Data Processing System Tested and 3D Imagery Generated

White Star Resources Limited (ASX: WSR) ("White Star") is pleased to announce that Spookfish Pty Ltd ("Spookfish") has successfully processed data captured during sensor testing in Sydney and Perth and generated full 3D models with the captured imagery.

The results of the testing validate the performance and robustness of the automated processing system in preparation for full-scale testing of the Spookfish Technology Demonstrator over the coming months.

The Spookfish Technology Demonstrator will test all aspects of the revolutionary Spookfish Technology including camera systems, data storage, processing, delivery and flight operations which will then be scaled up for the Spookfish commercial offering.

Commenting on the data processing system test results, White Star Executive Director, Jason Marinko, said, "It's exciting to see the first 3D images as evidence of the automated processing capabilities and enormous potential of the Spookfish technology. This is another important milestone achieved by the Spookfish technical team and is a key element of the upcoming full-scale operational trials of the Spookfish Technology Demonstrator."
