

US SMALL CAPS ACTIVE ETF

REASONS TO CONSIDER

Distinctive

Collective Intelligence investment philosophy interprets signals differently from peers resulting in distinctive portfolios offering diversification.

High Growth Potential

Access a robust US economy where US SMIDs are historically undervalued relative to large caps.

Broad Investment Process

Technology driven investment process values thousands of stocks daily to pick only the most undervalued for the SVNPN portfolio.

The Savana US Small Caps strategy was implemented on the ASX as of the 7th of November 2024. Total returns are calculated in Australian dollars based on the net asset value per unit. Returns are after fees and costs with dividends reinvested. Returns for periods greater than one year are annualised. Past performance is not a guarantee of future outcomes. Investment values can fluctuate due to market conditions, and there is a risk of losing your principal. Always assess your financial objectives and consult a professional advisor before making investment decisions.

Note that, prior to the 7th of November 2024, the ETF traded under a separate name and strategy, the FATP Global High Conviction Hedge Fund (ASX:FATP). This strategy was replaced by the Savana US Small Caps strategy, and the ASX ticker was updated accordingly from "FATP" to "SVNP". For performance information regarding the previous FATP strategy, please see [here](#).

Note also that, prior to listing on the 7th of November, the Savana US Small Caps strategy was run as a contemporaneous paper-trade fund from July 2022. This simulated the performance of the SVNPN's investment strategy, but with no actual money invested. For further information on the performance of this simulated fund, please see [here](#).
