Cyclotron Facility Suffers Significant Water Damage

Late Wednesday evening a vehicle caught fire in the car park of Macquarie University Hospital. The fire occurred on Basement Level 1. Cyclopharm's cyclotron facility is located directly below the site of the fire on Basement Level 2.

In the course of extinguishing the fire on the floor above, our facility suffered substantial water damage.

The full extent of the damage is yet to be ascertained; however, the cyclotron facility is fully insured and we expect that the claim will be significant.

Cyclopharm will provide shareholders with an update as we progress our discussions with insurers and assessors in the coming weeks.
