
UPCOMING ACTIVITY

Red Mountain Mining Limited (**ASX:RMX**) (the **Company**) is pleased to confirm the following upcoming exploration activity at its Western Australian projects:

Mt Maitland (100%, gold and copper-gold): Recent geophysical survey work carried out at Mt Maitland has yielded two IP anomalies at Mt Maitland. These anomalies are situated under previous workings and/or drilling. Drilling to test the anomalies is scheduled to commence in the near term. All regulatory approvals have been obtained. Arrangements with diamond drilling contractor have now been finalised.

Two diamond core holes of circa 400m are to be drilled at Mt Maitland, with Jacia prospective for copper-gold and Mt Maitland South for gold. For further details on the prospects and IP survey results, see ASX announcement dated 13 January 2021.

Mt Mansbridge (100%, heavy rare earth and nickel-cobalt): Subsequent to the end of a late wet season in the Kimberley, phase 1 fieldwork at Mt Mansbridge will commence in early June. Phase 1 operations will include:

- extensive soil sampling, rock chipping and mapping work on the priority heavy rare earth targets at Mt Mansbridge. Combined with the fixed wing radiometric survey conducted by the Company in December, 2020, this work will assist with identifying optimal drill targets. The team will be set up to assess soil sample results on-site which will streamline the process significantly.
- moving loop electromagnetic survey at nickel-cobalt prospect Déjà Vu.
- Ongoing assessment of available geophysical data sets and target generation at the Cow Creek intrusive complex.

Phase 2 operations at Mt Mansbridge are anticipated to comprise approximately 2,500m of RC drilling across the heavy rare earths and nickel-cobalt targets. However, drill plan specifics and metreage will be dependent on the results of phase 1. It is expected that drilling at Mt Mansbridge will occur during Q3 CY2021. For further details on the Mt Mansbridge phase 1 work programme and the heavy rare earth and nickel-cobalt targets see ASX announcement dated 17 May 2021.

Authorised for and on behalf of the Board,

Mauro Piccini,
Company Secretary

Competent Persons Statement

The information in this announcement that relates to Exploration Results and other technical information complies with the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (**JORC Code**) and has been compiled and assessed under the supervision of Mr Oliver Judd. Mr Judd is a Member of the Australasian Institute of Mining and Metallurgy. He has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the JORC Code. Mr Judd consents to the inclusion in this announcement of the matters based on his information in the form and context in which it appears.

Disclaimer

In relying on the above mentioned ASX announcements and pursuant to ASX Listing Rule 5.23.2, the Company confirms that it is not aware of any new information or data that materially affects the information included in the above-mentioned announcements.
