

ASX ANNOUNCEMENT 24 December 2024

Farm-In and Joint Venture Agreement at Bresnahan

HIGHLIGHTS

- Dreadnought has finalised a binding Farm-in and Joint Venture agreement with a subsidiary of Teck Resources Limited ("Teck") a leading Canadian resource company.
- The Farm-In and Joint Venture agreement is in respect of tenement E52/4142, part of Dreadnought's Bresnahan Project.
- The key terms include (see also later in this announcement):
 - First Earning Period: Teck may earn a 60% interest in the tenement by sole funding \$1,250,000 of exploration within 4 years.
 - Second Earning Period: Teck may earn an additional 20% interest in the tenement by sole funding \$2,000,000 of exploration within 4 years.
 - Upon completion of Phase 2, Teck and Dreadnought would form an 80/20 Joint Venture.
- The Farm-In and Joint Venture is aligned with Dreadnought's focus on gold at Mangaroon and on becoming a self-funded explorer.

Dreadnought Resources Limited ("Dreadnought") is pleased to announce that a Farm-In and Joint Venture agreement has been executed in relation to part of the Bresnahan Project located in the Ashburton region of WA.

Dreadnought's Managing Director, Dean Tuck, commented: "We are very pleased to have found a partner like Teck to advance exploration at Bresnahan. Teck is focused on responsibly providing the metals essential for global development and the energy transition. It has been a pleasure working with Teck to get to this point and we look forward to building upon our relationship as we are both committed to exploration and to discovering the metals needed now and in the future."

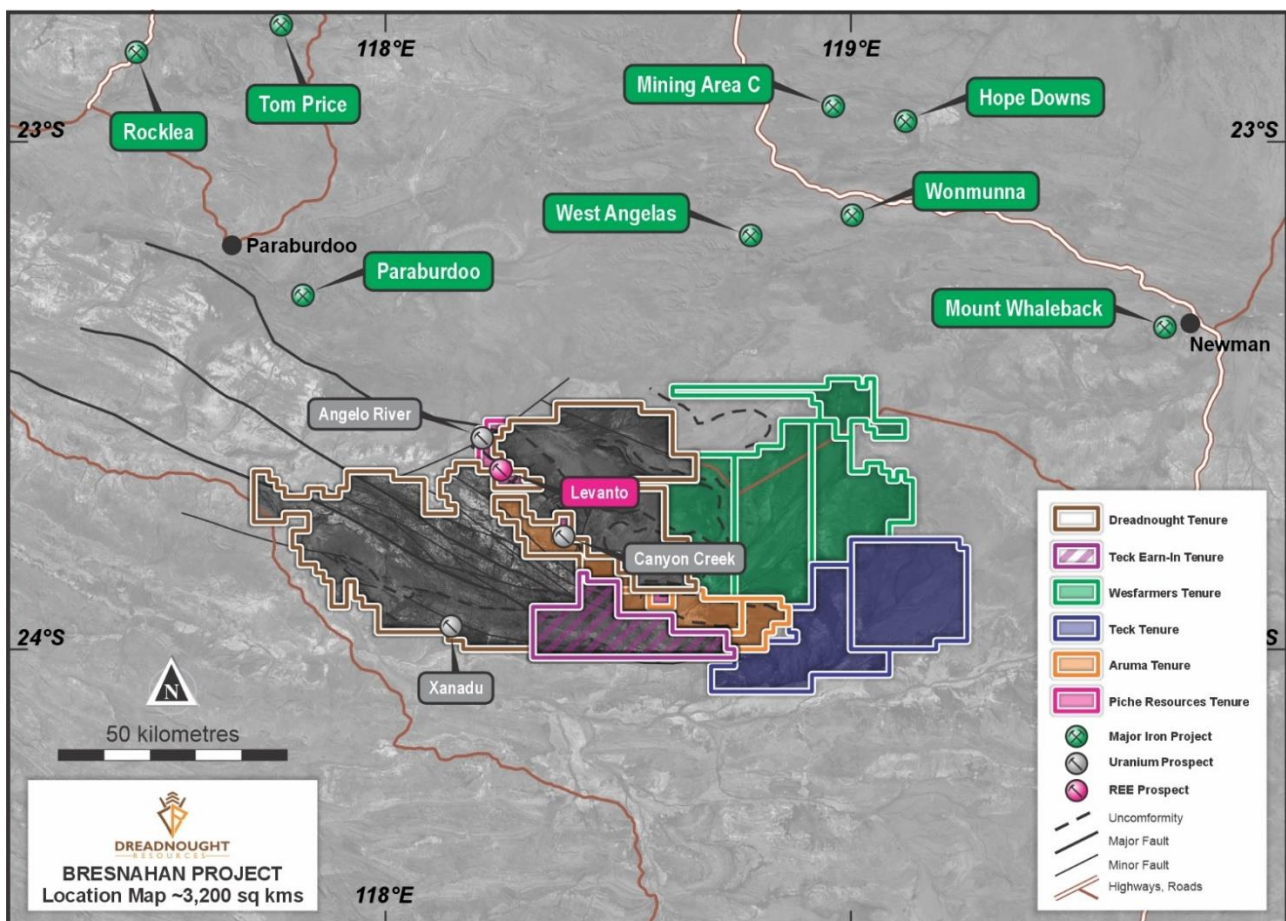

Figure 1: Map showing the location of the Farm-in and Joint Venture tenement in relation to the wider Bresnahan Project and major projects within the region.

Details of the Transaction

Tenement:

- E52/4142.

Farm-In Terms:

- First Earning Period: Teck may earn a 60% interest in the tenement by sole funding \$1,250,000 in expenditure within 4 years including a firm commitment of \$250,000 within the first 18 months.
- Second Earning Period: upon completing the First Earn In, Teck may earn an additional 20% interest in the tenement by sole funding \$2,000,000 of exploration within 4 years.
- Upon completion of Phase 2, Teck and Dreadnought would form an 80/20 Joint Venture.

Additional terms:

- Teck to manage all exploration.
- If Teck fails to complete the First Earning Period, then the tenement will revert to Dreadnought 100%.

Dreadnought's planned transition to self-funded explorer

	Dec 2024 Quarter	Mar 2025 Quarter	Jun 2025 Quarter	Sep 2025 Quarter	Dec 2025 Quarter
Star of Mangaroon Open Pit	Resource	Scoping Study	Mining, Haul, Process Agreement	Approvals and Commencement of Production	
Additional Resource Drilling		Granted Mining Leases including: Star of Mangaroon underground, Popeye, Pritchards, Lead			
Gold Exploration	Target Generation Bordah and High Range		Target Definition Bordah and High Range		Exploration Drilling

For further information please refer to previous ASX announcements:

- 26 October 2022 Tenement Acquisitions
- 8 February 2023 Bresnahan Emerging as a Light & Heavy Rare Earth Province
- 4 October 2023 Bresnahan Acquisition & Consolidation
- 26 October 2023 Significant HREE, Gold & Uranium Potential
- 7 March 2024 Significant Untested Uranium Targets

~Ends~

This announcement is authorised for release to the ASX by the Board of Dreadnought.

Cautionary Statement

This announcement and information, opinions or conclusions expressed in the course of this announcement contains forecasts and forward-looking information. Such forecasts, projections and information are not a guarantee of future performance, involve unknown risks and uncertainties. Actual results and developments will almost certainly differ materially from those expressed or implied. There are a number of risks, both specific to Dreadnought, and of a general nature which may affect the future operating and financial performance of Dreadnought, and the value of an investment in Dreadnought including and not limited to title risk, renewal risk, economic conditions, stock market fluctuations, commodity demand and price movements, timing of access to infrastructure, timing of environmental approvals, regulatory risks, operational risks, reliance on key personnel, reserve estimations, native title risks, cultural heritage risks, foreign currency fluctuations, and mining development, construction and commissioning risk.

Competent Person's Statement – Mineral Resources

The information in this announcement that relates to the Star of Mangaroon Mineral Resource is based on information compiled by Mr. Paul Payne, a Competent Person who is a Fellow of the Australasian Institute of Mining and Metallurgy. Mr. Payne is a full-time employee of Payne Geological Services Pty Ltd and is a shareholder of Dreadnought Resources Limited. Mr. Payne has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity that is being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves'. Mr. Payne consents to the inclusion in the announcement of the matters based on his information in the form and context that the information appears.

Competent Person's Statement – Exploration Results

The information in this announcement that relates to geology, exploration results and planning, and exploration targets was compiled by Mr. Dean Tuck, who is a Member of the AIG, Managing Director, and shareholder of the Company. Mr. Tuck has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Tuck consents to the inclusion in the announcement of the matters based on the information in the form and context in which it appears.

The Company confirms that it is not aware of any further new information or data that materially affects the information included in the original market announcements by Dreadnought Resources Limited referenced in this report and in the case of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. To the extent disclosed above, the Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

RESOURCES SUMMARY

Yin Ironstone Complex – Yin, Yin South, Y2, Sabre Measured, Indicated and Inferred Resources

Table 1: Summary of Yin Resources at 0.20% TREO Cut-off.

Resource Classification	Geology	Resource (Mt)	TREO (%)	Nd ₂ O ₃ +Pr ₆ O ₁₁ (kg/t)	NdPr:TREO Ratio (%)	Contained TREO (t)	Contained Nd ₂ O ₃ +Pr ₆ O ₁₁ (t)
Measured	Oxide	2.47	1.61	4.6	29	39,700	11,400
Measured	Fresh	2.70	1.09	3.0	27	29,500	8,100
Measured	Subtotal	5.17	1.34	3.8	28	69,300	19,500
Indicated	Oxide	13.46	1.06	3.1	29	142,600	41,000
Indicated	Fresh	7.67	0.95	2.8	29	72,800	21,300
Indicated	Subtotal	21.13	1.02	3.0	29	215,400	62,300
Inferred	Oxide	1.51	0.75	1.9	25	11,200	2,800
Inferred	Fresh	2.17	0.75	2.1	28	16,300	4,500
Inferred	Subtotal	3.68	0.75	2.0	27	27,600	7,300
Total	Oxide	17.44	1.11	3.2	29	193,600	55,300

Gifford Creek Carbonatite – Inferred Resource

Table 2: Summary of the Gifford Creek Carbonatite Inferred Resource at various % TREO Cut-offs.

Cut-Off (%TREO)	Resource (Mt)	TREO (%)	NdPr:TREO (%)	Nb ₂ O ₅ (%)	P ₂ O ₅ (%)	TiO ₂ (%)	Sc (ppm)	Contained TREO (t)	Contained Nb ₂ O ₅ (t)
0.90	5.73	1.18	21	0.25	3.8	5.4	92	67,500	14,500
0.70	10.84	1.00	21	0.22	3.5	4.9	85	108,000	23,700
0.50	20.55	0.80	21	0.15	3.0	3.9	68	164,600	31,100
0.30	45.87	0.58	21	0.10	2.7	3.0	52	265,300	44,800

Investment Highlights

Mangaroon Au, Nb-REE, Ni-Cu-PGE Project (100%)

Mangaroon covers ~5,300kms² and is located 250kms south-east of Exmouth in the Gascoyne Region of WA. At Mangaroon, Dreadnought has consolidated areas of outcropping high-grade gold and historical high grade gold mines including the historic Star of Mangaroon and Diamond gold mines. Exploration at the Money Intrusion has identified high tenor Ni-Cu-PGE sulphides. In addition, Mangaroon has emerged as a globally significant, rapidly growing, potential source of critical minerals. Highlights include:

- An independent Resource for Yin Ironstones Complex of 29.98Mt @ 1.04% TREO over only ~4.6kms – including a Measured and Indicated Resource of 26.3Mt @ 1.04% TREO (ASX 30 Nov 2023).
- Discovery of the globally significant, Nb-REE-P-Ti-Sc enriched Gifford Creek Carbonatite (ASX 7 Aug 2023).
- A large, independent initial Resource of 10.84Mt @ 1.00% TREO at the Gifford Creek Carbonatites, containing a range of critical minerals including rare earths, niobium, phosphate, titanium and scandium (ASX 28 Aug 2023).

Kimberley Ni-Cu-Au Project (80/100%)

The project is located only 85kms from Derby in the West Kimberley region of WA and was locked up as a Defence Reserve since 1978.

The project has outcropping mineralisation and historical workings which have seen no modern exploration.

Results to date indicate that there may be a related, large scale, Proterozoic Cu-Au VMS system at Tarraji-Yampi, similar to DeGrussa and Monty in the Bryah Basin.

Central Yilgarn Gold, Base Metals, Critical Minerals & Iron Ore Project (100%)

Central Yilgarn is located ~190km northwest of Kalgoorlie in the Yilgarn Craton. The project comprises ~1,400kms² covering ~150km of strike along the majority of the Illaara, Yerilgee, South Elvire and Evanston greenstone belts. Central Yilgarn is prospective for typical Archean mesothermal lode gold deposits, VMS base metals, komatiite-hosted nickel sulphides and critical metals including Lithium-Cesium-Tantalum.

Prior to consolidation by Dreadnought, the Central Yilgarn was predominantly held by iron ore explorers and remains highly prospective for iron ore.

Bresnahan HREE-Au-U Project (100%)

Bresnahan is located ~125km southwest of Newman in the Ashburton Basin. The project comprises ~3,700kms² covering over 200kms strike along the Bresnahan Basin / Wyloo Group unconformity. Bresnahan is prospective for unconformity related heavy rare earth (“HREE”) deposits similar to Browns Range HREE deposits, unconformity uranium (“U”) deposits and mesothermal lode gold similar to Paulsens Au-Ag-Sb deposits along strike.

Prior to consolidation by Dreadnought, the Bresnahan Basin had been successfully explored for unconformity uranium with limited exploration for mesothermal gold. Bresnahan is a first mover opportunity to explore for unconformity HREE.
