

MARCH QUARTERLY ACTIVITIES REPORT

Delta Lithium Limited (ASX: DLI) (“Delta” or the “Company”) is pleased to provide the following report on activities undertaken during the March Quarter, 2025.

March Quarter Highlights

- **Updated Mineral Resource Estimate (MRE) at the Yinnetharra Lithium and Tantalum Project** incorporating recent infill drilling at the Malinda Prospect and initial drilling at Jameson:
 - **140% increase in the Indicated lithium Mineral Resource at Malinda, now totalling 16.1Mt @ 1.0% Li₂O** (at 0.5% Li₂O cut-off), based on an average 40m x 40m drill spacing
 - **Total updated lithium MRE of 21.9Mt @ 1.0% Li₂O and 75ppm Ta₂O₅** (at 0.5% Li₂O cut-off), representing a 15% reduction in tonnes, due to refined wireframe boundaries and pegmatite morphology changes within the previous Inferred resource
 - Includes a **Maiden MRE at Jameson of 0.8Mt @ 1.66% Li₂O** (at 0.5% Li₂O cut-off)
 - **Total Tantalum MRE at Malinda of 39.4Mt @ 102ppm Ta₂O₅** representing a **152% increase in contained Tantalum metal**
- **Combined lithium and tantalum MRE for Yinnetharra and Mt Ida Projects updated to:**
 - **36.5 Mt @ 1.1% Li₂O** (at a 0.5% Li₂O cut-off)
 - **54.0 Mt @ 126ppm Ta₂O₅** (at a 65ppm Ta₂O₅ cut-off for Yinnetharra tantalum MRE, remainder is constrained within the lithium MREs without a Ta₂O₅ cut-off value) (See Table 3 for a detailed breakdown of Group MRE)
- **Completion of the 4-stage drill program with aim to update the Mt Ida Gold project Mineral Resource Estimate of 752koz @ 3.5g/t in June Quarter**
- Works Approval application submitted to the Department of Water and Environmental Regulation (DWER) for the construction at Mt Ida of up to a **1.5Mtpa gold Processing Plant and Tailings Storage Facility (TSF)**
- Mt Ida is **fully permitted for open pit and underground mining** with an approved Mining Proposal, Mining Closure Plan and water abstraction license
- Stay up to date at InvestorHub <https://investors.deltalithium.com.au/link/pegYNP>

Commenting on the quarter, Managing Director of Delta Lithium, Mr James Croser said:

“Delta has continued to advance key workstreams at both Mt Ida and Yinnetharra throughout the quarter. Yinnetharra’s updated MRE has increased our confidence at Malinda and provides for potential base-load feed at any future lithium processing operations. The M1 and M36 pegmatites contain a combined 14.6Mt of indicated resource, providing enough confidence to commence mining studies with the aim of delineating reserve tonnes. The M1 in particular has achieved a saleable SC6 concentrate in metallurgy test work undertaken by the Company and metallurgy testing has continued to advance.

“At Mt Ida, Delta continues advancing the Gold Project towards genuine standalone scale. The team completed the 4-stage extensional and regional drill program which provided outstanding results across Jupiter, Baldock, Bombay, and West Knell. Importantly, this program aims to update Mt Ida’s Gold MRE in the June Quarter. Delta also submitted a Works Approval application to the Department of Water and

Environmental Regulation for the construction of up to a 1.5Mtpa gold Processing Plant and Tailings Storage Facility.

“The milestones we’ve achieved in recent months provides Delta a strong foundation for the year ahead and we are excited to share our continued success with our shareholders.”

MT IDA GOLD PROJECT

Mt Ida is located approximately 100km northwest of Menzies, and approximately 225km by road from Kalgoorlie in Western Australia’s prolific Eastern Goldfields mining region (Figure 1). The Project area resides on granted mining leases and is approved for open pit and underground mining at Baldock, which hosts the majority of the high-grade gold Mineral Resource at Mt Ida

The Mt Ida Gold Project is underpinned by a Mineral Resource Estimate (MRE) of **6.6 Mt @ 3.5g/t Au for 752,000 ounces** (at various cut-off grades). This includes the **Baldock Area**, which is one of the **highest-grade undeveloped gold deposits in WA** containing **4.8Mt @ 4.4g/t Au for 674,000 oz.**

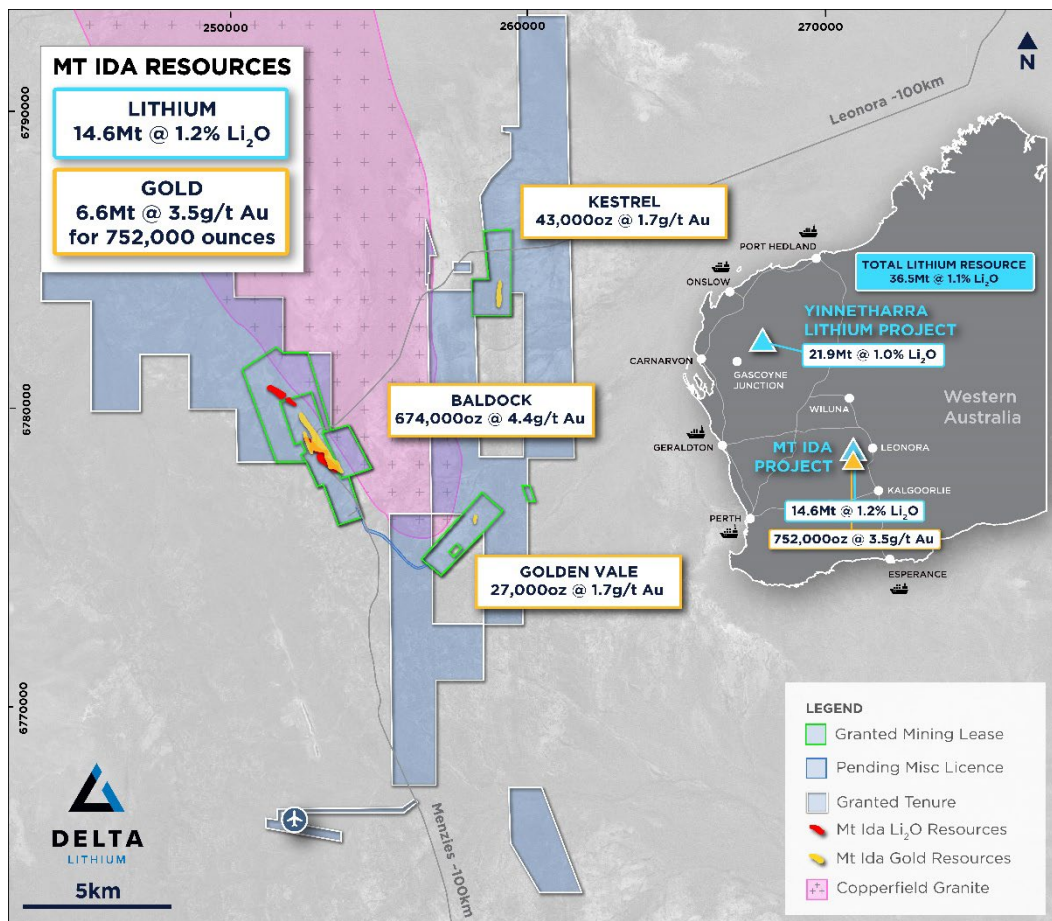

Figure 1: Location of Mt Ida Project with Gold and Lithium Resources stated

Mt Ida Resource Growth

Subsequent to the end of the quarter, the 4-stage extensional drill program was finalised delivering strong results and confirming more gold across the broader tenure of Mt Ida.

Delta’s exploration results have been very promising and provide further confirmation of historical tenor and potential of the broader Mt Ida Gold Project. Additional Intercepts at Baldock continued to deliver

exceptional extensions to deep high-grade resources including the delineation of an additional en-echelon lode in the footwall of Lode 90 which hosts 504kt @ 6.9g/t Au for 112koz. – See Figure 2. This new lode is completely open to the South and will add to the current resource base at Baldock of 674koz @ 4.4g/t Au, which acts as the baseload of the Mt Ida Gold Project.

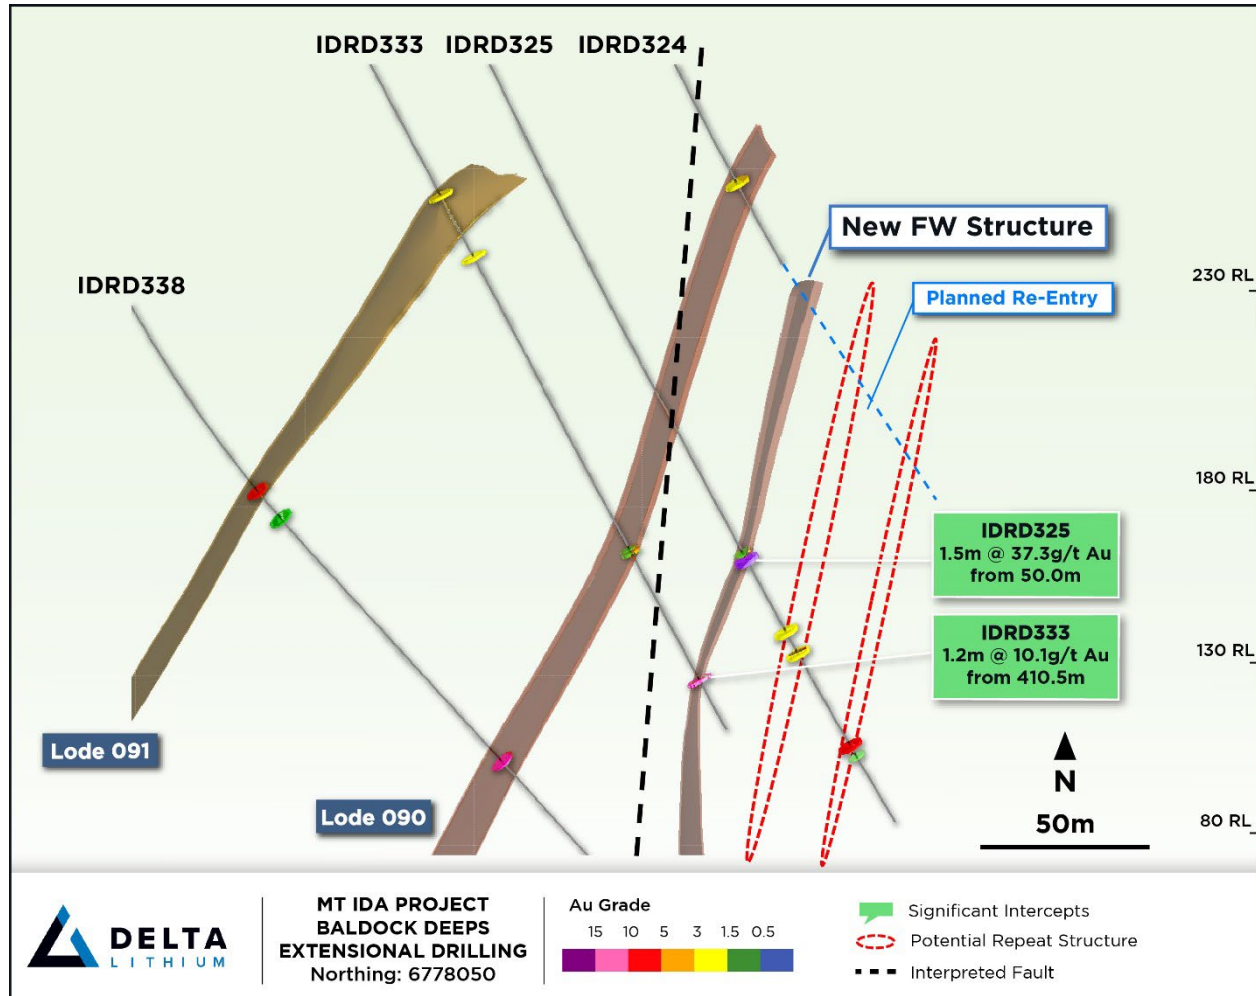

Figure 2: Cross- section showing Baldock deep lodes beyond the current MRE and new high-grade structure that remains open to the South

The Company believes this newly identified footwall lode beneath lode 90 presents a compelling exploration target and will be further tested by future drilling.

Previously released results from the extensional Baldock drilling include the following significant intercepts as shown in Table 1. See Figure 3 for illustration of these recent intercepts in relation to the current Mineral Resource Estimate at Baldock.

HoleID	From	To	Length	Au g/t	Cu_ppm
IDRD309	83	85	2	9.3	1966
IDRD310	197	198	1	6.5	555
IDRD329	325.92	326.42	0.5	13.4	2390
IDRD321	38	43	5	4.7	1615
IDRD327	308	309	1	8.8	466
IDRD330	140	141	1	9.3	186

HoleID	From	To	Length	Au g/t	Cu_ppm
IDRD333	410.5	411.72	1.22	10.1	4604
IDRD352	31	33	2	4.1	1714

Table 1: Highlights of drill intercepts at Mt Ida from Baldock during the recent program

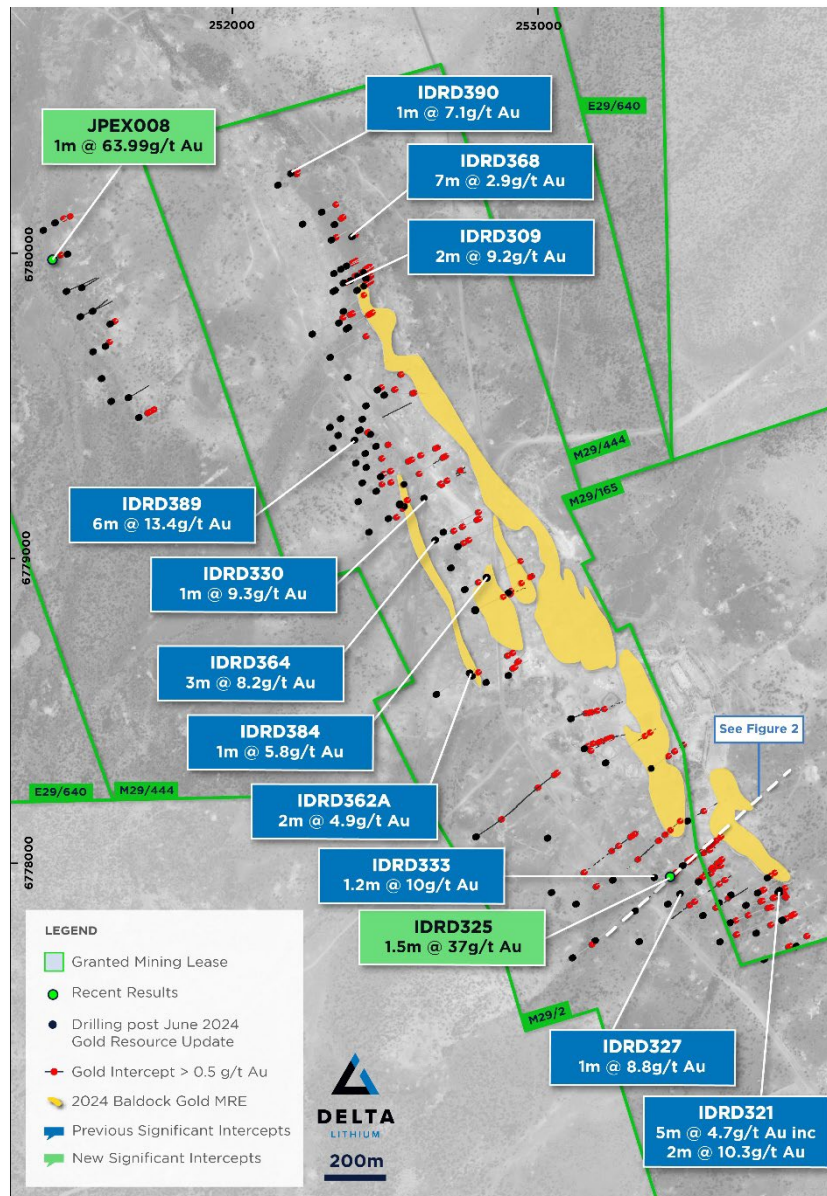

Figure 3: Plan view showing Stage 1 -3 Intercepts around the Baldock area and Jupiter to the Northwest

Stage 4 Regional Drilling

Initial assay results from the Company's priority regional prospects including Bombay, West Knell and Jupiter were extremely promising with high grade intercepts being reported from each prospect – see Table 2 and Figure 4 below.

HoleID	Prospect	From	To	Length	Au g/t	Cu_ppm
BYRD027	Bombay	148	151	3	7.9	795
JPEX008	Jupiter	45	46	1	64.0	341
WKEX025	West Knell	67	72	5	5.8	529
WKEX034	West Knell	74	80	6	4.4	595
WKEX039	West Knell	56	58	2	4.1	3352
WKEX040	West Knell	150	157	7	2.0	3386

Table 2: Highlights of recent regional drill intercepts at Mt Ida from Stage 4 drilling

Importantly, the Company continued to progress concurrent workstreams to accelerate Mt Ida's development including the submission of a Works Approval application to the Department of Water and Environmental Regulation to construct a gold Processing Plant and Tailings Storage Facility with the potential capacity of processing and tailings deposition of up to 1.5Mtpa.

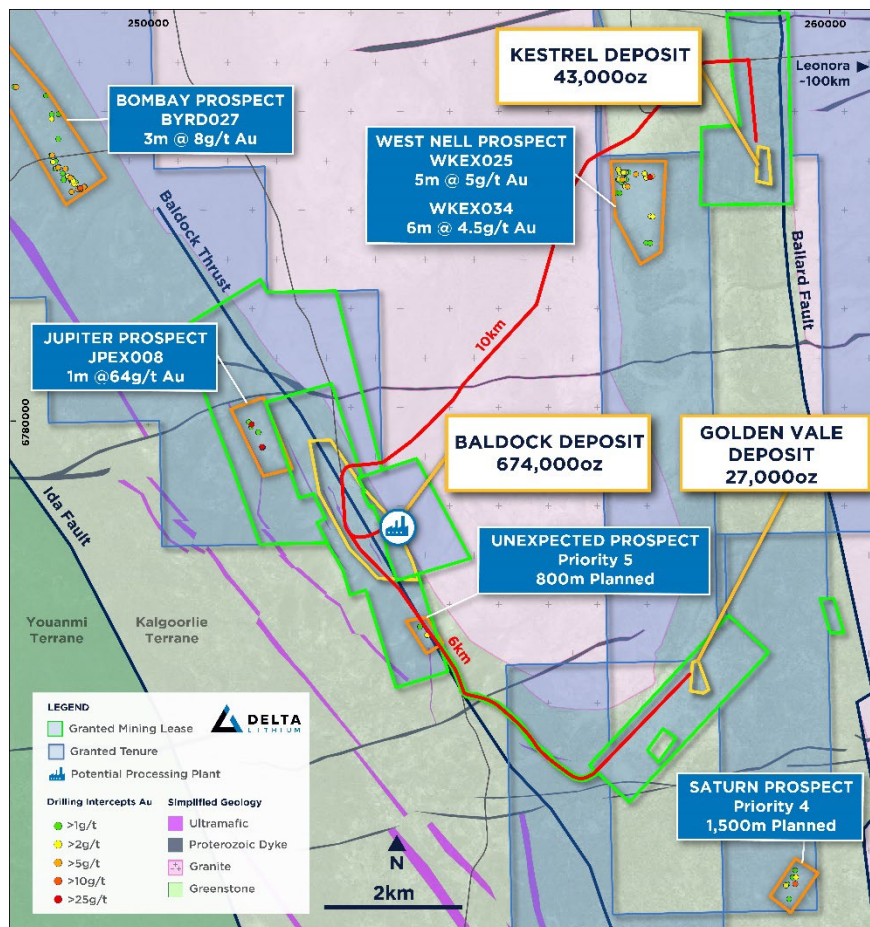

Figure 4: Plan view of regional prospects in relation to Baldock with some recent significant Intercepts

Delta's first drilling at West Knell has provided some excellent high-grade intercepts proving up local continuity from a historical interval of 5m @ 72g/t from 50.5m – see Figure 5.

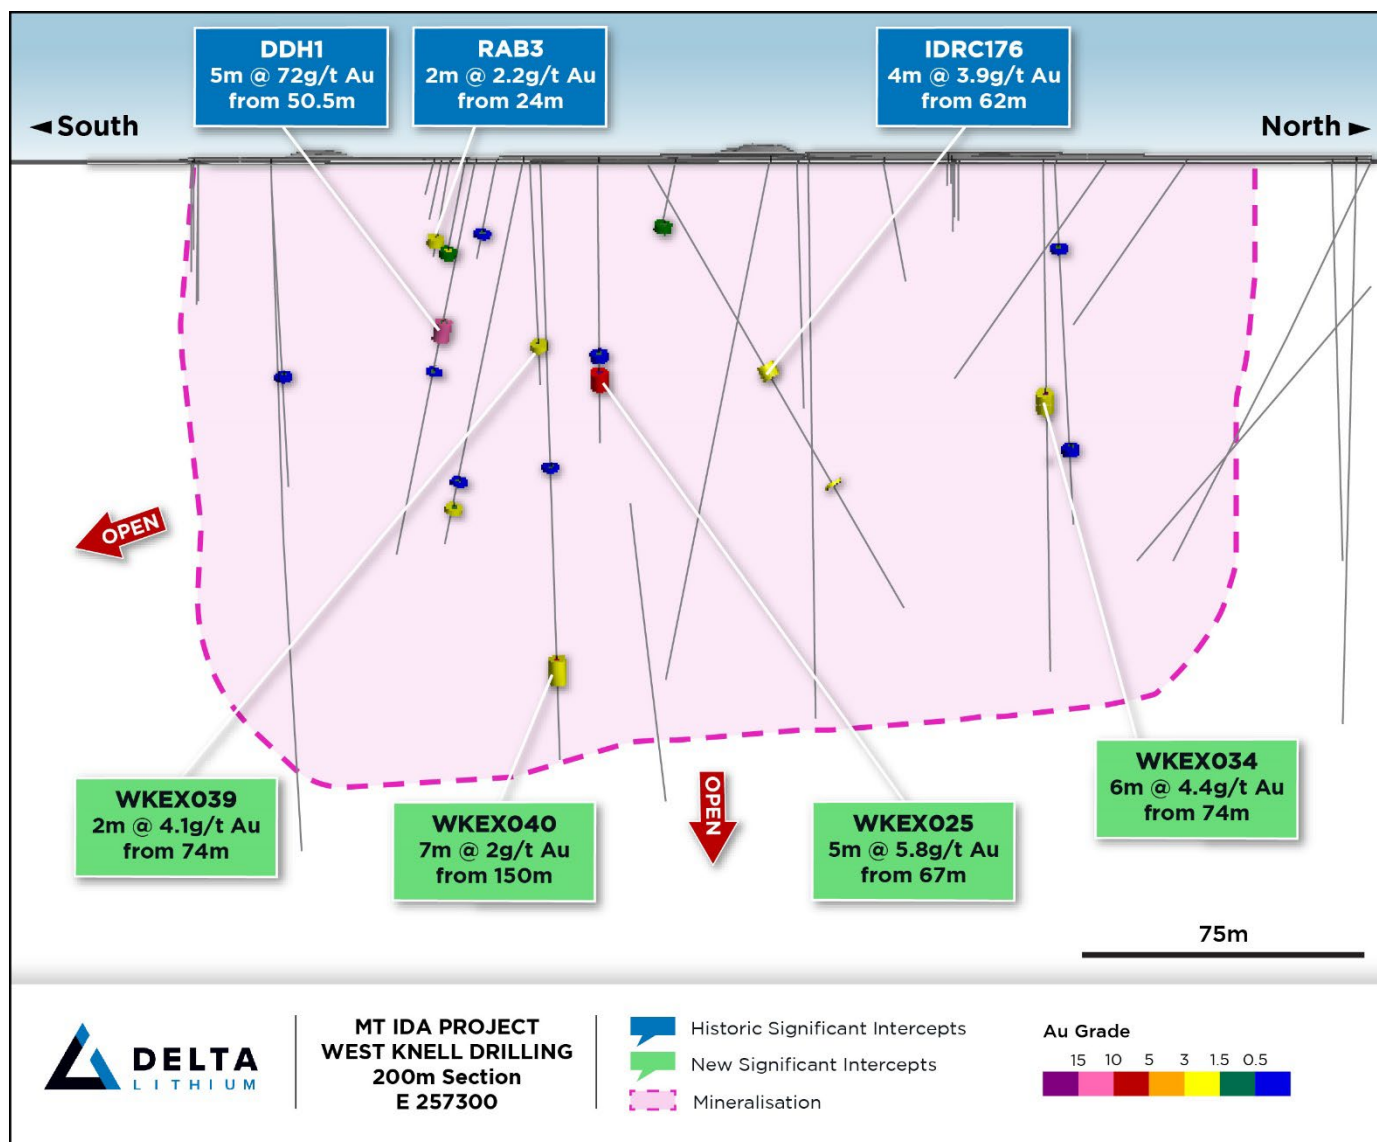

Figure 5: 200m wide West Knell section facing West showing previous and recent significant intercepts

All exploration results will feed into the updated Mineral Resource Estimate scheduled to be completed early in the June Quarter, which is planned to be followed by an infill resource conversion campaign. At the end of the quarter, there were still 26 holes undergoing testing in the lab while further drilling at the Saturn and Unexpected prospects commenced with the aim to further grow the Mt Ida regional resources.

Mt Ida Project Development

Delta submitted a Works Approval application for onsite gold treatment and tailings deposition, being the only outstanding permit required for Delta to construct a gold plant and TSF at Mt Ida.

The Works Approval application process may take up to six months. The timing of this submission and approval process aligns with ongoing workflows at Mt Ida, which are currently focused on completion of the current resource growth drilling and an updated MRE early in the June Quarter.

Future planning for Mt Ida includes the commencement of infill drilling, at Baldock in particular, and at sufficient density to underpin a multi-year Mining Plan and maiden Reserve statement. This planned infill drilling program will target the conversion of remaining inferred material up to 250m depth at Baldock to Indicated status, as well as geotechnical and metallurgical data collection to support a full Feasibility Study, inclusive of an onsite processing scenario for all potential ore production.

YINNETHARRA LITHIUM PROJECT

The Yinnetharra project is in the Gascoyne region of Western Australia targeting Lithium mineralisation. Delta Lithium has 1,769km of tenure owned outright and as Farm-in Joint Ventures. A maiden MRE was released in December 2023 of 25.7Mt @ 1% Li₂O. Farm-In Joint Venture Agreements have expanded the prospective stratigraphy to over 80km in length.

Yinnetharra Exploration and Resource Development

Results from infill drilling at the Malinda Prospect and initial Jameson exploration drilling supported the evaluation of an independent MRE prepared by Snowden Optiro. The updated Lithium MRE is 21.9Mt @ 1.0% Li₂O as announced on 31 March 2025.

This updated independent Lithium Mineral Resource Estimate was prepared by Snowden Optiro for the Malinda series, inclusive of the M1 series, M36, M42, M47, M67, M69, M70 pegmatites & the Jameson J1 pegmatite at the Company's 100% owned Yinnetharra Lithium Project in the Gascoyne Region of Western Australia. Delta drilled an additional 624 holes for 112,822m, providing the basis to report the updated Mineral Resource Estimate.

Delta's geological understanding has significantly improved for the Malinda system, following the focused infill drilling program over the last 12 months. As is often the case with infill drill programs to lift resource confidence, the Company has seen a modest decrease in resource tonnes of 15%, to be measured against a much larger increase in resource confidence of 140% in the Indicated category. This tonnage reduction can be explained by much tighter wireframe constraints applied to Indicated material and variations in pegmatite morphology within the previous Inferred boundaries which were defined by much wider spaced drilling.

See Figure 6 below plan view of the Malinda area with pegmatites labelled by Resources category.

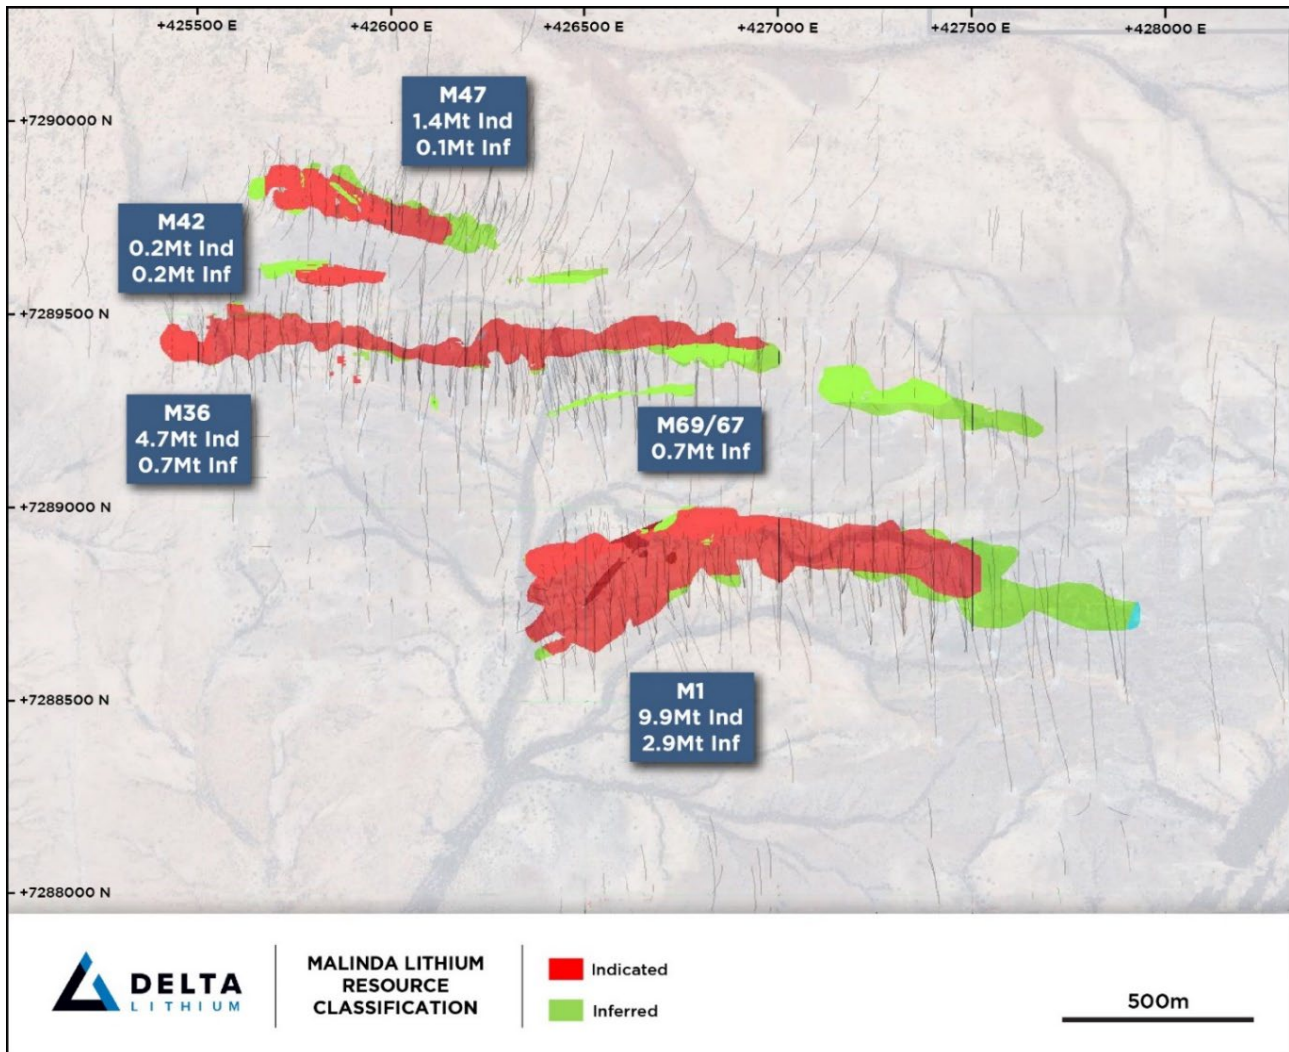

Figure 6: Plan View to Malinda area showing Lithium resource classification

The maiden MRE for the Jameson prospect highlighted the potential for high-grade lithium mineralisation located 20km west of the Malinda Prospect and presents currently as a potential satellite ore source. The J1 pegmatite intruded into the highly deformed fold hinge within the same Leake Springs Metamorphic package that hosts the Malinda resource.

The initial phase of exploration drilling at Jameson had limited access while phase 2 drill planning is underway in coordination with the heritage group to ensure any culturally significant sites are identified and remain undisturbed. Detailed follow up mapping is being completed at Jameson and Jameson South which returned several priority targets that will be drill tested later this year, as identified in Figure 7.

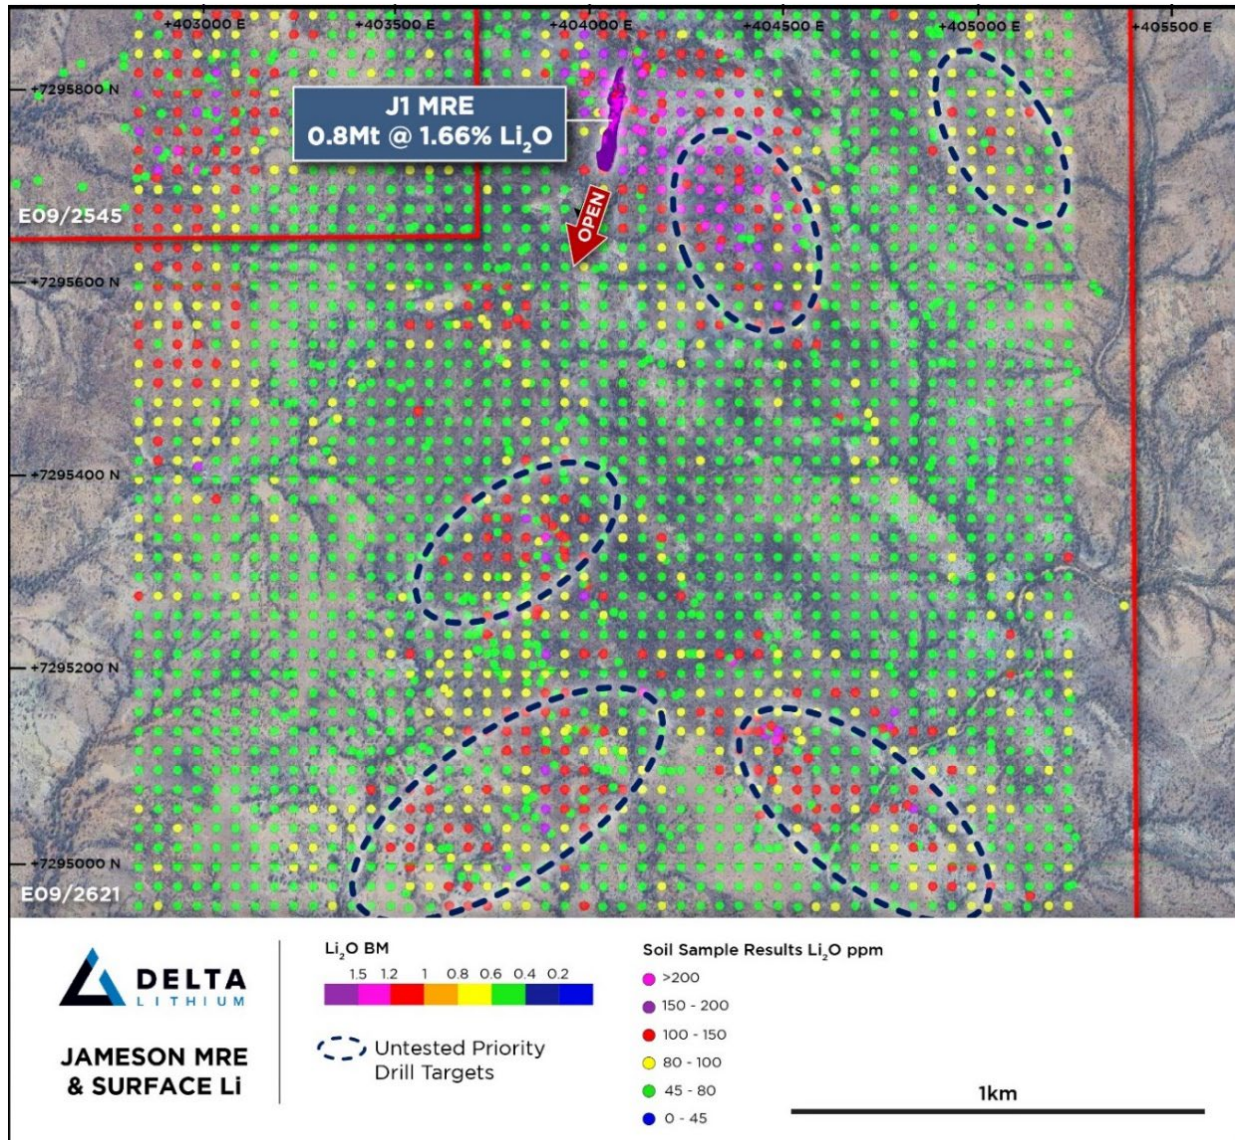

Figure 7: Jameson MRE over surface sampling highlighting extensions and priority drill targets in the area. Anomalous zone to the NW is due to the presence of a fertile Granite and is therefore not a priority drill target

Importantly, Delta delineated 74% of the Mineral Resource at Malinda as Indicated, which allowed work to advance toward feasibility studies while the Company turns its focus to priority regional targets across the 1,700km² package. Drilling is planned to recommence later in the year at Jameson and regional targets.

Table 3: Yinnetharra Lithium & Tantalum Resource March 2025

Tantalum Resource Estimate

During resource definition and infill drill programs, tantalum was intercepted beyond the current Lithium Mineral Resource. As a result, these tantalum rich pegmatites were domained separately to honour the maximum continuity of grade. The tantalum zones are within the same LCT system, generally on the extremities or in a hanging wall position relative to the Lithium mineralisation. This independent tantalum resource could potentially be mined incrementally within the same open pits and add value to the Yinnetharra project.

See Figure 8 long section of Malinda showing the spatial relationship of the tantalum resource in relation to the lithium resource. The Tantalum only 17.5Mt @ 136ppm Ta_2O_5 is independent of the Lithium MRE while the combined total Yinnetharra Tantalum Mineral Resource is estimated at 39.4Mt @ 102ppm Ta_2O_5 for 4,018,800 kg of contained Ta_2O_5 (at a 65ppm cut-off). Tantalum pentoxide Ta_2O_5 (99.95%) sold for an average of approximately USD\$237 per kilogram during the quarter, representing a potential byproduct via conventional gravity separation techniques such as spirals and tabling to produce a saleable concentrate onsite, with modest additions to flowsheet design.

Early investigations into tantalum involved two phases of very high-level sighter metallurgical test work, revealing encouraging recoveries worthy of follow up work. Expansion of this workflow and optimisations advanced, while a tantalum recovery circuit was incorporated into the baseline Malinda flowsheet design.

Table 6: Group Mineral Lithium Resource Estimate Delta Lithium

Yinnetharra Project Development

Delta continued to advance the project with geotechnical and metallurgical studies completed to DFS level on the M1, comprising 58% of the Mineral Resource tonnes. Further work is ongoing on the M36 and M47 pegmatites which comprise the next largest pegmatites at Malinda. Environmental and heritage surveys have been completed over the Malinda area while the Mining Lease application was submitted in November 2024.

Delta plans to continue to develop the Yinnetharra Project on a number of fronts;

- Delta Lithium now has exploration teams completing extensive exploration programs across the 1,700km² prospective package comprising of;
 - Systematic geochemical sampling and mapping over priority areas
 - Further high-resolution geophysical surveys which assisted in the discovery of Jameson
- This focus on regional exploration is aimed to support new resource growth, complementary to Malinda and the wider Yinnetharra Project, and value-accretive to future studies
- An expansive Passive Seismic Survey will be completed in the June quarter to provide important data for ongoing hydrogeological studies across the project area.

CORPORATE

Fundraising and Equity

There were 473,750 performance rights cancelled during the quarter.

Cash and Cash Equivalents

Cash at the end of the quarter was \$64.1M.

ASX Compliance

ASX Listing Rule 5.3.1: Exploration and Evaluation Expenditure during the March 2025 Quarter was \$6.131M. Full details of exploration activity during the March 2025 Quarter are set out in this report.

ASX Listing Rule 5.3.2: There was no substantive mining production and development activities during the March 2025 Quarter.

ASX Listing Rule 5.3.5: Payments to related parties of the Company and their associates during the December Quarter: \$205,000 - The Company advises that this relates to non-executive director's fees and executive directors' salaries and entitlements only. Please see Remuneration Report in the Annual Report for further details on Directors' remuneration.

About Delta Lithium

Delta Lithium (ASX: DLI) is an exploration and development company focused on bringing high-quality, lithium and tantalum bearing pegmatite deposits, located in Western Australia, into production. With current global JORC compliant resources of 36.5Mt@1.1%Li₂O and 54.0Mt@126ppm Ta₂O₅, strong balance sheet and an experienced team driving the exploration and development workstreams, Delta Lithium is rapidly advancing its Projects.

The Mt Ida Project has coincident gold and lithium orebodies and holds a critical advantage over other developers with existing Mining Leases and an approved Mining Proposal. Delta Lithium is pursuing a development pathway to unlock maximum value for shareholders. Delta is currently drilling to extend the high-grade gold resources at Mt Ida.

Delta Lithium also holds the highly prospective Yinnetharra Lithium Project, with exciting lithium discoveries at the Malinda and Jamesons prospects. The Company is currently conducting exploration activities at Yinnetharra with fieldwork commenced for 2025 across our large tenure package, testing additional targets and aiming to build on the Maiden Resource at Malinda.

Competent Person's Statement

Information in this announcement that relates to exploration results is based upon work undertaken by Mr. Shane Murray, a Competent Person who is a Member of the Australasian Institute of Geoscientists (AIG). Mr. Murray has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a 'Competent Person' as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (**JORC Code**). Mr. Murray is an employee of Delta Lithium and consents to the inclusion in this announcement of the matters based on his information in the form and context in which it appears.

Refer to www.deltalithium.com.au for past ASX announcements.

Past Exploration results and Mineral Resource Estimates reported in this announcement have been previously prepared and disclosed by Delta Lithium in accordance with JORC 2012. The Company confirms that it is not aware of any new information or data that materially affects the information included in these market announcements. The Company confirms that the form and content in which the Competent Person's findings are presented here have not been materially modified from the original market announcement, and all material assumptions and technical parameters underpinning Mineral Resource Estimates in the relevant market announcement continue to apply and have not materially changed. Refer to www.deltalithium.com.au for details on past exploration results and Mineral Resource Estimates.

Disclaimer

This release may include forward-looking and aspirational statements. These statements are based on Delta Lithium management's expectations and beliefs concerning future events as of the time of the release of this announcement. Forward-looking and aspirational statements are necessarily subject to risks, uncertainties and other factors, some of which are outside the control of Delta Lithium, which could cause actual results to differ materially from such statements. Delta Lithium makes no undertaking to subsequently update or revise the forward looking or aspirational statements made in this release to reflect events or circumstances after the date of this release, except as required by applicable laws and the ASX Listing

No New Information

This document should be read in conjunction with Delta's other periodic and continuous disclosure announcements lodged with the ASX, which are available on Delta's website.

1.9 Net cash from / (used in) operating activities	(2)	901
2. Cash flows from investing activities		
2.1 Payments to acquire:		
(a) entities (<i>net of cash acquired</i>)	-	-
(b) tenements	-	-
(c) property, plant and equipment	(73)	(209)

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (9 months) \$A'000
	(d) exploration & evaluation (if capitalised)	(6,484)	(25,447)
	(e) investments	-	-
	(f) other non-current assets	-	-
2.2	Proceeds from the disposal of:		
	(a) entities	-	1,500
	(b) tenements	-	-
	(c) property, plant and equipment	-	-
	(d) investments	-	11
	(e) other non-current assets	-	-
2.3	Cash flows from loans to other entities	-	-
2.4	Dividends received (see note 3)	-	-
2.5	Other (provide details if material)	-	-
2.6	Net cash from / (used in) investing activities	(6,557)	(24,145)

3.	Cash flows from financing activities		
3.1	Proceeds from issues of equity securities (excluding convertible debt securities)	-	-
3.2	Proceeds from issue of convertible notes	-	-
3.3	Proceeds from exercise of options	-	784
3.4	Transaction costs related to issues of equity securities or convertible debt securities	-	(6)
3.5	Proceeds from borrowings	-	-
3.6	Repayment of borrowings	-	-
3.7	Transaction costs related to loans and borrowings	-	-
3.8	Dividends paid	-	-
3.9	Principle payments of lease liability	(35)	(101)
3.10	Net cash from / (used in) financing activities	35	677

4.	Net increase / (decrease) in cash and cash equivalents for the period		
4.1	Cash and cash equivalents at beginning of period	70,713	86,686
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(2)	901
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(6,557)	(24,145)

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (9 months) \$A'000
4.4	Net cash from / (used in) financing activities (item 3.10 above)	(35)	677
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	Cash and cash equivalents at end of period	64,119	64,119

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	9,119	15,655
5.2	Call deposits	55,000	55,058
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	-	-
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	64,119	70,713

6. Payments to directors of the entity and their associates

- 6.1 Aggregate amount of payments to related parties and their associates included in item 1
- 6.2 Aggregate amount of payments to related parties and their associates included in item 2

Current quarter \$A'000
205
-

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments

7. Financing facilities available

Note: the term "facility" includes all forms of financing arrangements available to the entity.

Add notes as necessary for an understanding of the sources of finance available to the entity.

	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (Convertible loan)	-	-
7.4 Total financial facilities	-	-

7.5 Unused financial facilities available at quarter end

-

7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.

NIL

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (Item 1.9)	(2)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(6,484)
8.3 Total relevant outgoings (Item 8.1 + Item 8.2)	(6,486)
8.4 Cash and cash equivalents at quarter end (Item 4.6)	64,119
8.5 Unused finance facilities available at quarter end (Item 7.5)	-
8.6 Total available funding (Item 8.4 + Item 8.5)	64,119
8.7 Estimated quarters of funding available (Item 8.6 divided by Item 8.3)	9.89

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:

- Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: N/A

- Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

- Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 23 April 2025

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
