

## QUARTERLY ACTIVITIES REPORT

Peregrine Gold Limited (ASX: PGD) (“Peregrine” or “Company”) is pleased to present the Activities Report for the Quarter ended 31 March 2023.

### RECENT HIGHLIGHTS

- Fully Underwritten Entitlement Issue raised over A\$3M
- Diamond drilling contractor secured for the Newman Gold Project
- Airborne EM survey contractor secured for the Mallina Gold Project
- A third core drill hole (Hole C) into the auriferous quartz-ironstone vein at the Peninsula Prospect returns **1,797 g/t Au** and **374 g/t Ag** over 29cm
- Anomalous lithium, tantalum and niobium reported during a reconnaissance stream sediment sampling programme at Pilgangoora

### EXPLORATION ACTIVITIES

Peregrine Gold Limited (“Peregrine” or the “Company”) (ASX: PGD) is pleased to provide an update on its exploration activities during the quarter ended 31 March 2023 at its portfolio of projects.

#### Newman Gold Project

##### Peninsula Prospect

The Company performed a third core drill hole (C) into the auriferous quartz-ironstone vein was sent for analysis and returned spectacular gold and silver grades. The core was drilled approximately 10 cm below the original surface of the quartz vein to a depth of 29 cm with 100% recovery. The core comprises quartz-ironstone breccia with zones of massive brown ironstone.

**Figure 1: Core C long section**

A fourth core (D) was drilled approximately 125 m west of cores A, B and C. This core was drilled immediately adjacent to rock sample 22KR 87 which returned 0.24 g/t Au and 1.1 g/t Ag (ASX: PGD 15 December 2022).

Core D was drilled from surface to a depth of 40cm with 37cm recovered (92.5% recovery) and comprises a quartz-ironstone breccia with late-stage ironstone veinlets at the base of the interval.

## Diamond Drilling Contractor Secured

The Company has entered into an agreement with West Core Drilling Pty Ltd for diamond drilling service at the Newman Gold Project. The programme will drill beneath the auriferous quartz veins at both Peninsula and Birdsnest prospects.

The drilling programme is planned for 500-1,000 metres and is expected to take up to four weeks to complete.

## Pilgangoora North Lithium Project

During the quarter the Company received results from its recent reconnaissance stream sediment sampling programme.

The stream sediment sampling programme returned anomalous Li, Ta, Nb and Cs in numerous catchments within the project area. Of significance, several anomalous catchments have been identified with no reported pegmatite outcrop and no reported historical rock sampling. The stream sediment sampling programme also returned widespread gold anomalism.

## Mallina Gold Project

The Company entered into an agreement with Xcalibur Aviation (Australia) Pty Ltd to perform an EM survey at Mallina. The EM survey is planned to cover 845-line kilometres, with data acquisition expected to take approximately 1 week.

## Upcoming Results and Future Works Programmes

- Diamond drilling at the Newman Gold Project to commence in early May
- Costean programme currently underway at Peninsula, Birdsnest and Tin Can prospects over gold in soil anomalies
- Five Auriferous core and rock samples from the Peninsula and Birdsnest prospects were submitted to CSIRO at Kensington, Perth for mineralogical study. The objective is primarily to understand the relationship between gold and silver mineralisation and whether the mineralisation is primary, secondary or both
- Results from a mineralogical study by CSIRO are expected next quarter

## CORPORATE

### Entitlement Issue

The Company undertook a fully underwritten 1 for 6 non-renounceable entitlement issue to Peregrine shareholders with a record date of 17 March 2023 at an issue price of \$0.38 per share ("**New Share**") together with 1 free attaching option for every 2 New Shares applied for and issued, exercisable at \$0.55 on or before 31 March 2026 ("**New Option**").

The funds raised under the Entitlement Issue will be used for exploration activities at the Company's portfolio of Pilbara projects, including its Newman Gold Project and Mallina Gold Project as well as general working capital purposes. For specifics on the use of funds please refer to section 3.1 of the Prospectus dated 3 March 2023.

Subsequent to period end the results of the Entitlement Issue were announced and Entitlement Shares and Options were issued. In total 7,994,522 New Shares and 4,997,212 New Options were issued, raising approximately \$3,037,918 (before costs).

The Entitlement Offer was fully underwritten by Argonaut PCF Limited. The Underwriter subsequently subscribed for the remaining 4,016,041 Shares under the shortfall in accordance with Section 2.7 of the Prospectus issued in relation to the Offer.

## Project Locations Map

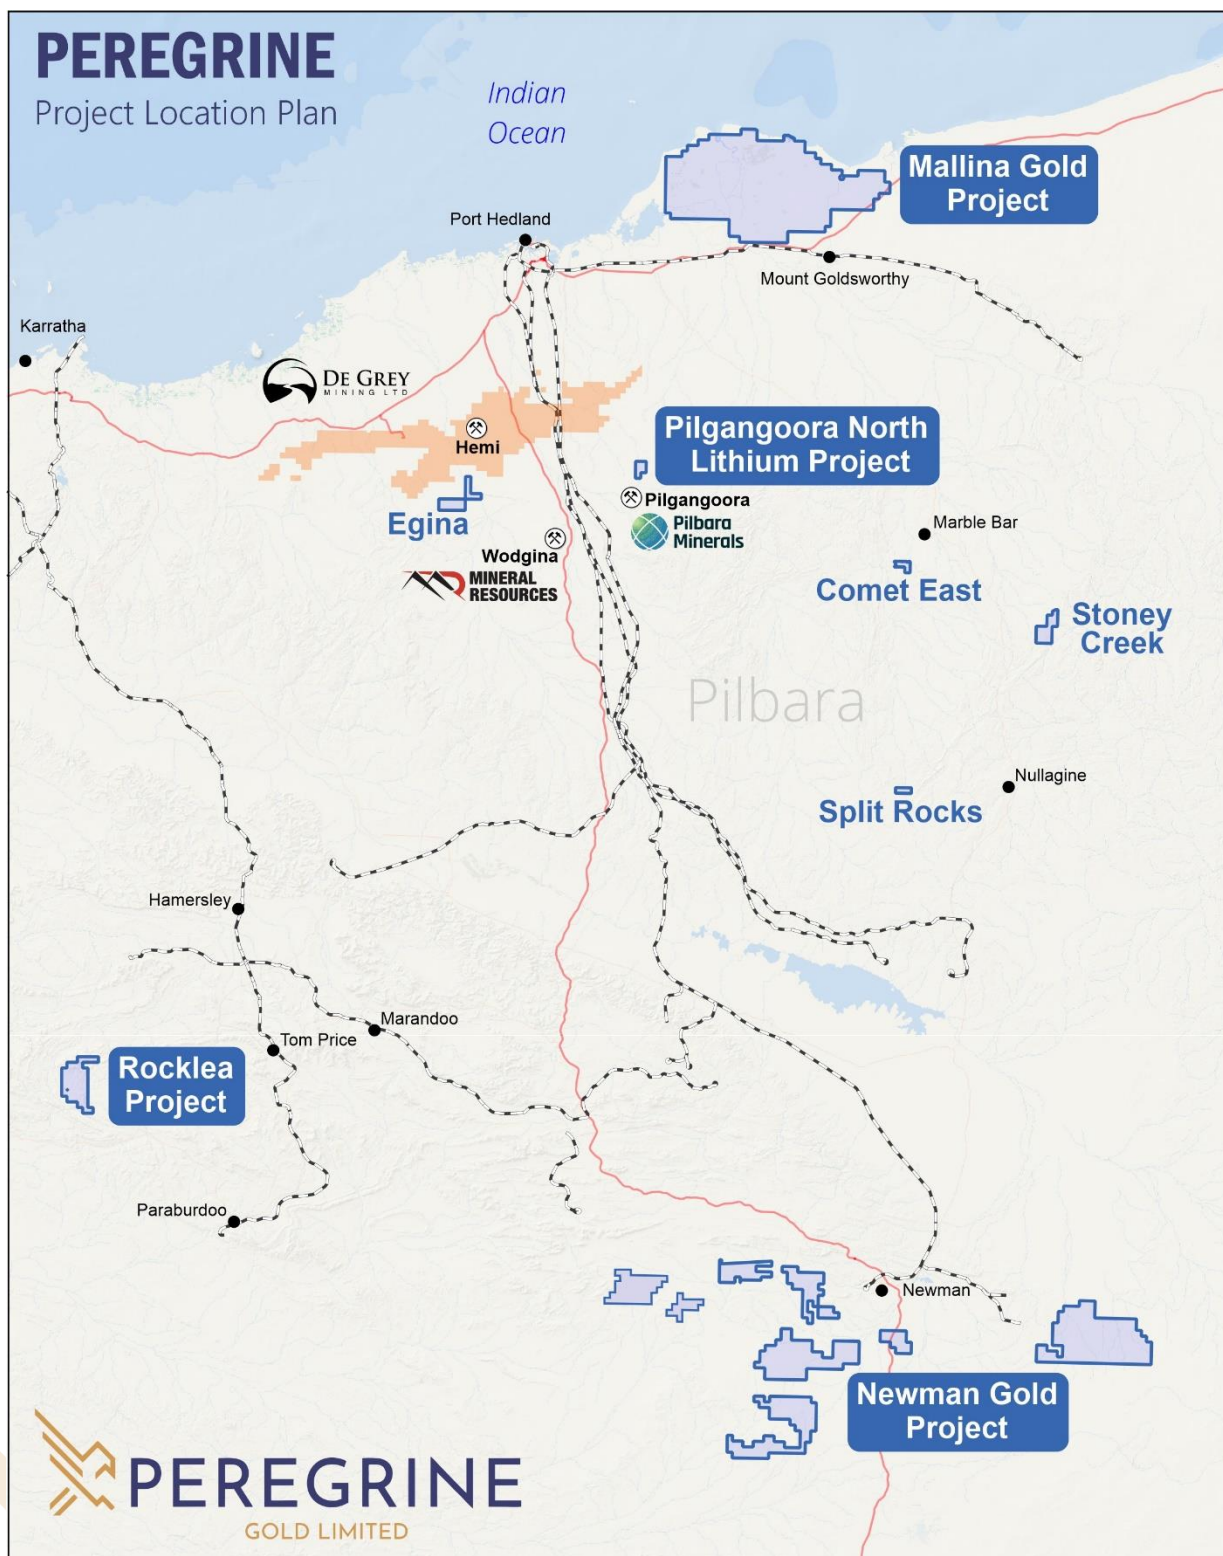

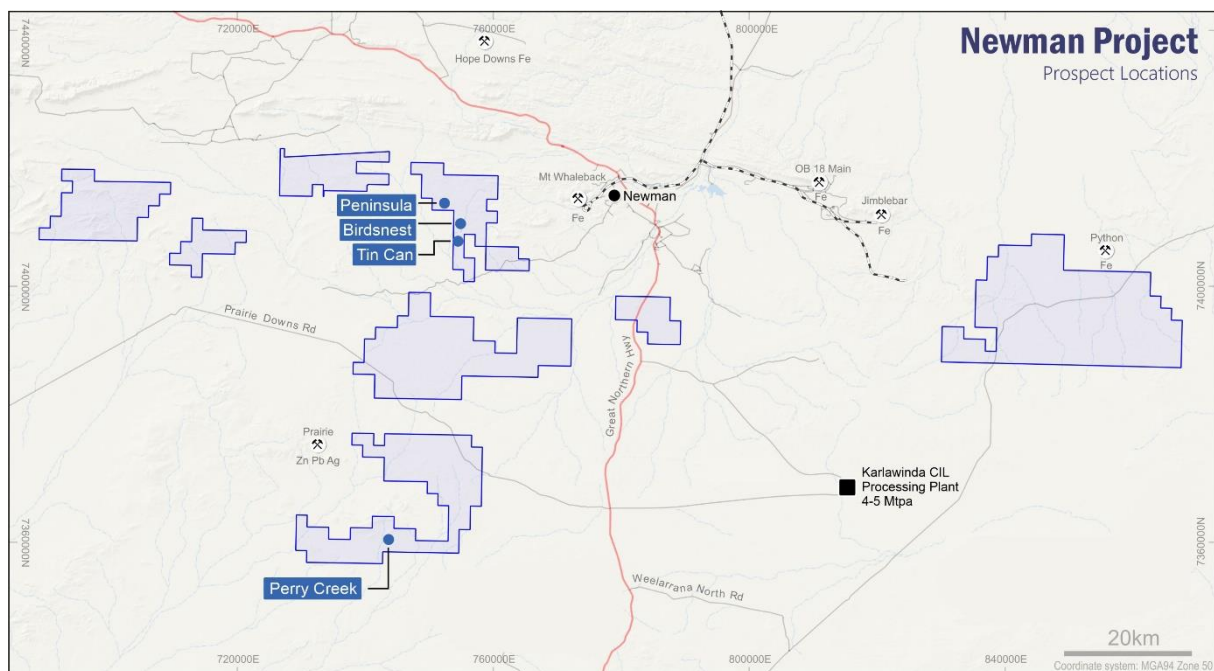

Figure 2: Peregrine Gold Limited project locations

### About the Newman Gold Project

The Company holds a 100% interest in the Newman Gold Project (formerly Pilbara Gold Project) consisting of fourteen (14) granted exploration licences (and eight applications) covering a total of 1,894km<sup>2</sup> located on the Sylvania Inlier in the south west of the prolific Pilbara region. The project is situated approximately 30km south and west of Newman and approximately 1,000km north-north east of Perth at the southern edge of the Hamersley area of Western Australia (Figure 3). The tenements are neighbouring Capricorn Metal Limited's Karlawinda Gold Project ("Karlawinda").

The tenement package comprises predominately greenfields tenements prospective for gold that historically have been underexplored and/or have had a focus on other metals such as iron ore. The Company considers that the tenements may contain additional gold prospects and warrant further investigation.

**Figure 3: Newman Gold Project tenement locations**

### About the Mallina Gold Project

The Mallina Gold Project (“**Mallina**”) comprises four tenements (three granted, one application) covering approximately 1,728km<sup>2</sup> of the Mallina Basin in the Northern Pilbara of Western Australia (Figure 4). De Grey Mining Limited’s Hemi deposit is located approximately 120km to the southwest of the NFR tenements with historical geophysical data suggesting that the majority of the tenement package is underlain by the Mallina Formation. Mallina comprises one of the largest tenement holdings assembled within the Mallina Basin, of which three of four tenements were applied for prior to the discovery of Hemi. Hemi is identified as an intrusion hosted gold deposit which is a new style of gold mineralisation in the Pilbara region. These intrusions are hosted in the Mallina Formation within the Mallina Basin, part of the De Grey Superbasin.

There has been limited drilling and historical gold exploration conducted over the Mallina Gold Project. The limited geological understanding of Mallina has been derived through geophysical data with some previous interpretation utilised to obtain an overall understanding of the geology of the area.

**Figure 4: Mallina Gold Project tenement locations**

### About the Rocklea Project

Rocklea was acquired through Peregrine’s purchase of New Frontier Resources Pty Ltd (“**NFR**”) (refer ASX announcement released 30 August 2021).

Rocklea is situated west of the Rocklea Dome and dominated by the Hardey Formation, Bongal Formation and the Pyradie Formation with numerous northwest trending faults cutting across the tenements. The 2021 sampling programme was mostly completed over the Pyradie Formation and the possible structural contact with the underlying Boongal Formation. The Pyradie Formation is a geological formation which is not known to be auriferous and is dominated by basaltic rocks with narrow northerly trending quartz-ironstone veins which can be traced discontinuously for several hundred metres.

### About the Pilgangoora North Lithium Project

The project is situated in a favourable geological setting which hosts numerous lithium occurrences in addition to tin, tantalum, gold and lead. Moreover, a sequence of ultramafic rocks mapped within the licence has the potential to host nickel and copper mineralisation. E45/5775 is approximately five kilometres along strike from Pilgangoora.

There has been limited drilling and historical exploration conducted over E45/5775. The limited geological understanding has been derived through geophysical data with some previous interpretation utilised to obtain an overall understanding of the geology of the area. A review of all past work has been carried out. Geological data compiled by the Department of Mines, Industry Regulation and Safety (“DMIRS”) on Critical Minerals reveals the significant extent of pegmatitic material in a broad corridor spanning across E45/5775 to the north.

#### **COMPETENT PERSONS STATEMENT**

The information in this report which relates to exploration and drilling is compiled by George Merhi, a Competent Person who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Merhi is a Technical Director of Peregrine Gold Limited and a holder of shares, performance shares and options in Peregrine Gold Limited. Mr Merhi has sufficient experience that is relevant to the styles of mineralisation and types of deposit under consideration, and to the activity being undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). Mr Merhi consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

#### **FORWARD LOOKING STATEMENTS**

Statements regarding plans with respect to Peregrine's project are forward-looking statements. There can be no assurance that the Company's plans for development of its projects will proceed as currently expected. These forward-looking statements are based on the Company's expectations and beliefs concerning future events. Forward looking statements are necessarily subject to risks, uncertainties and other factors, many of which are outside the control of the Company, which could cause actual results to differ materially from such statements. The Company makes no undertaking to subsequently update or revise the forward-looking statements made in this announcement, to reflect the circumstances or events after the date of that announcement.

*This ASX Announcement has been approved in accordance with the Company's published continuous disclosure policy and authorised for release by the Company's Board.*
