ABOUT FIREFINCH

Firefinch is a Mali focussed gold miner and lithium developer. It has an 80% interest in the Morila Gold Mine which has produced 7.5 million ounces of gold since 2000. Firefinch is ramping up production at the 4.5mtpa mill and mine from a current annual production profile of 40,000 ounces of gold per annum from tailing treatment towards a target of 80 to 90,000 ounces of gold per annum from small open pits, stocks and tailings. In 2022, the company plans to further increase production by re-commencing mining from the main Morila pit to fully exploit the 1.5 million ounces of gold in the Global Resource at Morila.

Morila was one of the world's highest grade open pits 12 to 20 years ago but its limits are not well understood. Exploration will be a major focus at Morila, its satellite resources and multiple targets on the 685km² of surrounding tenure.

The Goulamina Lithium Project is one of the world's largest undeveloped deposits and has the potential to be one of the lowest cost producers. All permits are in place, a Definitive Feasibility Study is complete and a Global Resource of 109 million tonnes at 1.45% Li₂O with 1.57 million tonnes of contained Li₂O has been declared.

Firefinch is a responsible miner. We support positive social and economic change through contributing to the communities in which we operate. We seek to buy local, employ local and safeguard the environment and our people's health, safety and wellbeing.

The Company confirms that it is not aware of any new information or data that materially affects the Mineral Resources at Goulamina and Morila and the production estimates for Goulamina. The Company also confirms that all material assumptions and parameters underpinning the Mineral Resource estimates and production estimates continue to apply and have not materially changed. Please refer to ASX Announcements of 8 July 2020 and 20 October 2020 (Goulamina), 31 August 2020 (Morila), 7 September 2020 (Morila Tailings) and 24 November 2020 (Satellite Resources).
