Video – Operational Update February 2020

BluGlass Limited (ASX:BLG) has today published an interview with Rachael Jones from Finance News Network.

Managing Director Giles Bourne talks about the recently launched Laser Diode business unit, the new technical paper presented at Photonics West, operational progress on customer demonstrations and the company's outlook for the remaining half of FY20.

The interview will be available to stream from the BluGlass website www.bluglass.com.au/brr from 11.00am, 19 February, 2020.

About BluGlass

BluGlass Limited (ASX: BLG) is a global leader commercialising a breakthrough technology using Remote Plasma Chemical Vapour Deposition (RPCVD) for the manufacture of high-performance LEDs and other devices. BluGlass has invented a new process using RPCVD to grow advanced materials such as gallium nitride (GaN) and indium gallium nitride (InGaN). These materials are crucial to the production of high-efficiency devices such as power electronics and high-brightness light emitting diodes (LEDs) used in next-generation vehicle lighting, virtual reality systems and device backlighting.

The RPCVD technology, because of its low temperature and flexible nature, offers many potential benefits over existing technologies including higher efficiency, lower cost, substrate flexibility (including GaN on silicon) and scalability.
