

ASX Announcement  
5 May 2022

## COOGEE WEST AIRCORE DRILLING PROGRAMME

Javelin Minerals Limited (**ASX: JAV**) ("**Javelin**" or the "**Company**") provides an update on its aircore (AC) drilling programme at its Coogee Project ("Coogee") near Kalgoorlie in Western Australia (Figure 1). Coogee is located approximately 55 kilometres south-east of Kalgoorlie and immediately to the west of Silver Lake Resources' Randall's Mill (Figure 2).

Javelin's AC drilling programme at Coogee West targeted areas where historical AC drilling in 2015 by Ramelius Resources intersected anomalous bottom of hole of gold values up to 0.47g/t along a 3km gold trend. An encouraging shallow gold intercept of 6m @ 0.48g/t Au from 28m has been outlined by the Goldfields/Lefroy JV immediately south of Javelin's E 26/177 tenement boundary, which adjoins the 3km gold zone (Figure 1).

A total of 43 aircore holes have been drilled for 686 metres. Holes have ranged in depth from 4 metres to 40 metres.

Javelin's AC drilling programme has been curtailed by several rain events making the conditions on Lake Lefroy difficult, resulting in the drill rig and support vehicles not able to traverse the lake surface and the Company has therefore decided not to undertake any further drilling for the time being.

Drill samples collected from the AC drilling will be dispatched to the laboratory. Assay results will be reported in due course.

**COMPETENT PERSON**

The information in this report that relates to Exploration Results concerning the Coogee Project is based on information compiled by Mr Harjinder Kehal who is a Registered Practicing Geologist and Member of the AusIMM and AIG. Mr Kehal has been engaged as a Consultant by Javelin Minerals Limited. Mr Kehal has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results'. Mr Kehal consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the above original market announcements. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

## ABOUT THE COOGEE PROJECT

Coogee is located approximately 55 kilometres southeast of Kalgoorlie on the north-eastern shore of Lake Lefroy and comprises four tenements (Mining Lease M 26/477, Exploration Lease E 26/177 and Miscellaneous Licences L 26/264 and L 26/265) that cover an area of approximately 17km<sup>2</sup>.

The project's location (Figure 2) near the major mining centre of Kalgoorlie in Western Australia provides ready access to both significant exploration and mining support services and a skilled workforce.

To date Javelin has completed 4 phases of RC drilling totalling 135 holes for 19,136 metres. The drilling programmes have been successful in outlining mineralisation which transitions from gold to copper-gold to the north within a broader copper-gold system at Coogee which now has strike length of over 1kilometres.
