ASX RELEASE

3 July 2014

## ETHANE TRANSPORTED FOR THE QUARTER ENDED 30 JUNE 2014

APA Ethane Limited, the responsible entity of Ethane Pipeline Income Fund (ASX:EPX), advises the following volume of ethane was transported on the Fund's ethane pipeline for the quarter ended 30 June 2014:

Actual volume of ethane transported for the quarter	Actual volume of ethane transported for the prior corresponding period
48,383 tonnes	57,942 tonnes

Actual volume transported for the quarter is consistent with the expected volume when distribution guidance was provided on 7 May 2014. Barring unforeseen circumstances distribution guidance remains as previously announced, namely that quarterly cash distributions for the September 2014 and December 2014 quarters are forecast to be between 3.0 to 3.5 cents per security or 4.0 to 4.5 cents per security inclusive of franking credits.

The Fund's primary source of operating revenue is the Product Transportation Agreement with Qenos Pty Limited ("Qenos"). The basis of calculating revenue under the agreement changed from September 2013 to a greater proportion of revenue being dependent on the volume of ethane transported on the pipeline from Moomba in South Australia's Cooper Basin to Qenos' petrochemical plant in Botany, Sydney. As a result, actual volumes transported impact the Fund's revenues more significantly than prior to September 2013.

The volume of ethane transported on the pipeline is determined by Qenos and its ethane suppliers. Actual volume transported may vary from period to period for a number of reasons including, for example, changes in the availability of ethane from Qenos' suppliers or Qenos' requirements for ethane.

Actual volume transported for any period should not be relied on as an indication of volume to be transported in future periods.
