

Amcom partners with AARNet to deliver Unified Communications

01 May 2014

Australian Securities Exchange Limited

Amcom Telecommunications Limited (ASX:AMM) has today agreed a landmark partnering agreement with AARNet to offer Amcom Cloud Collaboration (ACC), which is powered by Cisco, to AARNet's customer base, that includes some 38 Universities and the CSIRO.

The ACC platform will enable research and education nationally to access an enterprise grade hosted unified communications solution via AARNet's network infrastructure and integrate with AARNet's Unified Communications Exchange (AUCX). It will empower institutions to communicate and collaborate effectively and efficiently with their peers in the research and education communities via telephone and videophone, across Australia and around the globe.

Amcom CEO Clive Stein commented: "Amcom and AARNet have a long and successful association established over many years of working collaboratively. We are pleased to now partner with AARNet to deliver Amcom Cloud Collaboration to the research and education sectors".

Chris Hancock, CEO of AARNet said, "We are excited to extend our partnering relationship with Amcom for the delivery of Unified Communications. We see this as the next generation of communication tools that are ideally suited to our customer base."

About Amcom

Amcom is an award-winning ASX listed (ASX:AMM), Telecommunications and IT company employing over 340 talented people across Australia.

Through the delivery of innovative, flexible and cost effective solutions and superior customer service, we are provider of choice for the converging Information, Communication and Technology (ICT) needs of business and government across Australia.

Amcom's product set includes national data network access delivering business grade data and internet services, business class Unified Communications and IP voice, cloud solutions and managed services; all supported by our extensive fibre-optic network, data centres and a range of IT services including advisory, integration and security solutions.

About AARNet

Established over twenty years ago, AARNet (Australia's Academic and Research Network) is the not-for-profit company that operates Australia's National Research and Education Network (NREN). Its shareholders are 38 Australian universities and the Commonwealth Scientific and Industrial Research Organisation (CSIRO).

AARNet provides high-capacity, leading-edge internet and advanced communications services to the nation's universities, health and other research organisations, schools, vocational training providers and cultural institutions. AARNet serves over one million end users with whom it shares and exchanges expertise in numerous different ways, supporting collaboration and innovation in research and education.

A key area of focus has also been making representations to government on policy, legislation, strategy and programs to improve the telecommunications facilities and services available not only to the education and research sector, but to all Australians.
