

BrainChip Showcases Future Technology Roadmap

- Company's Chief Development Officer Dr. Jonathan Tapson to present
 - 35-minute session precedes the Company's Annual General Meeting
 - Topics include expected advancements to Akida IP and target applications
-

Sydney – 1st April 2025

BrainChip Holdings Ltd ("BrainChip" or the "Company") (ASX: BRN, OTCQX: BRCHF, ADR: BCHPY), the world's first commercial producer of ultra-low power, fully digital, event-based, neuromorphic AI, will present a 35-minute Technology Roadmap in the Thomas Keneally Room at the Sydney Harbour Marriott Hotel 10 a.m. AEST Tuesday, 6 May 2025. This is a separate Technology Roadmap presentation which precedes the Company's Annual General Meeting.

Dr. Jonathan Tapson, BrainChip's Chief Development Officer, will share the Company's Technology Roadmap, including development plans for its Akida designs, software stack, models and hardware offerings. As part of this presentation, Dr. Tapson will offer insights on the market and customer requirements.

Those wishing to attend in person, especially BrainChip shareholders who intend to attend both the Technology Roadmap presentation and the AGM, are advised to register for both sessions with the representatives of Boardroom Limited, who will be positioned outside the Thomas Keneally Room, at least 10 minutes prior to the commencement of the Technology Roadmap presentation.

The link for those wanting to access the Technology Roadmap presentation via webcast is <https://meetings.lumiconnect.com/300-896-227-913>

Please note that for those shareholders, proxyholders and visitors who wish to attend the Annual General Meeting using the Online AGM Technology, and who wish to view the Technology Roadmap presentation, you will need to disconnect from the above link and join the Annual General Meeting using the dedicated meeting link as contained within the Annual General Meeting Notice of Meeting.

This announcement is authorised for release by the BRN Board of Directors.

About BrainChip Holdings Ltd (ASX: BRN, OTCQX: BRCHF, ADR: BCHPY)

BrainChip is the worldwide leader in edge AI on-chip processing and learning. The company's first-to-market neuromorphic processor, Akida™, mimics the human brain to analyse only essential sensor inputs at the point of acquisition, processing data with unparalleled efficiency, precision, and economy of energy. Keeping machine learning local to the chip, independent of the cloud, also dramatically reduces latency while improving privacy and data security. In enabling effective edge compute to be universally deployable across real world applications such as connected cars, consumer electronics, and industrial IoT, BrainChip is proving that on-chip AI, close to the sensor, is the future, for its customers' products, as well as the planet.
