The Manager  
Market Announcements Office  
ASX Limited  
PO Box H224 Australia Square  
SYDNEY NSW 2001

Dear Sir/Madam

**GL1: DRILLING COMMENCES AT THE MANNA LITHIUM PROJECT**

Please find attached an ASX release by Global Lithium Resources Limited (GL1) announcing the commencement of a 20,000m reverse circulation drilling programme at the Manna Lithium deposit, situated within Breaker Resources NL's 1.7Moz# Lake Roe Gold Project.

A maiden Inferred JORC Mineral Resource of 9.9Mt @ 1.14% Li<sub>2</sub>O and 49 Ta<sub>2</sub>O<sub>5</sub> ppm<sup>^</sup> was previously announced on 17 February 2022. The pegmatite system at Manna is open in all directions with several mineralised trends extending over a 5km x 1.5km area.

Breaker retains a 20% free-carried interest in the Manna Lithium Project with Global Lithium carrying all costs and expenditure to completion of a positive bankable feasibility study (**BFS**). Breaker is also entitled to milestone payments of up to \$20 million.

On behalf of the Board of Directors,

A handwritten signature in black ink, appearing to read "Tom Sanders".

**Tom Sanders**  
Managing Director

## About Breaker Resources NL

Breaker Resources NL (ASX: BRB) is unlocking the potential of a new 1.7Moz greenfields gold district discovered in the Kalgoorlie region of Western Australia, the world's top-ranked mining jurisdiction.

The operational strategy is to develop a large open pit and underground gold mine while concurrently drilling to keep expanding the rapidly growing Resource. Major shareholders include the Electrum Gold Fund (10%), Paulson and Co (10%) and Franklin Templeton (6%).

The key attributes of the Lake Roe Project are its scale and high-grade mining optionality. Gold at the main deposit starts 5m from surface and occurs over a 150m-wide zone in a 3km-long single pit configuration, part of a 9km-long gold system. High-grade lodes discovered in the last year have confirmed that open pit mining will transition to underground mining.

Free-carried lithium interests situated within the Lake Roe project have the potential to fund a large part of the capital expenditure expected for a standalone development. PFS-level pre-mining studies to date indicate no impediments to development.

Project Location

The exciting Ularring Project, situated in the emerging SW Yilgarn mineral province, hosts a known gold-copper system and untested nickel and PGE potential in a large, previously undrilled mafic-ultramafic belt. BRB's initial drilling is expected to start in the next 1-2 months.

# ^ The information in this report that relates to the Lake Roe Mineral Resource is based on information announced to the ASX on 20 December 2021. The information in this report that relates to the Manna Mineral Resource is based on information announced to the ASX on 17 February 2022. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources, all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement

## DRILLING COMMENCES ON SCHEDULE AT THE MANNA LITHIUM PROJECT

*Initial 20,000m RC drilling campaign underway*

### Key Highlights

- Initial Reverse Circulation (RC) drilling program has commenced at the Manna Lithium Project
- Base of operations established to provide accommodation and infrastructure facilities
- Diamond drilling rig to join the program in June 22, targeting the LCT pegmatites at depth
- Results to be incorporated into updated Manna Mineral Resource later this year

Growing multi-asset West Australian lithium company Global Lithium Resources Limited (**ASX: GL1**, “**Global Lithium**” or “**the Company**”) is pleased to announce that RC drilling had commenced at the Manna Lithium Project, located 100km east of Kalgoorlie.

Earlier this year, experienced contractor Profile Drilling Services (“**Profile**”) was appointed to undertake the RC drilling program which will initially comprise 20,000m of drilling. Profile is a Western Australian-based drilling services company which specialises in RC mineral exploration drilling and other mining services. Profile has mobilised the RC rig with a further diamond drilling rig planned to join the campaign in June.

The Company has also completed the deployment of a mobile camp at the Manna Project to provide accommodation and infrastructure facilities for both the geology team and drilling contractors onsite.

The Company anticipates, subject to the timely return of assays, to undertake a Mineral Resource update at the Manna Lithium Project following the drilling program. This is also likely to incorporate additional metallurgical test work which it is targeting to be completed in Q4 2022.

## **Global Lithium Head of Geology Stuart Peterson commented,**

*"We are pleased to announce that the Company has commenced active exploration activities at the Manna Lithium Project, marking an important milestone for GL1. We are excited to now be engaged in large scale exploration programs at both of our key projects in the Tier 1 lithium and mining jurisdiction of Western Australia. In addition to the commencement of drilling at Manna, our RC drilling campaign at the Marble Bar Lithium Project is also progressing well, with 53% of the 60,000m program completed to date.*

*"We look forward to updating the market and shareholders of our progress at Manna during drilling as the initial results from this program become available. The results from this program will be incorporated into an updated Manna Mineral Resource which we expect to announce later this year."*

## About Global Lithium

Global Lithium Resources Limited (ASX:GL1, Global Lithium) is a diversified West Australian focussed mining exploration company with multiple assets in key lithium branded jurisdictions with a primary focus on the 100%-owned Marble Bar Lithium Project (MBLP) in the Pilbara region and the 80%-interest in the Manna Lithium Project in the Goldfields, Western Australia.

Global Lithium has now defined a total Inferred Mineral Resource of 18.4Mt @ 1.06% Li<sub>2</sub>O at its MBLP and Manna Lithium projects, confirming Global Lithium as a new lithium player in Western Australia, on which it will progress exploration during 2022.

Global Lithium's major shareholders include Suzhou TA&A Ultra Clean Technology Co. Limited (Suzhou TA&A), a controlling shareholder of Yibin Tianyi Lithium, a joint venture between Suzhou TA&A (SZSE: 300390) (75%) and CATL (SZSE: 300750) (25%), the world's largest EV battery producer, and ASX listed Mineral Resources Limited (ASX: MIN).

<b>Combined Total</b>		<b>18.4</b>	<b>1.06</b>	<b>51</b>

### Competent Persons Statement:

Information on historical exploration results and Mineral Resources presented in this Announcement, together with JORC Table 1 information, is contained in the Independent Geologists Report within the Company's Prospectus dated 22 March 2021, which was released as an announcement on 4 May 2021.

The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant market announcements, and that the form and context in which the Competent Persons findings are presented have not been materially modified from the original announcements.

Where the Company refers to Mineral Resources in this announcement (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource estimate with that announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not materially changed from the original announcement.
