

FEDERATION ORE HAULAGE MODIFICATION APPROVED

Aurelia Metals Limited (ASX: **AMI**) (**Aurelia** or the **Company**) is pleased to report that the NSW Department of Planning, Housing and Infrastructure (**DPHI**) has approved a modification to the Federation Mine development consent, allowing up to 600 thousand tonnes of ore per annum to be hauled to the Peak processing plant, up from the previously approved 200 thousand tonnes per annum.

This approval will enable Aurelia to realise the higher value from treating all ore mined from Federation at Peak, as outlined in the findings of the Cobar Optimisation Study (see ASX announcement dated 23 October 2024, 'Cobar Basin Optimisation Update').

There are a number of administrative updates to management plans required due to the approval, which will be undertaken in due course.

Managing Director and Chief Executive Officer, Bryan Quinn commented:

"The ability for Aurelia to send all of the ore mined at Federation to be processed at Peak is a key value driver for us as we optimise our Cobar Basin operations and fill our mills with high value ore. This modification to the development consent is a key step in enhancing our growth strategy.

I would like to thank the approvals team at Aurelia for their efforts in getting us to this point. I would also like to thank the NSW DPHI for their continued support of our operations in the Cobar Region."

This announcement has been approved for release by the Managing Director and Chief Executive Officer.

About Aurelia

Aurelia Metals Limited (ASX: AMI) is an Australian mining and exploration company with a highly strategic landholding in the Cobar Basin in western New South Wales. We operate three underground base metal mines at our two operations, Peak and Federation. In addition, we are progressing the Great Cobar Project, a consented, high-grade copper development located at Peak.
