

12 August 2020

## Infigen announces July 2020 monthly production

Infigen (ASX: IFN) today reported unaudited production for July 2020 as follows:

Wind Farm <sup>1</sup>	State	July			FYTD		
		2020 (GWh)	2019 (GWh)	Variance (%)	FY21 (GWh)	FY20 (GWh)	Variance (%)
Alinta	WA	24	22	8	24	22	8
Bodangora	NSW	25	30	(17)	25	30	(17)
Capital	NSW	23	41	(43)	23	41	(43)
Lake Bonney 1	SA	12	23	(48)	12	23	(48)
Lake Bonney 2	SA	23	45	(49)	23	45	(49)
Lake Bonney 3	SA	6	12	(53)	6	12	(53)
Woodlawn	NSW	9	18	(49)	9	18	(49)
Production Generated from Owned Renewable Energy Assets <sup>2</sup>		122	191	(36)	122	191	(36)

Production Sold from Owned Renewable Energy Assets <sup>3</sup>	118	186	(36)	118	186	(36)
Production purchased and sold from Contracted Assets <sup>4</sup>	11	10	n/m	11	10	n/m
Renewable Energy Generation Sold	129	196	(34)	129	196	(34)

In July 2020 Infigen's Renewable Energy Generation Sold was 34% lower than the prior corresponding period. While wind patterns vary seasonally, Infigen's renewable energy generation in July 2020 was the lowest since the commissioning of Woodlawn Wind Farm in 2012, and some 67 GWh lower than the prior corresponding period. The outlook commentary provided on 3 August in Infigen's Q4FY20 Activity Report was on the basis that this unusually weak start to the financial year will be recovered over the remainder of the period, and will converge towards an average (or "P50") outcome for the full year in FY21. Although future wind patterns may result in the recovery of some of this lost production in the ensuing months, there is no certainty that this recovery will in fact occur.

<sup>1</sup> Some totals may not add down the column or across the row (where applicable) due to rounding of individual components. Variance is reported as a percentage and is based on unrounded figures.

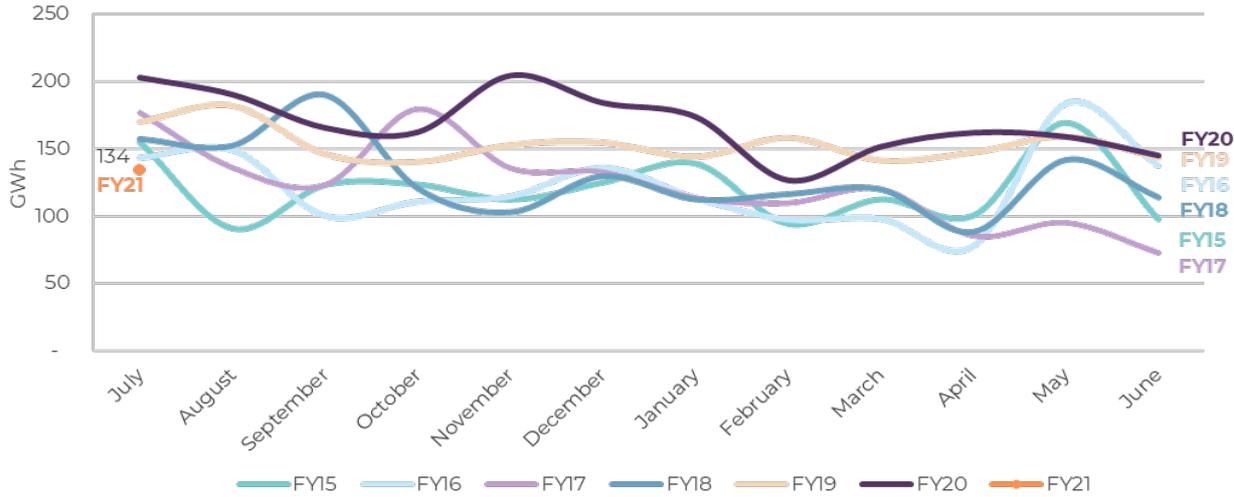

<sup>2</sup> Owned Renewable Energy Assets refers to Infigen's seven owned wind farms.

<sup>3</sup> Production Generated is subject to marginal loss factors (MLFs) that are fixed annually by the Australian Energy Market Operator to account for network losses. Production Sold reflects the impact of these MLFs.

<sup>4</sup> Contracted Assets refer to production acquired under run of plant PPAs where Infigen is the offtaker. Production from Contracted Assets commenced with Kiata Wind Farm in September 2018 and includes Toora Wind Farm from January 2020.

During July 2020, Production Sold from the Smithfield OCGT was 3GWh. Smithfield is a gas peaking facility where annual capacity utilisation is expected to be in the range of 2-8%, with significant variations in output expected from month to month.

**Monthly Renewable Energy Generation Produced in current and prior Financial Years<sup>5</sup>:**

Further details in relation to Production Generated are reported in Appendix 1. Further details in relation to Production Sold are reported in Appendix 2.

**Ends**

This announcement was authorised by: Managing Director and Chief Executive Officer, Ross Rolfe AO.

## About Infigen

Infigen is leading Australia to a clean future, today. Our strategy is to provide Australian businesses with firm supplies of reliable and competitively priced clean energy.

We generate renewable energy from our fleet of owned wind farms. We also source renewable energy from our portfolio of contracted assets. We manage intermittency risk with our fast start assets, enabling us to provide our customers with firm prices and firm volumes for renewable energy.
