About Emefcy Group Limited (EMC)

The Company offers a commercially-proven wastewater treatment solution potentially disrupting large existing markets and addressing the growing global need for clean water. Its initial technology, SABRE – The Spiral Aerobic Biofilm Reactor is a modular decentralised wastewater treatment solution using 90% less energy than conventional technology. Future generation SABRE2 and SUBRE are higher capacity solutions being developed for broader markets. The Company's future technology under development, EBR - The Electrogenic Bioreactor is being designed to harvest electricity from highly-loaded industrial wastewater that is typically very costly to treat. The energy's value has the potential to completely offset other treatment operating costs.

Any forward-looking statements in this announcement are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, its directors and management.
