

ASX Announcement

4 March 2014

Longtom Operational Update

Nexus Energy Limited (**Nexus**) advises that, further to the operational update issued on 21 February, an offshore intervention program will commence shortly. A vessel with the capability to inspect and potentially rectify the electrical fault is due to arrive in the field on 5 March 2014, weather permitting.

The location of the fault is currently unknown. Nexus and Santos are working co-operatively to identify and remedy the fault and return to continuous production as quickly as possible.

Nexus' securities continue to be in Voluntary Suspension whilst the company considers the implications of the suspension at the Longtom gas processing facility. Further updates will be provided as appropriate.

Lucio Della Martina
Managing Director & Chief Executive Officer
