## **GOLD BALL MILL SUCCESSFULLY RELOCATED**

The Company is pleased to report that the gold ball mill relocation, as announced to the ASX 13<sup>th</sup> January 2011, has been successfully completed by Burgess Laser Aligning Pty Ltd, Goldfields Cranes and Hampton Transport. The ball mill, associated infrastructure and spares have been relocated to a dedicated lay-down area at the Bullant Mine site and to specialised engineering firms located in Kalgoorlie, Western Australia in preparation for refurbishment.

The gold ball mill is a key component in the Company's ambition to construct a 500,000 tonnes per annum gold processing plant for the Bullant Mine Project, located approximately 75 km NW of Kalgoorlie, Western Australia.

The removal and transportation was well planned and was completed in a safe and organized manor. There were zero incidents or accidents on site during this relocation process.

The shift occurred over a seven day period with a team of eight personnel and has been completed within budget estimates.

Final shareholder approvals for the purchase of the Bullant Gold Project are expected to be received at the Company's meeting of shareholders on 24<sup>th</sup> March 2011.

The Company looks forward in the development of the Bullant Gold Project and will keep shareholders updated of any material progress.
