Facsimile: +61 8 9481 4404

A focus on exploration

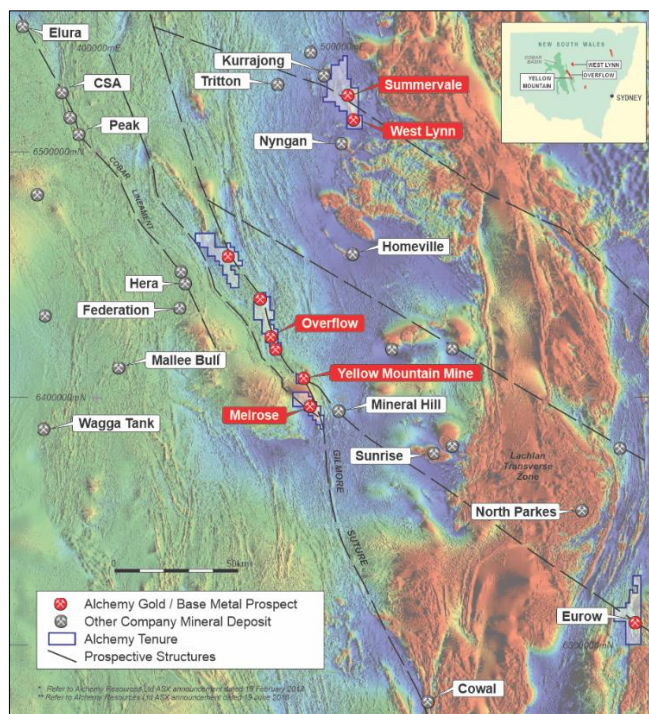

## Diamond drilling commences at the Overflow Gold and Base Metal Prospect, NSW

### Highlights

- Diamond drilling is underway at Alchemy's Overflow Prospect to confirm continuity of high-grade Cobar style gold and base metal mineralisation.
- Two holes planned to extend mineralisation down plunge to the south.

Alchemy Resources Limited (ASX: ALY) ("Alchemy") is pleased to announce the commencement of diamond drilling within the Overflow Gold and Base Metal Project in the Cobar Basin, NSW (*Figure 1*). The Project forms part of the farm-in and joint venture agreement with Heron Resources Ltd (ASX: HRR)<sup>1</sup>.

Two deep diamond holes totalling ~750m aim to expand the known extent of gold and base metal mineralisation down plunge to the south of previous high-grade gold intercepts.

**Figure 1:** Alchemy NSW JV Projects over regional aeromagnetic image (left), current drill hole (right).

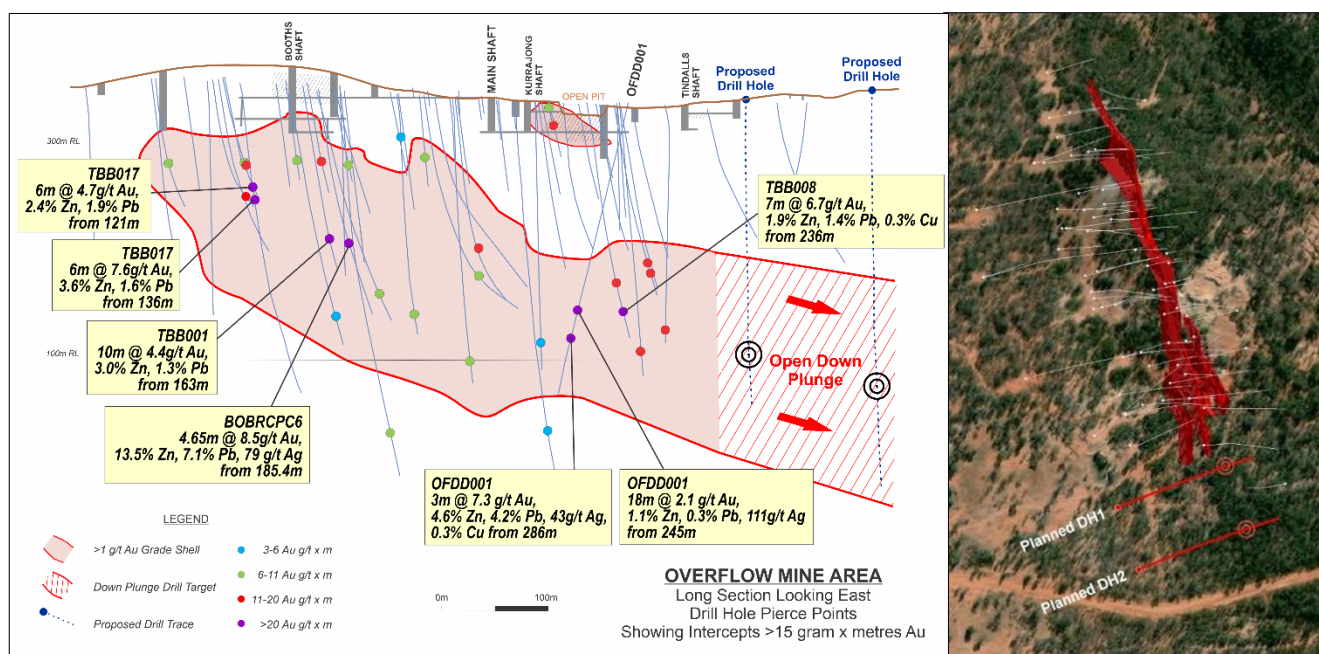

<sup>1</sup> Refer to Alchemy Resources Limited ASX announcement dated 30 May 2016

The diamond drilling aims to test a target area ~100m down-plunge to the south of several previous drill intercepts (*Figure 2*) including:

- 7m @ 6.7g/t Au, 19g/t Ag, 1.9% Zn, 1.4% Pb, 0.3% Cu from 236m (TBB008)<sup>2</sup>
- 18m @ 2.1g/t Au, 111g/t Ag, 1.1% Zn from 245m (OFDD001)<sup>3</sup>
- 3m @ 7.3g/t Au, 43g/t Ag, 4.6% Zn, 4.2% Pb, 0.3% Cu from 236m (OFDD001)<sup>3</sup>

The structurally controlled polymetallic mineralisation, located on the strike extensive Overflow shear zone, displays metal zonation similar that seen at the Hera mine just 30km to the northwest. Both shear parallel and cross-cutting quartz vein sets are present, along with shallow south dipping fault zones, which are interpreted to control the shallow southerly plunge identified in current gold and base metal grade shells (*Figure 2*).

Each diamond hole should take ~10 days to complete with first assays expected early in December 2020.

**Figure 2:** Overflow Prospect long section looking east (left) and plan (right) showing >1g/t Au grade shell and proposed diamond drilling.

Alchemy's Managing Director, Leigh Ryan said:

"After a significant delay due to COVID-19 restrictions Alchemy is excited about the commencement of diamond drilling at Overflow, and looking forward to extending mineralisation down plunge to the south and receiving some significant gold and base metal results in the near future."
