

Exploration planning continues at Yoquivo High-Grade Silver Project, Mexico

Highlights

- Exploration planning has commenced to advance the Yoquivo High Grade Silver Project located in northwest Chihuahua State, Mexico.
- Recruitment of key personnel to lead the in-country activities in Mexico is ongoing.
- Work has commenced on permitting and approvals required ahead of future exploration and drilling programs.
- Compilation and review of historical data is ongoing. This desktop study will verify existing information as well as identifying areas for exploration with significant upside potential.
- The data verification process is expected to culminate in a drilling campaign focused on twinning of historical holes. This program is currently planned to commence in Q1 CY 2025 subject to receipt of all required permits and approvals needed in order to drill.

Advance Metals Limited ('AVM' or 'Advance' or 'the Company') is pleased to provide an update on its ongoing work on its recently announced acquisition of the High-Grade Silver Yoquivo Project ('Yoquivo').

The Project is located in northwest Chihuahua State, Mexico and contains a Foreign Estimate of 937,000t at 570 g/t Ag Eq (2.1 g/t Au, 410 g/t Ag) for 17.23 Moz Ag Eq¹ (see ASX Announcement 28 October 2024).

Building our regional exploration team

Recruitment of key personnel to lead exploration activities in Mexico has commenced. The in country team will focus on exploration of the Yoquivo Project as well as with knowledge of Mexico and other mining friendly jurisdictions in the region, with language abilities in Spanish, the team will focus on also introducing new value accretive complementary projects in the region. AVM hopes to be able to provide an update in the near term in respect to regional exploration team appointments.

Permits

Permitting and approvals for exploration activities at the project have commenced.

AVM will keep the market informed with respect to its securing of permitting and approvals.

Technical activities

Technical activities have started with a focus on improving confidence in the existing data and identifying areas of upside potential.

There are three primary work streams ongoing: “Integration”, “Confirmation” and “Expansion”:

- Integration: the large volume of historical data collected at the Project by previous explorers is being compiled and reviewed to create a solid technical foundation for future activities.
- Confirmation: historical results will be independently verified with a drilling program designed to twin some of the historical drill holes. Planning for this program will commence as soon as the Integration work stream is completed.
- Expansion: while working on the integration and confirmation work streams, the technical team will focus on identifying areas with upside potential. Recommendation for additional exploration work including mapping, sampling, geophysics and drilling will be followed up with the goal of expanding the existing mineralization at the Project.

Non-Executive Chair, Craig Stranger, commented:

“The AVM team continues to work diligently yet aggressively towards a maiden first pass drilling program at the Yoquivo High-Grade Silver Project. After announcing the exciting acquisition of the Yoquivo High-Grade Silver Project less than two weeks ago, we are already progressing several work streams to add value to the asset. In Mexico and Australia our team is working efficiently to lay the foundation for our future exploration programs”.

This announcement has been authorised for release by the Board of Advance Metals Limited.
