of the Attaching Options exercised in accordance with the Exercise Notice.

### 7.4 Shares Issued on Exercise of Attaching Options

Shares to be issued pursuant to the exercise of Attaching Options will be issued following receipt of all the relevant documents and payments (in cleared funds) and will rank equally with the then issued Shares.

Shares issued pursuant to the exercise of Attaching Options will have the same rights and liabilities as the Company's existing Shares on issue as at the date of the exercise of the Attaching Options. The full details of the rights attaching to Shares are set out in the Company's Constitution. A summary of the rights and liabilities attaching to the Shares as at the date of this Prospectus is set out in section 6 of this Prospectus.

If the holder of any Attaching Options exercises less than the total number of Attaching Options registered in their name, the Company will provide the holder of any Attaching Options with a new holding statement stating the remaining number of Attaching Options registered in that holder's name, together with a new exercise notice.

## **7.5 Transfer**

The holder of any Attaching Options may transfer some or all of their Attaching Options in any manner authorised by the ASX or the Corporations Act.

The Attaching Options will not be Quoted.

## **7.6 Participation or Entitlements**

There are no participating rights or entitlements inherent in the Attaching Options and holders will not be entitled to participate in new issues of securities offered to Shareholders during the term of the Attaching Options, except in their capacity as existing Shareholders.

However, the Company will ensure that, for the purpose of determining entitlements to any such issue, the record date will be at least 6 Business Days after the issue is announced so as to give Attaching Options holders the opportunity to exercise their Attaching Options before the date for determining entitlements to participate in any issue.

## **7.7 Bonus Issues**

If, prior to the expiry of the Attaching Options, the Company makes a bonus issue of Shares to Shareholders for no consideration, the number of Shares over which an Option is exercisable will be increased by the number of Shares which the holder would have received if the Option had been exercised before the relevant record date for the bonus issue.

## **7.8 Pro-Rata Issue**

If, from time to time, before the expiry of the Attaching Options, the Company makes a pro-rata issue of Shares to shareholders, the exercise price of the Attaching Options may be amended in accordance with ASX Listing Rule 6.22.2.

## **7.9 Capital reorganisation**

If there is a reorganisation of the issued capital of the Company (including any consolidation, subdivision, reduction, or return of capital), the rights of the Option holders shall be changed to the extent necessary to comply with the ASX Listing Rules at the time of the reorganisation.

## **8. Risks**

---

### **8.1 Introduction**

The New Shares and Attaching Options offered in accordance with this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend that potential investors consider the risk factors described below, together with information contained elsewhere in this Prospectus and otherwise disclosed to the ASX, and consult their professional advisers before deciding whether to apply for New Shares or Attaching Options pursuant to this Prospectus.

In addition to the specific risks that relate directly to the Company, there are also other general risks, many of which are largely beyond the control of the Company and the Directors, that investors should consider. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of any New Shares and/or Attaching Options issued pursuant to this Prospectus.

### **8.2 Business specific and industry risks**

#### **(a) Key sensitivities of the Company's Projects**

The future success of the Company is primarily dependent on the success of the mineral exploration activities and development study outcomes as well as approvals and permits to enable the Company's existing or future projects to advance.

The Projects, together with any other project that the Company may in the future acquire, are subject to the following key sensitivities:

- (1) the identification and exploration of a mineral deposit with sufficient potential to be economically and commercially viable;
- (2) the delineation of sufficient gold reserves so as to result in the viable extraction and processing of gold from the Projects;
- (3) metal commodity prices and, in particular the gold price;
- (4) the permits and approvals to enable the exploration for and extraction of minerals from regulators, local authorities and stakeholders;
- (5) mining, processing and other related expenses (such as royalty payments) for the extraction of gold ores being less than the revenue receivable; and
- (6) the capital cost to construct any required processing plant and associated facilities being such that financing for the project is capable of being received.

Whilst the Company believes and is optimistic that it is possible, there is also no guarantee that the Company will be able to obtain all the necessary approvals, permits, licences or consents required to develop the projects or any other project that it may, in the future, acquire.

#### **(b) Current funding risk**

The Entitlement Offer is not underwritten and there are restrictions in the Corporations

Act that limit the extent that the Company's existing substantial Shareholders can participate in the Entitlement Offer and the Shareholder Shortfall Offer. No commitments of substantial holders have been received.

Therefore, it is highly unlikely that the Entitlement Offer will be fully subscribed. The Directors anticipate a subscription of approximately \$1 million, which may or may not be achieved.

Accordingly, it is anticipated that the proceeds of the Entitlement Offer will reach approximately \$1 million rather than the full subscription level. The Company will need to consider alternative methods to raise additional capital, such as undertaking further placements of Shares and undertaking the Public Shortfall Offer.

However, there is no certainty that the Company will be able to raise additional capital, or that it will be able to do so on favourable terms.

If the Company is able to raise additional capital, it may be required to do so at a significant discount to the issue price of the New Shares in accordance with the Entitlement Offer. If this occurs, this may significantly dilute existing Shareholders.

If the Company cannot raise additional capital through the issue of additional Shares, it may be forced to dispose of some or all of its interest in one of more of its assets. If the Company is required to dispose of assets in those circumstances to a third party, it is likely that such disposal will not be on favourable terms, including price.

If the Company is not able to raise additional funding in a timely manner through either the issue of additional Shares or the disposal of assets, it could have a significant detrimental effect on the financial position and viability of the Company.

**(c) Future funding requirements**

The Company's capital requirements depend on numerous factors, including the success of its planned exploration programs, the future exploration programs for its Projects, the Company's ability to generate income from its operations and possible acquisitions or other corporate opportunities. The Company may require further capital to achieve its objective of transitioning from explorer to producer. If the Company acquires any new project it may need to raise further capital to fund the acquisition or the project once acquired.

For the foreseeable future, it is expected that this funding will be obtained from equity financing. Any equity financing undertaken will dilute existing Shareholders.

There is no guarantee that the Company will be able to secure any additional funding or will be able to secure funding on terms that are favourable or acceptable to the Company.

This may require that the Company reduce the scope of its operations or, if necessary, surrender or dispose of some of its interest in one of more of its Projects to a third party.

There is a risk that the Company will not be able to meet the work commitments or satisfy the required licence fees, which may result in one or more of its Tenements being forfeited.

Similarly, while debt financing is unlikely to be available to the Company for the foreseeable future, any debt financing, if available, may involve restrictions on financing and operating activities.

If the Company is not able to raise additional future funding in a timely manner through either the issue of additional Shares or the disposal of assets, it could have a significant detrimental effect on the financial position and viability of the Company.

**(d) Grant and renewal of permits**

The Company's mineral exploration activities are dependent upon the granting and maintenance (including renewal) of the Tenements or other tenements in which the Company acquires an interest.

Maintenance of the Tenements is dependent on, among other things, the Company's ability to meet the licence conditions imposed by relevant authorities including minimum annual expenditure requirements which, in turn, is dependent on the Company being sufficiently funded to meet those expenditure requirements.

The extent of work performed on each Tenement may vary depending upon the results of the exploration programme which will determine the prospectivity of the relevant area of interest. There is a risk that if the Company fails to satisfy these minimum expenditure requirements at the time of expiry of the granted Tenements, the Company may be required to relinquish part or all its interests in these granted Tenements. As at the date of this Prospectus, the Company is not in breach of its minimum expenditure commitments.

**(e) Operational and exploration risk**

The business of mineral exploration, development and production, by its nature, involves significant risks. The Tenements are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings. There can be no assurance that exploration of the Tenements, or any other tenements that may be acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

The business depends on, amongst other things, successful exploration and identification of mineral reserves, geological conditions, security of tenure, the availability of adequate funding, satisfactory performance of mining operations, limitations on activities due to inclement weather or seasonal weather patterns, availability and cost of consumables and plant and equipment (including drilling rigs and other necessary machinery to undertake exploration, development and production) and skilled labour when required, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the Company.

### 8.3 Industry Specific Risks

There are a number of industry specific risks associated with the Company which have a reasonable likelihood of occurring, are difficult to mitigate, and if they do eventuate, would have a significant effect on the Company's financial position, prospects or the price of its Shares and are, therefore, key risks. These risks include:

(a) **Commodity price fluctuations**

It is anticipated that any future revenues derived from mining will primarily be derived from the sale of minerals, and in particular, gold. Consequently, any future earnings are likely to be closely related to the price of precious metals such as gold.

The prices of minerals are influenced by numerous variable factors beyond the control of the Company, including laws and regulations, economic conditions and trading demand and supply. Fluctuations in mineral prices may, positively or negatively, influence the operating and financial performance of projects and businesses in which the Company has an interest or proposes to have an interest.

Even if this is not the case, general sentiment towards one or more minerals may have a significant adverse affect on the price of Shares.

(b) **Land access**

The Company will be required to negotiate access arrangements and pay compensation to land owners, local authorities, traditional land users and others who may have an interest in the area covered by the Tenements. The Company's ability to resolve access and compensation issues will have an impact on the future success and financial performance of the Company's operations.

The effect of present laws in respect of native title that apply in Australia is that mining tenements (including applications for mining tenements) may be affected by native title claims or procedures, which may prevent or delay the granting of tenements, or affect the ability of the Company to explore and develop the Tenements.

In addition, where the relevant part of the Tenements is not accessible without crossing land which is not owned by the Company, the Company may be required to obtain the consent of owners and occupiers of land within the Tenements to carry out its planned activities on such land or otherwise pass through such land. Compensation may be required to be paid to the owners and occupiers of land in order for exploration and development activities to be carried out.

Negotiations with land owners, local authorities, traditional land users and others may therefore be required before the Company can access land for exploration or mining activities. Inability to access, or delays experienced in accessing, the land may impact on the Company's activities. Special conditions may also attach to exploration (if permitted) in special locations within the Tenements, including those of environmental or heritage significance. There may be delays experienced in negotiating these conditions, and there is a risk that the parties cannot reach agreement and the matter could result in the Company not being able to conduct the exploration or production activities on terms acceptable to the Company (or at all).

Agreements with traditional land owners include that any exploration programs are approved and the underlying land the subject to exploration is cleared by traditional owners via the Central Land Council to protect any sacred and sensitive sites. The timing of such clearances is outside the Company's control and subject to Central Land Council and traditional owner availability.

Access is critical for exploration and development to succeed and the ability to be able to negotiate satisfactory commercial arrangements with land owners, local authorities, traditional land users and occupiers is often essential.

(c) **Exploration costs**

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

(d) **Potential acquisitions, divestments and investments**

The Company may pursue and assess other new business opportunities in the resource sector in order to realise benefits including complementary revenue streams and future platforms for growth and may seek to divest certain assets no longer considered essential to the Company's operations.

Divestments under current agreements or negotiation may not be able to be completed and the identification, evaluation and negotiation of divestments and other opportunities may require significant time and effort from key management and employees, and may result in disruptions to the business.

These new business opportunities may take the form of direct project acquisitions, investments, joint ventures, farm-ins, acquisition of tenements and permits, and/or direct equity participation. Such transactions (whether completed or not) may require the payment of monies (as a deposit and/or exclusivity fee) after only limited due diligence or prior to the completion of comprehensive due diligence. There can be no guarantee that any proposed acquisition will be completed or be successful. If the proposed acquisition is not completed, monies advanced may not be recoverable, which may have a material adverse effect on the Company.

If an acquisition is undertaken, the Directors will need to reassess at that time, the funding allocated to current projects and new projects, which may result in the Company reallocating funds from other projects and/or raising additional capital (if available). There is also a risk that the Company is unsuccessful in integrating new businesses or assets into its existing operations in a timely manner, or that the new businesses or assets do not result in the benefits anticipated. The Company cannot guarantee that every acquisition or partnership that it makes or enters into will result in favourable outcomes for the business. In addition, the process of integrating new businesses or assets may require significantly more financial and management resources, or time to complete, than originally planned.

(e) **Mineral Resource estimates**

Mineral resource estimates are expressions of judgement and are estimates based on knowledge, experience and industry practice. While these estimates may be appropriate when made, they may change significantly when new information or techniques become available.

Estimates are a necessary practice and may change significantly or cease to be accurate when new information or techniques become available through additional fieldwork and analysis. Mineral Resource estimates are, by their nature, imprecise and, to an extent, depend on interpretation, which may result in inaccuracies. Should the Company encounter mineralisation or formations different from those predicted by past drilling, sampling and similar examinations, resource estimates may have to be adjusted and mining plans may have to be altered in a way which could adversely affect the Company's operations. New information, practices or techniques may result in the Company revising any initial estimates of its Mineral Resources or Ore Reserves, which may could adversely affect the Company's operations.

(f) **Native Title risk**

Access to land for exploration purposes can be adversely affected by land ownership, including private (freehold) land, pastoral lease and native title land or claims under the *Native Title Act 1993* (Cth) (**NTA**) (or similar legislation in the jurisdiction where the Company operates). The effect of the NTA is that existing and new Tenements held by the Company may be affected by native title claims and procedures.

There is a risk that a determination could be made that native title exists in relation to land the subject of a tenement held or to be held by the Company which may affect the operation of the Company's business and development activities. In the event that it is determined that native title does exist or a native title claim has been registered, the Company may need to comply with procedures under the NTA in order to carry out its operations or to be granted any additional rights required. Such procedures may take considerable time, involve the negotiation of significant agreements, may involve access rights, and require the payment of compensation to those persons holding or claiming native title in the land the subject of a Tenement. The involvement in the administration and determination of native title issues may have a material adverse impact on the position of the Company in terms of cash flows, financial performance, business development, and the Share price.

(g) **Joint venture parties, agents and contractors**

There is a risk of financial failure or default by a participant in any joint venture to which the Company is, or may in the future become, a party, or the insolvency or managerial failure by any service provider used by the Company for any activity.

Any failure by any of the Company's existing or future joint venture partners could result in the Company being required to expend significant time and monetary resources, for which it may not have made provision, requiring it to raise additional funds and direct its energies and/ or reallocate budgeted expenditure.

(h) **Environmental**

The operations and proposed activities of the Company are subject to laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds.

Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences and hamper access to Tenements and delay exploration activities. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by current, future or previous operations or non-compliance with environmental laws or regulations.

It is the Company's intention to conduct its activities to the highest standard of its environmental obligations, including by complying with all environmental laws and regulations.

(i) **Metallurgy**

Metal and/or mineral recoveries are dependent upon metallurgical processes and, by their nature, contain elements of significant risk such as:

- (1) identifying a metallurgical process through test work to produce a saleable metal and/or concentrate;
- (2) developing an economic process route to produce a metal and/or concentrate; and
- (3) changes in the mineralogy of the ore deposit can result in inconsistent metal recovery, affecting the economic viability of the Projects.

(j) **Competition risk**

The industry in which the Company will be involved is subject to domestic and global competition. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's Projects and business.

In particular, the Company's ability to undertake exploration and mining activities is dependent upon its ability to source and acquire appropriate mining equipment and personnel. Equipment and personnel are not always readily available and the market for mining equipment and personnel experiences fluctuations in supply and demand. Increases in worldwide mining activities may create cost pressures for services and skilled personnel in the resources industry, which may affect the ability to purchase or hire equipment, supplies, and services and to recruit skilled personnel in relation to the Projects. In addition, the availability of drilling rigs and other equipment and services is

affected by the level and location of drilling activity around the world. An increase in drilling activity in Australia may reduce the availability of equipment and services to the Company. In addition, an increased demand for mineral commodities may significantly increase the demand for many mining and processing inputs, which has resulted in shortages, as well as longer lead times for delivery and increases in pricing, of mining equipment and metallurgical plant, strategic spares and critical consumables. The reduced availability of equipment, services and skilled personnel may delay the planned exploration, development, and production activities at the projects. A shortage of skilled labour in the Australian mining industry could result in the Company having insufficient employees or contractors to operate its business, which could adversely affect the Company's business, results of operations and financial condition.

#### **8.4 General Investment Risks**

##### **(a) Regulatory risks and Government Policy changes**

The Company's exploration and development activities are subject to extensive laws and regulations relating to numerous matters including resource licence consents, conditions including environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters. Changes in government policies or legislation may affect ownership of mineral interests, taxation, royalties, land access, labour relations, and mining and exploration activities of the Company.

The Company requires permits from regulatory authorities to authorise the Company's operations. These permits relate to exploration, development, production, and rehabilitation activities. Obtaining necessary permits can be a time consuming process and there is a risk that the Company may not obtain these permits on acceptable terms, in a timely manner, or at all. Any costs or delays associated with obtaining necessary permits and complying with these permits and applicable laws and regulations could materially delay or restrict the Company from proceeding with the development of a Project or the operation or development of a mine. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Company's activities or forfeiture of one or more of the Company's Tenements.

##### **(b) Economic and market conditions**

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's ability to fund its operations. Share market conditions may affect the value of the Company's Equity Securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (1) general economic outlook;
- (2) commodity prices;
- (3) interest rates and inflation rates;
- (4) changes in investor sentiment toward particular market sectors and commodity types;

- (5) the demand for, and supply of, capital; and
- (6) terrorism or other hostilities.

The market price of Equity Securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for securities in general. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(c) **Foreign exchange rate risk**

The Company's revenue and expenditure will be taken into account in Australian dollars (**AUD**). The Company's operating and exploration expenses are largely incurred in AUD. Gold is sold throughout the world based principally on a USD price. Therefore, the Company is exposed to fluctuations and volatility in the USD and AUD exchange rates. Movements in these exchange rates may adversely or beneficially affect the Company's results or operations and cash flows.

(d) **Taxation**

The acquisition and disposal of Equity Securities will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Equity Securities from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Equity Securities in accordance with this Prospectus.

(e) **Liquidity risk**

An application will be made to ASX for Quotation of the New Shares offered pursuant to this Prospectus within 7 days of the date of this Prospectus. The Company will also apply for Quotation of any Shares issued on the exercise of the Attaching Options if quoted by the ASX at that time.

However, no assurance can be given of the price at which New Shares will trade or that they will trade at all. Potential Applicants should, therefore, be prepared to hold their New Shares for extended periods pending the development of the Projects and potential opportunities emerging in the future. The market price of Equity Securities can fall, as well as rise, and may be subject to varied and unpredictable influences on the market for equities and, in particular, resources entities. Neither the Company nor the Directors provide any warranty as to the future performance of the Company or any return on an investment in the Company.

This may affect the liquidity of trading in the Company's Shares, which may result in a lower volume of Shares being traded than would otherwise have been the case, potentially making it difficult to realise any return on your investment.

The Attaching Options will not be Quoted and Applicants should be aware that there is unlikely to be a viable market for the Attaching Options and a sale or transfer of the Attaching Options may be difficult.

(f) **Reliance on key personnel**

The Directors are primarily responsible for overseeing the operations and the strategic management of the Company. The day-to-day operations of the Company are the responsibility of the Managing Director. There can be no assurance that there will be no detrimental impact on the Company if one or more of the Directors, particularly the Managing Director, no longer act as Directors of the Company.

(g) **Information technology/privacy**

The Company relies heavily on its own computer systems and those of third party service providers to store and manage private and confidential information. A malicious attack on the Company's systems, processes or people from external or internal sources could put the integrity and privacy of the Company's data at risk. If the Company's efforts to combat any malicious attack are unsuccessful or the Company has actual or perceived vulnerabilities, the Company's business reputation and brand name may be harmed, potentially having a material adverse effect on the Company's operations and financial position.

(h) **Insurance**

The Company insures its operations in accordance with industry practice. However, in certain circumstances the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

Insurance of all risks associated with mineral exploration and production is not always available and where available the costs can be prohibitive.

(i) **Climate change**

There are a number of climate-related factors that may affect the operations and proposed activities of the Company.

Climate change may be said to cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. These risks said to be associated with climate change may have a direct impact on Company's ability to perform its mining operations, and may significantly change the industry in which the Company operates.

In addition, changing investor sentiment towards climate change, including a view that all mining should be avoided due to its contribution to greenhouse gas emissions (despite the reliance on the various metals by the renewables sector) and, thus, cause investors to cease investing in mining and exploration entities, may have a significant adverse effect on the Company's ability to secure additional funding and other ancillary products and services (including, for example, appropriate insurance at affordable prices).

## **8.5 Speculative investment**

The above risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the New Shares and Attaching Options offered under this Prospectus.

Therefore, the New Shares and Attaching Options to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Shares or Attaching Options.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for any New Shares and Attaching Options pursuant to this Prospectus.

The remuneration of an executive Director is decided by the Board, without the affected executive Director participating in that decision-making process. The total maximum remuneration of non-executive Directors is initially set by the Constitution and subsequent variation with the Constitution, the Corporations Act and the ASX Listing Rules, as applicable. The total aggregate amount of remuneration for non-executive directors approved by Shareholders as at the date of this Prospectus is \$400,000 per annum. The determination of non-executive Directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each non-executive Director.

A Director may be paid fees or other amounts (i.e. non-cash performance incentives such as options, subject to any necessary Shareholder approval) as the other Directors determine where a Director performs special duties or otherwise performs services outside the scope of the ordinary duties of a Director. In addition, Directors are also entitled to be paid reasonable travelling, hotel and other expenses incurred by them respectively in or about the performance of their duties as Directors.

Details of the remuneration paid and payable to each Director of the Company are set out in the Company's annual report for the financial year ending 30 June 2024. A copy of this report can be accessed on the Company's website [www.prodigygold.com.au](http://www.prodigygold.com.au) or on ASX webpage for the Company (ASX: PRX).

The following table details the total compensation each Director received for the financial years ending 30 June 2023 and 30 June 2024 (including allowances and share based payments):

### 9.3 Continuous disclosure obligations

The Company is a “disclosing entity” (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all ASX listed companies, the Company is required to immediately disclose to the market any information that a reasonable person would expect to have a material effect on the price or the value of the Company’s securities.

The Company ensures compliance with these obligations through the establishment of a formal ‘Continuous Disclosure Policy’, which establishes formal protocols for the notification and disclosure of information by the Company’s Directors, employees, consultants and contractors that may potentially be material. This Prospectus is a “transaction specific prospectus”. In general terms a “transaction specific prospectus” is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

As such, this Prospectus should be read in conjunction with the publicly available information in relation to the Company which has been notified to the ASX and does not include all of the information that would be included in a prospectus prepared in accordance with the Corporations Act for the initial public offering of securities in an entity that is not already listed on a securities exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision as to whether or not to invest.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act, advises that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of ASIC; and
- (c) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date:
  - (1) the annual financial report most recently lodged by the Company with ASIC;
  - (2) any half-year financial report lodged by the Company with ASIC after the lodgement of the annual financial report referred to in (1) and before the lodgement of this Prospectus with ASIC; and
  - (3) any documents lodged by the Company with ASX under the continuous disclosure reporting requirements from 15 August 2023 to the day prior to the date of this Prospectus.

Copies of all documents lodged with ASIC in relation to the Company can be inspected at the registered office of the Company during normal office hours.

No documents have been lodged by the Company with the ASX since the date of the lodgement of the Company's latest annual financial report and before the date of the lodgement of this Prospectus with ASIC.

ASX maintains files containing publicly available information for all listed companies. The Company's file is available for inspection at ASX during normal office hours.

The Company's announcements are also available through the Company's website located at [www.prodigygold.com.au](http://www.prodigygold.com.au).

New Shares and Options issued pursuant to the Public Shortfall Offer will be allotted on a progressive basis within three months of the Closing Date.

Where the number of New Shares and Attaching Options issued is less than the number applied for, or where no allotment is made, any surplus application money received by the Company will be refunded (only where the amount is \$1.00 or greater) to the Applicant in full as soon as practicable after the Closing Date of the Entitlement Offer. No interest will be paid on any application money refunded to Applicants.

Pending the allotment and issue of New Shares and Attaching Options or payment of refunds pursuant to this Prospectus, all application money will be held by the Company on trust for the Applicants in a separate bank account as required by the Corporations Act. The Company will, however, be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

## **9.7 ASX listing**

An application has been made for Quotation of the New Shares offered pursuant to this Prospectus. If the ASX does not grant Quotation of the New Shares offered pursuant to this Prospectus, before the expiration of three months after the date of this Prospectus (or such period as varied by ASIC), the Company will not issue any New Shares or Attaching Options and will repay all application money for the Shares and Attaching Options within the time prescribed under the Corporations Act, without interest.

The Company has not applied, and will not apply, to the ASX for Quotation of the Attaching Options offered pursuant to this Prospectus.

Accordingly, the Attaching Options will not be Quoted and will be unlisted.

The fact that the ASX may grant Quotation of the New Shares offered pursuant to this Prospectus is not to be taken in any way as an indication of the merits of the Company or the New Shares or Attaching Options offered for subscription.

## **9.8 Clearing House Electronic Sub Register System (CHES) and Issuer Sponsorship**

The Company will not be issuing share certificates. The Company is a participant in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company. Because the sub registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Electronic registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with a statement (similar to a bank account statement) that sets out the number of Shares allotted to them in accordance with this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures pursuant to CHES and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.
