## RCR TO ESTABLISH MORAY POWER FOR MAJOR POWER PROJECT

Diversified Engineering and Infrastructure Company, RCR Tomlinson Ltd (ASX: RCR) today announced that it has established Moray Power Pty Ltd, (“Moray Power”) a wholly owned subsidiary of RCR, to develop a power station in the Galilee Basin in Queensland.

Adani Mining Pty Ltd (“Adani Mining”) would be a foundation customer for the power station to provide approximately 150MWe of electricity to their Carmichael Mine development.

Under a Memorandum of Understanding with Adani Mining, RCR has commenced the Early Contractor Involvement (“ECI”) process for the provision of this power working with Adani Mining in a collaborative open book approach. The ECI is expected to be completed by the end of the first quarter of 2015.

On successful completion of the ECI work, regulatory approvals and agreement on terms, Moray Power and Adani Mining would enter into a Build, Own, Operate and Transfer (“BOOT”) agreement for the power station.

RCR’s Managing Director and CEO, Dr Paul Dalgleish said “We are delighted to have Adani Mining as a foundation customer for this power station and important piece of infrastructure for the Galilee Basin. The proposed power station will utilise environmentally friendly fluidised bed technology to maximise efficiency and provide a very reliable power supply. RCR is the only Australian company with the Intellectual Property capable of building this type of power station and the project will provide an opportunity to leverage our acquisition of the AE&E business in 2010.”
