

Castile Resources Limited

Buried Treasure in the Territory

**10,000m Drilling Program
Begins March 2021**

Compliance & General Disclaimer

COMPETENT PERSONS STATEMENTS

The information in this report that relates to Exploration Results and Mineral Resources and Exploration Data is based on, and fairly and accurately represents, information and supporting documentation compiled by Mr. Jake Russell B.Sc. (Hons) MAIG and Mr Mark Savage who each have sufficient experience which is relevant to the styles of mineralisation, the types of deposit under consideration and to the activities being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC 2012)". Mr Russell is a Member of the Australian Institute of Geoscientists and is a Director of Castile Resources Limited and is eligible to and may participate in any short-term and long-term incentive plans of the Company as disclosed in its annual reports and disclosure documents. Mr Savage is a Member of The Australasian Institute of Mining and Metallurgy and a full time employee of Castile. Mr Russell and Mr Savage each consent to the inclusion in this report of the matters based on this information in the form and context in which it appears.

GENERAL DISCLAIMER

This presentation has been prepared by Castile Resources Limited. It should not be considered as an offer or invitation or inducement to subscribe for the purchase of any securities in the Company. This presentation may contain forecasts and forward-looking statements. Such forecasts, projections and information are not a guarantee of future performance, involve unknown risks and uncertainties. Actual results and developments may differ materially from those expressed or implied. Castile has not audited or investigated the accuracy or completeness of the information, statements and opinions contained in this presentation. Accordingly, to the maximum extent permitted by applicable laws, Castile makes no representation and can give no assurance, guarantee or warranty, express or implied, as to, and take no responsibility and assume no liability for, the authenticity, validity, accuracy, suitability or completeness of, or any errors in or omission, from any information, statement or opinion contained in this presentation.

This overview of Castile does not purport to be all inclusive or to contain all information which its recipients may require in order to make an informed assessment of the Company's prospects. You should conduct your own investigation and perform your own analysis in order to satisfy yourself as to the accuracy and completeness of the information, statements and opinions contained in this presentation before making any investment decision.

The information in this presentation is general in nature and does not purport to be complete. This presentation is not a prospectus, disclosure document or other offering document under Australian law or under the laws of any other jurisdiction. This presentation is provided for information purposes and does not constitute an offer, invitation, inducement or recommendation to subscribe for or purchase securities in Castile Resources in any jurisdiction.

PREVIOUSLY REPORTED INFORMATION

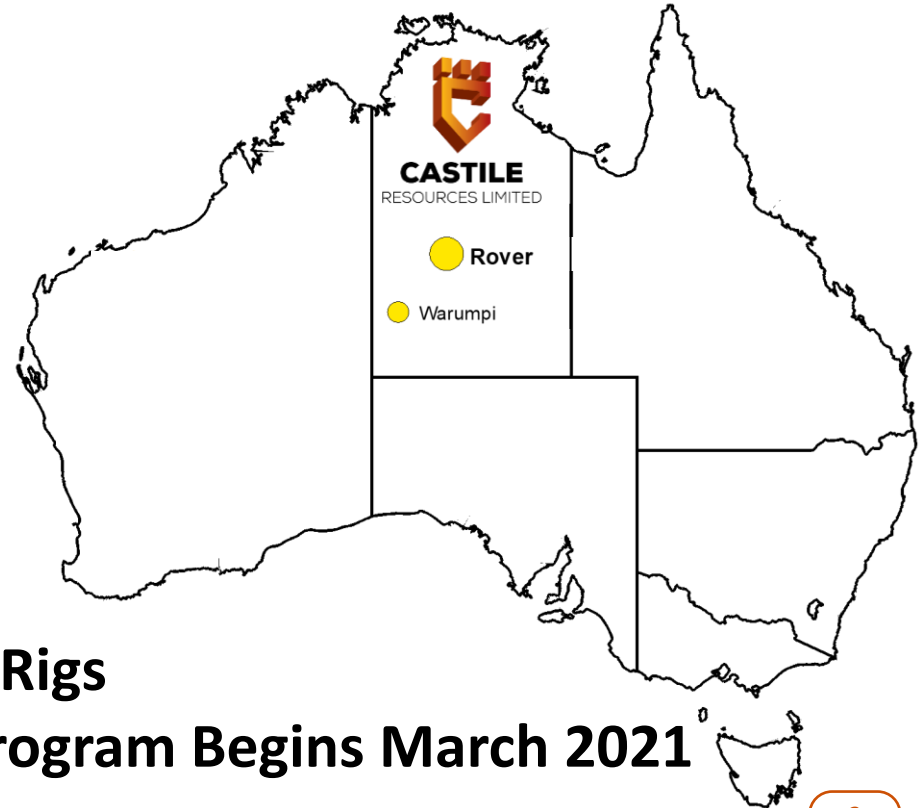

This presentation refers to information previously announced to the ASX, including mineral resource estimates and exploration results announced to the ASX on 12 February 2020 in its Prospectus dated 3 December 2019 and released on the ASX market announcements platform on 12 February 2020, and exploration results announced on 14 and 20 October 2020, 2 and 26 November 2020, 16 December 2020 and 14 January 2021. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements or this presentation, and that all material assumptions and technical parameters underpinning the mineral resource estimates continue to apply and have not materially changed.

This presentation is authorised for release by Mark Hepburn, Managing Director of Castile Resources Limited
Castile Resources Limited – Level 7, Ashton Chambers, 189 St Georges Terrace, Perth WA 6000.

Two Drill Rigs

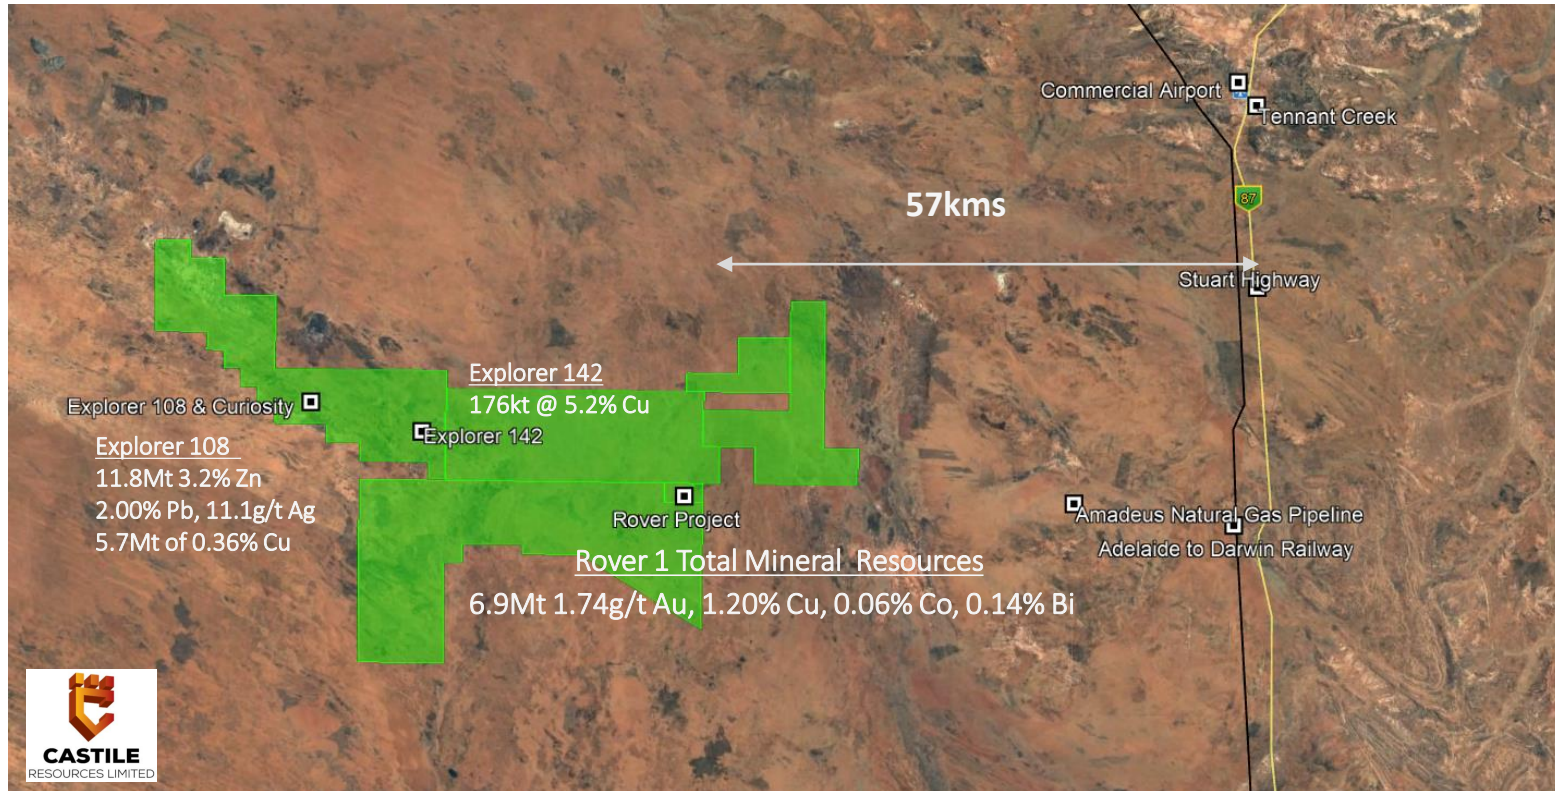

Fully Funded 10,000m Drilling Program Begins March 2021

The Rover Project

Surrounding Infrastructure and Resources

Gas, Rail, Road and Commercial Airport close to a major regional centre

Rover 1 – A Spectacular High Grade Gold Copper Deposit

Gold Intercepts

10m @ 47.97g/t Au

from 471m in R1ARD41-1

7m @ 125.93 g/t Au

from 542m in WGR1D034

20m @ 32.61 g/t Au

from 469m in WGR1D003

23m @ 13.22 g/t Au

from 833m in WGR1D059-2A1

22.75m @ 21.89 g/t Au

from 499m in WGR1D002-5

12m @ 58.40 g/t Au

from 555m in WGR1D002-5

Rover 1

Typical Tennant Creek high grade Iron Oxide Copper Gold (IOCG) deposit

Castile is currently completing a PFS on the Rover 1 Deposit

Over 85,000 metres of drilling and a Scoping Study has been completed by previous owners

By-products include cobalt, bismuth, silver and coal washing magnetite

Copper Intercepts

21m @ 6.86% Cu

from 469m in WGR1D011

27m @ 4.75% Cu

from 429m in WGR1D024-1

27m @ 3.26% Cu

from 935m in WGR1D055-1

30.2m @ 4.46% Cu

from 827m in WGR1D059-2A1

42m @ 4.10% Cu

from 360m in R1ARD30

29m @ 3.60% Cu

from 399m in WGR1D034-1

First Hole of 2020 Delivers Stunning Intercept from Rover 1

The first hole drilled by Castile 20CRD001 delivered the best Gold Copper intercepts ever received at Rover 1

30.4m @ 35.6 g/t Au with 1.46% Cu

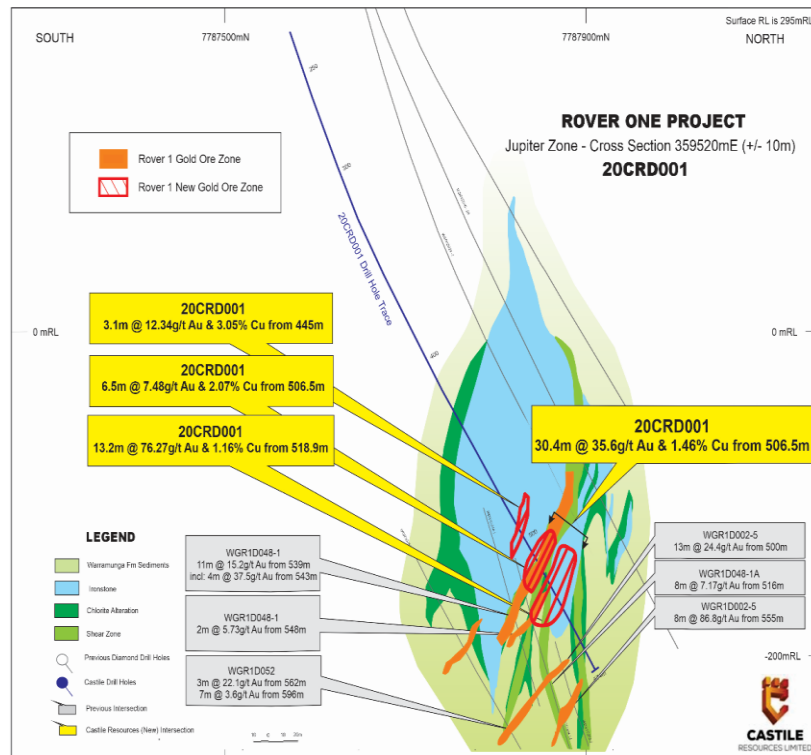

Conclusions of 2020 Program Rover 1

High grade “Bonanza” gold zones in Rover 1

Super-rich gold lenses typical of the great mines of the Tennant Creek goldfields

More intense drilling required to validate enriched zones continuity for the PFS due to the large value of gold and copper metal dependent on each intercept

Jupiter Zone Cross Section showing Hole 20CRD001
The red areas show the new, larger additional interpreted ore zones

Rover 1 – Further Resource Definition drilling for PFS

Proposed drill strings for 2021 Rover 1 program

Plan view of deposit and mining engineering model

2020 Drilling Presents New Theory At Rover1

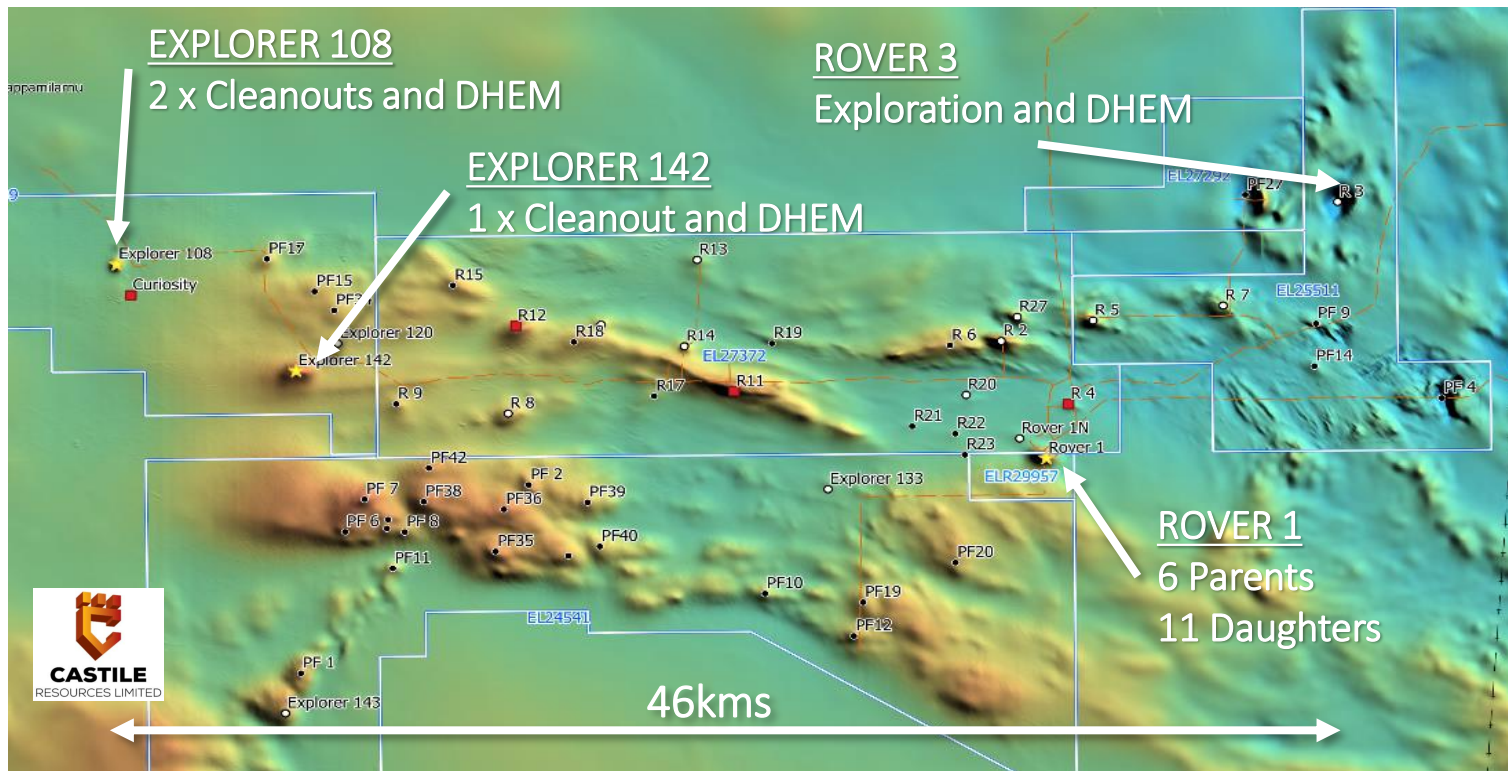

New Theory To Be Drill-Tested in 2021

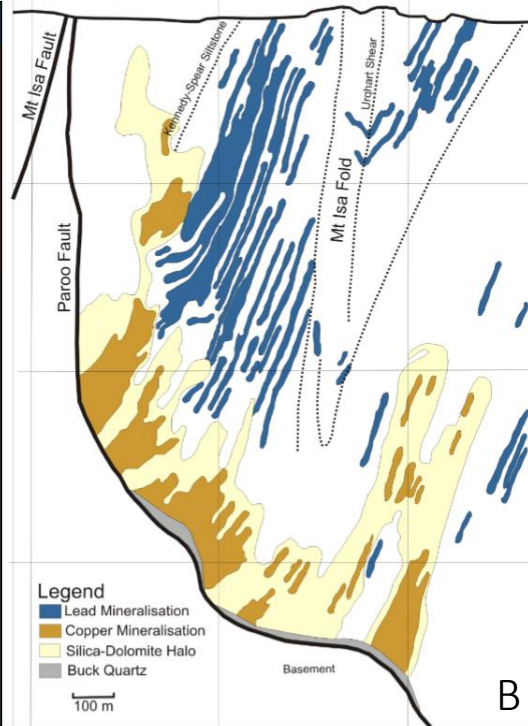

10,000m Exploration and Downhole Electromagnetics (DHEM)

2021 Regional Exploration

Explorer 108 – Mount Isa Model with Primary Copper Targets

Explorer 108

Resource 11.8Mt 3.2% Zn, 2.00% Pb, 11.1g/t Ag
5.7Mt of 0.36% Cu

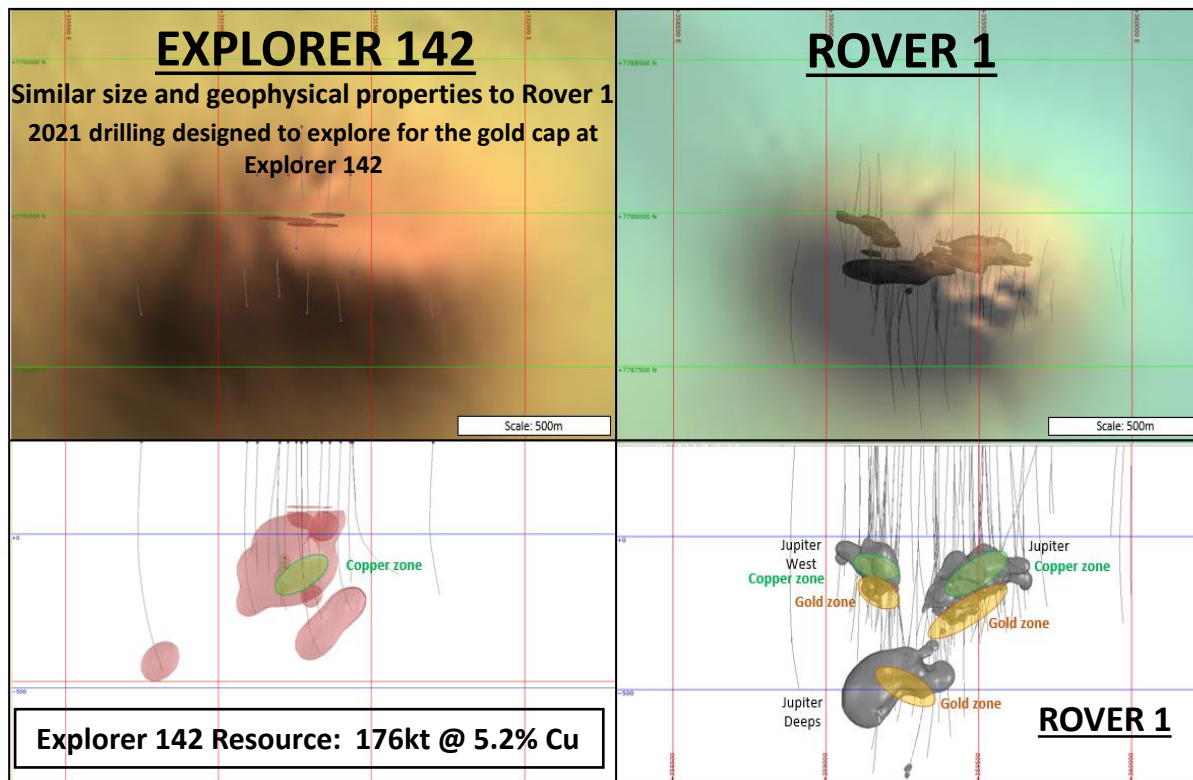

This program aims to identify the primary copper source that theoretically accompanies the lead zinc deposit. Two geophysical anomalies have been identified and will be further assessed in this program.

Explorer 108 shares several geological features with Mount Isa which is located 700kms to the East:

- Tectonic setting
- Temporal igneous intrusive events
- Host rocks
- Host rock preconditioning via silica-dolomite alteration
- Structural controls and
- Mineralisation style.

Comparison between Explorer 108 (A) and Mt Isa (B). Mt Isa simplified section from McLellan et al (2014).

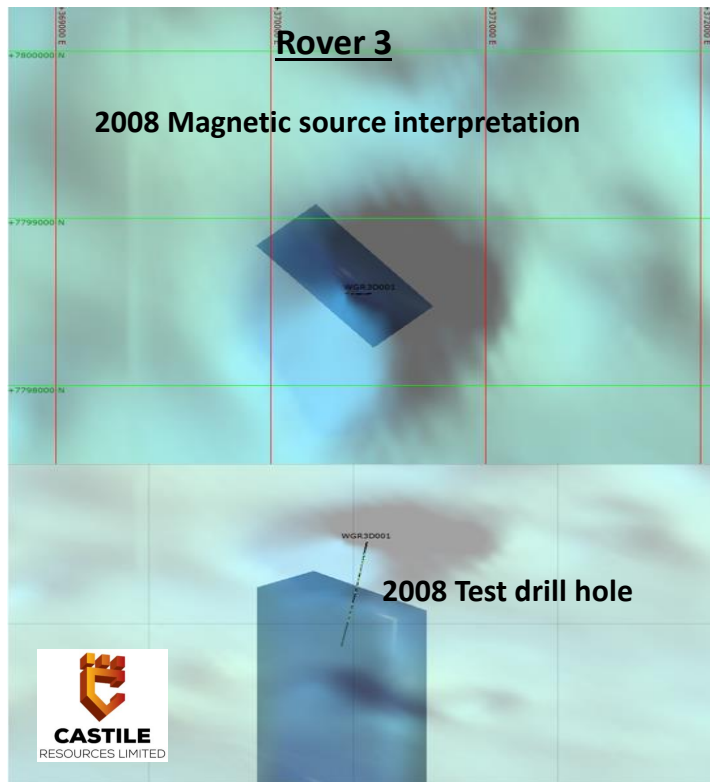

Explorer 142 - A high grade copper resource similar to Rover 1

Explorer 142: Regional Magnetic TMI over existing drilling and identified ironstones
The magnetic anomaly is of a similar size and intensity as Rover 1
Only a fraction of the ironstone has been identified to date.
Ironstone is open to west and down dip. Gold rich 'root zone' to be discovered.

Rover 1: Regional Magnetic TMI over existing drilling and identified ironstones
Scaled to provide a direct comparison with Explorer 142
Rich gold zone in the 'root zone' of ironstones

Rover 3 – Geophysics Re-interpretation Leads to Strong Target

Experienced Board & Management

Peter Cook Non-Executive Chairman

Mr Cook is a geologist BSc (App Geol 1983), mineral economist (MSc Min Econ 1995 WASM) and highly experienced veteran of the Australian resource sector. He is currently the Managing Director of Westgold and has more than a decade of association with the Company and its assets. Mr Cook has substantial experience in the exploration, development, mining, construction, permitting and financing of development projects within Australia as well as the corporate management of listed public entities.

Mark Hepburn Managing Director

Mr Hepburn has a degree in Economics and Finance (B.Econ. & Fin 1992 UWA) and has been a member of the Australian Institute of Company Directors since 2008. He has significant experience in institutional stockbroking, corporate transactions and the management and corporate development of public companies. He brings 28 years of substantial financial markets experience in the resources sector to Castile Resources. Mr Hepburn is also a Non-Executive Director of ASX listed lithium and gold explorer Mali Lithium after an acting role as CEO where he oversaw the company's refinancing and corporate re-structuring. He was also on the board of ASX listed Indonesian gold developer Sihayo Resources until November 2018.

John Braham Non-Executive Director

Mr Braham is an experienced Mining Finance and Investment professional having a 24-year career with Macquarie Bank until 2017. For the last 11 years of his service he was an Executive Director and co-head of Macquarie's Global Mining and Finance Division. Mr Braham has vast experience in the provision of debt and equity to mining, exploration and development companies, worldwide. Mr Braham brings Castile a set of finance and corporate skills to greatly assist with its future financing and development needs. Since November 2018, Mr Braham has served as Managing Director of the ASX listed and South American focused Equus Mining Limited.

Jake Russell Non-Executive Director

Mr Russell is a geologist B.Sc. (Hons) MAIG with circa 20 years of experience in exploration, mining, resource development and management. He is currently the group Chief Geologist of Westgold Resources Limited and prior to its demerger from Metals X Limited, he was the Group Chief Geologist of Metals X Limited. Mr Russell brings Castile a second to none knowledge of the assets of Castile and a high degree of technical expertise in their exploration, resource development and exploitation.

Michael Poepjes Mining Engineer

Mr Poepjes is a Mining Engineer (B Eng) a Mineral Economist (MSc [Min Econ]) and holds a Master's Degree in Business Administration (MBA). Mr Poepjes has over twenty years of experience in the mining industry working in gold, copper and tin across Australia in both Corporate and Operational roles. Mr Poepjes previous role was the Chief Operating Officer for Millennium Minerals. Prior to Millennium Minerals, he was the Group Mining Engineer for Metals X (which included the Westgold and Castile assets) for seven years.

Mark Savage Geology Manager

Mr Savage is a geologist B.Sc. (Hons) MAUSIMM with more than 20 years of experience in exploration, resource development and mining brings a wealth of experience to Castile having worked previously for Metals X, RNI and Apex Minerals on pre-development assets.

Castile Resources - The ASX's Newest Gold Copper Explorer & Developer

- 1. Extensive portfolio in the highly prolific Tennant Creek gold copper province region in the Northern Territory**
- 2. Strategic focus on exploration & development at Rover 1**
 - Highly successful 2020 Drilling program – Fully funded 10,000m of drilling planned for 2021
 - High-grade gold/copper polymetallic orebodies
 - Pre-Feasibility Study at Rover 1 ongoing
 - Huge copper resources adding to gold endowment across all prospects
 - Close to power and transport infrastructure
- 3. Explorer 108, Explorer 142 and Rover 3 ready made gold and copper targets**
- 4. Significant exploration upside at prospective targets with existing resources.**
- 5. Strong Board & Management**
