NATIONAL RETAILER TO EXCLUSIVELY USE AERISGUARD BIOLOGICAL COIL REMEDIATION ACROSS HVAC PLANT SERVICED BY GROSVENOR ENGINEERING GROUP

Grosvenor Engineering Group, a leading HVAC mechanical services firm has now become a certified Aeris Environmental Ltd (Aeris) applicator and will exclusively implement the AerisGuard 'clean, green' solutions across all sites that it services for a high profile national retailer.

Driving this initiative is Aeris' unique ability to replace corrosive and toxic chemicals with the AerisGuard remediation solution, which is **environmentally-friendly, uniquely effective, and meet the highest standards, whilst extending the life of the HVAC coils, alongside material improvements in the carbon footprint, system efficiency, indoor air quality, and performance.**

Peter Bush, Aeris' CEO said: "It is a privilege to partner with the Grosvenor Engineering Group to deliver world class solutions that are developed and manufactured in Australia to leading customers. Aeris is pleased to note that many organisations across Australia, New Zealand and the Asia Pacific region are now adopting the Company's advanced environmental HVAC solutions."

The AerisGuard coil remediation range has now also been specified by a large scale health authority for ongoing use in its facilities across a large Australian state, which adds to the momentum for widespread adoption of the AerisGuard solutions.

Aeris is in discussions with a number of leading International specialist wholesalers to extend the availability of its service and maintenance product range to make its technology more accessible to all market segments. Sales into this channel are likely to be significant and will provide additional momentum for the uptake of Aeris' SmartENERGY solution.

The Australian marketplace for cleaning and remediation chemicals is believed to be in excess of \$30 million per annum and Aeris is singularly placed to afford higher performance with environmentally friendly technology. In the near-term, the Company will be launching additional products with the aim of driving market leadership both domestically and across the Asia Pacific region.

Aeris Environmental Ltd

Peter Bush
Chief Executive Officer

About Grosvenor Engineering Group

Grosvenor Engineering Group is a leading provider of proactive asset management services across HVAC equipment, Fire Services and Electrical Systems.

Grosvenor has 11 offices nationally and maintains more than 15,000 sites for over 3,000 clients across Australia.

A uniquely proactive and data driven approach provides clients with superior outcomes in terms of tenant comfort, improved reliability, lower total cost of ownership and better building Return On Investment (ROI).

Grosvenor's custom built asset management system is industry leading and is designed to deliver to clients individual requirements, including real-time reporting with flexibility, detail and accuracy allowing more effective management of assets.

About Aeris Environmental

Aeris Environmental Ltd develops, manufactures and markets patented, environmentally friendly technology solutions that address the global megatrends of energy efficiency, healthier air, food safety, water quality, and long-term materials protection, with core guiding principles of 'clean, green, protect'.

Smart Enzymes and Coatings provide long-term remediation and prevention of mould, bacteria growth, corrosion and improved hygiene, with OEM, consumer and technical applications.

SmartENERGY provides dramatic and proven energy savings in the range of 19% to 33%, alongside documented improvement in system efficiency (54% to 289% improvement in airflow and up to 40% in coil efficiency) and independently-validated indoor air quality across all air-conditioning and refrigeration systems, with proven immediate cash flow savings.
