## Simon Linge appointed as President of Association for the Battery Recycling Industry

### HIGHLIGHTS

- **As President Mr Linge will drive ABRI's industry collaboration with policy makers, advocates and stakeholders to support a safe, sustainable, and globally competitive battery recycling sector**
- **He remains committed to his role at Livium and sees this appointment as a strategic opportunity to help shape the industry that will create long-term value for the industry and the Company**

Livium Ltd (ASX: LIT) ("**Livium**" or the "**Company**") is pleased to announce that its Managing Director & CEO, Simon Linge, has been appointed as President of Association for the Battery Recycling Industry ("**ABRI**").

ABRI is the peak body for the battery recycling industry in Australia and, with its members, is focused on driving innovation and investment into the sector. ABRI's members represent the entire supply chain for batteries and collectively enable progress within the sector through dynamic collaboration.

As President Mr Linge will oversee the Association's strategic direction and advocacy efforts, working closely with members, government, and industry stakeholders to advance a safe, sustainable, and innovative battery recycling sector. He will play a key role in shaping policy discussions, promoting investment and best practice, and ensuring the industry is well positioned to respond to evolving regulatory and market dynamics both in Australia and globally.

Mr Linge remains fully committed to his role with Livium and sees his appointment as President of ABRI as a strategic opportunity to help shape the industry in ways that will create long-term value and deliver new opportunities for the Company in sustainable battery solutions.

#### Comment from Livium CEO and Managing Director, Simon Linge

*"I'm honoured to take on the role of President at ABRI at such a pivotal time for our industry. Battery recycling is fast becoming a cornerstone of the global energy transition, and ABRI plays a critical role in shaping the future of this sector in Australia. As the peak body, ABRI provides a unified voice to champion innovation, investment, and the development of robust industry standards that will help us build a truly circular battery economy."*

*"The regulatory landscape — both here in Australia and globally — is evolving rapidly and with it comes the opportunity to position Australia as a leader in safe, sustainable battery recycling. I'm committed to working with ABRI members, Government, and industry stakeholders to ensure we're not only keeping pace with change but actively driving it by aligning need with policy, regulation and investment priorities."*

*"Livium is focused on delivering sustainable recycling solutions, supporting decarbonisation in battery-intensive sectors and building an enduring business that creates value for shareholders and society alike. As President, I look forward to helping steer the industry towards this future where innovation and sustainability go hand in hand."*

Authorised for release by the Managing Director and CEO.

## Forward-looking statements

This announcement contains forward-looking statements. Forward-looking statements are subject to a variety of risks and uncertainties that it is beyond the Company's ability to control or predict and which could cause actual events or results to differ materially from those anticipated in such forward-looking statements. Investors should be aware that past performance should not be relied upon as being indicative of future performance.

## About Livium

Livium (previously Lithium Australia) is aiming to lead and enable the global transition to sustainable lithium production. The Company operates Australia's market leading battery recycler, produces critical battery material lithium ferro phosphate (LFP), and has developed a patented lithium extraction technology (LieNA®). Livium's revenue-generating recycling business and technologies are well-placed to capitalise on growing global lithium-ion battery demand and provides diversification benefits to global supply chains.

## About The Association for the Battery Recycling Industry

ABRI was established in 2008 and consists of recyclers, OEMs and battery repurposing companies, waste sector companies, government entities, research institutions and environment groups to promote the collection, recycling and safe disposal of all batteries. ABRI's role includes research, advocacy, education and stakeholder engagement to promote safe and environmentally responsible recycling of all batteries at end of life.
