Two Emerging Sub-Plays Identified in SWISH AOI

Perth, Western Australia – Brookside Energy Limited (ASX: BRK) (OTC Pink: RDEF) (Brookside or the Company) is pleased to provide an update on newly emerging development opportunities within its SWISH Area of Interest (“AOI”) in the world-class Anadarko Basin, Oklahoma.

Recent industry activity has highlighted the potential of two new sub-Plays within the SWISH AOI, targeting previously underdeveloped zones using modern horizontal drilling and completion techniques. Specifically, productive intervals within the Simpson Group sands and the Caney Shale are being evaluated for future development. Leasing activity and encouraging early results from scout drilling across the region support the view that these formations can yield commercial production when developed with the latest generation of horizontal wells.

These developments further enhance the appeal of this region’s “stacked pay” potential — a key attribute of leading resource plays where multiple hydrocarbon-bearing formations can be accessed from a single surface location, significantly improving capital efficiency and long-term recovery.

Oklahoma’s largest and most successful independent E&P company, Continental Resources, is actively advancing these plays, leading a wave of renewed interest in what is already some of the most sought acreage in this part of the Anadarko Basin. Notably, Kolibri Energy (NASDAQ: KGEI) has demonstrated consistent success in the Caney Shale formation approximately 60 miles to the southeast in the Tishomingo Field, further validating the commerciality and productivity of this reservoir.

In addition to compelling geology, this portion of the Anadarko and Ardmore Basins offers exceptional access to markets, with extensive existing oil and gas pipeline infrastructure, gas processing capacity, and refining facilities — a critical advantage in terms of reducing development costs, enhancing pricing, and accelerating speed to market.

Brookside holds a strategic acreage position in the SWISH AOI and is closely monitoring this activity with a view to potentially expanding its development program into these emerging zones as the plays mature and early commercial success is confirmed.

Brookside’s Managing Director, David Prentice said:

"This is an exciting development for Brookside as we continue to unlock value across our SWISH acreage. The identification of these new sub-Plays provides additional upside potential and reinforces the Anadarko Basin’s position as a premier onshore oil and gas province. We’re watching the progress closely and positioning ourselves to capitalise on these new opportunities."

– ENDS –

ABOUT BROOKSIDE ENERGY LIMITED

Brookside is an Australian public company listed on the Australian (ASX: BRK), and USA (OTC Pink: RDFEF) stock exchanges. The Company was founded in 2015, to focus on the mid-continent region of the US, where our deep and valued relationships enable us to work with local communities to ensure sustainable growth and value creation through the safe and efficient development of energy assets. Focused on exploitation not exploration, the Company generates shareholder value through a disciplined portfolio approach to the acquisition and development of oil and gas assets and the leasing and development of acreage opportunities. The Company's wholly owned US subsidiary and manager of operations, Black Mesa Energy, LLC (Black Mesa), is led by a team of experienced and dedicated oil and gas professionals with decades of experience in the US onshore oil and gas sector with specific focus on the mid-continent region. Black Mesa works to identify opportunities that meet the Company's investment hurdles and executes the acquisition and subsequent development of these projects.

GLOSSARY

APO WI	After pay-out working interest
AFIT	After Federal Income Tax
AOI	Area of Interest
BBL	Barrel
BFIT	Before Federal Income Tax
BOE	Barrels of Oil Equivalent
BOEPD	Barrels of Oil Equivalent Per Day
BOPD	Barrels of Oil Per Day
BPD	Barrels Per Day
COPAS	Council of Petroleum Accountants Societies
Development Unit or DSU	Development Unit or drilling spacing unit is the geographical area in which an initial oil and/or gas well is drilled and produced from the geological formation listed in a spacing order. The spacing unit communitizes all interest owners for the purpose of sharing in production from oil and/or gas wells in the unit. A spacing order establishes the size of the unit; names the formations included in the unit; divides the ownership of the unit for the formations into the "royalty interest" and the "working interest;" Only one well can be drilled and completed in each common source of supply. Additional wells may be drilled in a Development Unit, but only after an Increased Density Order is issued by the Oklahoma Corporation Commission.
Force Pooled	The Oklahoma Corporation Commission is authorized to establish well spacing and drilling units covering any common source of supply of hydrocarbons, or any prospective common source of supply. Once the unit is established, the Commission can force pool the interests of all the owners who own interests in that unit and who have not voluntarily joined in the development of that unit.
IP	Initial Production
MBOE	1,000 barrels of oil equivalent
Mcf	1,000 cubic feet
MMBOE	1,000,000 barrels of oil equivalent
NPV ₁₀	The net present value of future net revenue before income taxes and using a discount rate of 10%.
NRI	Net Revenue Interest
PDP	Proved Developed Producing Reserves
Pooling Agreements	The pooling agreements facilitate the development of oil and gas wells and drilling units. These binding pooling agreements are between the Company and the operators
Prospective Resource	Prospective Resources are those quantities of petroleum which are estimated, on a given date, to be potentially recoverable from undiscovered accumulations.
PUD	Proved Undeveloped Reserves
Reserve Categories	These reserve categories are totalled up by the measures 1P, 2P, and 3P, which are inclusive of all reserve types: <ul style="list-style-type: none"> • "1P reserves" = proven reserves (both proved developed reserves + proved undeveloped reserves). • "2P reserves" = 1P (proven reserves) + probable reserves, hence "proved AND probable." • "3P reserves" = the sum of 2P (proven reserves + probable reserves) + possible reserves, all 3Ps "proved AND probable AND possible."
STACK	Sooner Trend Anadarko Basin Canadian and Kingfisher Counties – oil and gas play in the Anadarko Basin Oklahoma
SCOOP	South Central Oklahoma Oil Province - oil and gas play in the Anadarko Basin Oklahoma
SWISH AOI	Description of Brookside's Area of Interest in the SCOOP Play
TVD	True Vertical Depth
Working Interest	Percentage of ownership in a lease granting its owner the right to explore, drill and produce oil and gas from a tract of property. Working interest owners are obligated to pay a corresponding percentage of the cost of leasing, drilling, producing, and operating a well or unit
