RCR AWARDED ECI SERVICES AGREEMENT FOR MT PIPER ENERGY RECOVERY PROJECT

RCR Tomlinson Ltd (ASX: RCR) (“RCR”), is pleased to announce that it has signed an Early Contractor Involvement (ECI) Services Agreement with EnergyAustralia Development Pty Ltd and Re.Group Pty Ltd to develop the project scope, design, schedule and costings for the Mt Piper Energy Recovery Project in New South Wales (“The Project”).

The intent of the ECI agreement is to develop the Project scope, design, schedule and costings to a level suitable for a Final Investment Decision and suitable for the engagement of an EPC contractor. As part of the ECI Services, RCR has engaged Steinmuller Babcock Environment GmbH (SGEng) as their chosen technology partner for the project.

The Project involves the potential installation of a standalone boiler facility, adjacent to and integrated with the existing Unit 2 coal fired boiler at Mt Piper Power Station, and fired using Refuse Derived Fuel (RDF). RDF is an engineered fuel, made by selecting a portion of a mixed waste stream to produce a fuel to an agreed specification.

RCR’s Interim CEO and Executive Director Mr Bruce James said: *“We are very pleased to be chosen as ECI partner in this project. RCR has extensive experience in waste-to-energy solutions and Early Contractor Involvement, assisting many customers to achieve FID for their projects across multiple sectors including energy and transport; as well as the capability and resources to deliver a full EPC solution”.*

ENDS.

About Steinmuller Babcock Environment

Steinmüller Babcock Environment is a name that stands for cutting-edge technology in thermal waste treatment and flue gas cleaning. SBEng develops, plans, builds and manages complete plants as well as individual key components and is part of the NSENGI group (Nippon Steel & Sumikin Engineering Co. Ltd), one of the leading environmental technology companies in Asia.
