About Emefcy Group Limited (EMC)

Emefcy offers a commercially ready wastewater treatment solution potentially disrupting large existing markets and addressing the growing global need for clean water. Its initial technology, SABRE – the Spiral Aerobic Biofilm Reactor - is a modular decentralised wastewater treatment solution using an estimated 90% less energy than conventional technology. Future generation SABRE2 and SUBRE are higher capacity solutions being developed for broader markets. Emefcy's future technology under development, EBR - The Electrogenic Bioreactor - will harvest electricity from highly-loaded industrial wastewater that is typically very costly to treat. The energy's value has the potential to completely offset other treatment operating costs.
