

STRATEGIC INTEGRATION PARTNERSHIP AGREEMENT WITH SCIMAGE INC.

Highlights:

- **Strategic partnership with leading US medical Enterprise Cardiovascular Information Systems (CVIS) provider**
- **Agreement expected to make EchoSolv echocardiology assessments available to users within 3 months**
- **Initial roll-out to key CVIS practices across the US**
- **Priority roll-out sites earmarked as future revenue-generating sites under planned reimbursement model**

Sydney: AI and Medical Technology company Echo IQ Limited (“the Company”) (ASX:EIQ) today announces the completion of a strategic integration partnership agreement with ScImage Inc. (“ScImage”), based in Los Altos, California. ScImage provides Cloud-native enterprise image management, PACS and image exchange solutions for the healthcare industry. Under the terms of this agreement, ScImage will incorporate Echo IQ’s EchoSolv decision support for Aortic Stenosis, in the first instance, into ScImage’s PICOM365 Cloud image management and reporting platform. This is expected to give users of the platform access to high-quality, automated AI-backed echocardiography assessments designed to facilitate faster, more accurate diagnoses of this life-threatening but treatable condition.

ScImage has 2000 sites using its PICOM365 platform in the US and is one of the largest providers in its field. Initially, this integration partnership is expected to see EchoSolv’s automated assessment capabilities rolled out to several key US cardiology practices and strategic hospitals before the end of 2024. Deployment of EchoSolv’s capability in multiple sites of this nature is further expected to support Echo IQ’s strategy to secure reimbursement codes for the software and subsequent early revenue generation under this business model.

Andrew Grover, Executive Chair of Echo IQ said: *“ScImage is a trusted partner to many of the leading Cardiology centres in the US and is recognised for its consistent innovation in cloud-native imaging solutions. We are extremely honoured to have been selected by ScImage as a decision support partner for cardiology reporting in an agreement that will see EchoSolv’s proprietary AI-backed capabilities made available to forward-looking medical practitioners in the next 3 months.”*

Sai Raya, PhD, Founder and CEO of ScImage Inc. said, *"We are thrilled to offer our users the ability to leverage Echo IQ's capabilities. As AI continues to advance patient outcomes, clinical efficiency, and resource optimization, PICOM365 Cloud serves as a conduit for both users and leading software providers to advance technology forward. Both ScImage and Echo IQ share a vision of technology-driven tools that enhance cardiology and improve patient outcomes. I am confident our customers will embrace this innovative collaboration."*
