FY2016 HALF YEAR RESULTS

18 FEBRUARY 2016

NEXTDC LIMITED ACN 143 582 521

1H16 highlights

REVENUE¹

\$42.1m

↑ 51%
on 1H15

EBITDA

\$11.4m

↑ 279%
on 1H15

CONTRACTED UTILISATION

22.8MW

↑ 59%
since Dec-14

1. Total revenue from ordinary activities (including data centre services revenue as well as other revenue)

1H16 highlights (cont)

Ongoing growth in revenue

- Revenue from ordinary activities up \$14.1m (51%)¹ to \$42.1m
- Contracted utilisation up 8.5MW (59%)² to 22.8MW
- Interconnection up 1,645 (75%)² to 3,843, representing ~5% of recurring revenue³

Benefits of operating leverage

- EBITDA up \$8.4m (279%)¹ to \$11.4m
- Operating cash flow up \$3.7m¹ to \$5.9m
- Net profit of \$0.6m, up from \$5.8m loss in 1H15

Substantial liquidity

- \$220m of new funding raised via Notes II and issue of equity during 1H16
- Cash and term deposits of \$225m as at 31 Dec 2015 along with access to undrawn senior debt facility of \$50m
- Operating cash flow also expected to contribute to NEXTDC's overall funding position over time

Customer driven capital investment

- 1H16 capital expenditure of \$41m, with project works underway at M1, S1 and C1
- Contracted utilisation brings forward planned capital investment at M1 and S1
- High-density customer requirements provide opportunity to utilise Project Plus
- Currently in advanced discussions in relation to short-listed sites for B2 and M2

1. Compared to 1H15

2. Since 31 December 2014

3. Interconnection (cross connects) represented 4.4% of recurring data centre services revenue in FY15

Agenda

- **1H16** Financial results
- **1H16** Operational performance
- **FY16** Outlook
- Appendices

FY16
Half Year Results

Financial results

1H16 profit and loss summary

	1H16	1H15	Change
	(\$m)	(\$m)	(\$m)
<i>Statutory financial results:</i>			
<i>Revenue from ordinary activities:</i>			
Data centre services revenue	41.3	26.7	14.6
Other revenue	0.8	1.2	(0.4)
<i>Total revenue from ordinary activities</i>	<i>42.1</i>	<i>28.0</i>	<i>14.1</i>
Profit / (loss) after tax attributable to members	0.6	(5.8)	6.4

Data centre services

REVENUE

↑ 55%

Financial performance

- Increase in data centre services revenue of \$14.6m (55%)
- Net profit after tax of \$0.6m

1H16 profit and loss summary (cont)

	Note	1H16 (\$m)	1H15 (\$m)	Change (\$m)
<i>Non-statutory financial highlights for the year include:</i>				
	1			
EBITDA	2	11.4	3.0	8.4
EBIT		3.8	(4.0)	7.8
<i>Operating costs</i>				
Direct costs (power and consumables)		3.7	2.5	1.2
Facility costs (data centre rent, property costs, maintenance, facility staff, other)		13.2	12.0	1.2
Corporate overheads	3	13.1	9.0	4.1
Total operating costs		29.9	23.5	6.4

Operating performance

- \$8.4m improvement in EBITDA vs 1H15
- Direct costs (predominately power) rose significantly due to take up of contracted customer capacity, although still improved as a proportion of data centre revenue
- Increase in corporate overhead costs was driven by an earlier provision of executive incentive costs (not provided for in 1H15), some specific project related costs (e.g. site selection and other product related costs), as well as an underlying increase in staff numbers

1. Non-statutory financial metrics have been extracted from the audited accounts
2. EBITDA is a non-statutory metric representing earnings before interest, tax, depreciation and amortisation
3. Corporate overhead includes costs related to all sales and marketing, centralised customer support, project management and product development, site selection due diligence, as well as investments in growth initiatives including partner development, customer experience and systems

Substantial liquidity

	31 December 2015	30 June 2015
	(\$m)	(\$m)
Cash and term deposits	225.3	52.9
Property, plant, equipment	253.4	221.2
Net assets	331.3	214.9

Financing

- Positive operating cash flow of \$5.9m achieved in 1H16
 - 1H16 figure held back by significant increase in accounts receivable towards the end of the period
- Raised \$220m of additional capital to facilitate growth
 - \$100m through Notes II offering
 - \$120m through the issue of equity
- \$50m debt facility with NAB remains undrawn
- Funding sources further supplemented by ongoing operating cashflow

Cash flow profile

1. Cash flows from financing activities include proceeds from borrowings and issue of shares less transaction costs, cash paid into escrow for coupon payments, and finance lease payments

FY16
Half Year Results

Operational performance

Strong sales momentum

1H16 data centre services revenue of \$41.3m¹

- Reflects 55% growth on 1H15
- Recurring revenue represented 85% of total 1H16 revenue

1H16 EBITDA of \$11.4m

- Reflects 279% growth on 1H15
- Substantial headroom for earnings growth

Recurring and project revenue¹

EBITDA³

1. Data centre services revenue excludes interest and data centre development revenue

2. Project revenue includes one-off setup costs for new customer fit outs, standard establishment fees for new services, remote hands and other services

3. FY13 and FY14 EBITDA excludes building development profit, APDC distributions and fund raising advisory fees

Strong growth in sales metrics

Annualised unweighted
pipeline (\$m)¹

Customers²

Interconnection
(number of cross connects)

1. 30 June 2015 figure excludes Federal Government contract announced 10 August 2015

2. 30 June 2015 figure has been pro forma adjusted for the Federal Government contract announced 10 August 2015

Strong growth in revenue per unit metrics

Annualised revenue per MW (\$m)¹

- Demonstrates strong growth in revenue per MW since the billing commencement of Leading Corporation in 2H14
- Revenue derived from larger ecosystem-enhancing deals tends to increase over time as customers' deployments mature, resulting in greater use of contracted power capacity as well as driving cross connect revenue
- Expect a small decrease in 2H16E due to the billing commencement of the large Leading Corporation and Federal Government contracts, as they begin their power usage ramp up

Annualised revenue per square metre (\$)²

- Demonstrates strong growth in revenue per square metre, regardless of deployment of large, high density, ecosystem-enhancing deals (such as Leading Corporation in 2H14) over time
- Demonstrates the revenue leverage available due to the high power density Project Plus³ capacity
- Expect continued growth in 2H16E

1. Revenue reflects data centre services revenue less project revenue. Megawatts reflects the total weighted average megawatt months billed over the period
2. Revenue reflects data centre services revenue less project revenue. Square metres are the total weighted average square metres utilised during the period
3. Project Plus is an engineering project announced 25 August 2014, which expanded NEXTDC's overall IT capacity by 3MW to 15MW at M1 and by 2.5MW to 14MW at S1, without the requirement for additional land, building or fit out of additional data halls

Strong growth in earnings metrics

EBITDAR / Data Centre Services
Revenue^{1,2}

- Highlights the rapid growth in the company's operating performance
- Is a property-agnostic measure of EBITDA margin
- Demonstrates the operating leverage achievable by owning the land and buildings

EBITDA / (Net Debt + Equity)^{2,3}

- Demonstrates the company's operating performance relative to the capital invested (debt + equity)
- Highlights the strong improvement in returns on invested capital over a relatively short period of time

1. EBITDAR represents EBITDA plus data centre rent

2. FY14 EBITDA excludes building development profit, APDC distributions and fund raising advisory fees

3. Represents annualised EBITDA for the period divided by the average book value of net debt plus equity

Diversified recurring revenue model

Customer by industry¹

Cloud, connectivity and as-a-service partners drive strong ecosystem growth

Utilisation by density^{1,2}

Customer power requirements continue to increase, supported by Project Plus

Recurring vs project³

Significant contracted recurring revenue stream with average term greater than four years

Revenue by facility³

Strong performance in key markets

1. As at 31 December 2015
2. Density per rack equivalent
3. Expressed as a percentage of 1H16 data centre services revenue

Utilisation

Installed capacity vs contracted utilisation

- 1.6MW available for sale at 31 December 2015
- Project works underway at M1, S1 and C1 to bring on additional capacity in 2H16

Billing vs contracted utilisation

- Contracted utilisation up 8.5MW (59%) to 22.8MW since 31 December 2014
- Billing customer utilisation up 63% since 31 December 2014

1. Billing customer utilisation refers to the sold capacity for which revenue is being billed

Facilities capacity and utilisation

As at 31 December 2015

M1 Melbourne

- Final data hall (DH6) due for completion in February 2016; high density customer requirements make use of Project Plus capacity across halls

S1 Sydney

- Project works on final hall (DH4) commenced
- High density customer requirements make use of Project Plus capacity across halls

C1 Canberra

- Works continue on expanding capacity and upgrading critical infrastructure following customer wins (AEC, APRA)

M2 Melbourne

- 25MW planned capacity

B2 Brisbane

- 6MW planned capacity

	M1	S1	P1	C1	B1	M2	B2	Total
Commenced operations	Sep 2012	Sep 2013	Feb 2014	Aug 2012	Oct 2011	2H17E	2H17E	
Total power planned	15.0MW	14.0MW	6.0MW	4.8MW	2.25MW	25.0MW	6.0MW	73.1MW
MW built	10.0MW	8.7MW	2.7MW	0.7MW	2.25MW	-	-	24.4MW
Fit out capex to date ¹	\$101m	\$95m	\$39m	\$12m	\$29m	n/a	n/a	\$276m
Contracted utilisation	11.6MW	8.3MW	0.8MW	0.2MW	2.0MW	-	-	22.8MW
% of total power planned	77%	59%	13%	4%	91%	-	-	54%
% of MW built	116%	95%	29%	27%	91%	-	-	94%
Capacity available for sale	3.4MW	5.7MW	5.2MW	4.6MW	0.2MW	-	-	19.2MW

1. Site selection and other due diligence-related consulting costs for planned data centre developments are included in corporate overheads

FY16 NEW DEVELOPMENTS

FY16
Half Year Results

Outlook

FY16E Outlook

Ongoing
growth in
revenue

Revenue trending towards top end of \$85m to \$90m range (up 40% to 48% on FY15)

- 2H16E revenues underpinned by the expected commencement of Leading Corporation deployment (4MW contract announced on 29 June 2015 and 2MW contract announced on 25 January 2016) as well as Federal Government deal (announced in August 2015)
- Expecting further growth in connectivity revenue underpinned by 75% growth in cross connects (1H16 vs 1H15)
- Strong cash position (\$225m at 31 December 2015) also expected to result in increased interest income in 2H16E

Benefits of
operating
leverage

EBITDA trending towards top end of \$25m to \$28m range (up 213% to 250% on FY15)

- 1H16 reported EBITDA of \$11.4m was boosted by the timing of establishment fee recognition
- Incremental FY16E EBITDA (\$18.5m)¹ represents c. 70% of FY16E incremental revenue (\$26.6m)²
- Substantial scope for ongoing earnings growth across existing sites as well as B2 and M2

Customer
driven
capital
investment

Capital expenditure on existing sites of between \$100m and \$120m

- \$41m of capital expenditure invested in 1H16³
- Consistent with earlier guidance⁴ of \$75-85m with a further \$40-50m subject to successfully securing further large customer opportunities
 - 2MW Leading Corporation contract announced 25 January 2016
 - NEXTDC remains in discussion with customers in relation to further large opportunities

New
B2 & M2
investments

Capital expenditure on new data centre developments of between \$20m and \$40m in FY16E

- NEXTDC is in advanced stages of site selection for both B2 and M2
- Guidance range compares to earlier FY16E guidance³ of \$60-80m with the variance reflecting timing differences (i.e. part of previously expected FY16E spend is now expected to come through in FY17E)

1. Based on mid-point of FY16E guidance range of \$25m-28m (\$26.5m) less FY15 EBITDA of \$8.0m

2. Based on mid-point of FY16E guidance range of \$85m-90m (\$87.5m) less FY15 revenue of \$60.9m

3. Note that this figure represents the change in the underlying cost base of property, plant and equipment during 1H16 and varies from the \$39m figure disclosed in the cash flow statement (difference is due to timing of payments)

4. Capital raising presentation dated 23 November 2015

Business strategy

A low-angle, upward-looking photograph of modern skyscrapers. The central focus is a white, rectangular sign with the letters 'NEXTDC' in large, 3D block letters. 'NEXT' is in red, and 'DC' is in blue. The background shows the glass and steel facades of tall buildings, with a red building on the left and a blue one on the right. The sky is visible at the top.

VISION

Our vision is to help enterprises harness the digital age, improving our society through the advancement of technology

MISSION

Our mission is to be the leading customer-centric data centre services company, delivering solutions that power, secure and connect enterprise

NEXTDC is *where the cloud lives*®

Consumption economics is a powerful driver of hybrid cloud and colocation.

NEXTDC customers enjoy a wide choice of public, private and hybrid cloud solutions through our Cloud Centre partner community: the largest carrier, vendor and integrator neutral ecosystem in Australia.

Gartner, May 2015

Public and private cloud

Our enterprise and government customers leverage public and private cloud economics. Consumption computing is a key driver for customers' shift to colocation. NEXTDC hosts a number of the largest international and domestic public and private cloud computing providers right here in Australia. Cloud providers prefer carrier-neutral data centres because customers want connectivity choice.

Hybridised cloud

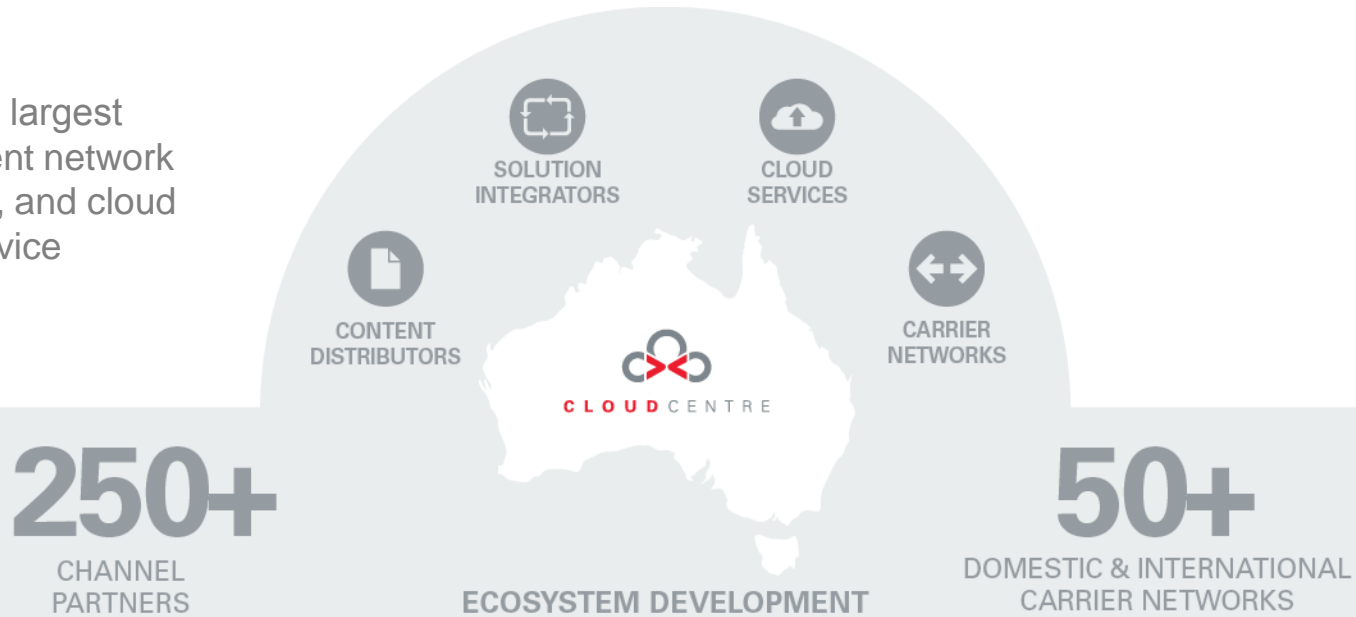

Most customers have workloads they run in the cloud, and workloads they run on their own infrastructure. Due to legacy platforms, network costs or security concerns not all customers put everything in public or private clouds, so they combine and connect their own infrastructure at NEXTDC to create a hybrid cloud environment. Hybrid clouds are also a key driver of NEXTDC's interconnection revenue.

Connecting the clouds

Connectivity is available through the internet, by secure private connection or elastic fabric connections to cloud solutions through NEXTDC interconnection services and our network of partners. Networking latency is a key consideration for workloads into the cloud and the preferred location of the cloud. Connection to public and private clouds is a key driver of NEXTDC's interconnection revenue.

Channel-first sales strategy

Australia's largest independent network of carriers, and cloud and IT service providers

BENEFITS FOR NEXTDC

4000+

Sales people selling solutions including NEXTDC colocation

Extended reach across all market segments and geographies

Visibility of all market opportunities

BENEFITS FOR CUSTOMERS

AGILITY

Freedom to choose from best of breed services

Suppliers all in one place, allow easy connection

Seamless hybrid cloud

Partners tailor solutions with NEXTDC data centre services

Cloud Centre

NEXTDC is home to many enterprises, government organisations, and some of the world's largest cloud computing providers. Our ecosystem value grows through interconnectedness.

The data centre is the heart of hybrid computing

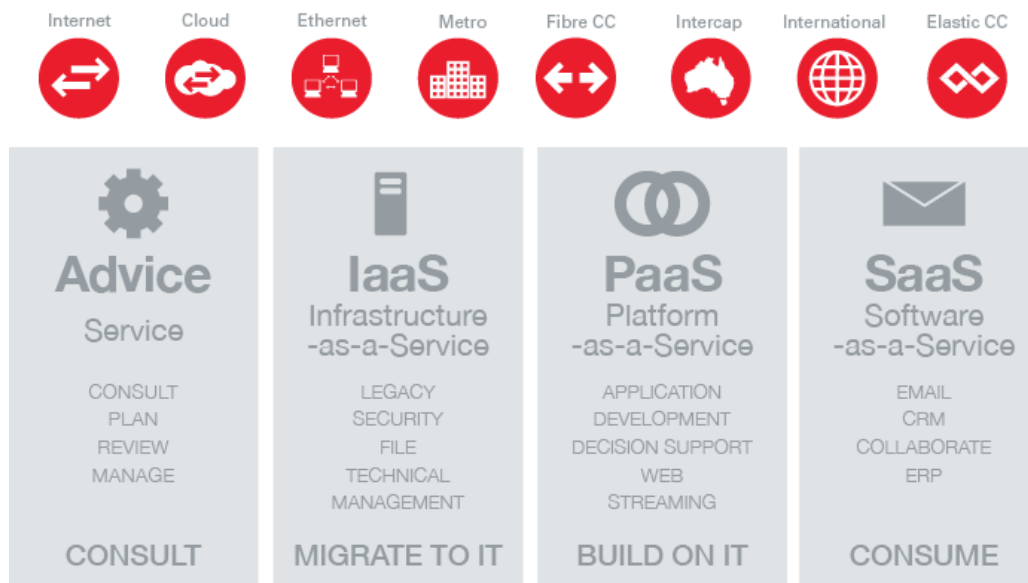

The movement by companies to selectively source public and private cloud computing solutions does not diminish but enhances the strategic value of large scale, high power, high specification colocation facilities such as NEXTDC's.

Without carrier-neutral data centres providing a place to build internet exchanges, the internet, private networks and cloud computing would not exist in their current form.

NEXTDC data centres are a marketplace for the digital economy

DISCLAIMER:

The information may not be reproduced or distributed to any third party or published in whole or in part for any purpose. The information contained in these materials or discussed at the presentation is not intended to be an offer for subscription, invitation or recommendation with respect to shares or securities in any jurisdiction. No representation or warranty, express or implied, is made in relation to the accuracy or completeness of the information contained in this document or opinions expressed in the course of this presentation. The information contained in this presentation is subject to change without notification.

This presentation contains forward-looking statements which can be identified by the use of words such as “may”, “should”, “will”, “expect”, “anticipate”, “believe”, “estimate”, “intend”, “scheduled” or “continue” or similar expressions. Any forward-looking statements contained in this presentation are subject to significant risks, uncertainties, assumptions, contingencies and other factors (many of which are outside the control of, and unknown to, NEXTDC Limited (“NXT”) and its officers, employees, agents or associates), which may cause the actual results or performance to be materially different from any future result so performed, expressed or implied by such forward looking statements. There can be no assurance or guarantee that actual outcomes will not differ materially from these statements.
