

8<sup>th</sup> May 2014

**Announcement**

Mr Stone Wang wishes to provide shareholders an update on the progress of its commercial solar energy business.

Since December 2013, the following projects have been completed in northern New South Wales:

Two 100 kilowatt solar power plans for regional businesses. These systems were completed in December 2013 and February 2014. Each of these systems is expected to generate approx. 3.5mw hours of electricity and saving over 3,000 tones of CO2 emission over their working life of 25 years.

Then in April this year we have signed another contract to provide approximately 100 kilowatt roof top solar power system on the North Coast of NSW. The system is expected to generate approximately 4 mega watt hours of electricity and will save over 3,500 tones of CO2 emission over it's 25 years working life. Installation is expected to commence before June.

A futher 4 projects are in development (approximately 230 kilowatts in total) and are due to be completed within the coming three months.

The total revenue value of these projects to AFT Corporation is over \$1million.

Stone Wang  
CEO  
AFT Corporation Ltd.
