As at the date of this Offer Document, the Company does not have any options on issue.

As at the date of this Offer Document, the Company has 268,310,508 Performance Rights on issue which remain subject to vesting conditions and as such, cannot be exercised prior to the Record Date in order to participate in the Offer.

All of the Shares offered under the Offer will rank equally with the Shares on issue at the date of this Offer Document. Please refer to Section 4.17 for further information regarding the rights and liabilities attaching to the Shares.

The Directors, may at any time decide to withdraw this Offer Document and the offer made under this Offer Document, in which case the Company will return all applications monies (without interest) within 28 days of giving notice of such withdrawal.

4.2 Reasons for the Entitlement Offer

The purpose of the Entitlement Offer is to fund the completion cash component of the acquisition of Matrix.

The Company will use the funds raised from the Entitlement Offer (after costs) for:

Notes:

1. At completion of the acquisition of Matrix, the Company will pay \$2,000,000 in addition to the scrip component for the acquisition. Refer to announcement dated 14 May 2025.

The Board believes that based on current cash reserves, expected net funds raised from the Entitlement Offer, the Company will have sufficient funding to maintain its business operations and investigate acquisition opportunities.

The above table is a statement of the Board's intentions as at the date of this Offer Document. The allocation of funds set out in the above table may change depending on a number of factors, including the outcome of operational and development activities, regulatory developments, market and general economic conditions and environmental factors. In light of this, the Board reserves the right to alter the way the funds are applied.

4.3 Capital structure

On the basis that the Company completes the Entitlement Offer, the Company's capital structure will be as follows:

4.4 Effect on the control of the Company

All of the Company's Shareholders are Eligible Shareholders.

Shareholders should note that if they do not participate in the Entitlement Offer and following settlement of the Institutional Offer, their holdings are likely to be diluted by approximately 26% (as compared to their holdings and number of Shares on issue as at the date of this Offer Document).

No New Shares will be issued to any Applicant if, in the view of the Directors, to do so would result in a breach of the Listing Rules, the Corporations Act or any other applicable law.

The Offers are not expected to give rise to control implications for the Company albeit that the effect of the Offers on the voting power in the Company, for the purposes of the Corporations Act, is dependent upon the number of New Shares and Shortfall Shares taken up.

4.5 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer. The Shortfall Offer is a separate offer made pursuant to this Offer Document and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.004 being the price at which Shares have been offered under the Offer.

If you do not wish to take up any part of your Entitlement you are not required to take any action. That part of your Entitlement not taken up will form part of the Shortfall Offer and potentially be allocated as part of the Shortfall Offer. The Shortfall Offer will only be available where there is a Shortfall between applications received from Eligible Shareholders and the number of Shares proposed to be issued under the Offer.

The Board presently intends to allocate Shortfall Shares to parties identified by the Directors, which may include parties who are not currently Shareholders.

No Shares will be issued to a party under the Shortfall Offer if the effect would be to increase that party's voting power in the Company to an amount greater than 19.99%.

The Company reserves the right to issue an Eligible Shareholder a lesser number of Shortfall Shares than applied for or no Shortfall Shares at all.

All decisions regarding the allocation of Shortfall Shares will be made by the Directors and will be final and binding on all applicants under the Shortfall Offer.

The Offer is not underwritten.

The Entitlement of Eligible Retail Shareholders to participate in the Retail Entitlement Offer is determined on the Record Date. Your Entitlement is shown on the Entitlement and Acceptance Form accompanying this Offer Document.

Payment for New Shares in accordance with an Eligible Shareholder's Entitlement creates a legally binding contract between the Applicant and the Company for the number of New Shares accepted by the Company. The Entitlement and Acceptance Form does not need to be signed to be a binding acceptance of New Shares.

4.11 No rights trading

The rights to New Shares under the Entitlement Offer are non-renounceable. Accordingly, there will be no trading of rights on the ASX and you may not dispose of your rights to subscribe for New Shares under the Retail Entitlement Offer to any other party. If you do not take up your Entitlement by the Closing Date, the Retail Entitlement Offer to you will lapse.

4.12 Notice to nominees and custodians

Shareholders who are resident overseas are responsible for ensuring that taking up an Entitlement under the Offer does not breach regulations in the relevant overseas jurisdiction.

Payment for New Shares in accordance with an Applicant's Entitlement will be taken by the Company to constitute a representation that there has been no breach of those regulations.

4.13 Opening and closing dates

The Company will accept Entitlement and Acceptance Forms in respect of the Entitlement Offer from Eligible Retail Shareholders from the Opening Date until 5.00pm (AWST) on the Closing Date or such other date as the Directors shall determine, subject to the Listing Rules.

Payment for New Shares in accordance with an Applicant's Entitlement by electronic funds transfer (EFT) or BPAY®, must be received no later than 5.00pm (AWST) on the Closing Date. It is the responsibility of all Eligible Retail Shareholders to ensure that their Application Form or BPAY® payments are received by the Company on or before the Closing Date.

The Shortfall Offer is currently scheduled to close on the Closing Date but the Directors reserve the right to extend the date that the Shortfall Offer closes by up to three months after the Closing Date, without prior notice.

4.14 Issue and Dispatch

It is the responsibility of Applicants to determine their allocation prior to trading in New Shares. Applicants who sell New Shares before they receive their holding statements will do so at their own risk.

The expected dates for issue of New Shares offered by this Offer Document and dispatch of holding statements is expected to occur on the dates specified in the Indicative Timetable set out in Section 3 of this Offer Document.

4.15 Application Monies held on trust

Pending the issue of the New Shares or payment of refunds pursuant to this Offer Document, all Application monies will be held by the registry in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest by making payment for New Shares in accordance with an Applicant's Entitlement.

4.16 Application Forms and BPAY® payments

An electronic funds transfer (EFT) or BPAY® payment, to the Company creates a legally binding contract between the Applicant and the Company for the number of New Shares accepted by the Company.

4.17 Rights and liabilities attaching to New Shares

The New Shares will rank equally in respect of dividends and have the same rights in all other respects (e.g. voting, bonus issues) as existing Shares.

Full details of the rights and liabilities attaching to the New Shares are set out in the Company's constitution, a copy of which is available at <https://www.asx.com.au/> and <https://www.babylonpumpandpower.com/>.

4.18 ASX quotation

Application for official quotation by ASX of the New Shares offered pursuant to this Offer Document will be made. If ASX does not grant official quotation of the New Shares within three months after the date of this Offer Document (or such period as the ASX allows), no New Shares will be issued or allotted under the Offers and the Company will return all Application Monies without interest in accordance with the Corporations Act.

The fact that ASX may grant official quotation to the New Shares is not to be taken in any way as an indication of the merits of the Company or the New Shares.

4.19 Removal of the Company's ASX Listing

ASX may require conditions to be satisfied before it will action such a request. ASX has stated in its guidance notes that, in practice, its decision to act upon a request from an entity for removal from the official list is usually subject to satisfaction of certain conditions directed to ensuring that:

- (a) the interests of securityholders are not unduly prejudiced by the removal; and
- (b) trading in the entity's securities takes place in an orderly manner up to the date of its removal.

In some cases, ASX's conditions may require shareholder approval for removal, with controlling shareholders potentially excluded from voting.

4.20 CHESS

The Company is a participant in CHESS, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHESS will be issuer sponsored by the Company. Because the sub-registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Electronic registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with a statement (similar to a bank account statement) that sets out the number of New Shares allotted to them under this Offer Document. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHESS and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

4.21 Continuous disclosure obligations

Specifically, the Company is required to notify ASX of information about specific events and matters as they arise for the purposes of the ASX making that information available to the securities markets conducted by the ASX. In particular, the Company has an obligation under the Listing Rules (subject to certain exceptions) to notify the ASX immediately of any information of which it is or becomes aware which a reasonable person would expect to have a material effect on the price of value of its securities.

This Offer Document is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include information that would be included in a disclosure document or which investors ought to have regard to in deciding whether to subscribe for Shares under the Offer. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

All announcements made by the Company are available from its website <https://www.babylonpumpandpower.com/> or the ASX website <https://www.asx.com.au/>.

Additionally, the Company is required to prepare and lodge with ASIC yearly and half-yearly financial statements accompanied by a directors' statement and report, and an audit report or review. These reports are released to ASX and published on the Company and the ASX websites.

4.22 Governing Law

This Offer Document (including any Application Forms) and the contracts that arise from acceptance of the Applications are governed by the laws applicable in Western Australia and each Applicant submits to the non-exclusive jurisdiction of the courts of Western Australia.

4.23 Taxation implications

The Directors do not consider it appropriate to give Shareholders advice regarding the taxation consequences of subscribing for New Shares under this Offer Document. The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Shareholders.

Shareholders should consult their professional tax adviser in connection with subscribing for New Shares under this Offer Document.

4.24 Risk Factors

An investment in New Shares should be regarded as speculative. In addition to the general risks applicable to all investments in listed securities, there are specific risks associated with an investment in the Company. Before deciding to invest in the Company, investors should read this Offer Document in its entirety, in particular the specific risks detailed in Section 6.

Investors should note that the New Shares to be issued pursuant to this Offer Document carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Shares.

This Offer Document is intended to be read in conjunction with the publicly available information in relation to the Company. Prospective investors should review the announcements made by the Company to the ASX (available from the ASX <https://www.asx.com.au/> (ASX code: BPP) and the Company's website <https://www.babylonpumpandpower.com/>) to more fully understand the position of the Company and the manner in which the Company operates before making a decision regarding the Entitlement Offer.

6. RISK FACTORS

6.1 Introduction

The New Shares are considered highly speculative and carry no guarantee with respect to the payment of dividends or returns of capital. A number of risks and uncertainties, which are both specific to the Company and of a more general nature, may adversely affect the operating and financial performance or position of the Company, which in turn may affect the value of Shares and the value of an investment in the Company.

The risks and uncertainties described below are not an exhaustive list of the risks facing the Company or associated with an investment in the Company. Additional risks and uncertainties may also become important factors that adversely affect the Company's operating and financial performance or position.

Before investing in the Company, you should consider whether an investment in the Company is suitable for you. Potential investors should consider publicly available information on the Company (such as that available on the websites of the Company and ASX), carefully consider their personal circumstances and consult their stockbroker, solicitor, accountant or other professional adviser before making an investment decision.

6.2 Specific risks

(a) Dilution risk

An Eligible Shareholder's voting power in the Company will be diluted if the Eligible Shareholder does not take up their full Entitlement under the Offer.

(b) Dependence on key personnel

The success of the Company, including its ability to effectively execute its business strategy, depends to a significant extent on its key personnel, in particular the Managing Director, Michael Shelby. Mr Shelby has extensive experience in, and knowledge of, the resources services sector. Changes that adversely affect the Company's ability to retain key personnel or an inability to recruit or retain suitable replacement or additional senior personnel could materially affect the Company's business, operational performance and financial results. The loss of key personnel could cause a significant disruption to the Company's business and could adversely affect its operations.

(c) Availability of equipment

The Company operates in the expanding resources sector providing specialist equipment to customers on demand. The majority of the Company's business has been focused on diesel engine services and heavy diesel maintenance. The Company plans to transition to a greater focus on building its rental fleet in the water management sector. There is the risk that such specific equipment may be in short supply, thereby limiting the ability to meet customer needs, generate new revenue and/or attract new customers.

(d) Failure to retain and attract customers

There can be no guarantee that the Company's business development and marketing activities will be successful in attracting new customers to the Company's business. There is a risk that the Company may not be successful in winning all or any of the current pipeline of prospective customer work. Further, the Company's existing customers may terminate their relationship with the Company, for example if any existing or new competitor offers more attractive pricing or services. There is also the risk that as the Company grows its business it may fail to maintain its customer service standards or may not develop service offerings that meet its customers' future requirements. A failure by the Company to retain and attract customers will have an adverse impact on the Company's business, operations and financial performance.

(e) Additional funds

Additional funding may be required by the Company to continue its growth strategy activities. In particular, additional funding may be required by the Company in the event new equipment costs exceed the Company's estimates and will be required once those funds are depleted. To effectively implement its business and operations plans in the future, to take advantage of opportunities for acquisitions or other business opportunities, and to meet any unanticipated liabilities or expenses which the Company may incur, additional equity or other finance will be required. The Company may seek to raise further funds through equity or debt financing or other means. Failure to obtain sufficient financing for the Company's activities may result in delay and indefinite postponement of new equipment acquisitions and other aspects of the Company's growth strategy. There can be no assurance that the Company will be able to obtain further financing on a timely basis, on favourable terms or that such further funding will be sufficient to enable the Company to implement its planned commercial strategy. These factors may adversely affect the financial performance of the Company. Further, if additional funds are raised by issuing equity securities, this may result in dilution for some or all of the Shareholders.

(f) Management of growth

There is a risk that the Company will not be able to manage rapid growth of the Company business, for example, due to the Company's small management team or if the cost of the equipment required for such growth exceeds management's expectations or available working capital. The capacity of the Company to properly implement and manage business growth including cash flow management may affect its operations and prospects. Further challenges and risks exist regarding attracting and retaining suitable skilled personnel in the current market.

(g) Competition

The Company operates in a competitive market. The market for provision of equipment hire and maintenance services is broad with international corporations, large local operators and smaller specialised operators competing for business. Competition also exists between service providers and the customer itself who has the alternative of purchasing

rather than hiring equipment and maintaining equipment themselves. The factors that may affect the competitive advantage of the Company include awareness of its brand, the loyalty of and its relationship with its customers, the scope, pricing and features of its service offerings and its level of service innovation, as well as the quality of its services and equipment provided, and its track record and reputation. The Company business is at a relatively early stage of development, although it has had early success in building its business, there is no certainty that the Company will be able to compete successfully with existing and new potential competitors. Further, there is a risk that existing or new competitors could gain market share through product innovation, price discounting or aggressive marketing campaigns. Competition may also come from providers of complementary products or services offering services similar to those of the Company. In addition, the Company could lose customers and market share if it fails to adapt to technological and regulatory changes or customer expectations at the same rate as its competitors.

(h) Revenue risks

The Company charges service charges and hire fees to its customers for its specialised equipment hire and diesel engine services. There is a risk that the Company may not be able to maintain its anticipated revenue per customer. This may occur, for example, due to price discounting by competitors or if customers do not perceive value in the Company's services or purchase rather than hire equipment and maintain equipment themselves. This may also occur should the client consider an alternate technology that the company is unable to deliver. To date the Company's customers are on short term purchase order contracts. The lack of long term contracted revenues creates uncertainty of future revenues. The Company may also need to reduce the level of its fees, for example, as a result of its strategy to grow market share.

(i) Maintenance and repair of equipment for hire

The retention and growth by the Company of its customer base is dependent on continued availability of its equipment for hire, and the ability of the Company to deliver a high level of maintenance and customer support. the Company may need to invest more on these matters than anticipated due to unanticipated wear and tear or damage to its equipment for hire. This increased investment could lead to reduced return on its products as well as delays in delivering equipment for hire to customers. This may impact on the Company's brand and reputation, business and financial performance. In addition, if there is a decline in customer service delivery, this may also adversely impact on the Company's brand and reputation.

(j) Insurance

The Company intends to insure its assets and operations in accordance with industry practice. However, in certain circumstances, the Company's insurance may not be available or of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company. In addition, there

is a risk that an insurer defaults in the payment of a legitimate claim by the Company.

(k) Contractual Disputes

There is a risk that the Company's business could be disrupted in situations where there is a disagreement or dispute in relation to a term of a contract. Should such a disagreement or dispute occur, this may have an adverse impact on the Company's operations, cashflow and performance generally. It is not possible for the Company to predict or protect itself against all such risks.

(l) Health Safety and Environment

As a company with industrial services operations, there are risks of accidents or incidents that may occur with regard to health, safety or the environment. The key risks include injury to personnel and discharge of hydro carbons into the environment, despite the Company's internal controls to mitigate these risks. The possibility exists that this may lead to environmental/property damage or injury that may result in losses due to compensation, litigation or reputational damage for the Company. The health and safety of company personnel is a key consideration, accordingly there is also a risk that pandemic scenarios may impact staff and company performance. Climate events related to climate change may also be a potential risk factor in the company's ongoing performance

(m) Third Party Risk

The operations of the Company require the involvement of a number of third parties, including suppliers, contractors and customers. Financial failure, insolvency, default or contractual non-compliance on the part of such third parties may have a material impact on the Company's operations and performance. It is not possible for the Company to predict or protect the Company against all such risks. Third party risks include, but are not limited to: (i) the possibility that some of the Company's customers may pose a future credit risk by defaulting on their payment obligations to the Company; and (ii) the possibility that some of the Company's customers may become insolvent, potentially placing assets of the Company hired to such a customer at risk, in either case, despite the best endeavours of management to mitigate these risks.

(n) Compliance with regulation

The Company is subject to regulation concerning how its business is conducted, including occupational health, safety and environmental regulation. A failure to comply with all relevant regulation may result in the Company incurring a penalty (such as a fine), censure which restricts the normal conduct of business, an obligation to pay compensation, the need to give a written undertaking to comply or receiving a direction to comply. In some cases, a regulator may cancel or suspend the relevant licence or registration or undertake proceedings against the Company. A significant failure to comply with regulatory requirements, including in relation to data and information privacy, may also give rise to reputational damage, and adversely affect the Company's business and financial performance.

(o) **Commodity prices**

The key driver of demand for mining and oil & gas services is overall level of investment in plant and equipment for production, new exploration and sustaining works all of which are ultimately driven by commodity pricing. Accordingly, the Company's future ability to generate revenue or attract funding will be related to the price of commodities. Commodity prices fluctuate and are affected by a range of factors outside of the Company's control, including the relationship between global supply and demand for such commodities, forward selling by producers, the cost of production and general global economic conditions.

6.3 General risks

(a) **Market conditions**

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(b) **Economic and government risks**

The future viability of the Company is also dependent on a number of other factors affecting performance of all industries including, but not limited to, the following:

- (i) general economic conditions in jurisdictions in which the Company operates;
- (ii) changes in government policies, taxation and other laws in jurisdictions in which the Company operates;
- (iii) the strength of the equity and share markets in Australia and throughout the world;
- (iv) movement in, or outlook on, interest rates and inflation rates in jurisdictions in which the Company operates; and

- (v) natural disasters, social upheaval or war in jurisdictions in which the Company operates.

(c) Litigation

The Company is exposed to the risk of actual or threatened litigation or legal disputes in the form of personal injury and property damage claims, environmental and indemnity claims, employee claims and other litigation and disputes. There is a risk that such litigation, claims and disputes could materially and adversely affect the Company's operating and financial performance due to the cost of defending and/or settling such claims, and could affect the Company's reputation.

(d) COVID-19 and pandemics risk

The outbreak of the novel coronavirus disease (**COVID-19**) has impacted global economic markets and other pandemics could do the same in the future. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by any further outbreaks or strains of COVID-19 or other pandemics. Further, governmental or industry measures taken in response to COVID-19 or other pandemics may adversely impact the Company's operations and are likely to be beyond the control of the Company.

Any effects of COVID-19 or other pandemics on the Company's Share price and global financial markets generally may also affect the Company's ability to raise equity or debt or require the Company to issue capital at a discount which may in turn cause dilution to Shareholders. If required, the Directors will monitor the impact of COVID-19 or other pandemics on the Company's business and financial performance, and in compliance with its continuous disclosure obligations, the Company would continue to update the market in regard to any further impact of COVID-19 or other pandemics on potential revenue channels and any potential, adverse impact on the Company and its operations.

(e) Investment risk

The Shares to be issued pursuant to this Offer Document should be considered speculative. They carry no guarantee as to payment of dividends, return of capital or the market value of the Shares. The prices at which an investor may be able to trade the Shares may be above or below the price paid for the Shares. While the Directors commend the Offer, prospective investors must make their own assessment of the likely risks and determine whether an investment in the Company is appropriate to their own circumstances.

6.4 Investment speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Shares offered under this Offer Document. Therefore, the Shares to be issued pursuant to this Offer Document carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares. Potential investors should

consider that the investment in the Company is speculative and should consult their professional adviser before deciding whether to apply for Shares pursuant to this Offer Document.
