## RAJA PINDAH, NATIONWIDE LOGISTICS CHOOSES YOJEE SOFTWARE

- Yojee makes its first advanced 'business uberfication' suite White-Label sale for Desktop, Driver and Customer side applications on iOS and Android.
- Raja Pindah an established leader in bulk goods logistics selects Yojee to extend to express services and great utilization of capacity.
- Deal advances both Yojee and Raja Pindahs Indonesia capabilities and proves Yojee software as a standout in the marketplace.

**Yojee Limited (ASX: YOJ)** is a pioneering platform technology company delivering powerful logistics and supply-chain management capabilities via its Artificial Intelligence (Ai) software to South East Asia and Australia. The company is pleased to announce its first Software as a Service Advanced Logistics White-Label agreement has been signed with rollout commencing in 2016.

### Raja Pindah, Indonesia Presence and Customers:

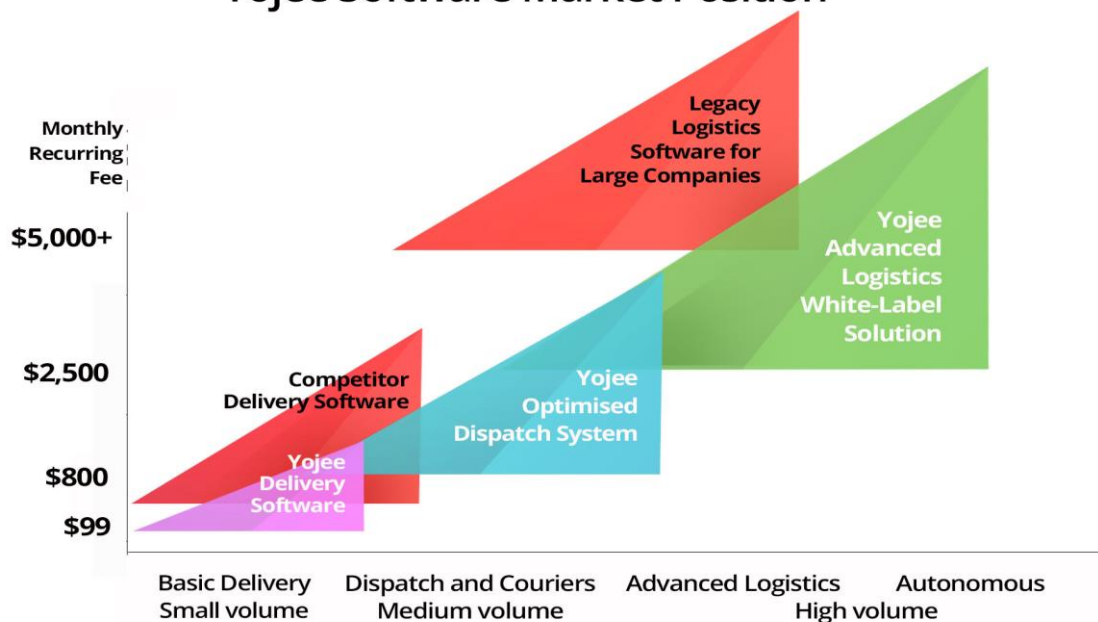

"Yojee's software is proving to be a standout in the market for it's advanced intelligence, simplicity, user experience and additionally unique features such as the fact it actually brings revenue to our clients through the Yojee network. In this case we have not yet commenced the collaborative economy concept in Indonesia, so this shows that our Software stands up in it's own right which is an extremely positive sign. The software market just doesn't offer the entire uberfication software ecosystem of apps for customers drivers and fleet managers, so there's a huge opportunity for us." said Managing Director Ed Clarke.

"Raja Pindah has been operating for 5 years and was seeking to move into the express delivery market and to expand its operations to the eastern Indonesia however building the technology can be expensive and

challenging. We have looked at the market, and Yojee is bringing something far beyond it's competitors in terms of technology and opportunity. " said Raja Pindah CEO Mike Roosevelt. "Raja Pindah is an advanced nationwide logistics business however it has empty capacity and seeks to move into the ecommerce market. Yojees software unique ability to plan and utilize empty capacity as well as optimize fleet movements is really exciting to transform Raja Pindah and help us become a leader in express delivery across Indonesia.

Yojees Logistics 2.0 Software Includes all the Software and applications for a logistics company to manage its fleet and engage customers through best in class mobile applications via Android and iOS. "We are just opening up our platform for sale, of both our two basic software options and our advanced logistics white-label 'uberfication' suite, and already we have strong demand and a large customer pipeline. We are really excited to work with Raja Pindah in Indonesia and for the overall opportunity that is at our fingertips across the region in 2017. The software is plug and play, and super scalable giving us the opportunity to support hundreds or even thousands of new clients. " Yojee Managing Director Ed Clarke Added.
