

Updated Prospectus and SAI Announcement for the Vanguard® Exchange Traded Funds

28 February 2011

Vanguard Investments Australia Ltd announces the following:

FUND	ASX CODE	DATE	ANNOUNCEMENT
Vanguard® All-World ex-US Shares Index ETF	VEU	28 FEB 2011	Lodgement of Australian Prospectus with ASIC
Vanguard® All-World ex-US Shares Index ETF	VEU	25 FEB 2011	Filing of updated US Prospectus and SAI with the SEC

Vanguard Investments Australia Ltd has lodged an updated Australian Prospectus dated 28 February 2011 for the Vanguard All-World ex-US Shares Index ETF with the Australian Securities and Investments Commission (ASIC), a copy of which is attached.

The Vanguard Group, Inc. in the US has filed an updated Prospectus and Statement of Additional Information (SAI) with the US Securities and Exchange Commission (SEC) for the Vanguard® FTSE All-World ex-US ETF which is traded on the New York Stock Exchange (**VEU:NYSE** Arca), copies of which are attached. These documents are incorporated by reference in the Australian Prospectus for the Vanguard All-World ex-US Shares Index ETF (**VEU:ASX**) and copies of these documents have been lodged with ASIC.

The Australian Prospectus should be read in conjunction with the new US Prospectus (for the Vanguard FTSE All-World ex-US ETF) and SAI (for the Vanguard International Equity Index Funds).

About this Prospectus

This Prospectus is for the Vanguard All-World ex-US Shares Index ETF (Vanguard All-World ex-US ETF) and is dated 28 February 2011.

Vanguard Investments Australia Ltd ABN 72 072 881 086 AFSL 227263 RSEL L0001335 (Vanguard) is the issuer of this Prospectus on behalf of the Vanguard FTSE All-World ex-US Index Fund (US Fund), a series of Vanguard International Equity Index Funds (a Delaware Statutory Trust).

The Vanguard Group, Inc. (VGI) is the US parent company of Vanguard.

In this Prospectus references to 'Vanguard', 'we', 'our' and 'us' refer to Vanguard Investments Australia Ltd.

A copy of this Prospectus has been lodged with the Australian Securities and Investments Commission (ASIC) pursuant to section 718 of the *Corporations Act 2001 (Cth) (Corporations Act)* and with the ASX Ltd (ASX). Neither ASIC nor the ASX takes any responsibility for the contents of this Prospectus.

The Vanguard All-World ex-US Shares Index ETF is the name given to the Clearing House Electronic Subregister System (CHES) Depositary Interests (CDIs) that are quoted on the AQUA market of the ASX (refer to page 9 for further details on CDIs).

These CDIs facilitate the buying and selling of the ETF securities (namely, shares in the US Fund, being the Vanguard FTSE All-World ex-US Index Fund) (US ETF Securities) on the ASX. CDIs are 'securities' for the purpose of the *Corporations Act*.

Unless otherwise stated, data sources used by Vanguard or VGI are public or licensed market data and all material is current as at the date of this Prospectus.

A copy of this Prospectus for the Vanguard All-World ex-US ETF, the prospectus of the US Fund (US Prospectus) and the US Fund's Statement of Additional Information (SAI) are available on Vanguard's website at www.vanguard.com.au. If you do not have access to the internet, please contact Vanguard Client Services on 1300 655 888. A paper copy will be provided free of charge on request.

Information available from Vanguard

To keep investors informed, Vanguard, in its capacity as the issuer of the Vanguard All-World ex-US ETF, will provide regular reporting and disclosure. The following information can be obtained by visiting Vanguard's website at www.vanguard.com.au or by contacting Vanguard Client Services on 1300 655 888:

- Details of the Net Asset Value (NAV) – available monthly
- Details of the NAV price – available daily
- A copy of this Prospectus (and any documents which may amend or update the Prospectus)
- Details of any continuous disclosure notices given by Vanguard to the ASX
- Details of distribution announcements given by Vanguard to the ASX via the ASX Company Announcements Platform
- Annual Reports and Financial Statements

Disclaimers

An investment in the Vanguard All-World ex-US ETF is subject to risk, (refer to the section 'Risks' on page 11), which may include possible delays in repayment and loss of income and capital invested.

None of VGI, including Vanguard or their related entities, directors or officers, gives any guarantee or assurance as to the performance of, or the repayment of capital or income reinvested, in the Vanguard All-World ex-US ETF described in this Prospectus. Members of VGI and its related entities may invest in, lend to or provide other services to the Vanguard All-World ex-US ETF.

This Prospectus is prepared for general information only. It is not intended to be a recommendation by Vanguard, any of Vanguard's associates or any other person to invest in the Vanguard All-World ex-US ETF. In preparing this Prospectus, Vanguard did not take into account the investment objectives, financial situation or particular needs of any particular person. Before making an investment decision, investors need to consider (with or without the advice or assistance of an adviser) whether an investment in the Vanguard All-World ex-US ETF is appropriate to their needs, objectives and circumstances.

Vanguard has sufficient working capital to enable it to operate the Vanguard All-World ex-US ETF as outlined in this Prospectus.

Key features of the ETF offer

Offer to Eligible Investors

Through this Prospectus, Vanguard gives Eligible Investors the opportunity to apply for US ETF Securities for transitioning into the Australian market and to then allow the trading of those US ETF Securities on the secondary market in Australia. Eligible Investors, as referred to in this Prospectus, cannot directly apply for or redeem US ETF Securities with the US Fund. Only institutions that are registered Authorised Participants in the US can apply for or redeem US ETF Securities. Therefore, Eligible Investors will be required to engage their or other counterparts in the US that are registered Authorised Participants for the creation and redemption of US ETF Securities (refer to page 13 for more details on the application and redemption process).

Continuous offer and expiry date

The offer of CDIs is a continuous offer which remains open until 28 March 2012 (the Expiry date) being 13 months after the date of this Prospectus. CDIs will not be offered, issued or transferred on the basis of this Prospectus after 28 March 2012.

What is an ETF?

An ETF is an Exchange Traded Fund. An ETF typically is a broadly diversified investment portfolio of either shares, bonds or real estate securities and is constructed using an indexed investment methodology.

ETFs seek to combine the best features of index managed funds and listed shares in one investment. They are index funds which come with the benefits of relatively low cost, broad diversification, transparency and tax efficiency. However, unlike traditional index funds which are priced only once per day, ETF securities trade on a stock exchange so they can be bought and sold at any time during the trading day at prevailing market prices. ETFs carry certain risks (refer to the section 'Risks' on page 11 for further details).

Who is Vanguard?

Vanguard (the product issuer) is a wholly owned subsidiary of VGI. VGI is based in the United States and as at 31 December 2010 managed more than AUD 1.5 trillion for over 23 million institutional and personal investor accounts.

Over the past 35 years VGI has grown to be one of the world's largest and most respected investment management companies. VGI now has a global presence with offices in the United States, Australia, Asia and Europe. Vanguard has established a reputation in Australia as an index specialist, managing over AUD 82 billion as at 31 December 2010.

VGI first launched ETFs in the United States in 2001. As at 31 December 2010, VGI had over 60 ETFs valued at over USD 148 billion and was the third largest ETF provider in the United States. Vanguard launched its initial range of ETFs in the Australian market in 2009. As at 31 December 2010, Vanguard had 4 ETFs valued at over AUD 280 million.

Vanguard All-World ex-US Shares Index ETF

The ETF offered in this Prospectus is:

	Investment objective	Underlying Index	Management costs*
Vanguard All-World ex-US Shares Index ETF ASX code VEU	Seeks to track the performance of a benchmark index that measures the investment return of stocks of companies located in developed and emerging markets outside of the United States.	The FTSE All-World ex-US Index includes approximately 2,180 stocks of companies located in 46 countries, including both developed and emerging markets, excluding the US market.	0.22% p.a.

* Refer to the section 'Fees and Expenses' below.

The Vanguard All-World ex-US Shares Index ETF referred to in the above table is the name given to the CDIs that are quoted on the AQUA market of the ASX (refer to page 9 for further details on CDIs). CDIs facilitate the buying and selling of US ETF Securities issued by a US fund called the Vanguard FTSE All-World ex-US Index Fund, a series of Vanguard International Equity Index Funds, a

Delaware Statutory Trust (US Fund). The US ETF Securities are listed on NYSE Arca (a subsidiary of the New York Stock Exchange).

The information above is referenced from the US Prospectus for the US ETF Securities. For further information regarding the investment objectives and the fees and expenses, please refer to the US Prospectus.

Fees and Expenses

The following table sets out the Management Costs of the US ETF Securities at the date of this Prospectus:

Vanguard ETF	Vanguard All-World ex-US Shares Index ETF
US ETF	Vanguard FTSE All-World ex-US ETF
Management expenses	0.16%
Distribution fees	None
Other expenses	0.06%
Total annual fund operating expenses* (Management Costs)	0.22%

* Management Costs are deducted from the assets of the US Fund

Management Costs are expressed as a percentage of the US ETF Security's average net assets during the relevant period. Management Costs include management expenses, such as advisory fees, account maintenance, reporting, accounting, legal, and other administrative expenses and any distribution fees. They do not include the transaction costs of buying and selling portfolio securities.

As Management Costs are expressed as a percentage of the average net assets of the US ETF Security and the value of those assets may change over time, the actual Management Costs for a period

may be higher or lower than shown in the table above.

For additional information about Fees and Expenses of the US ETF Securities, please see the US Prospectus.

Investors should note that buying and selling CDIs in the secondary market will incur brokerage and other costs. Refer to the section 'Applications and Redemptions' on page 13.

Who is involved in the ETF process?

The role of Vanguard is to be the issuer of the cross-listed US ETF Securities, via CDIs, into the Australian market (refer to page 9 for further details). To accomplish this, Vanguard has entered into an Intermediary Authorisation Agreement with VGI. Neither the US Fund nor VGI will hold an Australian Financial Services Licence (AFSL).

Other roles of Vanguard are to:

- contract with relevant parties in Australia to ensure that the CDIs are properly created for the Australian market,
- contract with an appropriate share registry to ensure that the relevant investor details are maintained in regard to the CDIs that are quoted on the AQUA market of the ASX, and
- help maintain an efficient trading market by assigning at least one market maker.

VGI, either itself or through a subsidiary, will manage the investments of the US Fund and process the creation and redemption orders of the US ETF Securities in the US.

The US ETF Securities are held by **Depository Trust Company** (DTC) which is a limited purpose trust company that was created in the US to hold the securities of its participants (refer to page 9 for further details).

Computershare Trust Company, N.A. (a DTC Participant) has entered into a Custody Agreement with **CHESS Depository Nominees Pty Limited** (CHESS Depository Nominees), such that CHESS Depository Nominees becomes the holder of the underlying US ETF Securities that will be cross-listed into the Australian market.

Computershare Investor Services Pty Limited (Computershare) has been engaged by Vanguard under a Share Registry Agreement to maintain the Australian register of CDI holders and provide services to investors (including facilitating payment of any distributions) in relation to their CDI holdings. Computershare keeps investor records including the quantity of securities held by an investor and how the securities are held. Computershare's role is to also facilitate the transfer of US ETF Securities, created in the US, for transacting in Australia.

AQUA market of the ASX

The ASX on 15 September 2008 introduced a market service to provide managed funds, ETFs and structured products a more tailored framework for the quoting of these products on the ASX market and access to back office clearing and settlement services offered by the ASX.

The key distinction between products admitted under the ASX Listing Rules and those quoted under Schedule 10A of the ASX Operating Rules (AQUA Rules) is the level of influence that the issuer has over the underlying instrument.

An equity issuer under the ASX Listing Rules controls the value of its own securities and the business it runs and the value of those securities is directly influenced by the equity issuer's performance and conduct. For example, a company's management and board generally control the company's business and therefore have direct influence over the company's share price.

A product issuer under the AQUA Rules does not control the value of the assets underlying the products but offers products that give investors exposure to the underlying assets. The value (price) of products quoted under the AQUA Rules is dependent upon the performance of the underlying assets rather than the financial performance of the issuer itself. For example, a managed fund issuer does not control the value of the shares it invests in.

The following information highlights the key differences between the provisions of the ASX Listing and AQUA Rules.

INFORMATION	Issuers of products governed under ASX Listing Rules	Issuers of products governed under ASX AQUA Rules
Continuous Disclosure	<ul style="list-style-type: none"> ■ Subject to the continuous disclosure requirements under Listing Rule 3.1 and section 674 of the <i>Corporations Act</i>. 	<ul style="list-style-type: none"> ■ Not subject to Listing Rule 3.1 and section 674 of the <i>Corporations Act</i>. ■ Subject to ASX Operating Rules Schedule 10A.4.4 and 10A.6.3 and section 675 of the <i>Corporations Act</i>.
Periodic Disclosure	<ul style="list-style-type: none"> ■ Required to disclose half yearly and annual financial information or annual reports under Chapter 4 of the Listing Rules. 	<ul style="list-style-type: none"> ■ Not required to disclose half yearly and annual financial information or annual reports under the Listing Rules. ■ Copies of the US Fund's Annual and Semi-Annual Reports filed with the SEC in the US will be disclosed via the ASX's Company Announcements Platform.
Corporate Control	<ul style="list-style-type: none"> ■ Requirements in the <i>Corporations Act</i> and the Listing Rules relating to takeover bids, share buy-backs, change of capital, new issues, restricted securities, disclosure of directors' interests and substantial shareholdings apply. 	<ul style="list-style-type: none"> ■ Subject to general requirement to provide the ASX with any information concerning itself that may lead to the establishment of a false market or materially affect price.
Related Party Transactions	<ul style="list-style-type: none"> ■ Chapter 10 of the Listing Rules specifies controls over related party transactions. 	<ul style="list-style-type: none"> ■ Chapter 10 of the Listing Rules do not apply to AQUA Products.
Auditor Rotation Obligations	<ul style="list-style-type: none"> ■ Requirements relating to auditor rotation under Division 5 of Part 2M.4 of the <i>Corporations Act</i> apply. 	<ul style="list-style-type: none"> ■ Not subject to Division 5 of Part 2M.4 of the <i>Corporations Act</i>.

Market Marker

A market maker's role is to satisfy supply and demand for CDIs. They do this by fulfilling two key functions:

- Providing liquidity to the market by acting as the buyer and seller of CDIs throughout the day, and
- Creating and redeeming US ETF Securities off-market to ensure the number of CDIs on issue matches supply and demand.

Market makers seek to provide continuous liquidity to the market. The process begins with the issuer distributing a net asset value per US ETF Security to the market every day, allowing market makers to price the underlying US ETF Security. Market makers place a bid-offer spread around the intrinsic value of the US ETF Security and send these prices to the stock exchange as orders. The orders are published to market, and investors can either execute orders by trading with a market maker or by sending their own orders to the exchange for display (consistent with ASX order handling rules). Market maker orders are updated continuously throughout the day to reflect price changes in the underlying securities.

In selecting market makers for the Vanguard All-World ex-US ETF, Vanguard focuses on firms experienced in market making in both Australia and international markets. Most importantly, the firms selected by Vanguard currently make markets on the ASX in existing Australian based ETF products and have arrangements with the ASX to operate in this capacity. Internationally, the market makers selected will also have experience in markets such as the New York Stock Exchange.

CHESS Depositary Interests (CDIs)

Investors in the Vanguard All-World ex-US ETF offered in this Prospectus will hold a CDI rather than a US ETF Security. CDIs are Australian financial instruments designed to give its holders rights and entitlements in relation to holding US ETF Securities. A Depositary Nominee holds title on behalf of CDI holders. In the case of the US ETF Securities, the nominee is CHESS Depositary Nominees Pty Limited.

CDI holders are not holders of the US ETF Security. Some entitlements accrue to holders of US ETF Securities directly such as voting rights and corporate actions. This can alter the entitlements of a CDI holder.

In relation to **voting**, if a meeting of holders of US ETF Securities is convened, each holder of CDIs will be given notice of the meeting via the DTC system. The notice will include a form permitting the CDI holder to direct the Depositary Nominee to cast, or authorise or arrange the casting of, proxy votes in accordance with the CDI holder's written directions. Only holders of US ETF Securities (as shown on DTC records or DTC Participant records) or their proxies can attend and vote at meetings of holders of US ETF Securities.

In relation to **corporate actions** such as bonus issues, rights issues and capital reconstructions, some rights accrue directly to the holders of the US ETF Securities. These rights may not accrue directly to the holder of the CDI. Under the ASX Settlement and Transfer Corporation Pty Limited Settlement Rules, all economic benefits such as dividends, bonus issues, rights issues or similar corporate actions must flow through to CDI holders as if they were the holders of the corresponding US ETF Securities.

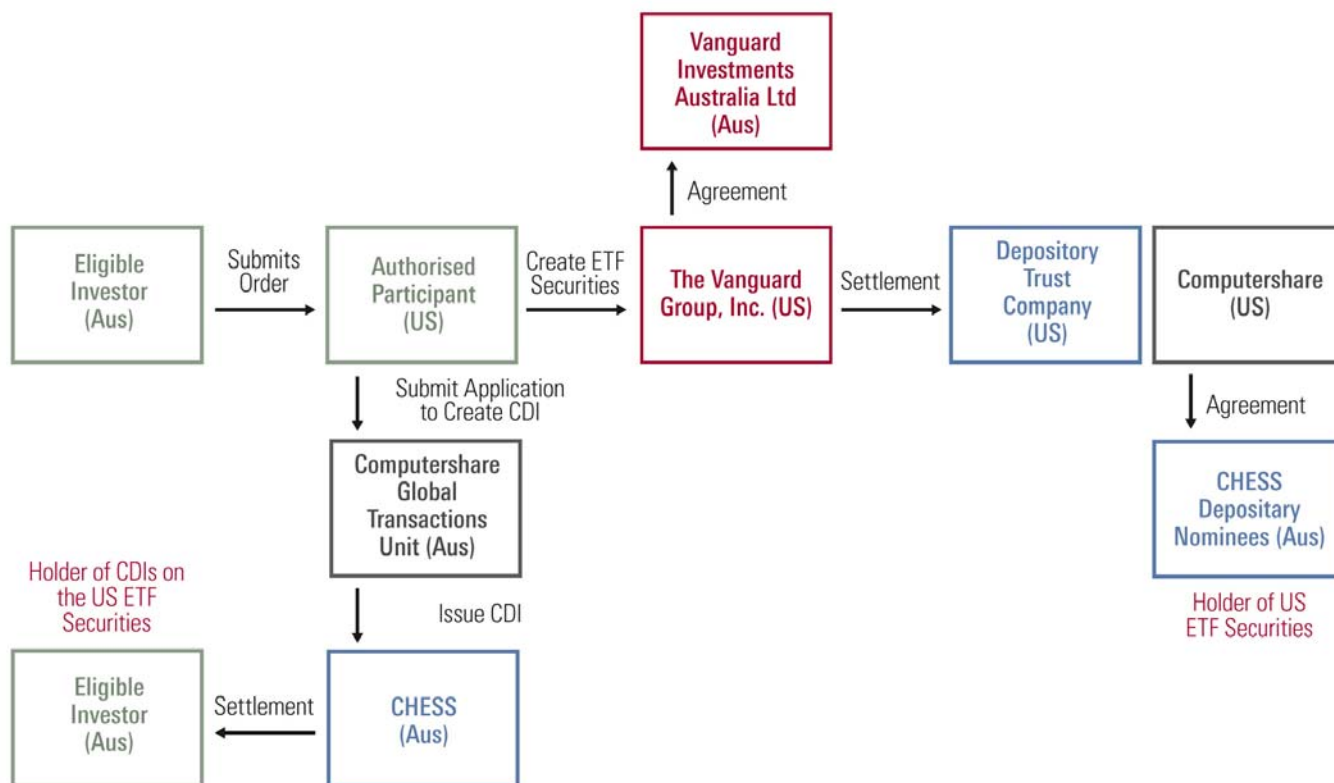

CDIs may be held in uncertificated form on either the Issuer Sponsored Subregister or the CHESS Subregister, which together make up the Australian CDI Register (maintained by Computershare).

Depository Trust Company (DTC)

DTC, a limited-purpose trust company, was created in the US to hold securities owned on record by its participants (DTC Participants) and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organisations. Excluding the Australian branch offices of major overseas DTC Participants, there are few (if any) Australian entities who are DTC Participants.

CDI creation process

The following diagram illustrates the CDI creation process.

Risks

Investors in the Vanguard All-World ex-US ETF face a number of investment risks. It is important to keep in mind one of the main principles of investing: the higher the potential reward, the higher the risk of losing money. The reverse is also generally true: the lower the risk, the lower the potential reward. An investment in ETFs could lose money over short or even long periods.

The price of an ETF can fluctuate within a wide range, like fluctuations of the overall stock market. When considering an investment in the Vanguard All-World ex-US ETF, personal tolerance for fluctuating market values should be taken into account.

There is no guarantee that the value of investment capital will be maintained.

The risks described in the US Prospectus for the US Fund are:

- Stock market risk
- Country/regional risk
- Emerging markets risk
- Currency risk
- ETF trading risks.

The above risk descriptions are incorporated by reference into this Prospectus pursuant to section 712 of the *Corporations Act*. It is important that prospective investors are aware of these risks.

Additional risks in regard to the offer in Australia are contained in the following table:

Type of risk	Description
Currency risk	<p>Fluctuations in the value of the Australian dollar and foreign currencies can affect the returns from overseas investments. This is because losses or gains must be converted back into Australian dollars.</p> <p>The Vanguard All-World ex-US ETF offered in this Prospectus does not hedge any of its exposure to foreign currencies.</p> <p>A weaker Australian dollar increases the value of investments held in non-Australian dollars and therefore benefits the Australian investor holding non-Australian dollar denominated assets, such as international shares. Conversely, if the value of the Australian dollar rises, the value of investments held in non-Australian dollar denominated assets will fall.</p> <p>Fluctuations in the exchange rate between when a distribution is paid on the US ETF security and when these distributions are converted into Australian dollars by Computershare for holders of CDIs can also result in foreign currency gains and losses arising for holders of CDIs. This is discussed in further detail in the section entitled "Distributions" under the heading "How to transact with Vanguard" below.</p>
Regulatory and tax risk	<p>This is the risk that a government or regulator may introduce regulatory and tax changes or a court may make a decision that alters the interpretation of a law that affects the value of securities in which the Vanguard All-World ex-US ETF invests, the value of the interests in the Vanguard All-World ex-US ETF, or the tax treatment of the investment in the Vanguard All-World ex-US ETF.</p> <p>The US Fund may be affected by changes to legislation or government policy both in Australia and in other countries. These changes are monitored by Vanguard and action is taken, where appropriate, to facilitate the achievement of the Vanguard All-World ex-US ETF's objectives.</p>

Type of risk	Description
Trading risk	<p>In certain circumstances, the ASX and/or other exchanges may suspend the trading of CDIs and therefore investors will not be able to buy or sell the CDIs on the ASX.</p> <p>The ASX also imposes certain requirements for the Vanguard All-World ex-US ETF to continue to be quoted. Vanguard will endeavour to meet these requirements at all times to ensure the Vanguard All-World ex-US ETF remains quoted.</p> <p>Although the Vanguard All-World ex-US ETF is quoted on the AQUA market of the ASX, there can be no assurances that there will always be a liquid market. Vanguard has appointed a market maker to assist in maintaining liquidity for the Vanguard All-World ex-US ETF on the ASX.</p> <p>The net asset value of the US ETF Securities may differ from the trading price of the CDIs on the ASX. The trading price is dependent on a number of factors including the demand and supply of the CDIs, investor confidence and how closely the value of the assets of the US Fund tracks the performance of the index.</p>

How to transact with Vanguard

Applications and redemptions

Interests in the US Fund are issued and redeemed in large blocks known as creation units. To purchase or redeem a creation unit you must be an Authorised Participant or you must trade through a broker that is an Authorised Participant. An Authorised Participant is a participant in the Depository Trust Company (DTC) that has executed a Participant Agreement with VGI.

As Eligible Investors cannot directly create or redeem a creation unit, they will need to facilitate this process via a counterparty in the US that is a registered Authorised Participant.

To transact in interests in the Vanguard All-World ex-US ETF, an Eligible Investor must contact an

Authorised Participant to apply for or redeem US ETF Securities. The Authorised Participant will then arrange for the purchase/redemption of US ETF Securities with VGI. These US ETF Securities issued by the US Fund will be held by Computershare Trust Company, N.A. on behalf of the Eligible Investor (in the name of CHESD Depository Nominees). The equivalent value of CDIs (1 US ETF security for 1 CDI) will then be issued to the Eligible Investor. Please see page 10 for a diagram that illustrates the CDI creation process.

Please note that transaction fees may apply to Eligible Investors in Australia when the Authorised Participant trades on their behalf. These costs are negotiable directly with the relevant Authorised Participants.

The number of US ETF Securities in a creation unit, the creation unit value and the transaction fee for the US ETF Securities offered in this Prospectus is detailed below:

US ETF Security	Size of Creation Unit	Creation Unit Value*	Transaction Fee
Vanguard FTSE All-World ex-US ETF	300,000	USD 14,385,000	USD 22,000

* This value is at 31/12/2010

For further details on the application and redemption process, please contact Vanguard Client Services on 1300 655 888 who can assist you with the process.

Investors who are not Eligible Investors can acquire, via the secondary market, CDIs of the Vanguard All-World ex-US ETF which are publicly traded via the ASX. To acquire a US ETF security in the form of a CDI, investors will need to have a brokerage account.

When investors buy or sell CDIs on the secondary market, brokers will charge a brokerage fee. Investors may also incur the cost of the 'bid-offer spread' which is the difference between the price at which the broker will purchase the security and the higher price at which the broker will sell the security. In addition, because the secondary market transactions occur at market prices, investors may pay more or less than the Net Asset Value when buying a CDI and receive more or less than the Net Asset Value when selling it.

Distributions

Distributions from the US Fund are generally calculated annually in December. Distributions may be paid at other times.

The distributions payable in respect of the CDIs quoted on the ASX will be declared and paid by the US Fund in US dollars, and converted by Computershare into Australian dollars prior to payment to holders of CDIs.

CDI holders will generally receive distribution payments (to which they are entitled) within 20 trading days following the record date in Australia. The value of the Australian dollar distribution payment is dependent on the prevailing foreign exchange rate a few days prior to the payment date. That is, the dollar amount of the distribution will first be determined and paid by the US Fund in US dollars and Computershare will then convert this into Australian dollars before making the distribution payment to holders of CDIs.

From time to time, the foreign exchange rate can be volatile and the exchange rate when the distribution is declared and paid by the US Fund, may differ from the prevailing foreign exchange rate at the date at which the distribution is converted into Australian dollars. This can give rise to foreign currency gains and losses for holders of CDIs in some circumstances.

Payment of distributions will be generally made by direct credit into a nominated Australian bank account. A distribution reinvestment plan is not available in regard to the Vanguard All-World ex-US ETF offered in this Prospectus.

Please refer to the 'Taxation of the ETFs' section on page 15 for information on the tax consequences of receiving distributions from the US Fund.

Investor Taxation

The taxation information in this Prospectus is provided for general information only. It is a broad overview of some of the Australian and US tax consequences associated with investing in the Vanguard All-World ex-US ETF offered in this Prospectus, and is not intended to provide an exhaustive or definitive statement as to all the possible tax outcomes for investors.

It does not take into account the specific circumstances of each person who may invest in the Vanguard All-World ex-US ETF and should not be used as the basis upon which potential investors make a decision to invest in the Vanguard All-World ex-US ETF. As each investor's circumstance is different, Vanguard strongly recommends that an investor obtains independent professional tax advice concerning the tax implications of investing in and dealing in interests in the Vanguard All-World ex-US ETF, particularly if an investor is not a resident of Australia or is a 'temporary resident' of Australia for tax purposes.

The Australian taxation information in this Prospectus has been prepared based on tax laws and administrative practice available at the date of this Prospectus. Any changes in the tax law or administrative practice that are announced subsequent to this date may alter the taxation information provided in this Prospectus.

Taxation of Australian tax resident investors

The taxation information provided in this Prospectus relates to Australian tax residents. Investors who are foreign residents should seek independent professional advice in relation to their specific circumstances.

US Tax Treatment

Further information regarding US taxation matters is contained in the US Prospectus.

Distributions from the ETF

Distributions received from the US Fund by an Australian tax resident investor in the Vanguard All-World ex-US ETF should be treated as assessable foreign sourced income for the Australian tax resident investor in the tax year in which the distribution has been received.

The amount on which an Australian tax resident investor is assessed on a distribution for Australian tax purposes should be the amount of the dividend distributions received during the tax year gross of any US withholding tax deducted. Australian tax resident investors may be entitled to claim an offset against the Australian tax payable on their foreign sourced income for any US tax withheld, as described below, from distributions made to the Australian tax resident investor. Please see an Australian tax adviser in order to determine whether benefits of any tax offsets for US tax withheld from distributions in the Vanguard All-World ex-US ETF can be obtained.

The US generally imposes withholding tax at a 30% rate on dividends paid by US corporations to non-US persons, but this rate may be reduced to 15% under the Australia/US income tax treaty. Australian tax resident investors may be required to complete US tax forms if they would like access to the reduced rate under the treaty. The US Fund distributes its portfolio income and short-term capital gains as a dividend subject to the applicable US withholding rate. Unlike those distributions, long-term capital gains distributions will not be subject to US withholding tax.

In very limited circumstances, distributions from the US Fund could include amounts that constitute a return of capital. Vanguard will notify investors if any distribution from the US Fund includes a return of capital amounts. The receipt of a return of capital may, for some Australian tax resident investors, have different tax consequences to other distributions from the US Fund. You should seek advice from an Australian tax adviser for further details regarding the tax consequences of receiving a return of capital from the US Fund.

Distributions paid by the Vanguard All-World ex-US ETF to Australian tax resident investors will be paid

by the US Fund in US dollars, but then converted into Australian dollars by Computershare prior to payment to Australian tax resident investors. The distribution payment advice will show the gross distribution amount, tax withheld and net distribution amount in US dollars, the exchange rate at the time the distribution was paid by the US Fund in US dollars and the exchange rate used to convert the net distribution to Australian dollars. Investors may use these exchange rates to convert the gross distribution and tax withheld to Australian dollars for tax return purposes, and to determine the amount of any foreign currency gains or losses that may arise for the Australian tax investor in respect of the distribution.

The US Fund is a Regulated Investment Company ("RIC") under subchapter M of the Internal Revenue Code of 1986 in the US and intends to continue to qualify as a RIC in the future. As a result, the US Fund expects to benefit from special US tax rules that will generally cause it to pay no US tax on its income or gains. However, distributions may be subject to withholding tax as described above.

The US Fund may also be subject to withholding taxes on income earned by the US Fund outside of the US. The distributions paid by the Vanguard All-World ex-US ETF to Australian tax resident investors will be net of withholding taxes payable by the US Fund on the receipt by the US Fund of its non-US income.

Foreign accruals regimes

Generally, under the previous foreign investment fund ("FIF") regime, Australian tax resident taxpayers may be assessed on their portion of gain in the value of interests in certain foreign companies and foreign trusts at the end of the tax year, even though those gains are unrealised. However, interests in the Vanguard All-World ex-US ETF were generally exempt from the FIF regime on the basis that the US Fund was a RIC.

The FIF rules have been repealed effective from 1 July 2010. At the date of this Prospectus, the Government has released an exposure draft in relation to a new "foreign accumulation fund" rule which is proposed to replace the repealed FIF rules.

It is proposed that the "anti-roll-up" rule will apply from the date from which the FIF rules were repealed. At the date of this Prospectus, the "anti-roll-up" rule is still in draft form and its final form is unknown.

Vanguard does not anticipate, based on the version of the exposure draft for the "foreign accumulation fund" rule that is available at the date of this Prospectus, that CDIs in the Vanguard All-World ex-US ETF would be subject to the "anti-roll up" rule. Investors should monitor developments in relation to the "anti-roll up" rule as the terms of this rule which becomes law may be different.

Selling or transferring CDIs

If an Australian tax resident investor in the Vanguard All-World ex-US ETF disposes of their CDIs by selling or otherwise transferring the CDIs to another person (e.g. if they sell their CDIs on-market), the investor may be liable for tax on any gains realised on the disposal of those CDIs.

For investors who do not hold their CDIs on capital account for income tax purposes (e.g. if the investor is in the business of dealing in securities such as CDIs), any gains realised on the disposal of CDIs should be assessable as ordinary income. Where investors who hold their CDIs on revenue account incur a loss in respect of dealings in their CDIs, this loss may, subject to certain integrity requirements, be available to offset current or future assessable income amounts.

For investors who hold their CDIs on capital account for income tax purposes, a capital gain or loss may be made on the disposal of their CDIs. Some investors may be eligible for the CGT discount (50% for individuals and certain trusts and 33.33% for complying superannuation funds) if the CDIs are held for at least 12 months before they are disposed of and the other relevant requirements are satisfied. Investors should obtain independent professional tax advice about the availability of the CGT discount.

Any capital loss arising on a disposal of CDIs may only be offset against capital gains made in that year or subsequent years.

US estate tax

US estate tax may apply to an individual who is neither a US citizen nor domiciled in the US and, at the time of death, is the beneficial owner of the US ETF Securities. The amount of the estate tax may be determined by the value of the US ETF Securities owned at death and may be reduced under an Australia/US estate tax treaty. Certain US tax laws, called the “estate tax look-through rules”, may also provide such individuals relief from the estate tax to the extent the US Fund’s investments are in assets that would be treated as situated outside the US if held directly by these individuals (for example, stock issued by corporations outside the US).

However, these estate tax look-through rules are subject to periodic extension by the US Congress and could expire in the future.

All investors should seek professional tax advice in relation to the US estate tax rules, including in relation to whether the tax may not apply to US ETF Securities held indirectly through certain estate-planning structures.

Other information you need to know

Financial information

Financial information for the US Fund appears in the Annual Report of the US Fund. This report can be found on Vanguard's website at www.vanguard.com.au. Outlined below is a summary of the financial accounts:

US Fund	Vanguard FTSE All-World ex-US Index Fund
Date	31 Oct 2010
Net Assets of Fund	USD 11.9 billion
Net Assets of ETF class	USD 6.3 billion
Outstanding ETF Shares	133.7 million
NAV price per ETF Share	USD 46.92

For additional financial information about the US Fund, please see the US Prospectus.

Financial statements of the US Fund

The Financial Statements and Notes contained in the Annual Report of the US Fund are incorporated by reference into and are deemed for US legal purposes to be part of the Company's Statement of Additional Information (SAI). However, for the purpose of section 712 of the *Corporations Act*, this Prospectus does not refer to and therefore excludes the Annual Reports of the US Fund.

Interests of Directors

The table on page 19 shows information about the Trustees of the US Fund. Further details about the Trustees and officers of the US Fund (and details of their remuneration) are referred to in the US Prospectus and SAI.

The table on page 21 shows the profiles of the directors of Vanguard.

Except as set out in this Prospectus, the US Prospectus, or the SAI, as may be updated:

- no Trustee of the US Fund or director of Vanguard has had in the last 2 years before lodgement of this Prospectus, an interest in:
 - the formation or promotion of Vanguard, VGI, the US Fund or the Vanguard All-World ex-US ETF;

- the offer in this Prospectus, or
- any property acquired or proposed to be acquired by Vanguard, VGI, the US Fund or the Vanguard All-World ex-US ETF in connection with its formation or promotion of the offer in this Prospectus, and

- no amounts, whether in cash or shares or otherwise have been paid or agreed to be paid (by anyone), and no benefit has been given or agreed to be given (by anyone), to any Trustee of the US Fund or director of Vanguard, either to induce them to become, or to qualify as, a trustee, a director, or otherwise for services provided by them in connection with the promotion or formation of Vanguard, VGI, the US Fund or the Vanguard All-World ex-US ETF or the offer in this Prospectus.

The Trustees of the US Fund and the directors of Vanguard have given and not withdrawn their consent to be named in this Prospectus.

Interests of US Fund Trustees

The following table provides information about the Trustees of the US Fund.

Name, Year of Birth	Current Position	Trustee Officer Since	Principal Occupation(s) and Outside Directorships During the Past Five Years
Interested Trustee			
F. William McNabb III (1957)	Chairman of the Board, Chief Executive Officer, and President	July 2009	Mr. McNabb has served as Chairman of the Board of VGI and of each of the investment companies served by VGI, since January 2010; Trustee of each of the investment companies served by VGI, since 2009; Director of VGI since 2008; and Chief Executive Officer and President of VGI and of each of the investment companies served by VGI, since 2008. Mr. McNabb also serves as Director of Vanguard Marketing Corporation. Mr. McNabb served as a Managing Director of VGI from 1995 to 2008. Mr. McNabb's 24 years with VGI and his position as chief executive officer of VGI and the Vanguard funds give him intimate experience with the day-to-day management and operations of the Vanguard funds.
Mr. McNabb is considered an "interested person", of the US Fund, as that term is defined in the <i>Investments Company Act 1940</i> (in the US), because he is an officer of the US Fund.			
Independent Trustees			
Emerson U. Fullwood (1948)	Trustee	January 2008	Mr. Fullwood is the former Executive Chief Staff and Marketing Officer for North America and Corporate Vice President (retired 2008) of Xerox Corporation (document management products and services). Previous positions held at Xerox by Mr. Fullwood include President of the Worldwide Channels Group, President of Latin America, Executive Chief Staff Officer of Developing Markets, and President of Worldwide Customer Services. Mr. Fullwood serves as a director of SPX Corporation (multi-industry manufacturing) and Amerigroup Corporation (managed health care). Mr. Fullwood also serves as a director of the University of Rochester Medical Center, Monroe Community College Foundation, and the United Way of Rochester. Mr. Fullwood brings to the board particular experience with marketing, organizational development, and operations management.
Rajiv L. Gupta (1945)	Trustee	December 2001	Mr. Gupta is the former Chairman and Chief Executive Officer (retired 2009) and President (2006–2008) of Rohm and Haas Co. (chemicals). Mr. Gupta serves as a director of Tyco International, Ltd. (diversified manufacturing and services) and Hewlett-Packard Company (electronic computer manufacturing); as a trustee of The Conference Board; and on the Board of Managers of Delphi Automotive LLP (automotive components). Mr. Gupta brings to the board particular experience with finance, capital markets, and global operations.
Amy Gutmann (1949)	Trustee	June 2006	Dr. Gutmann serves as the President of the University of Pennsylvania. She is the Christopher H. Browne Distinguished Professor of Political Science in the School of Arts and Sciences with secondary appointments at the Annenberg School for Communication and the Graduate School of Education at the University of Pennsylvania. Dr. Gutmann also serves as a director of Carnegie Corporation of New York, Schuylkill River Development Corporation, and Greater Philadelphia Chamber of Commerce; and as a trustee of the National Constitution Center. Dr. Gutmann is Chair of the Presidential Commission for the Study of Bioethical Issues. Dr. Gutmann brings to the board particular experience with community and organizational development, education, ethics, and public policy.

Interests of US Fund Trustees (Continued)

Name, Year of Birth	Current Position	Trustee Since	Principal Occupation(s) During the Past Five Years and Outside Directorships
Independent Trustees			
JoAnn Heffernan Heisen (1950)	Trustee	July 1998	Ms. Heisen is the former Corporate Vice President and Chief Global Diversity Officer and a Member of the Executive Committee (retired 2008) of Johnson & Johnson (pharmaceuticals/consumer products). Ms. Heisen served as Vice President and Chief Information Officer of Johnson & Johnson from 1997 to 2005; corporate controller from 1995 to 1997; and corporate treasurer from 1991 to 1995. Ms. Heisen serves as a director of the University Medical Center at Princeton and Women's Research and Education Institute; and as a member of the advisory board of the Maxwell School of Citizenship and Public Affairs at Syracuse University. Ms. Heisen brings to the board particular experience with human resources, and financial and information technology matters.
F. Joseph Loughrey (1949)	Trustee	October 2009	Mr. Loughrey is the former President and Chief Operating Officer (retired 2009) and Vice Chairman of the Board (2008–2009) of Cummins Inc. (industrial machinery). From 1996 to 1999, Mr. Loughrey served as the chief technical officer of Cummins Inc. Mr. Loughrey serves as a director of SKF AB (industrial machinery), Hillenbrand, Inc. (specialized consumer services), Sauer-Danfoss Inc. (machinery), the Lumina Foundation for Education, and Oxfam America; and as Chairman of the Advisory Council for the College of Arts and Letters at the University of Notre Dame. Mr. Loughrey brings to the board particular experience with global operations, technology, and risk and human resources management.
André F. Perold (1952)	Trustee	December 2004	Mr. Perold is the George Gund Professor of Finance and Banking at the Harvard Business School, and Chair of the Investment Committee of HighVista Strategies LLC (private investment firm). From 2003 to 2009, Mr. Perold served as chairman of the board of UNX, Inc. (equities trading firm). Mr. Perold brings to the board particular experience with investment management and finance.
Alfred M. Rankin, Jr. (1941)	Lead Independent Trustee	January 1993	Mr. Rankin serves as Chairman, President, and Chief Executive Officer of NACCO Industries, Inc. (forklift/ trucks/ housewares/ lignite). Mr. Rankin also serves as a director of Goodrich Corporation (industrial products/ aircraft systems and services); Chairman of the Federal Reserve Bank of Cleveland; and a trustee of The Cleveland Museum of Art. Mr. Rankin brings to the board particular experience with finance, capital markets, and risk and operations management.
Peter F. Volanakis (1955)	Trustee	July 2009	Mr. Volanakis has served as President since 2007 and Chief Operating Officer since 2005 of Corning Incorporated (communications equipment). Mr. Volanakis served as President of Corning Technologies from 2001 to 2005. Mr. Volanakis also serves as a director of Corning Incorporated and Dow Corning; a trustee of the Corning Incorporated Foundation and the Corning Museum of Glass; and an Overseer of the Amos Tuck School of Business Administration at Dartmouth College. Mr. Volanakis brings to the board particular experience with international operations, marketing, and corporate development.

Directors of Vanguard

The table below provides information about the directors of Vanguard.

Name	Current Position	Board member since:	Principal Occupation(s) and Outside Directorships
John M. James	Director	2010	Managing Director, Vanguard Investments Australia Ltd (from 1 May 2010); Head of Broker-Dealer Sales and Distribution, Vanguard Financial Advisor Services (2008-2010); Chief Executive Officer, Port Adelaide Football Club (2004-2008); General Manager, Corporate Solutions, MLC (2000-2004).
Joseph P. Brennan	Director	2009	Chief Investment Officer, Vanguard Investment Australia Ltd (since 2009); Principal, Head of Portfolio Review Department, The Vanguard Group, Inc. (2004 – 2009).
James M. Norris	Director	2008	Head of International, The Vanguard Group (since 2008); Principal, Vanguard Advice, Brokerage & Retirement Services Group (2004-08); Member of the M.B.A. advisory board for Saint Joseph's University; Board member of Triskeles Foundation.

Watt	Director	2009	Principal, General Counsel and Company Secretary, Vanguard Investments Australia Ltd (since 1999); Director of Regnan Governance Research & Engagement Pty Ltd (since 2007); Director of Ruyton Girls' School (since 2009). Member, Committee of Management Skin and Cancer Foundation Victoria (since 2005).

Interests of other parties

Vanguard is an Australian financial services licensee and the product issuer of the CDIs. Vanguard will receive from VGI an amount equal to all costs incurred by Vanguard in relation to being the issuer of the cross-listed ETF plus a margin as agreed from time to time.

Consents

Computershare Investor Services Pty Limited has given and not withdrawn its consent to be named in this Prospectus in the form and context in which all references to its name appear and takes no responsibility for any part of this Prospectus other than references to its name.

Consents to lodge Prospectus

This Prospectus has been prepared by Vanguard. Each of the Trustees of the US Fund and the directors of Vanguard has consented to the lodgement of this Prospectus with ASIC.

Incorporating other documents

The US Prospectus and SAI are referred to and incorporated by reference in this Prospectus under section 712 of the *Corporations Act*. The SAI is incorporated by reference into its US Prospectus and for US legal purposes is a part of the US Prospectus.

The US Prospectus and the SAI have been lodged with ASIC, and this Prospectus simply refers to parts of these documents instead of setting out the information that is contained in them. The information below is provided to allow a person to whom the offer is made to decide whether to obtain a copy of either the US Prospectus or the SAI.

The US Prospectus contains information regarding:

- The US Fund's investment objective, fees and expenses, primary investment strategies, risks, performance and investment advisor; purchases and sale of the fund shares; and US tax information.
- US ETF Securities and how they differ from conventional mutual fund securities.
- How to buy and sell US ETF Securities.

- Share class overview, market exposure, security selection, cash management and other investment policies and risks.
- Further details on special risks of US ETF Securities, purchasing and selling US ETF securities on the secondary market, conversion privilege, portfolio holdings disclosure and turnover rate.
- VGI and its corporate structure.
- Fund distributions and the reinvestment of distributions.
- Basic US tax points.
- How the US Fund's net asset value is determined.
- Highlights from the US Fund's financial statements.

The SAI contains information regarding:

- The US Fund's organisational structure and service providers.
- Characteristics of the US Fund's securities.
- US tax status of the US Fund.
- The US Fund's fundamental and non-fundamental policies ("fundamental" policies are those that cannot be changed without shareholder approval).
- The purchase and redemption of the US Fund's non-ETF securities.
- Management of the US Fund.
- Officers and trustees of the US Fund, trustee compensation and trustee ownership of fund securities.
- Portfolio holdings disclosure policies and procedures.
- The US Fund's portfolio managers, including summary information about other accounts they manage and their compensation structure.
- Allocation of portfolio transactions among various broker-dealers.
- The US Fund's proxy voting guidelines.
- The ETF share-class, including exchange listing and trading, conversions and exchanges, book entry only system, purchase and redemption of ETF Securities in creation units and foreign market information.

Copies of the documents incorporated in this Prospectus (including US Prospectus and the SAI) may be obtained by contacting Vanguard Client Services on 1300 655 888 or by visiting Vanguard's website at www.vanguard.com.au. These documents will be available free of charge.

Consequential filings in the US

Certain documents which may be filed or prepared by VGI subsequent to the date of this Prospectus may be incorporated by reference in the US Prospectus. Such documents (if any) cannot (for legal and timing reasons) be taken to be included in this Prospectus under section 712 of the *Corporations Act*. Such documents (if any) may be given to the ASX as announcements by Vanguard and will be made available on Vanguard's website at www.vanguard.com.au.

ASX Confirmations and Waivers

The ASX has granted Vanguard a confirmation under the ASX Market Rules that for the purposes of ASX Market Rule 2.10, the Vanguard All-World ex-US ETF constitutes an 'ETF'.

The ASX has granted Vanguard a waiver from ASX Market Rule 10A.4.1 such that the investment

strategies or policies can be amended without the approval of 75% of votes cast on a proposed resolution. Any change to the investment strategies or policies of the US Fund will be subject to the requirements as set out in the US Prospectus. In this regard, the board of trustees of the US Fund, which oversees the management of the US Fund, may change investment strategies or policies in the interests of shareholders without a shareholder vote. For this reason, it is unlikely that an Australian investor would be able to influence the outcome of a change in the investment strategies or policies.

ASIC Relief

ASIC has issued an instrument of relief INS 09-00290 dated 16 April 2009, relating to offers for sale of CDIs on the ASX. ASIC has also issued an instrument of relief INS 09-00289 dated 16 April 2009, relating to the ability of Vanguard Investments Australia Ltd to offer CDIs under a Prospectus.

FTSE Disclaimer

The Vanguard All-World ex-US Shares Index ETF is not in any way sponsored, endorsed, sold or promoted by FTSE International Limited (FTSE) or by the London Stock Exchange Plc (the 'Exchange') or by The Financial Times Limited (FT) and neither FTSE nor the Exchange nor FT makes any warranty or representation whatsoever, expressly or impliedly, either as to the results to be obtained from the use of the FTSE All-World ex-US Index (the Index) and/or the figure at which the said Index stands at any particular time on any particular day or otherwise. The Index is compiled and calculated by FTSE. However, neither FTSE nor the Exchange nor FT shall be liable (whether in negligence or otherwise) to any person for any error in the Index and neither FTSE nor the Exchange nor FT shall be under any obligation to advise any person of any error therein.

'FTSE®', 'FT-SE®' and 'Footsie®' are trade marks jointly owned by the London Stock Exchange Plc and The Financial Times Limited and are used by FTSE International Limited under licence. 'All World' is a trade mark of FTSE International Limited.

ETF Summary

Investment Objective

The Fund seeks to track the performance of a benchmark index that measures the investment return of stocks of companies located in developed and emerging markets outside of the United States.

Fees and Expenses

The following table describes the fees and expenses you may pay if you buy and hold ETF Shares of the Fund.

Shareholder Fees

(Fees paid directly from your investment)

Transaction Fee on Purchases and Sales	None through Vanguard (Broker fees vary)
Transaction Fee on Reinvested Dividends	None through Vanguard (Broker fees vary)
Transaction Fee on Conversion to ETF Shares	None through Vanguard (Broker fees vary)

Annual Fund Operating Expenses

(Expenses that you pay each year as a percentage of the value of your investment)

Management Expenses	0.16%
12b-1 Distribution Fee	None
Other Expenses	0.06%
Total Annual Fund Operating Expenses	0.22%

Example

The following example is intended to help you compare the cost of investing in FTSE All-World ex-US ETF with the cost of investing in other funds. It illustrates the hypothetical expenses that you would incur over various periods if you invest \$10,000 in FTSE All-World ex-US ETF. This example assumes that FTSE All-World ex-US ETF Shares provide a return of 5% a year and that operating expenses remain as stated in the preceding table. The results apply whether or not you redeem your investment at the end of the given period. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$23	\$71	\$124	\$280

This example does not include the brokerage commissions that you may pay to buy and sell ETF Shares of the Fund.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the previous expense example, reduce the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 6%.

Primary Investment Strategies

The Fund employs a “passive management”—or indexing—investment approach designed to track the performance of the FTSE All-World ex US Index, a free-float-adjusted, market-capitalization-weighted index designed to measure equity market performance of international markets. The Index includes approximately 2,180 stocks of companies located in 46 countries, including both developed and emerging markets. As of October 31, 2010, the United Kingdom, Japan, France, Australia, Germany, and Canada, made up approximately 15%, 13%, 7%, 6%, 6%, and 6%, respectively, of the Index’s market capitalization. The Fund attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the Index, holding each stock in approximately the same proportion as its weighting in the Index.

Primary Risks

An investment in the Fund could lose money over short or even long periods. You should expect the Fund’s share price and total return to fluctuate within a wide range, like the fluctuations of global stock markets. The Fund’s performance could be hurt by:

- *Stock market risk*, which is the chance that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices. The Fund’s investments in foreign stocks can be riskier than U.S. stock investments. The prices of foreign stocks and the prices of U.S. stocks have, at times, moved in opposite directions. In addition, the Fund’s target index may, at times, become focused in stocks of a particular sector, category, or group of companies.
- *Country/regional risk*, which is the chance that world events—such as political upheaval, financial troubles, or natural disasters—will adversely affect the value of securities issued by companies in foreign countries or regions. Because the Fund may invest a large portion of its assets in securities of companies located in any one country or region, the Fund’s performance may be hurt disproportionately by the poor performance of its investments in that area. Country/regional risk is especially high in emerging markets.
- *Emerging markets risk*, which is the chance that the stocks of companies located in emerging markets will be substantially more volatile, and substantially less liquid, than the stocks of companies located in more developed foreign markets.

- *Currency risk*, which is the chance that the value of a foreign investment, measured in U.S. dollars, will decrease because of unfavorable changes in currency exchange rates. Currency risk is especially high in emerging markets.

Because ETF Shares are traded on an exchange, they are subject to additional risks:

- FTSE All-World ex-US ETF Shares are listed for trading on NYSE Arca and can be bought and sold on the secondary market at market prices. Although it is expected that the market price of a FTSE All-World ex-US ETF Share typically will approximate its net asset value (NAV), there may be times when the market price and the NAV vary significantly. Thus, you may pay more or less than NAV when you buy FTSE All-World ex-US ETF Shares on the secondary market, and you may receive more or less than NAV when you sell those shares.
- Although FTSE All-World ex-US ETF Shares are listed for trading on NYSE Arca, it is possible that an active trading market may not be maintained.
- Trading of FTSE All-World ex-US ETF Shares on NYSE Arca may be halted by the activation of individual or marketwide “circuit breakers” (which halt trading for a specific period of time when the price of a particular security or overall market prices decline by a specified percentage). Trading of FTSE All-World ex-US ETF Shares may also be halted if (1) the shares are delisted from NYSE Arca without first being listed on another exchange or (2) if NYSE Arca officials determine that such action is appropriate in the interest of a fair and orderly market to protect investors.

An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Annual Total Returns

The following bar chart and table are intended to help you understand the risks of investing in the Fund. The bar chart shows how the performance of the Fund’s ETF Shares (based on NAV) has varied from one calendar year to another over the periods shown. The table shows how the average annual total returns of the ETF Shares compare with those of the Fund’s target index, which has investment characteristics similar to those of the Fund. FTSE All-World ex US Index returns are adjusted for withholding taxes applicable to U.S. based mutual funds organized as Delaware statutory trusts. Keep in mind that the Fund’s past performance (before and after taxes) does not indicate how the Fund will perform in the future. Updated performance information is available on our website at vanguard.com/performance or by calling Vanguard toll-free at 800-662-7447.

Annual Total Returns — Vanguard FTSE All-World ex-US Index Fund ETF Shares

During the periods shown in the bar chart, the highest return for a calendar quarter was 28.11% (quarter ended June 30, 2009), and the lowest return for a quarter was -21.93% (quarter ended December 31, 2008).

Average Annual Total Returns for Periods Ended December 31, 2010

	1 Year	Since Inception (Mar. 2, 2007)
Vanguard FTSE All-World ex-US Index Fund ETF Shares		
Return Before Taxes	11.85%	0.80%
Return After Taxes on Distributions	11.46	0.49
Return After Taxes on Distributions and Sale of Fund Shares	8.13	0.63
FTSE All-World ex US Index (reflects no deduction for fees or expenses)	11.65%	0.98%

Actual after-tax returns depend on your tax situation and may differ from those shown in the preceding table. When after-tax returns are calculated, it is assumed that the shareholder was in the highest individual federal marginal income tax bracket at the time of each distribution of income or capital gains or upon redemption. State and local income taxes are not reflected in the calculations. Please note that after-tax returns are not relevant for a shareholder who holds fund shares in a tax-deferred account, such as an individual retirement account or a 401(k) plan. Also, figures captioned *Return After Taxes on Distributions and Sale of Fund Shares* will be higher than other figures for the same period if a capital loss occurs upon redemption and results in an assumed tax deduction for the shareholder.

Investment Advisor

The Vanguard Group, Inc.

Portfolio Manager

Ryan E. Ludt, Principal of Vanguard. He has managed the Fund since 2008.

Purchase and Sale of Fund Shares

You can buy and sell ETF Shares of the Fund through a brokerage firm. The firm may charge you a commission to execute the transaction. Unless imposed by your brokerage firm, there is no minimum dollar amount you must invest and no minimum number of shares you must buy. The price you pay or receive for ETF Shares will be the prevailing market price, which may be more or less than the NAV of the shares.

ETF Shares of the Fund cannot be purchased or redeemed directly with the Fund, except by certain authorized broker-dealers. These broker-dealers may purchase and redeem ETF Shares only in large blocks (Creation Units) worth several million dollars, and only in exchange for baskets of securities rather than cash. For this Fund, the number of ETF Shares in a Creation Unit is 300,000.

Tax Information

The Fund's distributions may be taxable as ordinary income or capital gain. A sale of ETF Shares is a taxable event, which means that you may have a capital gain to report as income, or a capital loss to report as a deduction, when you complete your federal income tax return. Dividend and capital gain distributions that you receive, as well as your gains or losses from any sale of ETF Shares, may also be subject to state and local income taxes.

Payments to Financial Intermediaries

The Fund and its investment advisor do not pay financial intermediaries for sales of Fund shares.

Investing in Vanguard ETF® Shares

What Are Vanguard ETF Shares?

Vanguard ETF Shares are an exchange-traded class of shares issued by certain Vanguard mutual funds. ETF Shares represent an interest in the portfolio of stocks or bonds held by the issuing fund. This prospectus describes FTSE All-World ex-US ETF, a class of shares issued by Vanguard FTSE All-World ex-US Index Fund. In addition to ETF Shares, the Fund offers three conventional (not exchange-traded) classes of shares. This prospectus, however, relates only to ETF Shares.

How Are Vanguard ETF Shares Different From Conventional Mutual Fund Shares?

Conventional mutual fund shares are bought from and redeemed with the issuing fund for cash at the net asset value (NAV), typically calculated once a day. ETF Shares, by contrast, cannot be purchased from or redeemed with the issuing fund by an individual investor.

An organized secondary trading market is expected to exist for ETF Shares, unlike conventional mutual fund shares, because ETF Shares are listed for trading on a national securities exchange. Investors can purchase and sell ETF Shares on the secondary market through a broker. Secondary-market transactions occur not at NAV, but at market prices that change throughout the day, based on the supply of, and demand for, ETF Shares and on changes in the prices of the fund's portfolio holdings.

The market price of a fund's ETF Shares typically will differ somewhat from the NAV of those shares. The difference between market price and NAV is expected to be small most of the time, but in times of extreme market volatility the difference may become significant.

How Do I Buy and Sell Vanguard ETF Shares?

Individual investors can purchase ETF Shares on the secondary market through a broker. When you buy or sell ETF Shares, your broker may charge a commission. You will also incur the cost of the "bid-asked spread," which is the difference between the price a dealer will pay for a security and the somewhat higher price at which the dealer will sell the same security. In addition, because secondary-market transactions occur at market prices, you may pay more or less than NAV when you buy ETF Shares, and receive more or less than NAV when you sell those shares.

Your ownership of ETF Shares will be shown on the records of the broker through which you hold the shares. Vanguard will not have any record of your ownership. Your account information will be maintained by your broker, which will provide you with account statements, confirmations of your purchases and sales of ETF Shares, and tax information. Your broker also will be responsible for distributing income and capital gains distributions and for ensuring that you receive shareholder reports and other communications from the fund whose ETF Shares you own. You will receive other services (e.g., dividend reinvestment and average cost information) only if your broker offers these services.

More on the Fund and ETF Shares

This prospectus describes the primary risks you would face as a Fund shareholder. It is important to keep in mind one of the main axioms of investing: The higher the risk of losing money, the higher the potential reward. The reverse, also, is generally true: The lower the risk, the lower the potential reward. As you consider an investment in any mutual fund, you should take into account your personal tolerance for fluctuations in the securities markets. Look for this  symbol throughout the prospectus. It is used to mark detailed information about the more significant risks that you would confront as a Fund shareholder. To highlight terms and concepts important to mutual fund investors, we have provided Plain Talk® explanations along the way. Reading the prospectus will help you decide whether the Fund is the right investment for you. We suggest that you keep this prospectus for future reference.

Share Class Overview

This prospectus offers the Fund's ETF Shares, an exchange-traded class of shares. A separate prospectus offers the Fund's Investor Shares, which have an investment minimum of \$3,000. Another prospectus offers the Fund's Institutional and Institutional Plus Shares, which are generally for investors who invest a minimum of \$5 million and \$100 million, respectively.

All share classes offered by a Fund have the same investment objective, strategies, and policies. However, different share classes have different expenses; as a result, their investment performances will differ.

A Note to Investors

Vanguard ETF Shares can be purchased directly from the issuing Fund only in exchange for a basket of securities that is expected to be worth several million dollars. Most individual investors, therefore, will not be able to purchase ETF Shares directly from the Fund. Instead, these investors will purchase ETF Shares on the secondary market with the assistance of a broker.

Plain Talk About Fund Expenses

All mutual funds have operating expenses. These expenses, which are deducted from a fund's gross income, are expressed as a percentage of the net assets of the fund. Assuming that operating expenses remain as stated in the Annual Fund Operating Expenses table, Vanguard FTSE All-World ex-US ETF Shares' expense ratio would be 0.22%, or \$2.20 per \$1,000 of average net assets. The average expense ratio for international stock funds in 2009 was 1.44%, or \$14.40 per \$1,000 of average net assets (derived from data provided by Lipper Inc., which reports on the mutual fund industry). Management expenses, which are one part of operating expenses, include investment advisory fees as well as other costs of managing a fund—such as account maintenance, reporting, accounting, legal, and other administrative expenses.

Plain Talk About Costs of Investing

Costs are an important consideration in choosing a mutual fund. That's because you, as a shareholder, pay a proportionate share of the costs of operating a fund, plus any transaction costs incurred when the fund buys or sells securities. These costs can erode a substantial portion of the gross income or the capital appreciation a fund achieves. Even seemingly small differences in expenses can, over time, have a dramatic effect on a fund's performance.

The following sections explain the primary investment strategies and policies that the Fund uses in pursuit of its objective. The Fund's board of trustees, which oversees the Fund's management, may change investment strategies or policies in the interest of shareholders without a shareholder vote, unless those strategies or policies are designated as fundamental. Note that the Fund's investment objective is not fundamental and may be changed without a shareholder vote. Under normal circumstances, the Fund will invest at least 80% of its assets in the stocks that make up its target index. The Fund may change its 80% policy only upon 60 days' notice to shareholders.

Market Exposure

The Fund invests mainly in common stocks of companies located in developed and emerging markets around the world.

Plain Talk About International Investing

U.S. investors who invest abroad will encounter risks not typically associated with U.S. companies, because foreign stock and bond markets operate differently from the U.S. markets. For instance, foreign companies are not subject to the same accounting, auditing, and financial-reporting standards and practices as U.S. companies, and their stocks may not be as liquid as those of similar U.S. firms. In addition, foreign stock exchanges, brokers, and companies generally have less government supervision and regulation than their counterparts in the United States. These factors, among others, could negatively affect the returns U.S. investors receive from foreign investments.

The Fund is subject to stock market risk, which is the chance that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices. The Fund's investments in foreign stocks can be riskier than U.S. stock investments. The prices of foreign stocks and the prices of U.S. stocks have, at times, moved in opposite directions. In addition, the Fund's target index may, at times, become focused in stocks of a particular sector, category, or group of companies.

To illustrate the volatility of international stock prices, the following table shows the best, worst, and average annual total returns for foreign stock markets over various periods as measured by the MSCI EAFE Index, a widely used barometer of international market activity. (Total returns consist of dividend income plus change in market price.) Note that the returns shown do not include the costs of buying and selling stocks or other expenses that a real-world investment portfolio would incur.

International Stock Market Returns
(1970–2010)

	1 Year	5 Years	10 Years	20 Years
Best	69.4%	36.1%	22.0%	15.5%
Worst	–43.4	–2.9	0.8	3.1
Average	11.8	10.4	10.7	11.2

The table covers all of the 1-, 5-, 10-, and 20-year periods from 1970 through 2010. These average returns reflect *past* performance of international stocks; you should not regard them as an indication of *future* performance of either foreign markets as a whole or the Fund in particular.

Note that the MSCI EAFE Index does not take into account returns for emerging markets, which can be substantially more volatile, and substantially less liquid, than

the more developed markets included in the Index. In addition, because the MSCI EAFE Index tracks the European and Pacific developed markets collectively, the returns in the preceding table do not reflect the variability of returns for these markets individually. To illustrate this variability, the following table shows returns for different international markets—as well as for the U.S. market for comparison—from 2001 through 2010, as measured by their respective indexes.

Returns for Various Stock Markets¹

	European Market ²	Pacific Market ²	Emerging Markets ²	U.S. Market
2001	−19.90%	−25.40%	−2.62%	−11.89%
2002	−18.38	−9.29	−6.17	−22.10
2003	38.54	38.48	55.82	28.68
2004	20.88	18.98	25.55	10.88
2005	9.42	22.64	34.00	4.91
2006	33.72	12.20	32.17	15.79
2007	13.86	5.30	39.39	5.49
2008	−46.42	−36.42	−53.33	−37.00
2009	35.83	24.18	78.51	26.46
2010	3.88	15.92	18.88	15.06

¹ European market returns are measured by the MSCI Europe Index; Pacific market returns are measured by the MSCI Pacific Index; emerging markets returns are measured by the MSCI Emerging Markets Index; and U.S. market returns are measured by the Standard & Poor's 500 Index.

² MSCI Index returns are adjusted for withholding taxes applicable to Luxembourg holding companies.

Keep in mind that these returns reflect *past* performance of the various indexes; you should not consider them as an indication of *future* performance of the indexes, or of the Fund in particular.

The Fund is subject to country/regional risk and currency risk. Country/regional risk is the chance that world events—such as political upheaval, financial troubles, or natural disasters—will adversely affect the value of securities issued by companies in foreign countries or regions. Because the Fund may invest a large portion of its assets in securities of companies located in any one country or region, the Fund's performance may be hurt disproportionately by the poor performance of its investments in that area. Currency risk is the chance that the value of a foreign investment, measured in U.S. dollars, will decrease because of unfavorable changes in currency exchange rates. Country/regional risk and currency risk are especially high in emerging markets.

Security Selection

The Fund attempts to track the investment performance of a benchmark index consisting of common stocks of companies located in developed and emerging countries around the world. The companies in which the Fund invests will be within the capitalization range of the companies included in the FTSE All-World ex US Index (\$239 million to \$216 billion as of October 31, 2010). While the Index tracks stocks that are predominantly large-cap, it also tracks mid- and small-cap stocks to a lesser extent. Historically, the stocks of these companies have been more volatile than—and at times have performed quite differently from—large-cap stocks. In the future, the Index's market-capitalization range may be higher or lower, and the Fund's investments may track a different index. Such changes may occur at any time and without notice to Fund shareholders.

 *The Fund is subject to emerging markets risk, which is the chance that the stocks of companies located in emerging markets will be substantially more volatile, and substantially less liquid, than the stocks of companies located in more developed foreign markets.*

Indexing Strategy. The Fund attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the Index, holding each stock in approximately the same proportion as its weighting in the Index.

Depository Receipts. The Fund, in most cases, will obtain economic exposure to stocks of its target index (component securities) by investing directly in common stocks. However, the Fund reserves the right to obtain economic exposure to component securities indirectly by purchasing depository receipts of the component securities. Depository receipts are securities that are listed on exchanges or quoted in over-the-counter markets in one country, but represent shares of issuers domiciled in another country. Generally, the Fund will hold depository receipts only when the advisor believes that the Fund would benefit from holding the depository receipt, rather than the underlying component security. The Fund might opt to hold depository receipts if the foreign market in which a stock trades does not provide adequate protection to the rights of foreign investors or if government regulators place restrictions on the free flow of capital or currency. The Fund treats depository receipts that represent interests in component securities as component securities for purposes of any requirements related to the percentage of component securities held in the Fund's portfolio.

The FTSE All-World ex US Index. The FTSE All-World ex US Index is maintained by FTSE Group (FTSE), a widely known global index provider that currently manages and calculates more than 120,000 indexes daily.

Other Investment Policies and Risks

The Fund reserves the right to substitute a different index for the index it currently tracks if the current index is discontinued, if the Fund's agreement with the sponsor of its target index is terminated, or for any other reason determined in good faith by the Fund's board of trustees. In any such instance, the substitute index would measure the same market segment as the current index.

The Fund may invest, to a limited extent, in stock futures and options contracts, warrants, convertible securities, and swap agreements, all of which are types of derivatives. Generally speaking, a derivative is a financial contract whose value is based on the value of a financial asset (such as a stock, bond, or currency), a physical asset (such as gold, oil, or wheat), or a market index (such as the S&P 500® Index). Investments in derivatives may subject the Fund to risks different from, and possibly greater than, those of the underlying securities, assets, or market indexes. The Fund will not use derivatives for speculation or for the purpose of leveraging (magnifying) investment returns.

The Fund may enter into forward foreign currency exchange contracts, which are a type of derivative, in order to maintain the same currency exposure as its respective index. A forward foreign currency exchange contract is an agreement to buy or sell a country's currency at a specific price on a specific date, usually 30, 60, or 90 days in the future. In other words, the contract guarantees an exchange rate on a given date. These contracts, however, would not prevent the Fund's securities from falling in value during foreign market downswings. The Fund may use these contracts to gain currency exposure when investing in stock index futures and to settle trades in a foreign currency.

Cash Management

The Fund's daily cash balance may be invested in one or more Vanguard CMT Funds, which are very low-cost money market funds. When investing in a Vanguard CMT Fund, the Fund bears its proportionate share of the at-cost expenses of the CMT Fund in which it invests.

Temporary Investment Measures

The Fund may temporarily depart from its normal investment policies and strategies when doing so is believed to be in the Fund's best interest, so long as the alternative is consistent with the Fund's investment objective. For instance, the Fund may invest beyond the normal limits in derivatives or ETFs that are consistent with the Fund's objective when those instruments are more favorably priced or provide needed liquidity, as might be the case when the Fund receives large cash flows that it cannot prudently invest immediately.

Special Risks of Exchange-Traded Shares

 **ETF Shares are not individually redeemable.** They can be redeemed with the issuing Fund at NAV only in large blocks known as Creation Units, which would cost millions of dollars to assemble.

 **The market price of ETF Shares may differ from NAV.** Vanguard ETF Shares are listed for trading on a national securities exchange and can be bought and sold on the secondary market at market prices. Although it is expected that the market price of an ETF Share typically will approximate its NAV, there may be times when the market price and the NAV differ significantly. Thus, you may pay more or less than NAV when you buy ETF Shares on the secondary market, and you may receive more or less than NAV when you sell those shares.

The market price of ETF Shares, like the price of any exchange-traded security, includes a “bid-asked spread” charged by the exchange specialist and other market-makers that cover the particular security. In times of severe market disruption, the bid-asked spread can increase significantly. This means that ETF Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest, when the price of ETF Shares is falling fastest—and this may be the time that you most want to sell ETF Shares.

Vanguard’s website at vanguard.com shows the previous day’s closing NAV and closing market price for the Fund’s ETF Shares. The website also discloses, in the **Premium/Discount Analysis** section of the ETF Shares’ Performance page, how frequently the Fund’s ETF Shares traded at a premium or discount to NAV (based on closing NAVs and market prices) and the magnitudes of such premiums and discounts.

 **An active trading market may not exist.** Although Vanguard ETF Shares are listed on a national securities exchange, it is possible that an active trading market may not be maintained.

 **Trading may be halted.** Trading of Vanguard ETF Shares on an exchange may be halted by the activation of individual or marketwide “circuit breakers” (which halt trading for a specific period of time when the price of a particular security or overall market prices decline by a specified percentage). Trading of ETF Shares may also be halted if (1) the shares are delisted from the listing exchange without first being listed on another exchange or (2) exchange officials determine that such action is appropriate in the interest of a fair and orderly market or to protect investors.

Purchasing and Selling Vanguard ETF Shares on the Secondary Market

You can buy and sell ETF Shares on the secondary market in the same way you buy and sell any other exchange-traded security—through a broker. The broker may charge you a commission to execute the transaction. The price at which you buy or sell ETF Shares (i.e., the market price) may be more or less than the NAV of the shares. Unless imposed by your broker, there is no minimum dollar amount you must invest and no minimum number of ETF Shares you must buy.

Conversion Privilege

Owners of conventional shares issued by the Fund may convert those shares to ETF Shares of equivalent value of the same fund. *Please note that investors who own conventional shares through a 401(k) plan or other employer-sponsored retirement or benefit plan may not convert those shares to ETF Shares.* Vanguard Brokerage Services® (Vanguard Brokerage) does not impose a fee on conversions from Vanguard conventional shares to Vanguard ETF Shares. However, other brokerage firms may charge a fee to process a conversion. Vanguard reserves the right, in the future, to impose a transaction fee on conversions or to limit or terminate the conversion privilege. ETF Shares, whether acquired through a conversion or purchased on the secondary market, cannot be converted to conventional shares. Similarly, ETF Shares of one fund cannot be exchanged for ETF Shares of another fund.

You must hold ETF Shares in a brokerage account. Thus, before converting conventional shares to ETF Shares, you must have an existing, or open a new, brokerage account. To initiate a conversion of conventional shares to ETF Shares, please contact your broker.

Converting conventional shares to ETF Shares generally is accomplished as follows. First, after your broker notifies Vanguard of your request to convert, Vanguard will transfer your conventional shares from your account to the broker's omnibus account with Vanguard (an account maintained by the broker on behalf of all its customers who hold conventional Vanguard fund shares through the broker). After the transfer, Vanguard's records will reflect your broker, not you, as the owner of the shares. Next, your broker will instruct Vanguard to convert the appropriate number or dollar amount of conventional shares in its omnibus account to ETF Shares of equivalent value, based on the respective NAVs of the two share classes.

Your Fund's transfer agent will reflect ownership of all ETF Shares in the name of the Depository Trust Company (DTC). The DTC will keep track of which ETF Shares belong to your broker, and your broker, in turn, will keep track of which ETF Shares belong to you.

Because the DTC is unable to handle fractional shares, only whole shares will be converted. For example, if you owned 300.250 conventional shares, and this was equivalent in value to 90.750 ETF Shares, the DTC account would receive 90 ETF

Shares. Conventional shares worth 0.750 ETF Shares (in this example, that would be 2.481 conventional shares) would remain in the broker's omnibus account with Vanguard. Your broker then could either (1) credit your account with 0.750 ETF Shares rather than 2.481 conventional shares, or (2) redeem the 2.481 conventional shares at NAV, in which case you would receive cash in place of those shares. If your broker chooses to redeem your conventional shares, you will realize a gain or loss on the redemption that must be reported on your tax return (unless you hold the shares in an IRA or other tax-deferred account). Please consult your broker for information on how it will handle the conversion process, including whether it will impose a fee to process a conversion.

If you convert your conventional shares to ETF Shares through Vanguard Brokerage, *all* conventional shares for which you request conversion will be converted to ETF Shares of equivalent value. Because no fractional shares will have to be sold, the transaction will be 100% tax-free.

Here are some important points to keep in mind when converting conventional shares of a Vanguard fund to ETF Shares:

- The conversion process can take anywhere from several days to several weeks, depending on your broker. Vanguard generally will process conversion requests either on the day they are received or on the next business day. Vanguard imposes conversion blackout windows around the dates when a fund with ETF Shares declares dividends. This is necessary to prevent a shareholder from collecting a dividend from both the conventional share class currently held and also from the ETF share class to which the shares will be converted.
- Until the conversion process is complete, you will remain fully invested in a fund's conventional shares, and your investment will increase or decrease in value in tandem with the NAV of those shares.
- The conversion transaction is nontaxable except, if applicable, to the very limited extent previously described.
- If you have used the average cost basis method of accounting for your conventional mutual fund shares prior to converting them to ETF Shares, you are required to maintain the average cost basis method of accounting for your converted ETF Shares, unless you first obtain permission from the IRS to use a different method. However, since January 1, 2010, any new ETF Shares that you purchase into your account may be eligible for another IRS-approved method. Please contact your tax advisor to discuss your specific situation.

A precautionary note to investment companies: For purposes of the Investment Company Act of 1940, Vanguard ETF Shares are issued by registered investment companies, and the acquisition of such shares by other investment companies is subject to the restrictions of Section 12(d)(1) of that Act, except as permitted by an SEC

exemptive order that allows registered investment companies to invest in the issuing funds beyond the limits of Section 12(d)(1), subject to certain terms and conditions.

Frequent Trading and Market-Timing

Unlike frequent trading of a Vanguard fund's conventional (i.e., not exchange-traded) classes of shares, frequent trading of ETF Shares does not disrupt portfolio management, increase the fund's trading costs, lead to realization of capital gains by the fund, or otherwise harm fund shareholders. The vast majority of trading in ETF Shares occurs on the secondary market. Because these trades do not involve the issuing fund, they do not harm the fund or its shareholders. A few institutional investors are authorized to purchase and redeem ETF Shares directly with the issuing fund. Because these trades are effected in-kind (i.e., for securities and not for cash), they do not cause any of the harmful effects to the issuing fund (as previously noted) that may result from frequent cash trades. For these reasons, the board of trustees of each fund that issues ETF Shares has determined that it is not necessary to adopt policies and procedures to detect and deter frequent trading and market-timing of ETF Shares. The broker through which you hold your ETF Shares, however, may place certain limits on your ability to purchase and/or sell ETF Shares over any given period.

Portfolio Holdings

We generally post on our website at vanguard.com, in the **Portfolio** section of the Fund's Portfolio & Management page, a detailed list of the securities held by the Fund as of the end of the most recent calendar quarter. This list is generally updated within 30 days after the end of each calendar quarter. Vanguard may exclude any portion of these portfolio holdings from publication when deemed in the best interest of the Fund. We also generally post the ten largest stock portfolio holdings of the Fund and the percentage of the Fund's total assets that each of these holdings represents, as of the end of the most recent calendar quarter. This list is generally updated within 15 calendar days after the end of each calendar quarter. Please consult the Fund's *Statement of Additional Information* or our website for a description of the policies and procedures that govern disclosure of the Fund's portfolio holdings.

Turnover Rate

Although the Fund normally seeks to invest for the long term, the Fund may sell securities regardless of how long they have been held. Generally, index-oriented funds sell securities only in response to redemption requests or changes in the composition of a target index. Because of this, the turnover rate for the Fund has been very low. The **Financial Highlights** section of this prospectus shows historical turnover rates for the Fund. A turnover rate of 100%, for example, would mean that the Fund had sold and replaced securities valued at 100% of its net assets within a one-year period.

The average turnover rate for international stock funds was approximately 94%, as reported by Morningstar, Inc., on October 31, 2010.

Plain Talk About Turnover Rate

Before investing in a mutual fund, you should review its turnover rate. This gives an indication of how transaction costs, which are not included in the fund's expense ratio, could affect the fund's future returns. In general, the greater the volume of buying and selling by the fund, the greater the impact that brokerage commissions and other transaction costs will have on its return. Also, funds with high turnover rates may be more likely to generate capital gains that must be distributed to shareholders as taxable income.

The Fund and Vanguard

The Fund is a member of The Vanguard Group, a family of 37 investment companies with more than 170 funds holding assets of approximately \$1.4 trillion. All of the funds that are members of The Vanguard Group (other than funds of funds) share in the expenses associated with administrative services and business operations, such as personnel, office space, equipment, and advertising.

Vanguard also provides marketing services to the funds. Although shareholders do not pay sales commissions or 12b-1 distribution fees, each fund (other than a fund of funds) or each share class of a fund (in the case of a fund with multiple share classes) pays its allocated share of The Vanguard Group's marketing costs.

Plain Talk About Vanguard's Unique Corporate Structure

The Vanguard Group is truly a *mutual* mutual fund company. It is owned jointly by the funds it oversees and thus indirectly by the shareholders in those funds. Most other mutual funds are operated by management companies that may be owned by one person, by a private group of individuals, or by public investors who own the management company's stock. The management fees charged by these companies include a profit component over and above the companies' cost of providing services. By contrast, Vanguard provides services to its member funds on an at-cost basis, with no profit component, which helps to keep the funds' expenses low.

Investment Advisor

The Vanguard Group, Inc. (Vanguard), P.O. Box 2600, Valley Forge, PA 19482, which began operations in 1975, serves as advisor to the Fund through its Quantitative Equity Group. As of October 31, 2010, Vanguard served as advisor for approximately \$1.2 trillion in assets. Vanguard manages the Fund on an at-cost basis, subject to the supervision and oversight of the trustees and officers of the Fund.

For the fiscal year ended October 31, 2010, the advisory expenses represented an effective annual rate of 0.01% of the Fund's average net assets.

For a discussion of why the board of trustees approved the Fund's investment advisory arrangement, see the most recent semiannual report to shareholders covering the fiscal period ended April 30.

Vanguard's Quantitative Equity Group is overseen by:

George U. Sauter, Chief Investment Officer and Managing Director of Vanguard. As Chief Investment Officer, he is responsible for the oversight of Vanguard's Quantitative Equity and Fixed Income Groups. The investments managed by these two groups include active quantitative equity funds, equity index funds, active bond funds, index bond funds, stable value portfolios, and money market funds. Since joining Vanguard in 1987, Mr. Sauter has been a key contributor to the development of Vanguard's stock indexing and active quantitative equity investment strategies. He received his A.B. in Economics from Dartmouth College and an M.B.A. in Finance from the University of Chicago.

Sandip A. Bhagat, CFA, Principal of Vanguard and head of Vanguard's Quantitative Equity Group. He has oversight responsibility for all active quantitative equity funds and all equity index funds managed by the Quantitative Equity Group. He has managed investment portfolios since 1987 and has been with Vanguard since 2009. He received his B.S. in Chemical Engineering from the University of Bombay, India, and an M.S. in Chemical Engineering and an M.B.A. from the University of Connecticut.

The manager primarily responsible for the day-to-day management of the Fund is:

Ryan E. Ludt, Principal of Vanguard. He has been with Vanguard since 1997; has managed investment portfolios since 2000; and has managed the Fund since 2008. Education: B.S., The Pennsylvania State University.

The *Statement of Additional Information* provides information about each portfolio manager's compensation, other accounts under management, and ownership of shares of the Fund.

Dividends, Capital Gains, and Taxes

Fund Distributions

The Fund distributes to shareholders virtually all of its net income (interest and dividends less expenses) as well as any net capital gains realized from the sale of its holdings. Distributions generally occur annually in December. You can receive distributions of income or capital gains in cash, or you can have them automatically reinvested in more shares of the Fund.

Plain Talk About Distributions

As a shareholder, you are entitled to your portion of a fund's income from interest and dividends as well as capital gains from the fund's sale of investments. Income consists of both the dividends that the fund earns from any stock holdings and the interest it receives from any money market and bond investments. Capital gains are realized whenever the fund sells securities for higher prices than it paid for them. These capital gains are either short-term or long-term, depending on whether the fund held the securities for one year or less or for more than one year.

Reinvestment of Distributions

In order to reinvest dividend and capital gains distributions, investors in the Fund's ETF Shares must hold their shares at a broker that offers a reinvestment service (either the broker's own service or a service made available by a third party, such as the broker's outside clearing firm or the Depository Trust Company (DTC)). If a reinvestment service is available, distributions of income and capital gains can automatically be reinvested in additional whole and fractional ETF Shares of the Fund. If a reinvestment service is not available, investors would receive their distributions in cash. To determine whether a reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker.

As with all exchange-traded funds, reinvestment of dividend and capital gains distributions in additional ETF Shares will occur four business days or more after the ex-dividend date (the date when a distribution of dividends or capital gains is deducted from the price of the Fund's shares). The exact number of days depends on your broker. During that time, the amount of your distribution will not be invested in the Fund and therefore will not share in the Fund's income, gains, and losses.

Basic Tax Points

Investors in taxable accounts should be aware of the following basic federal income tax points:

- Distributions are taxable to you whether or not you reinvest these amounts in additional ETF Shares.
- Distributions declared in December—if paid to you by the end of January—are taxable as if received in December.
- Any dividend and short-term capital gains distributions that you receive are taxable to you as ordinary income. If you are an individual and meet certain holding-period requirements with respect to your Fund shares, you may be eligible for reduced tax rates on “qualified dividend income,” if any, distributed by the Fund.
- Any distributions of net long-term capital gains are taxable to you as long-term capital gains, no matter how long you’ve owned ETF Shares.
- Capital gains distributions may vary considerably from year to year as a result of the Fund’s normal investment activities and cash flows.
- A sale of ETF Shares is a taxable event. This means that you may have a capital gain to report as income, or a capital loss to report as a deduction, when you complete your tax return.

Dividend and capital gains distributions that you receive, as well as your gains or losses from any sale of ETF Shares, may be subject to state and local income taxes.

The Fund may be subject to foreign taxes or foreign tax withholding on dividends, interest, and some capital gains that the Fund receives on foreign securities. You may qualify for an offsetting credit or deduction under U.S. tax laws for any amount designated as your portion of the Fund’s foreign tax obligations, provided that you meet certain requirements. See your tax advisor or IRS publications for more information.

This prospectus provides general tax information only. If you are investing through a tax-deferred retirement account, such as an IRA, special tax rules apply. Please consult your tax advisor for detailed information about any tax consequences for you.

Share Price and Market Price

Share price, also known as *net asset value* (NAV), is calculated each business day as of the close of regular trading on the New York Stock Exchange, generally 4 p.m., Eastern time. Each share class has its own NAV, which is computed by dividing the total assets, minus liabilities, allocated to each share class by the number of Fund shares outstanding for that class. On holidays or other days when the Exchange is closed, the NAV is not calculated, and the Fund does not transact purchase or redemption requests. However, on those days the value of the Fund’s assets may be

affected to the extent that the Fund holds foreign securities that trade on foreign markets that are open.

Remember: If you buy or sell ETF Shares on the secondary market, you will pay or receive the market price, which may be higher or lower than NAV. Your transaction will be priced at NAV only if you purchase or redeem your ETF Shares in Creation Unit blocks, or if you convert your conventional fund shares to ETF Shares.

Stocks held by a Vanguard fund are valued at their *market value* when reliable market quotations are readily available. Certain short-term debt instruments used to manage a fund's cash are valued on the basis of amortized cost. The values of any mutual fund shares held by a fund are based on the NAVs of the shares. The values of any ETF or closed-end fund shares held by a fund are based on the market value of the shares.

When a fund determines that market quotations either are not readily available or do not accurately reflect the value of a security, the security is priced at its *fair value* (the amount that the owner might reasonably expect to receive upon the current sale of the security). A fund also will use fair-value pricing if the value of a security it holds has been materially affected by events occurring before the fund's pricing time but after the close of the primary markets or exchanges on which the security is traded. This most commonly occurs with foreign securities, which may trade on foreign exchanges that close many hours before the fund's pricing time. Intervening events might be: company-specific (e.g., earnings report, merger announcement), or country-specific or regional/global (e.g., natural disaster, economic or political news, act of terrorism, interest rate change). Intervening events include price movements in U.S. markets that are deemed to affect the value of foreign securities.

Fair value prices are determined by Vanguard according to procedures adopted by the board of trustees. When fair-value pricing is employed, the prices of securities used by a fund to calculate the NAV may differ from quoted or published prices for the same securities.

Vanguard's website will show the previous day's closing NAV and closing market price for the Fund's ETF Shares. The previous day's closing market price may also be published in the business section of major newspapers.

Financial Highlights

The following financial highlights table is intended to help you understand the ETF Shares' financial performance for the periods shown, and certain information reflects financial results for a single ETF Share. The total returns in the table represent the rate that an investor would have earned or lost each period on an investment in the ETF Shares (assuming reinvestment of all distributions). This information has been obtained from the financial statements audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, whose report—along with the Fund's financial statements—is included in the Fund's most recent annual report to shareholders. You may obtain a free copy of the latest annual or semiannual report online at vanguard.com or by contacting Vanguard by telephone or mail.

Plain Talk About How to Read the Financial Highlights Table

The ETF Shares began fiscal year 2010 with a net asset value (price) of \$41.95 per share. During the year, each ETF Share earned \$1.118 from investment income (interest and dividends) and \$4.715 from investments that had appreciated in value or that were sold for higher prices than the Fund paid for them.

Shareholders received \$0.863 per share in the form of dividend distributions. A portion of each year's distributions may come from the prior year's income or capital gains.

The share price at the end of the year was \$46.92, reflecting earnings of \$5.833 per share and distributions of \$0.863 per share. This was an increase of \$4.97 per share (from \$41.95 at the beginning of the year to \$46.92 at the end of the year). For a shareholder who reinvested the distributions in the purchase of more shares, the total return was 14.07% for the year.

As of October 31, 2010, the ETF Shares had approximately \$6.3 billion in net assets. For the year, the expense ratio was 0.22% (\$2.20 per \$1,000 of net assets), and the net investment income amounted to 2.58% of average net assets. The Fund sold and replaced securities valued at 6% of its net assets.

Glossary of Investment Terms

Active Management. An investment approach that seeks to exceed the average returns of a particular financial market or market segment. Active managers rely on research, market forecasts, and their own judgment and experience in selecting securities to buy and sell.

Authorized Participant. Institutional investors that are permitted to purchase Creation Units directly from, and redeem Creation Units directly with, the issuing fund. To be an Authorized Participant, an entity must be a participant in the Depository Trust Company and must enter into an agreement with the fund's Distributor.

Bid-Asked Spread. The difference between the price a dealer is willing to pay for a security (the bid price) and the somewhat higher price at which the dealer is willing to sell the same security (the ask price).

Capital Gains Distribution. Payment to mutual fund shareholders of gains realized on securities that a fund has sold at a profit, minus any realized losses.

Cash Investments. Cash deposits, short-term bank deposits, and money market instruments that include U.S. Treasury bills and notes, bank certificates of deposit (CDs), repurchase agreements, commercial paper, and banker's acceptances.

Common Stock. A security representing ownership rights in a corporation. A stockholder is entitled to share in the company's profits, some of which may be paid out as dividends.

Creation Unit. A large block of a specified number of ETF Shares. Authorized Participants may purchase and redeem ETF Shares from the issuing fund only in Creation Unit-size aggregations.

Dividend Distribution. Payment to mutual fund shareholders of income from interest or dividends generated by a fund's investments.

Ex-Dividend Date. The date when a distribution of dividends and/or capital gains is deducted from the price of a mutual fund or stock. On the ex-dividend date, the share price drops by the amount of the distribution (plus or minus any market activity).

Expense Ratio. The percentage of a fund's average net assets used to pay its expenses during a fiscal year. The expense ratio includes management expenses (such as advisory fees, account maintenance, reporting, internal accounting, legal, and other administrative expenses); any 12b-1 distribution fees; and "other" expenses (usually fees paid to independent third parties, such as the fund's custodian and auditor). It does not include the transaction costs of buying and selling portfolio securities.

Inception Date. The date on which the assets of a fund (or one of its share classes) are first invested in accordance with the fund's investment objective. For funds with a subscription period, the inception date is the day after that period ends. Investment performance is measured from the inception date.

Median Market Capitalization. An indicator of the size of companies in which a fund invests; the midpoint of market capitalization (market price x shares outstanding) of a fund's stocks, weighted by the proportion of the fund's assets invested in each stock. Stocks representing half of the fund's assets have market capitalizations above the median, and the rest are below it.

Mutual Fund. An investment company that pools the money of many people and invests it in a variety of securities in an effort to achieve a specific objective over time.

Passive Management. A low-cost investment strategy in which a mutual fund attempts to track—rather than outperform—a specified market benchmark or “index”; also known as indexing.

Principal. The face value of a debt instrument or the amount of money put into an investment.

Securities. Stocks, bonds, money market instruments, and other investments.

Total Return. A percentage change, over a specified time period, in a mutual fund's net asset value, assuming the reinvestment of all distributions of dividends and capital gains.

Volatility. The fluctuations in value of a mutual fund or other security. The greater a fund's volatility, the wider the fluctuations in its returns.

Yield. Income (interest or dividends) earned by an investment, expressed as a percentage of the investment's price.

1 Individually, a class; collectively, the classes.

2 Individually, a Fund; collectively, the Funds.

3 The ETF Share class is known as Vanguard MSCI Europe ETF (formerly known as Vanguard European ETF).

4 The ETF Share class is known as Vanguard MSCI Pacific ETF (formerly known as Vanguard Pacific ETF).

5 The ETF Shares class is known as Vanguard MSCI Emerging Markets ETF (formerly known as Vanguard Emerging Markets ETF).

The Trust has the ability to offer additional funds or classes of shares. There is no limit on the number of full and fractional shares that may be issued for a single fund or class of shares.

Organization

The Trust was organized as a Maryland corporation in 1989, and was reorganized as a Delaware statutory trust in 1998. Prior to its reorganization as a Delaware statutory trust, the Trust was known as Vanguard International Equity Index Fund, Inc. The Trust is registered with the United States Securities and Exchange Commission (the SEC) under the Investment Company Act of 1940 (the 1940 Act) as an open-end management investment company. All Funds within the Trust, other than the Global ex-U.S. Real Estate Fund, are classified as diversified within the meaning of the 1940 Act. The Global ex-U.S. Real Estate Fund is classified as nondiversified within the meaning of the 1940 Act.

Service Providers

Custodian. Brown Brothers Harriman & Co., 40 Water Street, Boston, MA 02109, serves as the Funds' custodian. The custodian is responsible for maintaining the Funds' assets, keeping all necessary accounts and records of Fund assets, and appointing any foreign sub-custodians or foreign securities depositories.

Independent Registered Public Accounting Firm. PricewaterhouseCoopers LLP, Two Commerce Square, Suite 1700, 2001 Market Street, Philadelphia, PA 19103-7042, serves as the Funds' independent registered public accounting firm. The independent registered public accounting firm audits the Funds' annual financial statements and provides other related services.

Transfer and Dividend-Paying Agent. The Funds' transfer agent and dividend-paying agent is Vanguard, P.O. Box 2600, Valley Forge, PA 19482.

Characteristics of the Funds' Shares

Restrictions on Holding or Disposing of Shares. There are no restrictions on the right of shareholders to retain or dispose of a Fund's shares, other than those described in the Fund's current prospectus and elsewhere in this Statement of Additional Information. Each Fund or class may be terminated by reorganization into another mutual fund or class or by liquidation and distribution of the assets of the Fund or class. Unless terminated by reorganization or liquidation, each Fund and share class will continue indefinitely.

Shareholder Liability. The Trust is organized under Delaware law, which provides that shareholders of a statutory trust are entitled to the same limitations of personal liability as shareholders of a corporation organized under Delaware law. This means that a shareholder of a Fund generally will not be personally liable for payment of the Fund's debts. Some state courts, however, may not apply Delaware law on this point. We believe that the possibility of such a situation arising is remote.

Dividend Rights. The shareholders of each class of a Fund are entitled to receive any dividends or other distributions declared by the Fund for each such class. No shares of a Fund have priority or preference over any other shares of the Fund with respect to distributions. Distributions will be made from the assets of the Fund and will be paid ratably to all shareholders of a particular class according to the number of shares of the class held by shareholders on the record date. The amount of dividends per share may vary between separate share classes of the Fund based upon differences in the net asset values of the different classes and differences in the way that expenses are allocated between share classes pursuant to a multiple class plan.

Voting Rights. Shareholders are entitled to vote on a matter if: (1) the matter concerns an amendment to the Declaration of Trust that would adversely affect to a material degree the rights and preferences of the shares of a Fund or any class; (2) the trustees determine that it is necessary or desirable to obtain a shareholder vote; (3) a merger or consolidation, share conversion, share exchange, or sale of assets is proposed and a shareholder vote is required by the 1940 Act to approve the transaction; or (4) a shareholder vote is required under the 1940 Act. The 1940 Act requires a shareholder vote under various circumstances, including to elect or remove trustees upon the written request of shareholders representing 10% or more of a Fund's net assets, to change any fundamental policy of a Fund, and to enter into certain merger transactions. Unless otherwise required by applicable law, shareholders of a Fund receive one vote for each dollar of net asset value owned on the record date, and a fractional vote for each fractional dollar of net asset value owned on the record date. However, only the shares of the Fund or class affected by a particular matter are entitled to vote on that matter. In addition, each class has exclusive voting rights on any matter submitted to shareholders that relates solely to that class, and each class has separate voting rights on any matter submitted to shareholders in which

the interests of one class differ from the interests of another. Voting rights are noncumulative and cannot be modified without a majority vote.

Liquidation Rights. In the event that a Fund is liquidated, shareholders will be entitled to receive a pro rata share of the Fund's net assets. In the event that a class of shares is liquidated, shareholders of that class will be entitled to receive a pro rata share of the Fund's net assets that are allocated to that class. Shareholders may receive cash, securities, or a combination of the two.

Preemptive Rights. There are no preemptive rights associated with the Funds' shares.

Conversion Rights. Fund shareholders may convert their shares into another class of shares of the same Fund upon the satisfaction of any then applicable eligibility requirements. ETF Shares cannot be converted into conventional shares of a fund. For additional information about the conversion rights applicable to ETF Shares, please see "Information About the ETF Share Class."

Redemption Provisions. Each Fund's redemption provisions are described in its current prospectus and elsewhere in this Statement of Additional Information.

Sinking Fund Provisions. The Funds have no sinking fund provisions.

Calls or Assessment. Each Fund's shares, when issued, are fully paid and non-assessable.

Tax Status of the Funds

Each Fund expects to qualify each year as a "regulated investment company" under Subchapter M of the Internal Revenue Code of 1986, as amended (the IRC). This special tax status means that the Fund will not be liable for federal tax on income and capital gains distributed to shareholders. In order to preserve its tax status, each Fund must comply with certain requirements. If a Fund fails to meet these requirements in any taxable year, it will be subject to tax on its taxable income at corporate rates, and all distributions from earnings and profits, including any distributions of net tax-exempt income and net long-term capital gains, will be taxable to shareholders as ordinary income. In addition, a Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before regaining its tax status as a regulated investment company.

Each Fund may invest in passive foreign investment companies (PFICs). A foreign company is generally a PFIC if 75% or more of its gross income is passive or if 50% or more of its assets produce passive income. Capital gains on the sale of a PFIC will be deemed ordinary income regardless of how long the Fund held it. Also, the Fund may be subject to corporate income tax and an interest charge on certain dividends and capital gains earned from PFICs, whether or not they are distributed to shareholders. To avoid such tax and interest, the Fund may elect to treat PFICs as sold on the last day of the Fund's fiscal year, mark-to-market these securities, and recognize any unrealized gains (or losses, to the extent of previously recognized gains) as ordinary income each year. Distributions from the Fund that are attributable to PFICs are characterized as ordinary income.

Dividends received and distributed by Vanguard Total World Stock Index Fund on shares of stock of domestic corporations may be eligible for the dividends-received deduction applicable to corporate shareholders. Corporations must satisfy certain requirements in order to claim the deduction. Capital gains distributed by the Fund are not eligible for the dividends-received deduction.

FUNDAMENTAL POLICIES

Each Fund is subject to the following fundamental investment policies, which cannot be changed in any material way without the approval of the holders of a majority of the Fund's shares. For these purposes, a "majority" of shares means shares representing the lesser of: (1) 67% or more of the Fund's net assets voted, so long as shares representing more than 50% of the Fund's net assets are present or represented by proxy; or (2) more than 50% of the Fund's net assets.

Borrowing. Each Fund may borrow money only as permitted by the 1940 Act or other governing statute, by the Rules thereunder, or by the SEC or other regulatory agency with authority over the Fund.

Commodities. Each Fund may invest in commodities only as permitted by the 1940 Act or other governing statute, by the Rules thereunder, or by the SEC or other regulatory agency with authority over the Fund.

Diversification. For the European Stock Index, Pacific Stock Index, and Emerging Markets Stock Index Funds: With respect to 75% of its total assets, each Fund may not: (1) purchase more than 10% of the outstanding voting securities of any one issuer; or (2) purchase securities of any issuer if, as a result, more than 5% of the Fund's total assets would be invested in that issuer's securities. This limitation does not apply to obligations of the U.S. government or its agencies or instrumentalities. Additionally, each Fund will limit the aggregate value of holdings of a single issuer (other than U.S. government securities, as defined in the IRC) to a maximum of 25% of the Fund's total assets as of the end of each quarter of the taxable year.

For the FTSE All-World ex-US Index, Total World Stock Index, FTSE All-World ex-US Small-Cap Index, and Global ex-U.S. Real Estate Index Funds: Each Fund may not change its classification as a "management company" its subclassification as an "open-end company," or (except the Global ex-U.S. Real Estate Index Fund) its subclassification as a "diversified company," as each such term is defined in the 1940 Act.

Industry Concentration. Each Fund (except the Global ex-U.S. Real Estate Index Fund) will not concentrate its investments in the securities of issuers whose principal business activities are in the same industry, except as may be necessary to approximate the composition of its target index. The Global ex-U.S. Real Estate Index Fund will concentrate its investments in the securities of issuers whose principal business activities are in the real estate industry.

Loans. Each Fund may make loans to another person only as permitted by the 1940 Act or other governing statute, by the Rules thereunder, or by the SEC or other regulatory agency with authority over the Fund.

Real Estate. Each Fund may not invest directly in real estate unless it is acquired as a result of ownership of securities or other instruments. This restriction shall not prevent the Fund from investing in securities or other instruments (1) issued by companies that invest, deal, or otherwise engage in transactions in real estate, or (2) backed or secured by real estate or interests in real estate.

Senior Securities. Each Fund may not issue senior securities, except as permitted by the 1940 Act or other governing statute, by the Rules thereunder, or by the SEC or other regulatory agency with authority over the Fund.

Underwriting. Each Fund may not act as an underwriter of another issuer's securities, except to the extent that the Fund may be deemed to be an underwriter within the meaning of the Securities Act of 1933 (the 1933 Act), in connection with the purchase and sale of portfolio securities.

Compliance with the fundamental policies previously described is generally measured at the time the securities are purchased. Unless otherwise required by the 1940 Act (as is the case with borrowing), if a percentage restriction is adhered to at the time the investment is made, a later change in percentage resulting from a change in the market value of assets will not constitute a violation of such restriction. All fundamental policies must comply with applicable regulatory requirements. For more details, see "Investment Strategies and Nonfundamental Policies."

None of these policies prevents the Funds from having an ownership interest in Vanguard. As a part owner of Vanguard, each Fund may own securities issued by Vanguard, make loans to Vanguard, and contribute to Vanguard's costs or other financial requirements. See "Management of the Funds" for more information.

INVESTMENT STRATEGIES AND NONFUNDAMENTAL POLICIES

Some of the investment strategies and policies described below and in each Fund's prospectus set forth percentage limitations on a Fund's investment in, or holdings of, certain securities or other assets. Unless otherwise required by law, compliance with these strategies and policies will be determined immediately after the acquisition of such securities or assets. Subsequent changes in values, net assets, or other circumstances will not be considered when determining whether the investment complies with the Fund's investment strategies and policies.

The following investment strategies and policies supplement each Fund's investment strategies and policies set forth in the prospectus. With respect to the different investments discussed below, a Fund may acquire such investments to the extent consistent with its investment strategies and policies.

Borrowing. A fund's ability to borrow money is limited by its investment policies and limitations, by the 1940 Act, and by applicable exemptions, no-action letters, interpretations, and other pronouncements issued from time to time by the SEC and its staff or any other regulatory authority with jurisdiction. Under the 1940 Act, a fund is required to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception for borrowings not in excess of 5% of the fund's total assets made for

temporary or emergency purposes. Any borrowings for temporary purposes in excess of 5% of the fund's total assets must maintain continuous asset coverage. If the 300% asset coverage should decline as a result of market fluctuations or for other reasons, a fund may be required to sell some of its portfolio holdings within three days (excluding Sundays and holidays) to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time.

Borrowing will tend to exaggerate the effect on net asset value of any increase or decrease in the market value of a fund's portfolio. Money borrowed will be subject to interest costs that may or may not be recovered by earnings on the securities purchased. A fund also may be required to maintain minimum average balances in connection with a borrowing or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

The SEC takes the position that transactions that have a leveraging effect on the capital structure of a fund or are economically equivalent to borrowing can be viewed as constituting a form of borrowing by the fund for purposes of the 1940 Act. These transactions can include entering into reverse repurchase agreements; engaging in mortgage-dollar-roll transactions; selling securities short (other than short sales "against-the-box"); buying and selling certain derivatives (such as futures contracts); selling (or writing) put and call options; engaging in sale-buybacks; entering into firm-commitment and standby-commitment agreements; engaging in when-issued, delayed-delivery, or forward-commitment transactions; and other similar trading practices. (Additional discussion about a number of these transactions can be found on the following pages.) A borrowing transaction will not be considered to constitute the issuance, by a fund, of a "senior security," as that term is defined in Section 18(g) of the 1940 Act, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by a fund, if the fund (1) maintains an offsetting financial position; (2) segregates liquid assets (with such liquidity determined by the advisor in accordance with procedures established by the board of trustees) equal (as determined on a daily mark-to-market basis) in value to the fund's potential economic exposure under the borrowing transaction; or (3) otherwise "covers" the transaction in accordance with applicable SEC guidance (collectively, "covers" the transaction). A fund may have to buy or sell a security at a disadvantageous time or price in order to cover a borrowing transaction. In addition, segregated assets may not be available to satisfy redemptions or for other purposes.

Common Stock. Common stock represents an equity or ownership interest in an issuer. Common stock typically entitles the owner to vote on the election of directors and other important matters as well as to receive dividends on such stock. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds, other debt holders, and owners of preferred stock take precedence over the claims of those who own common stock.

Convertible Securities. Convertible securities are hybrid securities that combine the investment characteristics of bonds and common stocks. Convertible securities typically consist of debt securities or preferred stock that may be converted (on a voluntary or mandatory basis) within a specified period of time (normally for the entire life of the security) into a certain amount of common stock or other equity security of the same or a different issuer at a predetermined price. Convertible securities also include debt securities with warrants or common stock attached and derivatives combining the features of debt securities and equity securities. Other convertible securities with features and risks not specifically referred to herein may become available in the future. Convertible securities involve risks similar to those of both fixed income and equity securities.

The market value of a convertible security is a function of its "investment value" and its "conversion value." A security's "investment value" represents the value of the security without its conversion feature (i.e., a nonconvertible fixed income security). The investment value may be determined by reference to its credit quality and the current value of its yield to maturity or probable call date. At any given time, investment value is dependent upon such factors as the general level of interest rates, the yield of similar nonconvertible securities, the financial strength of the issuer, and the seniority of the security in the issuer's capital structure. A security's "conversion value" is determined by multiplying the number of shares the holder is entitled to receive upon conversion or exchange by the current price of the underlying security. If the conversion value of a convertible security is significantly below its investment value, the convertible security will trade like nonconvertible debt or preferred stock and its market value will not be influenced greatly by fluctuations in the market price of the underlying security. In that circumstance, the convertible security takes on the characteristics of a bond, and its price moves in the opposite direction from interest rates. Conversely, if the conversion value of a convertible security is near or above its investment value, the market value of the convertible security will be more heavily influenced by fluctuations in the market price of the underlying security. In that case, the convertible security's price may be as volatile as that of common stock. Because both interest rates and market movements can influence its

value, a convertible security generally is not as sensitive to interest rates as a similar fixed income security, nor is it as sensitive to changes in share price as its underlying equity security. Convertible securities are often rated below investment-grade or are not rated, and are generally subject to a high degree of credit risk.

Although all markets are prone to change over time, the generally high rate at which convertible securities are retired (through mandatory or scheduled conversions by issuers or voluntary redemptions by holders) and replaced with newly issued convertibles may cause the convertible securities market to change more rapidly than other markets. For example, a concentration of available convertible securities in a few economic sectors could elevate the sensitivity of the convertible securities market to the volatility of the equity markets and to the specific risks of those sectors. Moreover, convertible securities with innovative structures, such as mandatory conversion securities and equity-linked securities, have increased the sensitivity of the convertible securities market to the volatility of the equity markets and to the special risks of those innovations, which may include risks different from, and possibly greater than, those associated with traditional convertible securities.

Depository Receipts. Depository receipts are securities that evidence ownership interests in a security or a pool of securities that have been deposited with a “depository.” Depository receipts may be sponsored or unsponsored and include American Depositary Receipts (ADRs), European Depositary Receipts (EDRs), and Global Depositary Receipts (GDRs). For ADRs, the depository is typically a U.S. financial institution and the underlying securities are issued by a foreign issuer. For other depository receipts, the depository may be a foreign or a U.S. entity, and the underlying securities may have a foreign or a U.S. issuer. Depository receipts will not necessarily be denominated in the same currency as their underlying securities. Generally, ADRs are issued in registered form, denominated in U.S. dollars, and designed for use in the U.S. securities markets. Other depository receipts, such as GDRs and EDRs, may be issued in bearer form and denominated in other currencies, and are generally designed for use in securities markets outside the United States. Although the two types of depository receipt facilities (sponsored and unsponsored) are similar, there are differences regarding a holder’s rights and obligations and the practices of market participants.

A depository may establish an unsponsored facility without participation by (or acquiescence of) the underlying issuer; typically, however, the depository requests a letter of non-objection from the underlying issuer prior to establishing the facility. Holders of unsponsored depository receipts generally bear all the costs of the facility. The depository usually charges fees upon the deposit and withdrawal of the underlying securities, the conversion of dividends into U.S. dollars or other currency, the disposition of non-cash distributions, and the performance of other services. The depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the underlying issuer or to pass through voting rights to depository receipt holders with respect to the underlying securities.

Sponsored depository receipt facilities are created in generally the same manner as unsponsored facilities, except that sponsored depository receipts are established jointly by a depository and the underlying issuer through a deposit agreement. The deposit agreement sets out the rights and responsibilities of the underlying issuer, the depository, and the depository receipt holders. With sponsored facilities, the underlying issuer typically bears some of the costs of the depository receipts (such as dividend payment fees of the depository), although most sponsored depository receipt holders may bear costs such as deposit and withdrawal fees. Depositories of most sponsored depository receipts agree to distribute notices of shareholder meetings, voting instructions, and other shareholder communications and information to the depository receipt holders at the underlying issuer’s request.

For purposes of a fund’s investment policies, investments in depository receipts will be deemed to be investments in the underlying securities. Thus, a depository receipt representing ownership of common stock will be treated as common stock. Depository receipts do not eliminate all of the risks associated with directly investing in the securities of foreign issuers.

Derivatives. A derivative is a financial instrument that has a value that is based on—or “derived from”—the values of other assets, reference rates, or indexes. Derivatives may relate to a wide variety of underlying references, such as commodities, stocks, bonds, interest rates, currency exchange rates, and related indexes. Derivatives include futures contracts and options on futures contracts, forward-commitment transactions, options on securities, caps, floors, collars, swap agreements, and other financial instruments. Some derivatives, such as futures contracts and certain options, are traded on U.S. commodity and securities exchanges, while other derivatives, such as swap agreements, are privately negotiated and entered into in the over-the-counter (OTC) market. The risks associated with the use of derivatives are different from, and possibly greater than, the risks associated with investing directly in the securities, assets, or market indexes on which the derivatives are based. Derivatives are used by some investors for speculative

purposes. Derivatives also may be used for a variety of purposes that do not constitute speculation, such as hedging, risk management, seeking to stay fully invested, seeking to reduce transaction costs, seeking to simulate an investment in equity or debt securities or other investments, seeking to add value by using derivatives to more efficiently implement portfolio positions when derivatives are favorably priced relative to equity or debt securities or other investments, and for other purposes. There is no assurance that any derivatives strategy used by a fund's advisor will succeed. The counterparties to the funds' derivatives will not be considered the issuers thereof for purposes of certain provisions of the 1940 Act and the IRC, although such derivatives may qualify as securities or investments under such laws. The funds' advisors, however, will monitor and adjust, as appropriate, the funds' credit risk exposure to derivative counterparties.

Derivative products are highly specialized instruments that require investment techniques and risk analyses different from those associated with stocks, bonds, and other traditional investments. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself, without the benefit of observing the performance of the derivative under all possible market conditions.

The use of derivatives generally involves the risk that a loss may be sustained as a result of the insolvency or bankruptcy of the other party to the contract (usually referred to as a "counterparty") or the failure of the counterparty to make required payments or otherwise comply with the terms of the contract. Additionally, the use of credit derivatives can result in losses if a fund's advisor does not correctly evaluate the creditworthiness of the issuer on which the credit derivative is based.

Derivatives may be subject to liquidity risk, which exists when a particular derivative is difficult to purchase or sell. If a derivative transaction is particularly large or if the relevant market is illiquid (as is the case with many OTC derivatives), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Derivatives may be subject to pricing or "basis" risk, which exists when a particular derivative becomes extraordinarily expensive relative to historical prices or the prices of corresponding cash market instruments. Under certain market conditions, it may not be economically feasible to initiate a transaction or liquidate a position in time to avoid a loss or take advantage of an opportunity.

Because many derivatives have a leverage component, adverse changes in the value or level of the underlying asset, reference rate, or index can result in a loss substantially greater than the amount invested in the derivative itself. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. A derivative transaction will not be considered to constitute the issuance, by a fund, of a "senior security," as that term is defined in Section 18(g) of the 1940 Act, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by a fund, if the fund covers the transaction in accordance with the requirements described under the heading "Borrowing."

Like most other investments, derivative instruments are subject to the risk that the market value of the instrument will change in a way detrimental to a fund's interest. A fund bears the risk that its advisor will incorrectly forecast future market trends or the values of assets, reference rates, indexes, or other financial or economic factors in establishing derivative positions for the fund. If the advisor attempts to use a derivative as a hedge against, or as a substitute for, a portfolio investment, the fund will be exposed to the risk that the derivative will have or will develop imperfect or no correlation with the portfolio investment. This could cause substantial losses for the fund. Although hedging strategies involving derivative instruments can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in other fund investments. Many derivatives, in particular OTC derivatives, are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to a fund.

Exchange-Traded Funds. A fund may purchase shares of exchange-traded funds (ETFs), including ETF Shares issued by other Vanguard funds. Typically, a fund would purchase ETF shares for the same reason it would purchase (and as an alternative to purchasing) futures contracts: to obtain exposure to all or a portion of the stock or bond market. ETF shares enjoy several advantages over futures. Depending on the market, the holding period, and other factors, ETF shares can be less costly and more tax-efficient than futures. In addition, ETF shares can be purchased for smaller sums, offer exposure to market sectors and styles for which there is no suitable or liquid futures contract, and do not involve leverage.

An investment in an ETF generally presents the same primary risks as an investment in a conventional fund (i.e., one that is not exchange-traded) that has the same investment objective, strategies, and policies. The price of an ETF can fluctuate within a wide range, and a fund could lose money investing in an ETF if the prices of the securities owned by the ETF go

down. In addition, ETFs are subject to the following risks that do not apply to conventional funds: (1) the market price of the ETF's shares may trade at a discount to their net asset value; (2) an active trading market for an ETF's shares may not develop or be maintained; or (3) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are de-listed from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally.

Most ETFs are investment companies. Therefore, a fund's purchases of ETF shares generally are subject to the limitations on, and the risks of, a fund's investments in other investment companies, which are described under the heading "Other Investment Companies."

Vanguard ETF® Shares are exchange-traded shares that represent an interest in an investment portfolio held by Vanguard funds. A fund's investments in Vanguard ETF Shares are also generally subject to the descriptions, limitations, and risks described under the heading "Other Investment Companies," except as provided by an exemption granted by the SEC that permits registered investment companies to invest in a Vanguard fund that issues ETF Shares beyond the limits of Section 12(d)(1) of the 1940 Act, subject to certain terms and conditions.

* U.S. Pat. No. 6,879,964 B2; 7,337,138.

Foreign Securities. Typically, foreign securities are considered to be equity or debt securities issued by entities organized, domiciled, or with a principal executive office outside the United States, such as foreign corporations and governments. Securities issued by certain companies organized outside the United States may not be deemed to be foreign securities if the company's principal operations are conducted from the United States or when the company's equity securities trade principally on a U.S. stock exchange. Foreign securities may trade in U.S. or foreign securities markets. A fund may make foreign investments either directly by purchasing foreign securities or indirectly by purchasing depositary receipts or depositary shares of similar instruments (depositary receipts) for foreign securities. Direct investments in foreign securities may be made either on foreign securities exchanges or in the OTC markets. Investing in foreign securities involves certain special risk considerations that are not typically associated with investing in securities of U.S. companies or governments.

Because foreign issuers are not generally subject to uniform accounting, auditing, and financial reporting standards and practices comparable to those applicable to U.S. issuers, there may be less publicly available information about certain foreign issuers than about U.S. issuers. Evidence of securities ownership may be uncertain in many foreign countries. As a result, there is a risk that a fund's trade details could be incorrectly or fraudulently entered at the time of the transaction, resulting in a loss to the fund. Securities of foreign issuers are generally less liquid than securities of comparable U.S. issuers. In certain countries, there is less government supervision and regulation of stock exchanges, brokers, and listed companies than in the United States. In addition, with respect to certain foreign countries, there is the possibility of expropriation or confiscatory taxation, political or social instability, war, terrorism, nationalization, limitations on the removal of funds or other assets, or diplomatic developments that could affect U.S. investments in those countries. Although an advisor will endeavor to achieve most favorable execution costs for a fund's portfolio transactions in foreign securities under the circumstances, commissions (and other transaction costs) are generally higher than those on U.S. securities. In addition, it is expected that the custodian arrangement expenses for a fund that invests primarily in foreign securities will be somewhat greater than the expenses for a fund that invests primarily in domestic securities. Certain foreign governments levy withholding taxes against dividend and interest income from foreign securities. Although in some countries a portion of these taxes is recoverable by the fund, the nonrecovered portion of foreign withholding taxes will reduce the income received from the companies making up a fund.

The value of the foreign securities held by a fund that are not U.S. dollar-denominated may be significantly affected by changes in currency exchange rates. The U.S. dollar value of a foreign security generally decreases when the value of the U.S. dollar rises against the foreign currency in which the security is denominated and tends to increase when the value of the U.S. dollar falls against such currency (as discussed under the heading "Foreign Securities—Foreign Currency Transactions," a fund may attempt to hedge its currency risks). In addition, the value of fund assets may be affected by losses and other expenses incurred in converting between various currencies in order to purchase and sell foreign securities, and by currency restrictions, exchange control regulation, currency devaluations, and political and economic developments.

Foreign Securities — Emerging Market Risk. Investing in emerging market countries involves certain risks not typically associated with investing in the United States, and imposes risks greater than, or in addition to, risks of investing in more developed foreign countries. These risks include, but are not limited to, the following: greater risks of nationalization or expropriation of assets or confiscatory taxation; currency devaluations and other currency exchange

rate fluctuations; greater social, economic, and political uncertainty and instability (including amplified risk of war and terrorism); more substantial government involvement in the economy; less government supervision and regulation of the securities markets and participants in those markets; controls on foreign investment and limitations on repatriation of invested capital and on the fund's ability to exchange local currencies for U.S. dollars; unavailability of currency hedging techniques in certain emerging market countries; the fact that companies in emerging market countries may be smaller, less seasoned, and newly organized companies; the difference in, or lack of, auditing and financial reporting standards, which may result in unavailability of material information about issuers; the risk that it may be more difficult to obtain and/or enforce a judgment in a court outside the United States; and greater price volatility, substantially less liquidity, and significantly smaller market capitalization of securities markets. Also, any change in the leadership or politics of emerging market countries, or the countries that exercise a significant influence over those countries, may halt the expansion of or reverse the liberalization of foreign investment policies now occurring and adversely affect existing investment opportunities. Furthermore, high rates of inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries.

Foreign Securities – Foreign Currency Transactions. The value in U.S. dollars of a fund's non-dollar-denominated foreign securities may be affected favorably or unfavorably by changes in foreign currency exchange rates and exchange control regulations, and the fund may incur costs in connection with conversions between various currencies. In an index fund, the intent is to maintain exposure to foreign currencies to the same extent that the fund's assets are held in securities denominated in those currencies. A fund may enter into foreign currency contracts when it trades foreign stocks in order to avoid any gain or loss on the currency during the settlement period. A fund also may enter into foreign currency transactions to provide the appropriate currency exposure to offset an amount related to an open futures contract. A fund will not speculate in foreign currency exchange.

Currency exchange transactions may be conducted either on a spot (i.e., cash) basis at the rate prevailing in the currency exchange market or through forward contracts to purchase or sell foreign currencies. A forward currency contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are entered into with large commercial banks or other currency traders who are participants in the interbank market. Currency exchange transactions also may be effected through the use of swap agreements or other derivatives. Currency exchange transactions may be considered borrowings. A currency exchange transaction will not be considered to constitute the issuance, by a fund, of a "senior security," as that term is defined in Section 18(g) of the 1940 Act, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by a fund, if the fund covers the transaction in accordance with the requirements described under the heading "Borrowing."

By entering into a forward contract for the purchase or sale of foreign currency involved in underlying security transactions, a fund may be able to protect itself against part or all of the possible loss between trade and settlement dates for that purchase or sale resulting from an adverse change in the relationship between the U.S. dollar and such foreign currency. This practice is sometimes referred to as "transaction hedging." In addition, when the advisor reasonably believes that a particular foreign currency may suffer a substantial decline against the U.S. dollar, a fund may enter into a forward contract to sell an amount of foreign currency approximating the value of some or all of its portfolio securities denominated in such foreign currency. This practice is sometimes referred to as "portfolio hedging." Similarly, when the advisor reasonably believes that the U.S. dollar may suffer a substantial decline against a foreign currency, a fund may enter into a forward contract to buy that foreign currency for a fixed dollar amount.

A fund may also attempt to hedge its foreign currency exchange rate risk by engaging in currency futures, options, and "cross-hedge" transactions. In cross-hedge transactions, a fund holding securities denominated in one foreign currency will enter into a forward currency contract to buy or sell a different foreign currency (one that the advisor reasonably believes generally tracks the currency being hedged with regard to price movements). The advisor may select the tracking (or substitute) currency rather than the currency in which the security is denominated for various reasons, including in order to take advantage of pricing or other opportunities presented by the tracking currency or because the market for the tracking currency is more liquid or more efficient. Such cross-hedges are expected to help protect a fund against an increase or decrease in the value of the U.S. dollar against certain foreign currencies.

A fund may hold a portion of its assets in bank deposits denominated in foreign currencies, so as to facilitate investment in foreign securities as well as protect against currency fluctuations and the need to convert such assets into U.S. dollars (thereby also reducing transaction costs). To the extent these monies are converted back into U.S. dollars, the value of

the assets so maintained will be affected favorably or unfavorably by changes in foreign currency exchange rates and exchange control regulations.

The forecasting of currency market movement is extremely difficult, and whether any hedging strategy will be successful is highly uncertain. Moreover, it is impossible to forecast with precision the market value of portfolio securities at the expiration of a foreign currency forward contract. Accordingly, a fund may be required to buy or sell additional currency on the spot market (and bear the expense of such transaction) if its advisor's predictions regarding the movement of foreign currency or securities markets prove inaccurate. In addition, the use of cross-hedging transactions may involve special risks, and may leave a fund in a less advantageous position than if such a hedge had not been established. Because foreign currency forward contracts are privately negotiated transactions, there can be no assurance that a fund will have flexibility to roll-over a foreign currency forward contract upon its expiration if it desires to do so. Additionally, there can be no assurance that the other party to the contract will perform its services thereunder.

Foreign Securities — Foreign Investment Companies. Some of the countries in which a fund may invest may not permit, or may place economic restrictions on, direct investment by outside investors. Fund investments in such countries may be permitted only through foreign government approved or authorized investment vehicles, which may include other investment companies. Such investments may be made through registered or unregistered closed-end investment companies that invest in foreign securities. Investing through such vehicles may involve frequent or layered fees or expenses and may also be subject to the limitations on, and the risks of, a fund's investments in other investment companies, which are described under the heading "Other Investment Companies."

Foreign Securities — Russian Market Risk. There are significant risks inherent in investing in Russia. Because of the underdeveloped state of Russia's banking system, settlement, clearing, and registration of securities transactions are subject to significant risks.

Equity securities in Russia are issued only in book entry form and ownership records are maintained by registrars who are under contract with the issuers. Although a Russian sub-custodian will maintain copies of the registrar's records ("Share Extracts") on its premises, such Share Extracts may not be legally sufficient to establish ownership of securities. The registrars are not necessarily subject to effective state supervision, nor are they licensed with any governmental entity. Although a fund will endeavor to ensure that its interest continues to be appropriately recorded either itself or through a custodian or other agent inspecting the share register and by obtaining extracts of share registers through regular confirmations, these extracts have no legal enforceability, and it is possible that subsequent illegal amendment or other fraudulent act may deprive the fund of its ownership rights or improperly dilute its interest. In addition, although applicable Russian regulations impose liability on registrars for losses resulting from their errors, it may be difficult for a fund to enforce any rights it may have against the registrar or issuer of the securities in the event of loss of share registration.

Futures Contracts and Options on Futures Contracts. Futures contracts and options on futures contracts are derivatives. A futures contract is a standardized agreement between two parties to buy or sell at a specific time in the future a specific quantity of a commodity at a specific price. The commodity may consist of an asset, a reference rate, or an index. A security futures contract relates to the sale of a specific quantity of shares of a single equity security or a narrow-based securities index. The value of a futures contract tends to increase and decrease in tandem with the value of the underlying commodity. The buyer of a futures contract enters into an agreement to purchase the underlying commodity on the settlement date and is said to be "long" the contract. The seller of a futures contract enters into an agreement to sell the underlying commodity on the settlement date and is said to be "short" the contract. The price at which a futures contract is entered into is established either in the electronic marketplace or by open outcry on the floor of an exchange between exchange members acting as traders or brokers. Open futures contracts can be liquidated or closed out by physical delivery of the underlying commodity or payment of the cash settlement amount on the settlement date, depending on the terms of the particular contract. Some financial futures contracts (such as security futures) provide for physical settlement at maturity. Other financial futures contracts (such as those relating to interest rates, foreign currencies, and broad-based securities indexes) generally provide for cash settlement at maturity. In the case of cash settled futures contracts, the cash settlement amount is equal to the difference between the final settlement price on the last trading day of the contract and the price at which the contract was entered into. Most futures contracts, however, are not held until maturity but instead are "offset" before the settlement date through the establishment of an opposite and equal futures position.

The purchaser or seller of a futures contract is not required to deliver or pay for the underlying commodity unless the contract is held until the settlement date. However, both the purchaser and seller are required to deposit "initial margin"

with a futures commission merchant (FCM) when the futures contract is entered into. Initial margin deposits are typically calculated as a percentage of the contract's market value. If the value of either party's position declines, that party will be required to make additional "variation margin" payments to settle the change in value on a daily basis. This process is known as "marking-to-market." A futures transaction will not be considered to constitute the issuance, by a fund, of a "senior security," as that term is defined in Section 18(g) of the 1940 Act, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by a fund, if the fund covers the transaction in accordance with the requirements described under the heading "Borrowing."

An option on a futures contract (or futures option) conveys the right, but not the obligation, to purchase (in the case of a call option) or sell (in the case of a put option) a specific futures contract at a specific price (called the "exercise" or "strike" price) any time before the option expires. The seller of an option is called an option writer. The purchase price of an option is called the premium. The potential loss to an option buyer is limited to the amount of the premium plus transaction costs. This will be the case, for example, if the option is held and not exercised prior to its expiration date. Generally, an option writer sells options with the goal of obtaining the premium paid by the option buyer. If an option sold by an option writer expires without being exercised, the writer retains the full amount of the premium. The option writer, however, has unlimited economic risk because its potential loss, except to the extent offset by the premium received when the option was written, is equal to the amount the option is "in-the-money" at the expiration date. A call option is in-the-money if the value of the underlying futures contract exceeds the exercise price of the option. A put option is in-the-money if the exercise price of the option exceeds the value of the underlying futures contract. Generally, any profit realized by an option buyer represents a loss for the option writer.

A fund that takes the position of a writer of a futures option is required to deposit and maintain initial and variation margin with respect to the option, as previously described in the case of futures contracts. A futures option transaction will not be considered to constitute the issuance, by a fund, of a "senior security," as that term is defined in Section 18(g) of the 1940 Act, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by a fund, if the fund covers the transaction in accordance with the requirements described under the heading "Borrowing."

Each fund intends to comply with Rule 4.5 of the Commodity Futures Trading Commission, under which a mutual fund is conditionally excluded from the definition of the term "commodity pool operator." A fund will only enter into futures contracts and futures options that are standardized and traded on a U.S. or foreign exchange, board of trade, or similar entity, or quoted on an automated quotation system.

Futures Contracts and Options on Futures Contracts — Risks. The risk of loss in trading futures contracts and in writing futures options can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures and options pricing, and the potential high volatility of the futures markets. As a result, a relatively small price movement in a futures position may result in immediate and substantial loss (or gain) for the investor. For example, if at the time of purchase, 10% of the value of the futures contract is deposited as margin, a subsequent 10% decrease in the value of the futures contract would result in a total loss of the margin deposit, before any deduction for the transaction costs, if the account were then closed out. A 15% decrease would result in a loss equal to 150% of the original margin deposit if the contract were closed out. Thus, a purchase or sale of a futures contract, and the writing of a futures option, may result in losses in excess of the amount invested in the position. In the event of adverse price movements, a fund would continue to be required to make daily cash payments to maintain its required margin. In such situations, if the fund has insufficient cash, it may have to sell portfolio securities to meet daily margin requirements (and segregation requirements, if applicable) at a time when it may be disadvantageous to do so. In addition, on the settlement date, a fund may be required to make delivery of the instruments underlying the futures positions it holds.

A fund could suffer losses if it is unable to close out a futures contract or a futures option because of an illiquid secondary market. Futures contracts and futures options may be closed out only on an exchange that provides a secondary market for such products. However, there can be no assurance that a liquid secondary market will exist for any particular futures product at any specific time. Thus, it may not be possible to close a futures or option position. Moreover, most futures exchanges limit the amount of fluctuation permitted in futures contract prices during a single trading day. The daily limit establishes the maximum amount that the price of a futures contract may vary either up or down from the previous day's settlement price at the end of a trading session. Once the daily limit has been reached in a particular type of contract, no trades may be made on that day at a price beyond that limit. The daily limit governs only price movement during a particular trading day and therefore does not limit potential losses, because the limit may

prevent the liquidation of unfavorable positions. Futures contract prices have occasionally moved to the daily limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of future positions and subjecting some futures traders to substantial losses. The inability to close futures and options positions also could have an adverse impact on the ability to hedge a portfolio investment or to establish a substitute for a portfolio investment. Treasury futures are generally not subject to such daily limits.

A fund bears the risk that its advisor will incorrectly predict future market trends. If the advisor attempts to use a futures contract or a futures option as a hedge against, or as a substitute for, a portfolio investment, the fund will be exposed to the risk that the futures position will have or will develop imperfect or no correlation with the portfolio investment. This could cause substantial losses for the fund. Although hedging strategies involving futures products can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in other fund investments.

A fund could lose margin payments it has deposited with its FCM, if, for example, the FCM breaches its agreement with the fund or becomes insolvent or goes into bankruptcy. In that event, the fund may be entitled to return of margin owed to it only in proportion to the amount received by the FCM's other customers, potentially resulting in losses to the fund.

Interfund Borrowing and Lending. The SEC has granted an exemption permitting the Vanguard funds to participate in Vanguard's interfund lending program. This program allows the Vanguard funds to borrow money from and lend money to each other for temporary or emergency purposes. The program is subject to a number of conditions, including, among other things, the requirements that: (1) no fund may borrow or lend money through the program unless it receives a more favorable interest rate than is typically available from a bank for a comparable transaction; (2) no equity, taxable bond, or money market fund may loan money if the loan would cause its aggregate outstanding loans through the program to exceed 5%, 7.5%, or 10%, respectively, of its net assets at the time of the loan; and (3) a fund's interfund loans to any one fund shall not exceed 5% of the lending fund's net assets. In addition, a Vanguard fund may participate in the program only if and to the extent that such participation is consistent with the fund's investment objective and investment policies. The boards of trustees of the Vanguard funds are responsible for overseeing the interfund lending program. Any delay in repayment to a lending fund could result in a lost investment opportunity or additional borrowing costs.

Investing for Control. The Vanguard funds invest in securities and other instruments for the sole purpose of achieving a specific investment objective. As such, they do not seek to acquire enough of a company's outstanding voting stock to have control over management decisions. The Vanguard funds do not invest for the purpose of controlling a company's management.

Options. An option is a derivative. An option on a security (or index) is a contract that gives the holder of the option, in return for the payment of a "premium," the right, but not the obligation, to buy from (in the case of a call option) or sell to (in the case of a put option) the writer of the option the security underlying the option (or the cash value of the index) at a specified exercise price prior to the expiration date of the option. The writer of an option on a security has the obligation upon exercise of the option (1) to deliver the underlying security upon payment of the exercise price (in the case of a call option) or (2) to pay the exercise price upon delivery of the underlying security (in the case of a put option). The writer of an option on an index has the obligation upon exercise of the option to pay an amount equal to the cash value of the index minus the exercise price, multiplied by the specified multiplier for the index option. The multiplier for an index option determines the size of the investment position the option represents. Unlike exchange-traded options, which are standardized with respect to the underlying instrument, expiration date, contract size, and strike price, the terms of OTC options (options not traded on exchanges) generally are established through negotiation with the other party to the option contract. Although this type of arrangement allows the purchaser or writer greater flexibility to tailor an option to its needs, OTC options generally involve greater credit risk than exchange-traded options, which are guaranteed by the clearing organization of the exchanges where they are traded.

The buyer (or holder) of an option is said to be "long" the option, while the seller (or writer) of an option is said to be "short" the option. A call option grants to the holder the right to buy (and obligates the writer to sell) the underlying security at the strike price. A put option grants to the holder the right to sell (and obligates the writer to buy) the underlying security at the strike price. The purchase price of an option is called the "premium." The potential loss to an option buyer is limited to the amount of the premium plus transaction costs. This will be the case if the option is held and not exercised prior to its expiration date. Generally, an option writer sells options with the goal of obtaining the premium paid by the option buyer, but that person could also seek to profit from an anticipated rise or decline in option prices. If an option sold by an option writer expires without being exercised, the writer retains the full amount of the premium. The

option writer, however, has unlimited economic risk because its potential loss, except to the extent offset by the premium received when the option was written, is equal to the amount the option is “in-the-money” at the expiration date. A call option is in-the-money if the value of the underlying position exceeds the exercise price of the option. A put option is in-the-money if the exercise price of the option exceeds the value of the underlying position. Generally, any profit realized by an option buyer represents a loss for the option writer. The writing of an option will not be considered to constitute the issuance, by a fund, of a “senior security,” as that term is defined in Section 18(g) of the 1940 Act, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by a fund, if the fund covers the transaction in accordance with the requirements described under the heading “Borrowing.”

If a trading market in particular options were to become unavailable, investors in those options (such as the funds) would be unable to close out their positions until trading resumes, and they may be faced with substantial losses if the value of the underlying instrument moves adversely during that time. Even if the market were to remain available, there may be times when options prices will not maintain their customary or anticipated relationships to the prices of the underlying instruments and related instruments. Lack of investor interest, changes in volatility, or other factors or conditions might adversely affect the liquidity, efficiency, continuity, or even the orderliness of the market for particular options.

A fund bears the risk that its advisor will not accurately predict future market trends. If the advisor attempts to use an option as a hedge against, or as a substitute for, a portfolio investment, the fund will be exposed to the risk that the option will have or will develop imperfect or no correlation with the portfolio investment. This could cause substantial losses for the fund. Although hedging strategies involving options can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in other fund investments. Many options, in particular OTC options, are complex and often valued based on subjective factors. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to a fund.

Other Investment Companies. A fund may invest in other investment companies to the extent permitted by applicable law or SEC exemption. Under Section 12(d)(1) of the 1940 Act, a fund generally may invest up to 10% of its assets in shares of investment companies and up to 5% of its assets in any one investment company, as long as no investment represents more than 3% of the voting stock of an acquired investment company. In addition, no funds for which Vanguard acts as an advisor may, in the aggregate, own more than 10% of the voting stock of a closed-end investment company. The 1940 Act and related rules provide certain exemptions from these restrictions. If a fund invests in other investment companies, shareholders will bear not only their proportionate share of the fund’s expenses (including operating expenses and the fees of the advisor), but also, indirectly, the similar expenses of the underlying investment companies. Shareholders would also be exposed to the risks associated not only to the investments of the fund but also to the portfolio investments of the underlying investment companies. Certain types of investment companies, such as closed-end investment companies, issue a fixed number of shares that typically trade on a stock exchange or over-the-counter at a premium or discount to their net asset value. Others are continuously offered at net asset value but also may be traded on the secondary market.

Preferred Stock. Preferred stock represents an equity or ownership interest in an issuer. Preferred stock normally pays dividends at a specified rate and has precedence over common stock in the event the issuer is liquidated or declares bankruptcy. However, in the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock. Preferred stock, unlike common stock, often has a stated dividend rate payable from the corporation’s earnings. Preferred stock dividends may be cumulative or non-cumulative, participating, or auction rate. “Cumulative” dividend provisions require all or a portion of prior unpaid dividends to be paid before dividends can be paid to the issuer’s common stock. “Participating” preferred stock may be entitled to a dividend exceeding the stated dividend in certain cases. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of such stocks to decline. Preferred stock may have mandatory sinking fund provisions, as well as provisions allowing the stock to be called or redeemed, which can limit the benefit of a decline in interest rates. Preferred stock is subject to many of the risks to which common stock and debt securities are subject.

Repurchase Agreements. A repurchase agreement is an agreement under which a fund acquires a fixed income security (generally a security issued by the U.S. government or an agency thereof, a banker’s acceptance, or a certificate of deposit) from a commercial bank, broker, or dealer, and simultaneously agrees to resell such security to the seller at an agreed-upon price and date (normally, the next business day). Because the security purchased constitutes collateral

for the repurchase obligation, a repurchase agreement may be considered a loan that is collateralized by the security purchased. The resale price reflects an agreed-upon interest rate effective for the period the instrument is held by a fund and is unrelated to the interest rate on the underlying instrument. In these transactions, the securities acquired by a fund (including accrued interest earned thereon) must have a total value in excess of the value of the repurchase agreement and be held by a custodian bank until repurchased. In addition, the investment advisor will monitor a fund's repurchase agreement transactions generally and will evaluate the creditworthiness of any bank, broker, or dealer party to a repurchase agreement relating to a fund. The aggregate amount of any such agreements is not limited, except to the extent required by law.

The use of repurchase agreements involves certain risks. One risk is the seller's ability to pay the agreed-upon repurchase price on the repurchase date. If the seller defaults, the fund may incur costs in disposing of the collateral, which would reduce the amount realized thereon. If the seller seeks relief under the bankruptcy laws, the disposition of the collateral may be delayed or limited. For example, if the other party to the agreement becomes insolvent and subject to liquidation or reorganization under the bankruptcy or other laws, a court may determine that the underlying security is collateral for a loan by the fund not within its control and therefore the realization by the fund on such collateral may be automatically stayed. Finally, it is possible that the fund may not be able to substantiate its interest in the underlying security and may be deemed an unsecured creditor of the other party to the agreement.

Restricted and Illiquid Securities. Illiquid securities are securities that cannot be sold or disposed of in the ordinary course of business within seven business days at approximately the value at which they are being carried on a fund's books. The SEC generally limits aggregate holdings of illiquid securities by a mutual fund to 15% of its net assets (5% for money market funds). A fund may experience difficulty valuing and selling illiquid securities and in some cases may be unable to value or sell certain illiquid securities for an indefinite period of time. Illiquid securities may include a wide variety of investments, such as: (1) repurchase agreements maturing in more than seven days (unless the agreements have demand/redemption features); (2) OTC options contracts and certain other derivatives (including certain swap agreements); (3) fixed time deposits that are not subject to prepayment or do not provide for withdrawal penalties upon prepayment (other than overnight deposits); (4) loan interests and other direct debt instruments; (5) municipal lease obligations; (6) commercial paper issued pursuant to Section 4(2) of the 1933 Act; and (7) securities whose disposition is restricted under the federal securities laws. Illiquid securities include restricted, privately placed securities that, under the federal securities laws, generally may be resold only to qualified institutional buyers. If a substantial market develops for a restricted security held by a fund, it may be treated as a liquid security, in accordance with procedures and guidelines approved by the board of trustees. This generally includes securities that are unregistered, that can be sold to qualified institutional buyers in accordance with Rule 144A under the 1933 Act, or that are exempt from registration under the 1933 Act, such as commercial paper. Although a fund's advisor monitors the liquidity of restricted securities, the board of trustees oversees and retains ultimate responsibility for the advisor's liquidity determinations. Several factors that the trustees consider in monitoring these decisions include the valuation of a security; the availability of qualified institutional buyers, brokers, and dealers that trade in the security; and the availability of information about the security's issuer.

Reverse Repurchase Agreements. In a reverse repurchase agreement, a fund sells a security to another party, such as a bank or broker-dealer, in return for cash and agrees to repurchase that security at an agreed-upon price and time. Under a reverse repurchase agreement, the fund continues to receive any principal and interest payments on the underlying security during the term of the agreement. Reverse repurchase agreements involve the risk that the market value of securities retained by the fund may decline below the repurchase price of the securities sold by the fund that it is obligated to repurchase. A reverse repurchase agreement may be considered a borrowing transaction for purposes of the 1940 Act. A reverse repurchase agreement transaction will not be considered to constitute the issuance, by a fund, of a "senior security," as that term is defined in Section 18(g) of the 1940 Act, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by a fund, if the fund covers the transaction in accordance with the requirements described under the heading "Borrowing." A fund will enter into reverse repurchase agreements only with parties whose creditworthiness has been reviewed and found satisfactory by the advisor.

Securities Lending. A fund may lend its investment securities to qualified institutional investors (typically brokers, dealers, banks, or other financial institutions) who may need to borrow securities in order to complete certain transactions, such as covering short sales, avoiding failures to deliver securities, or completing arbitrage operations. By lending its investment securities, a fund attempts to increase its net investment income through the receipt of interest

on the securities lent. Any gain or loss in the market price of the securities lent that might occur during the term of the loan would be for the account of the fund. If the borrower defaults on its obligation to return the securities lent because of insolvency or other reasons, a fund could experience delays and costs in recovering the securities lent or in gaining access to the collateral. These delays and costs could be greater for foreign securities. If a fund is not able to recover the securities lent, a fund may sell the collateral and purchase a replacement investment in the market. The value of the collateral could decrease below the value of the replacement investment by the time the replacement investment is purchased. Cash received as collateral through loan transactions may be invested in other eligible securities. Investing this cash subjects that investment to market appreciation or depreciation. Currently, Vanguard funds that lend securities invest the cash collateral received in one or more Vanguard CMT Funds, which are very low-cost money market funds.

The terms and the structure of the loan arrangements, as well as the aggregate amount of securities loans, must be consistent with the 1940 Act, and the rules or interpretations of the SEC thereunder. These provisions limit the amount of securities a fund may lend to 33 1/3% of the fund's total assets, and require that (1) the borrower pledge and maintain with the fund collateral consisting of cash, an irrevocable letter of credit, or securities issued or guaranteed by the U.S. government having at all times not less than 100% of the value of the securities lent; (2) the borrower add to such collateral whenever the price of the securities lent rises (i.e., the borrower "marks-to-market" on a daily basis); (3) the loan be made subject to termination by the fund at any time; and (4) the fund receive reasonable interest on the loan (which may include the fund's investing any cash collateral in interest bearing short-term investments), any distribution on the lent securities, and any increase in their market value. Loan arrangements made by each fund will comply with all other applicable regulatory requirements, including the rules of the New York Stock Exchange, which presently require the borrower, after notice, to redeliver the securities within the normal settlement time of three business days. The advisor will consider the creditworthiness of the borrower, among other things, in making decisions with respect to the lending of securities, subject to oversight by the board of trustees. At the present time, the SEC does not object if an investment company pays reasonable negotiated fees in connection with lent securities, so long as such fees are set forth in a written contract and approved by the investment company's trustees. In addition, voting rights pass with the lent securities, but if a fund has knowledge that a material event will occur affecting securities on loan, and in respect of which the holder of the securities will be entitled to vote or consent, the lender must be entitled to call the loaned securities in time to vote or consent.

Swap Agreements. A swap agreement is a derivative. A swap agreement is an agreement between two parties (counterparties) to exchange payments at specified dates (periodic payment dates) on the basis of a specified amount (notional amount) with the payments calculated with reference to a specified asset, reference rate, or index.

Examples of swap agreements include, but are not limited to, interest rate swaps, credit default swaps, equity swaps, commodity swaps, foreign currency swaps, index swaps, excess return swaps, and total return swaps. Most swap agreements provide that when the periodic payment dates for both parties are the same, payments are netted, and only the net amount is paid to the counterparty entitled to receive the net payment. Consequently, a fund's current obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement, based on the relative values of the positions held by each counterparty. Swap agreements allow for a wide variety of transactions. For example, fixed rate payments may be exchanged for floating rate payments; U.S. dollar-denominated payments may be exchanged for payments denominated in a different currency; and payments tied to the price of one asset, reference rate, or index may be exchanged for payments tied to the price of another asset, reference rate, or index.

An option on a swap agreement, also called a "swaption," is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market-based "premium." A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties.

The use of swap agreements by a fund entails certain risks, which may be different from, or possibly greater than, the risks associated with investing directly in the securities and other investments that are the referenced asset for the swap agreement. Swaps are highly specialized instruments that require investment techniques, risk analyses, and tax planning different from those associated with stocks, bonds, and other traditional investments. The use of a swap requires an understanding not only of the referenced asset, reference rate, or index but also of the swap itself, without the benefit of observing the performance of the swap under all possible market conditions.

Swap agreements may be subject to liquidity risk, which exists when a particular swap is difficult to purchase or sell. If a swap transaction is particularly large or if the relevant market is illiquid (as is the case with many OTC swaps), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price, which may result in significant losses. In addition, swap transactions may be subject to a fund's limitation on investments in illiquid securities.

Swap agreements may be subject to pricing risk, which exists when a particular swap becomes extraordinarily expensive (or cheap) relative to historical prices or the prices of corresponding cash market instruments. Under certain market conditions, it may not be economically feasible to initiate a transaction or liquidate a position in time to avoid a loss or take advantage of an opportunity or to realize the intrinsic value of the swap agreement.

Because some swap agreements have a leverage component, adverse changes in the value or level of the underlying asset, reference rate, or index can result in a loss substantially greater than the amount invested in the swap itself. Certain swaps have the potential for unlimited loss, regardless of the size of the initial investment. A leveraged swap transaction will not be considered to constitute the issuance, by a fund, of a "senior security," as that term is defined in Section 18(g) of the 1940 Act, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by a fund, if the fund covers the transaction in accordance with the requirements described under the heading "Borrowing."

Like most other investments, swap agreements are subject to the risk that the market value of the instrument will change in a way detrimental to a fund's interest. A fund bears the risk that its advisor will not accurately forecast future market trends or the values of assets, reference rates, indexes, or other economic factors in establishing swap positions for the fund. If the advisor attempts to use a swap as a hedge against, or as a substitute for, a portfolio investment, the fund will be exposed to the risk that the swap will have or will develop imperfect or no correlation with the portfolio investment. This could cause substantial losses for the fund. Although hedging strategies involving swap instruments can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in other fund investments. Many swaps, in particular OTC swaps, are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to a fund.

The use of a swap agreement also involves the risk that a loss may be sustained as a result of the insolvency or bankruptcy of the counterparty or the failure of the counterparty to make required payments or otherwise comply with the terms of the agreement. Additionally, the use of credit default swaps can result in losses if a fund's advisor does not correctly evaluate the creditworthiness of the issuer on which the credit swap is based.

The swaps market is a relatively new market and is largely unregulated. It is possible that developments in the swaps market, including potential government regulation, could adversely affect a fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements.

Tax Matters — Federal Tax Treatment of Futures Contracts. A fund generally must recognize for federal income tax purposes, as of the end of each taxable year, any net unrealized gains and losses on certain futures contracts, as well as any gains and losses actually realized during the year. In these cases, any gain or loss recognized with respect to a futures contract is considered to be 60% long-term capital gain or loss and 40% short-term capital gain or loss, without regard to the holding period of the contract. Gains and losses on certain other futures contracts (primarily non-U.S. futures contracts) are not recognized until the contracts are closed and are treated as long-term or short-term, depending on the holding period of the contract. Sales of futures contracts that are intended to hedge against a change in the value of securities held by a fund may affect the holding period of such securities and, consequently, the nature of the gain or loss on such securities upon disposition. A fund may be required to defer the recognition of losses on one position, such as futures contracts, to the extent of any unrecognized gains on a related offsetting position held by the fund.

In order for a fund to continue to qualify for federal income tax treatment as a regulated investment company, at least 90% of its gross income for a taxable year must be derived from qualifying income—i.e., dividends, interest, income derived from securities loans, gains from the sale of securities or foreign currencies, or other income derived with respect to the fund's business of investing in securities or currencies. It is anticipated that any net gain recognized on futures contracts will be considered qualifying income for purposes of the 90% requirement.

A fund will distribute to shareholders annually any net capital gains that have been recognized for federal income tax purposes on futures transactions. Such distributions will be combined with distributions of capital gains realized on the fund's other investments and shareholders will be advised on the nature of the distributions.

Tax Matters — Federal Tax Treatment of Non-U.S. Transactions. Special rules govern the federal income tax treatment of certain transactions denominated in a currency other than the U.S. dollar or determined by reference to the value of one or more currencies other than the U.S. dollar. The types of transactions covered by the special rules include the following: (1) the acquisition of, or becoming the obligor under, a bond or other debt instrument (including, to the extent provided in Treasury regulations, preferred stock); (2) the accruing of certain trade receivables and payables; and (3) the entering into or acquisition of any forward contract, futures contract, option, or similar financial instrument if such instrument is not marked-to-market. The disposition of a currency other than the U.S. dollar by a taxpayer whose functional currency is the U.S. dollar is also treated as a transaction subject to the special currency rules. However, foreign-currency-related regulated futures contracts and non-equity options are generally not subject to the special currency rules if they are or would be treated as sold for their fair market value at year end under the marking-to-market rules applicable to other futures contracts unless an election is made to have such currency rules apply. With respect to transactions covered by the special rules, foreign currency gain or loss is calculated separately from any gain or loss on the underlying transaction and is normally taxable as ordinary income or loss. A taxpayer may elect to treat as capital gain or loss foreign currency gain or loss arising from certain identified forward contracts, futures contracts, and options that are capital assets in the hands of the taxpayer and that are not part of a straddle. The Treasury Department issued regulations under which certain transactions subject to the special currency rules that are part of a “section 988 hedging transaction” (as defined in the IRC and the Treasury regulations) will be integrated and treated as a single transaction or otherwise treated consistently for purposes of the IRC. Any gain or loss attributable to the foreign currency component of a transaction engaged in by a fund that is not subject to the special currency rules (such as foreign equity investments other than certain preferred stocks) will be treated as capital gain or loss and will not be segregated from the gain or loss on the underlying transaction. It is anticipated that some of the non-U.S. dollar-denominated investments and foreign currency contracts a fund may make or enter into will be subject to the special currency rules described within this policy.

Tax Matters — Foreign Tax Credit. Foreign governments may withhold taxes on dividends and interest paid with respect to foreign securities held by a fund. Foreign governments may also impose taxes on other payments or gains with respect to foreign securities. If, at the close of its fiscal year, more than 50% of a fund’s total assets are invested in securities of foreign issuers, the fund may elect to pass through foreign taxes paid, and thereby allow shareholders to take a deduction or, if they meet certain holding period requirements, a tax credit on their tax returns. If shareholders do not meet the holding period requirements, they may still be entitled to a deduction for certain gains that were actually distributed by the fund.

Warrants. Warrants are instruments that give the holder the right, but not the obligation, to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.

When-Issued, Delayed-Delivery, and Forward-Commitment Transactions. When-issued, delayed-delivery, and forward-commitment transactions involve a commitment to purchase or sell specific securities at a predetermined price or yield in which payment and delivery take place after the customary settlement period for that type of security. Typically, no interest accrues to the purchaser until the security is delivered. When purchasing securities pursuant to one of these transactions, payment for the securities is not required until the delivery date. However, the purchaser assumes the rights and risks of ownership, including the risks of price and yield fluctuations and the risk that the security will not be issued as anticipated. When a fund has sold a security pursuant to one of these transactions, the fund does not participate in further gains or losses with respect to the security. If the other party to a delayed-delivery transaction fails to deliver or pay for the securities, the fund could miss a favorable price or yield opportunity or suffer a loss. A fund may renegotiate a when-issued or forward-commitment transaction and may sell the underlying securities before delivery, which may result in capital gains or losses for the fund. When-issued, delayed-delivery, and forward-commitment transactions will not be considered to constitute the issuance, by a fund, of a “senior security,” as that term is defined in Section 18(g) of the 1940 Act, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by the fund, if the fund covers the transaction in accordance with the requirements described under the heading “Borrowing.”

SHARE PRICE

Multiple-class funds do not have a single share price. Rather, each class has a share price, called its net asset value, or NAV, that is calculated each business day as of the close of regular trading on the New York Stock Exchange (the Exchange), generally 4 p.m., Eastern time. NAV per share is computed by dividing the total assets, minus liabilities, allocated to each share class by the number of Fund shares outstanding for that class.

The Exchange typically observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day (Washington's Birthday), Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. Although each Fund expects the same holidays to be observed in the future, the Exchange may modify its holiday schedule or hours of operation at any time.

PURCHASE AND REDEMPTION OF SHARES

Purchase of Shares (Other Than ETF Shares)

The purchase price of shares of each Fund is the NAV per share next determined after the purchase request is received in good order, as defined in the Fund's prospectus.

The European Stock Index, Pacific Stock Index, and FTSE All-World ex-US Index Funds do not charge purchase fees. Total World Stock Index and Global ex-U.S. Real Estate Index Funds charge a 0.25% purchase fee, the Emerging Markets Stock Index Fund charges a 0.50% fee, and the FTSE All-World ex-US Small-Cap Index Fund charges a 0.75% purchase fee. The purchase fee is paid to the Fund to reimburse it for the transaction costs incurred from purchasing securities. The fee is deducted from all purchases, including exchanges from other Vanguard funds, but not from reinvested dividends and capital gains.

Redemption of Shares (Other Than ETF Shares)

The redemption price of shares of each Fund is the NAV next determined after the redemption request is received in good order, as defined in the Fund's prospectus.

Each Fund may suspend redemption privileges or postpone the date of payment for redeemed shares: (1) during any period that the Exchange is closed or trading on the Exchange is restricted as determined by the SEC; (2) during any period when an emergency exists, as defined by the SEC, as a result of which it is not reasonably practicable for the Fund to dispose of securities it owns or to fairly determine the value of its assets; and (3) for such other periods as the SEC may permit.

The Trust has filed a notice of election with the SEC to pay in cash all redemptions requested by any shareholder of record limited in amount during any 90-day period to the lesser of \$250,000 or 1% of the net assets of a Fund at the beginning of such period.

If Vanguard determines that it would be detrimental to the best interests of the remaining shareholders of a Fund to make payment wholly or partly in cash, the Fund may pay the redemption price in whole or in part by a distribution in kind of readily marketable securities held by the Fund in lieu of cash in conformity with applicable rules of the SEC. Investors may incur brokerage charges on the sale of such securities received in payment of redemptions.

There is a 0.25% redemption fee charged for redemptions from the Emerging Markets Index and Global ex-U.S. Real Estate Index Funds, and a 0.75% redemption fee charged for redemptions from the FTSE All-World ex-US Small-Cap Index Fund. For the European Stock Index, Pacific Stock Index, FTSE All-World ex-US Index, and Total World Stock Index Funds, each Fund charges a redemption fee of 2% for shares held for less than two months. The redemption fee is paid to the Fund to reimburse the Fund for transaction costs it incurs while liquidating securities in order to meet fund redemptions. Shares redeemed may be worth more or less than what was paid for them, depending on the market value of the securities held by the Funds.

After redeeming shares that are exempt from redemption fees, shares you have held the longest will be redeemed first. Information regarding the application of redemption fees is described more fully in the Funds' prospectuses.

Right to Change Policies

Vanguard reserves the right, without notice, to (1) alter, add, or discontinue any conditions of purchase (including eligibility requirements), redemption, exchange, conversion, service, or privilege at any time; (2) accept initial purchases by telephone; (3) freeze any account and/or suspend account services if Vanguard has received reasonable notice of a dispute regarding the assets in an account, including notice of a dispute between the registered or beneficial account owners, or if we reasonably believe a fraudulent transaction may occur or has occurred; (4) temporarily freeze any account and/or suspend account services upon initial notification to Vanguard of the death of the shareholder until Vanguard receives required documentation in good order; (5) alter, impose, discontinue, or waive any purchase fee, redemption fee, account service fee, or other fees charged to a group of shareholders; and (6) redeem an account or suspend account privileges, without the owner's permission to do so, in cases of threatening conduct or activity Vanguard believes to be suspicious, fraudulent, or illegal. Changes may affect any or all investors. These actions will be taken when, at the sole discretion of Vanguard management, we reasonably believe they are deemed to be in the best interest of a fund.

Investing With Vanguard Through Other Firms

Each Fund has authorized certain agents to accept on its behalf purchase and redemption orders, and those agents are authorized to designate other intermediaries to accept purchase and redemption orders on the Fund's behalf (collectively, Authorized Agents). A Fund will be deemed to have received a purchase or redemption order when an Authorized Agent accepts the order in accordance with the Fund's instructions. In most instances, a customer order that is properly transmitted to an Authorized Agent will be priced at the NAV next determined after the order is received by the Authorized Agent.

MANAGEMENT OF THE FUNDS

Vanguard

Each Fund is part of the Vanguard group of investment companies, which consists of more than 170 funds. Through their jointly owned subsidiary, Vanguard, the funds obtain at cost virtually all of their corporate management, administrative, and distribution services. Vanguard also provides investment advisory services on an at-cost basis to several of the Vanguard funds.

Vanguard employs a supporting staff of management and administrative personnel needed to provide the requisite services to the funds and also furnishes the funds with necessary office space, furnishings, and equipment. Each fund pays its share of Vanguard's total expenses, which are allocated among the funds under methods approved by the board of trustees of each fund. In addition, each fund bears its own direct expenses, such as legal, auditing, and custodial fees. The funds' officers are also officers and employees of Vanguard.

Vanguard, Vanguard Marketing Corporation (VMC), the funds' advisors, and the funds have adopted Codes of Ethics designed to prevent employees who may have access to nonpublic information about the trading activities of the funds (access persons) from profiting from that information. The Codes permit access persons to invest in securities for their own accounts, including securities that may be held by a fund, but place substantive and procedural restrictions on the trading activities of access persons. For example, the Codes require that access persons receive advance approval for most securities trades to ensure that there is no conflict with the trading activities of the funds.

Vanguard was established and operates under an Amended and Restated Funds' Service Agreement. The Amended and Restated Funds' Service Agreement provides as follows: (1) each Vanguard fund may be called upon to invest up to 0.40% of its current net assets in Vanguard, and (2) there is no other limitation on the dollar amount that each Vanguard fund may contribute to Vanguard's capitalization. The amounts that each fund has invested are adjusted from time to time in order to maintain the proportionate relationship between each fund's relative net assets and its contribution to Vanguard's capital. As of October 31, 2010, the Funds had contributed \$13,293,500 to Vanguard, which represented 0.03% of each Fund's net assets and was 6.16% of Vanguard's capitalization.

Management. Corporate management and administrative services include: (1) executive staff; (2) accounting and financial; (3) legal and regulatory; (4) shareholder account maintenance; (5) monitoring and control of custodian

relationships; (6) shareholder reporting; and (7) review and evaluation of advisory and other services provided to the funds by third parties.

Distribution. Vanguard Marketing Corporation, 400 Devon Park Drive A39, Wayne, PA 19087, a wholly owned subsidiary of Vanguard, is the principal underwriter for the funds and in that capacity performs and finances marketing, promotional, and distribution activities (collectively, marketing and distribution activities) that are primarily intended to result in the sale of the funds' shares. VMC performs marketing and distribution activities at cost in accordance with the conditions of a 1981 SEC exemptive order that permits the Vanguard funds to internalize and jointly finance the marketing, promotion, and distribution of their shares. The funds' trustees review and approve the marketing and distribution expenses incurred by the funds, including the nature and cost of the activities and the desirability of each fund's continued participation in the joint arrangement.

To ensure that each fund's participation in the joint arrangement falls within a reasonable range of fairness, each fund contributes to VMC's marketing and distribution expenses in accordance with an SEC-approved formula. Under that formula, one half of the marketing and distribution expenses are allocated among the funds based upon their relative net assets. The remaining half of those expenses is allocated among the funds based upon each fund's sales for the preceding 24 months relative to the total sales of the funds as a group; provided, however, that no fund's aggregate quarterly rate of contribution for marketing and distribution expenses shall exceed 125% of the average marketing and distribution expense rate for Vanguard, and that no fund shall incur annual marketing and distribution expenses in excess of 0.20% of its average month-end net assets. Each fund's contribution to these marketing and distribution expenses helps to maintain and enhance the attractiveness and viability of the Vanguard complex as a whole, which benefits all of the funds and their shareholders.

VMC's principal marketing and distribution expenses are for advertising, promotional materials, and marketing personnel. Other marketing and distribution activities that VMC undertakes on behalf of the funds may include, but are not limited to:

- Conducting or publishing Vanguard-generated research and analysis concerning the funds, other investments, the financial markets, or the economy;
- Providing views, opinions, advice, or commentary concerning the funds, other investments, the financial markets, or the economy;
- Providing analytical, statistical, performance, or other information concerning the funds, other investments, the financial markets, or the economy;
- Providing administrative services in connection with investments in the funds or other investments, including, but not limited to, shareholder services, recordkeeping services, and educational services;
- Providing products or services that assist investors or financial service providers (as defined below) in the investment decision-making process;
- Providing promotional discounts, commission-free trading, fee waivers, and other benefits to clients of Vanguard Brokerage Services® who maintain qualifying investments in the funds; and
- Sponsoring, jointly sponsoring, financially supporting, or participating in conferences, programs, seminars, presentations, meetings, or other events involving fund shareholders, financial service providers, or others concerning the funds, other investments, the financial markets, or the economy, such as industry conferences, prospecting trips, due diligence visits, training or education meetings, and sales presentations.

VMC performs most marketing and distribution activities itself. Some activities may be conducted by third parties pursuant to shared marketing arrangements under which VMC agrees to share the costs and performance of marketing and distribution activities in concert with a financial service provider. Financial service providers include, but are not limited to, investment advisors, broker-dealers, financial planners, financial consultants, banks, and insurance companies. Under these cost- and performance-sharing arrangements, VMC may pay or reimburse a financial service provider (or a third party it retains) for marketing and distribution activities that VMC would otherwise perform. VMC's cost- and performance-sharing arrangements may be established in connection with Vanguard investment products or services offered or provided to or through the financial service providers. VMC's arrangements for shared marketing and distribution activities may vary among financial service providers, and its payments or reimbursements to financial service providers in connection with shared marketing and distribution activities may be significant. VMC does not participate in the offshore arrangement Vanguard has established with a third party to provide marketing, promotional, and other services to qualifying Vanguard funds that are distributed in certain foreign countries on a private-placement

basis to government-sponsored and other institutional investors. In exchange for such services, the third party receives an annual base (fixed) fee, and may also receive discretionary fees or performance adjustments.

In connection with its marketing and distribution activities, VMC may give financial service providers (or their representatives): (1) promotional items of nominal value that display Vanguard's logo, such as golf balls, shirts, towels, pens, and mouse pads; (2) gifts that do not exceed \$100 per person annually and are not preconditioned on achievement of a sales target; (3) an occasional meal, a ticket to a sporting event or the theater, or comparable entertainment that is neither so frequent nor so extensive as to raise any question of propriety and is not preconditioned on achievement of a sales target; and (4) reasonable travel and lodging accommodations to facilitate participation in marketing and distribution activities.

VMC, as a matter of policy, does not pay asset-based fees, sales-based fees, or account-based fees to financial service providers in connection with its marketing and distribution activities for the Vanguard funds. VMC policy also prohibits marketing and distribution activities that are intended, designed, or likely to compromise suitability determinations by, or the fulfillment of any fiduciary duties or other obligations that apply to, financial service providers. Nonetheless, VMC's marketing and distribution activities are primarily intended to result in the sale of the funds' shares, and, as such, its activities, including shared marketing and distribution activities, may influence participating financial service providers (or their representatives) to recommend, promote, include, or invest in a Vanguard fund or share class. In addition, Vanguard or any of its subsidiaries may retain a financial service provider to provide consulting or other services, and that financial service provider also may provide services to investors. Investors should consider the possibility that any of these activities or relationships may influence a financial service provider's (or its representatives') decision to recommend, promote, include, or invest in a Vanguard fund or share class. Each financial service provider should consider its suitability determinations, fiduciary duties, and other legal obligations (or those of its representatives) in connection with any decision to consider, recommend, promote, include, or invest in a Vanguard fund or share class.

The following table describes the expenses of Vanguard and VMC that are shared by the funds on an at-cost basis under the terms of two SEC exemptive orders. Amounts captioned "Management and Administrative Expenses" include a fund's allocated share of expenses associated with the management, administrative, and transfer agency services Vanguard provides to the funds. Amounts captioned "Marketing and Distribution Expenses" include a fund's allocated share of expenses associated with the marketing and distribution activities that VMC conducts on behalf of the Vanguard funds.

As is the case with all mutual funds, transaction costs incurred by the Fund for buying and selling securities are not reflected in the table. Annual Shared Fund Operating Expenses are based on expenses incurred in the fiscal years ended October 31, 2008, 2009, and 2010, and are presented as a percentage of each average month-end net assets.

1 The inception date for Vanguard Total World Stock Index Fund was June 24, 2008.

2 The inception date for Vanguard FTSE All-World ex-US Small-Cap Index Fund was April 2, 2009.

3 Vanguard Global ex-U.S. Real Estate Index Fund did not commence operations until November 1, 2010

Officers and Trustees

Each Vanguard fund is governed by the board of trustees of its trust and a single set of officers. Consistent with the board's corporate governance principles, the trustees believe that their primary responsibility is oversight of the management of each fund for the benefit of its shareholders, not day-to-day management. The trustees set broad policies for the funds; select investment advisors; monitor fund operations, regulatory compliance, performance, and costs; nominate and select new trustees; and elect fund officers. Vanguard manages the day-to-day operations of the funds under the direction of the board of trustees.

The trustees play an active role, as a full board and at the committee level, in overseeing risk management for the funds. The trustees delegate the day-to-day risk management of the funds to various groups, including portfolio review, investment management, risk management, compliance, legal, fund accounting, and fund financial services. These groups provide the trustees with regular reports regarding investment, valuation, liquidity, and compliance, as well as the risks associated with each. The trustees also oversee risk management for the funds through regular interactions with the funds' internal and external auditors.

The full board participates in the funds' risk oversight, in part, through the Vanguard funds' compliance program which covers the following broad areas of compliance: investment and other operations; recordkeeping; valuation and pricing; communications and disclosure; reporting and accounting; oversight of service providers; fund governance; and code of ethics, insider trading controls, and protection of nonpublic information. The program seeks to identify and assess risk through various methods, including through regular interdisciplinary communications between compliance professionals and business personnel who participate on a daily basis in risk management on behalf of the funds. The funds' chief compliance officer regularly provides reports to the board in writing and in person.

The audit committee of the board, which is composed of all independent trustees, oversees management of financial risks and controls. The audit committee serves as the channel of communication between the independent auditors of the funds and the board with respect to financial statements and financial-reporting processes, systems of internal control, and the audit process. The head of internal audit reports directly to the audit committee and provides reports to the committee in writing and in person on a regular basis. Although the audit committee is responsible for overseeing the management of financial risks, the entire board is regularly informed of these risks through committee reports.

All of the trustees bring to each fund's board a wealth of executive leadership experience derived from their service as executives (in many cases chief executive officers), board members, and leaders of diverse public operating companies, academic institutions, and other organizations. In determining whether an individual is qualified to serve as a trustee of the funds, the board considers a wide variety of information about the trustee, and multiple factors contribute to the board's decision. Each trustee is determined to have the experience, skills, and attributes necessary to serve the funds and their shareholders because each trustee demonstrates an exceptional ability to consider complex business and financial matters, evaluate the relative importance and priority of issues, make decisions, and contribute effectively to the deliberations of the board. The board also considers the individual experience of each trustee and determines that the trustee's professional experience, education, and background contribute to the diversity of perspectives on the board. The business acumen, experience, and objective thinking of the trustees are considered invaluable assets for Vanguard management and, ultimately, the Vanguard funds' shareholders. The specific roles and experience of each board member that factor into this determination are presented below. The mailing address of the trustees and officers is P.O. Box 876, Valley Forge, PA 19482.

Name, Year of Birth	Position(s) Held with Funds	Vanguard Funds' Trustee/ Officer Since	Principal Occupation(s) and Outside Directorships During the Past Five Years	Number of Vanguard Funds Overseen by Trustee/Officer
Interested Trustee¹				
F. William McNabb III (1957)	Chairman of the Board, Chief Executive Officer, and President	July 2009	Mr. McNabb has served as Chairman of the Board of Vanguard and of each of the investment companies served by Vanguard, since January 2010; Trustee of each of the investment companies served by Vanguard, since 2009; Director of Vanguard since 2008; and Chief Executive Officer and President of Vanguard and of each of the investment companies served by Vanguard, since 2008. Mr. McNabb also serves as Director of Vanguard Marketing Corporation. Mr. McNabb served as a Managing Director of Vanguard from 1995 to 2008. Mr. McNabb's 24 years with Vanguard and his position as chief executive officer of Vanguard and the Vanguard funds give him intimate experience with the day-to-day management and operations of the Vanguard funds.	179

¹ Mr. McNabb is considered an "interested person," as defined in the 1940 Act, because he is an officer of the Trust.

Independent Trustees				
Emerson U. Fullwood (1948)	Trustee	January 2008	Mr. Fullwood is the former Executive Chief Staff and Marketing Officer for North America and Corporate Vice President (retired 2008) of Xerox Corporation (document management products and services). Previous positions held at Xerox by Mr. Fullwood include President of the Worldwide Channels Group, President of Latin America, Executive Chief Staff Officer of Developing Markets, and President of Worldwide Customer Services. Mr. Fullwood serves as a director of SPX Corporation (multi-industry manufacturing) and Amerigroup Corporation (managed health care). Mr. Fullwood also serves as a director of the University of Rochester Medical Center, Monroe Community College Foundation, and the United Way of Rochester. Mr. Fullwood brings to the board particular experience with marketing, organizational development, and operations management.	179
Rajiv L. Gupta (1945)	Trustee	December 2001	Mr. Gupta is the former Chairman and Chief Executive Officer (retired 2009) and President (2006–2008) of Rohm and Haas Co. (chemicals). Mr. Gupta serves as a director of Tyco International, Ltd. (diversified manufacturing and services) and Hewlett-Packard Company (electronic computer manufacturing); as a trustee of The Conference Board; and on the Board of Managers of Delphi Automotive LLP (automotive components). Mr. Gupta brings to the board particular experience with finance, capital markets, and global operations.	179

Name, Year of Birth	Position(s) Held with Funds	Vanguard Funds' Trustee/ Officer Since	Principal Occupation(s) and Outside Directorships During the Past Five Years	Number of Vanguard Funds Overseen by Trustee/Officer
Amy Gutmann (1949)	Trustee	June 2006	Dr. Gutmann serves as the President of the University of Pennsylvania. She is the Christopher H. Browne Distinguished Professor of Political Science in the School of Arts and Sciences with secondary appointments at the Annenberg School for Communication and the Graduate School of Education at the University of Pennsylvania. Dr. Gutmann also serves as a director of Carnegie Corporation of New York, Schuylkill River Development Corporation, and Greater Philadelphia Chamber of Commerce; and as a trustee of the National Constitution Center. Dr. Gutmann is Chair of the Presidential Commission for the Study of Bioethical Issues. Dr. Gutmann brings to the board particular experience with community and organizational development, education, ethics, and public policy.	179
JoAnn Heffernan Heisen (1950)	Trustee	July 1998	Ms. Heisen is the former Corporate Vice President and Chief Global Diversity Officer and a Member of the Executive Committee (retired 2008) of Johnson & Johnson (pharmaceuticals/consumer products). Ms. Heisen served as Vice President and Chief Information Officer of Johnson & Johnson from 1997 to 2005; corporate controller from 1995 to 1997; and corporate treasurer from 1991 to 1995. Ms. Heisen serves as a director of the University Medical Center at Princeton and Women's Research and Education Institute; and as a member of the advisory board of the Maxwell School of Citizenship and Public Affairs at Syracuse University. Ms. Heisen brings to the board particular experience with human resources, and financial and information technology matters.	179
F. Joseph Loughrey (1949)	Trustee	October 2009	Mr. Loughrey is the former President and Chief Operating Officer (retired 2009) and Vice Chairman of the Board (2008–2009) of Cummins Inc. (industrial machinery). From 1996 to 1999, Mr. Loughrey served as the chief technical officer of Cummins Inc. Mr. Loughrey serves as a director of SKF AB (industrial machinery), Hillenbrand, Inc. (specialized consumer services), Sauer-Danfoss Inc. (machinery), the Lumina Foundation for Education, and Oxfam America; and as Chairman of the Advisory Council for the College of Arts and Letters at the University of Notre Dame. Mr. Loughrey brings to the board particular experience with global operations, technology, and risk and human resources management.	179
André F. Perold (1952)	Trustee	December 2004	Mr. Perold is the George Gund Professor of Finance and Banking at the Harvard Business School, and Chair of the Investment Committee of HighVista Strategies LLC (private investment firm). From 2003 to 2009, Mr. Perold served as chairman of the board of UNX, Inc. (equities trading firm). Mr. Perold brings to the board particular experience with investment management and finance.	179

Name, Year of Birth	Position(s) Held with Funds	Vanguard Funds' Trustee/ Officer Since	Principal Occupation(s) and Outside Directorships During the Past Five Years	Number of Vanguard Funds Overseen by Trustee/Officer
Alfred M. Rankin, Jr. (1941)	Lead Independent Trustee	January 1993	Mr. Rankin serves as Chairman, President, and Chief Executive Officer of NACCO Industries, Inc. (forklift trucks/housewares/lignite). Mr. Rankin also serves as a director of Goodrich Corporation (industrial products/ aircraft systems and services); Chairman of the Federal Reserve Bank of Cleveland; and a trustee of The Cleveland Museum of Art. Mr. Rankin brings to the board particular experience with finance, capital markets, and risk and operations management.	179
Peter F. Volanakis (1955)	Trustee	July 2009	Mr. Volanakis has served as President since 2007 and Chief Operating Officer since 2005 of Corning Incorporated (communications equipment). Mr. Volanakis served as President of Corning Technologies from 2001 to 2005. Mr. Volanakis also serves as a director of Corning Incorporated and Dow Corning; a trustee of the Corning Incorporated Foundation and the Corning Museum of Glass; and an Overseer of the Amos Tuck School of Business Administration at Dartmouth College. Mr. Volanakis brings to the board particular experience with international operations, marketing, and corporate development.	179
Executive Officers				
Glenn Booraem (1967)	Controller	July 2010	Mr. Booraem, a Principal of Vanguard, has served as Controller of each of the investment companies served by Vanguard, since 2010. Mr. Booraem served as Assistant Controller of each of the investment companies served by Vanguard, from 2001 to 2010.	179
Thomas J. Higgins (1957)	Chief Financial Officer	September 2008	Mr. Higgins, a Principal of Vanguard, has served as Chief Financial Officer of each of the investment companies served by Vanguard, since 2008. Mr. Higgins served as Treasurer of each of the investment companies served by Vanguard, from 1998 to 2008.	179
Kathryn J. Hyatt (1955)	Treasurer	November 2008	Ms. Hyatt, a Principal of Vanguard, has served as Treasurer of each of the investment companies served by Vanguard, since 2008. Ms. Hyatt served as Assistant Treasurer of each of the investment companies served by Vanguard, from 1988 to 2008.	179
Heidi Stam (1956)	Secretary	July 2005	Ms. Stam has served as a Managing Director of Vanguard since 2006; General Counsel of Vanguard since 2005; Secretary of Vanguard and of each of the investment companies served by Vanguard, since 2005; and Director and Senior Vice President of Vanguard Marketing Corporation since 2005. Ms. Stam served as a Principal of Vanguard from 1997 to 2006.	179

All but one of the trustees are independent. The independent trustees designate a lead independent trustee. The lead independent trustee is a spokesperson and principal point of contact for the independent trustees and is responsible for coordinating the activities of the independent trustees, including calling regular executive sessions of the independent trustees; developing the agenda of each meeting together with the chairman; and chairing the meetings of the independent trustees, including the meetings of the audit, compensation, and nominating committees.

The independent trustees appoint the chairman of the board. The roles of chairman of the board and chief executive officer currently are held by the same person. The independent trustees generally believe that the Vanguard funds' chief executive officer is best qualified to serve as chairman and that fund shareholders benefit from this leadership structure through accountability and strong day-to-day leadership.

Board Committees: The Trust's board has the following committees:

- **Audit Committee:** This committee oversees the accounting and financial reporting policies, the systems of internal controls, and the independent audits of each fund and Vanguard. All independent trustees serve as members of the committee. The committee held three meetings during the Funds' last fiscal year.
- **Compensation Committee:** This committee oversees the compensation programs established by each fund and Vanguard for the benefit of their employees, officers, and trustees/directors. All independent trustees serve as members of the committee. The committee held three meetings during the Funds' last fiscal year.
- **Nominating Committee:** This committee nominates candidates for election to Vanguard's board of directors and the board of trustees of each fund (collectively, the Vanguard boards). The committee also has the authority to recommend the removal of any director or trustee from the Vanguard boards. All independent trustees serve as members of the committee. The committee held two meetings during the Funds' last fiscal year.

The Nominating Committee will consider shareholder recommendations for trustee nominees. Shareholders may send recommendations to Mr. Rankin, Chairman of the Committee.

Trustee Compensation

The same individuals serve as trustees of all Vanguard funds and each fund pays a proportionate share of the trustees' compensation. The funds also employ their officers on a shared basis; however, officers are compensated by Vanguard, not the funds.

Independent Trustees. The funds compensate their independent trustees (i.e., the ones who are not also officers of the funds) in three ways:

- The independent trustees receive an annual fee for their service to the funds, which is subject to reduction based on absences from scheduled board meetings.
- The independent trustees are reimbursed for the travel and other expenses that they incur in attending board meetings.
- Upon retirement (after attaining age 65 and completing five years of service), the independent trustees who began their service prior to January 1, 2001, receive a retirement benefit under a separate account arrangement. As of January 1, 2001, the opening balance of each eligible trustee's separate account was generally equal to the net present value of the benefits he or she had accrued under the trustees' former retirement plan. Each eligible trustee's separate account will be credited annually with interest at a rate of 7.5% until the trustee receives his or her final distribution. Those independent trustees who began their service on or after January 1, 2001, are not eligible to participate in the plan.

"Interested" Trustee. Mr. McNabb serves as trustee, but is not paid in this capacity. He is, however, paid in his role as an officer of Vanguard.

Compensation Table. The following table provides compensation details for each of the trustees. We list the amounts paid as compensation and accrued as retirement benefits by the Funds for each trustee. In addition, the table shows the total amount of benefits that we expect each trustee to receive from all Vanguard funds upon retirement, and the total amount of compensation paid to each trustee by all Vanguard funds.

VANGUARD INTERNATIONAL EQUITY INDEX FUNDS TRUSTEES' COMPENSATION TABLE

Trustee	Aggregate Compensation from the Funds ¹	Pension or Retirement Benefits Accrued as Part of the Funds' Expenses ¹	Accrued Annual Retirement Benefit at January 1, 2010 ²	Total Compensation from All Vanguard Funds Paid to Trustees ³
F. William McNabb III	—	—	—	—
Emerson U. Fullwood	\$12,294	—	—	\$205,000
Rajiv L. Gupta	12,294	—	—	205,000
Amy Gutmann	12,294	—	—	199,200
JoAnn Heffernan Heisen	12,294	\$278	\$3,395	205,000
F. Joseph Loughrey	12,294	—	—	205,000
André F. Perold	12,294	—	—	199,200
Alfred M. Rankin, Jr.	14,094	545	6,653	235,000
Peter F. Volanakis	12,294	—	—	205,000

1 The amounts shown in this column are based on the Trust's fiscal year ended October 31, 2010. Each Fund within the Trust is responsible for a proportionate share of these amounts.

2 Each trustee is eligible to receive retirement benefits only after completing at least 5 years (60 consecutive months) of service as a trustee for the Vanguard funds. The annual retirement benefit will be paid in monthly installments, beginning with the month following the trustee's retirement from service, and will cease after 10 years of payments (120 monthly installments). Trustees who began their service on or after January 1, 2001, are not eligible to participate in the retirement benefit plan.

3 The amounts reported in this column reflect the total compensation paid to each trustee for his or her service as trustee of 179 Vanguard funds for the 2010 calendar year.

Ownership of Fund Shares

All trustees allocate their investments among the various Vanguard funds based on their own investment needs. The following table shows each trustee's ownership of shares of each Fund and of all Vanguard funds served by the trustee as of December 31, 2010.

Dowdell Jr. & Linda A. Dowdell, University Park, FL (14.83%), C. Fred Taylor & Erica S Taylor, Irvine CA (6.83%), Northern Trust Co, Chicago, IL (5.13%); Vanguard FTSE All-World ex-US Index Fund—Investor Shares: Charles Schwab & Co. Inc., San Francisco, CA (7.23%); Vanguard FTSE All-World ex-US Index Fund—Institutional Shares: National Financial Services LLC, New York, NY (5.45%); Vanguard FTSE All-World ex-US Index Fund—Institutional Plus Shares: JPMorgan Chase Bank, Saint Paul, MN (63.08%), Glenmeade Trust Co., Philadelphia, PA (22.72%); Vanguard FTSE All-World ex-US Small-Cap Index Fund—Investor Shares: MAC & Co., Pittsburgh, PA (6.05%); Vanguard FTSE All-World ex-US Small-Cap Index Fund—Institutional Shares: Swiss Vorsorgestiftung, Switzerland (61.88%), Michael L. Mavrovouniotis, Irvine, CA (38.12%); Vanguard Total World Stock Index Fund—Investor Shares: SEI Private Trust Co., (7.32%); Vanguard Total World Stock Index Fund—Institutional

Shares: Golden Bay Investment Fund LLC, San Francisco, CA (3.58%), The Town School, New York, NY (20.87%), Jeff Tarr, New York, NY (14.18%), Wilmington Trust Company FBO Mutual Fire Marine & Inland Ins., Wilmington, DE (11.89%), Northern Trust Co Tr FBO JB DuPont FD, Chicago, IL (10.45%), The Childrens Institute of Pittsburgh, Pittsburgh, PA (9.85%).

Although the Funds do not have information concerning the beneficial ownership of shares held in the names of Depository Trust Company (DTC) participants, as of January 31, 2011, the name and percentage ownership of each DTC participant that owned of record 5% or more of the outstanding ETF Shares of a Fund were as follows:

Vanguard European Stock Index Fund—ETF Shares: Charles Schwab & Co., Inc. (11.2%), Morgan Stanley DW Inc. (10.7%), State Street Bank & Trust Co. (8.4%), National Financial Services LLC (7.9%), JPMorgan Chase Bank, N.A. (6.2%), The Bank of New York Mellon (5.9%), Vanguard Marketing Corporation (5.1%); Vanguard Pacific Stock Index Fund—ETF Shares: Charles Schwab & Co., Inc. (14.1%), National Financial Services LLC (11.4%), Morgan Stanley DW Inc. (8.9%), Vanguard Marketing Corporation (7.1%), JPMorgan Chase Bank, N.A. (6.5%), UBS Financial Services LLC (5.3%); Vanguard Emerging Markets Stock Index Fund—ETF Shares: State Street Bank & Trust Co. (16.9%), Brown Brothers Harriman & Company (9.3%), JPMorgan Chase Bank, National Association (9.6%), Charles Schwab & Co., Inc. (6.5%); Vanguard FTSE All-World ex-US Index Fund—ETF Shares: Charles Schwab & Co., Inc. (21.2%), National Financial Services LLC (11.4%), Vanguard Marketing Corporation (8.9%), TD Ameritrade Clearing, Inc. (5.7%), Merrill Lynch, Pierce Fenner & Smith (5.6%); Vanguard FTSE All-World ex-US Small-Cap Index Fund—ETF Shares: Vanguard Marketing Corporation (21.7%), Charles Schwab & Co., Inc. (15.2%), National Financial Services LLC (15.0%), Morgan Stanley DW Inc. (5.7%), TD Ameritrade Clearing, Inc. (5.3%), Merrill Lynch, Pierce Fenner & Smith (5.4%); Vanguard Total World Stock Index Fund—ETF Shares: Vanguard Marketing Corporation (33.0%), Brown Brothers Harriman & Company (11.7%), National Financial Services LLC (11.6%), Charles Schwab & Co., Inc. (6.8%), JPMorgan Clearing Corp. (6.4%).

Portfolio Holdings Disclosure Policies and Procedures

Introduction

Vanguard and the Boards of Trustees of the Vanguard funds (Boards) have adopted Portfolio Holdings Disclosure Policies and Procedures (Policies and Procedures) to govern the disclosure of the portfolio holdings of each Vanguard fund. Vanguard and the Boards considered each of the circumstances under which Vanguard fund portfolio holdings may be disclosed to different categories of persons under the Policies and Procedures. Vanguard and the Boards also considered actual and potential material conflicts that could arise in such circumstances between the interests of Vanguard fund shareholders, on the one hand, and those of the fund's investment advisor, distributor, or any affiliated person of the fund, its investment advisor, or its distributor, on the other. After giving due consideration to such matters and after the exercise of their fiduciary duties and reasonable business judgment, Vanguard and the Boards determined that the Vanguard funds have a legitimate business purpose for disclosing portfolio holdings to the persons described in each of the circumstances set forth in the Policies and Procedures and that the Policies and Procedures are reasonably designed to ensure that disclosure of portfolio holdings and information about portfolio holdings is in the best interests of fund shareholders and appropriately addresses the potential for material conflicts of interest.

The Boards exercise continuing oversight of the disclosure of Vanguard fund portfolio holdings by (1) overseeing the implementation and enforcement of the Policies and Procedures, the Code of Ethics, and the Policies and Procedures Designed to Prevent the Misuse of Inside Information (collectively, the portfolio holdings governing policies) by the Chief Compliance Officer of Vanguard and the Vanguard funds; (2) considering reports and recommendations by the Chief Compliance Officer concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act and Rule 206(4)-7 under the Investment Advisers Act of 1940) that may arise in connection with any portfolio holdings governing policies; and (3) considering whether to approve or ratify any amendment to any portfolio holdings governing policies. Vanguard and the Boards reserve the right to amend the Policies and Procedures at any time and from time to time without prior notice at their sole discretion. For purposes of the Policies and Procedures, the term "portfolio holdings" means the equity and debt securities (e.g., stocks and bonds) held by a Vanguard fund and does not mean the cash investments, derivatives, and other investment positions (collectively, other investment positions) held by the fund.

Online Disclosure of Ten Largest Stock Holdings

Each of the Vanguard equity funds and Vanguard balanced funds generally will seek to disclose the fund's ten largest stock portfolio holdings and the percentages that each of these ten largest stock portfolio holdings represents of the

fund's total assets as of the end of the most recent calendar quarter (quarter-end ten largest stock holdings) online at *vanguard.com* in the "Portfolio" section of the fund's Portfolio & Management page, 15 calendar days after the end of the calendar quarter. In addition, those funds generally will seek to disclose the fund's ten largest stock portfolio holdings as of the end of the most recent month (month-end ten largest stock holdings) online at *vanguard.com* in the "Portfolio" section of the fund's Portfolio & Management page, 10 business days after the end of the month. Together, the quarter-end and month-end ten largest stock holdings are referred to as the ten largest stock holdings. Online disclosure of the ten largest stock holdings is made to all categories of persons, including individual investors, institutional investors, intermediaries, third-party service providers, rating and ranking organizations, affiliated persons of a Vanguard fund, and all other persons.

Online Disclosure of Complete Portfolio Holdings

Each of the Vanguard funds, excluding Vanguard money market funds and Vanguard Market Neutral Fund, generally will seek to disclose the fund's complete portfolio holdings as of the end of the most recent calendar quarter online at *vanguard.com* in the "Portfolio" section of the fund's Portfolio & Management page, 30 calendar days after the end of the calendar quarter. Vanguard Market Neutral Fund generally will seek to disclose the Fund's complete portfolio holdings as of the end of the most recent calendar quarter online at *vanguard.com* in the "Portfolio" section of the Fund's Portfolio & Management page, 60 calendar days after the end of the calendar quarter. In accordance with Rule 2a-7 under the 1940 Act, each of the Vanguard money market funds will disclose the fund's complete portfolio holdings as of the last business day of the prior month online at *vanguard.com*, in the "Portfolio" section of the fund's Portfolio & Management page, no later than the fifth (5th) business day of the current month. The complete portfolio holdings information for money market funds will remain available online for at least six (6) months after the initial posting. Online disclosure of complete portfolio holdings is made to all categories of persons, including individual investors, institutional investors, intermediaries, third-party service providers, rating and ranking organizations, affiliated persons of a Vanguard fund, and all other persons. Vanguard's Portfolio Review Department will review complete portfolio holdings before online disclosure is made as previously described and, except with respect to the complete portfolio holdings of the Vanguard money market funds, may withhold any portion of the fund's complete portfolio holdings from online disclosure, as previously described, when deemed to be in the best interests of the fund after consultation with a Vanguard fund's investment advisor.

Disclosure of Complete Portfolio Holdings to Service Providers Subject to Confidentiality and Trading Restrictions

Vanguard, for legitimate business purposes, may disclose Vanguard fund complete portfolio holdings at times it deems necessary and appropriate to rating and ranking organizations; financial printers; proxy voting service providers; pricing information vendors; third parties that deliver analytical, statistical, or consulting services; and other third parties that provide services (collectively, Service Providers) to Vanguard, Vanguard subsidiaries, and/or the Vanguard funds. Disclosure of complete portfolio holdings to a Service Provider is conditioned on the Service Provider being subject to a written agreement imposing a duty of confidentiality, including a duty not to trade on the basis of any material nonpublic information.

The frequency with which complete portfolio holdings may be disclosed to a Service Provider, and the length of the lag, if any, between the date of the information and the date on which the information is disclosed to the Service Provider, is determined based on the facts and circumstances, including, without limitation, the nature of the portfolio holdings information to be disclosed, the risk of harm to the funds and their shareholders, and the legitimate business purposes served by such disclosure. The frequency of disclosure to a Service Provider varies and may be as frequent as daily, with no lag. Disclosure of Vanguard fund complete portfolio holdings by Vanguard to a Service Provider must be authorized by a Vanguard fund officer or a Principal in Vanguard's Portfolio Review or Legal Department. Any disclosure of Vanguard fund complete portfolio holdings to a Service Provider as previously described may also include a list of the other investment positions that make up the fund, such as cash investments and derivatives.

Currently, Vanguard fund complete portfolio holdings are disclosed to the following Service Providers as part of ongoing arrangements that serve legitimate business purposes: Abel/Noser Corporation, Advisor Software, Inc., Alcom Printing Group Inc., Apple Press, L.C., Bloomberg L.P., Brilliant Graphics, Inc., Broadridge Financial Solutions, Inc., Brown Brothers Harriman & Co., FactSet Research Systems Inc., Innovation Printing & Communications, Intelligencer Printing Company, Investment Technology Group, Inc., Lipper, Inc., Markit WSO Corporation, McMunn Associates Inc., Océ

Business Services, Inc., Reuters America Inc., R.R. Donnelley, Inc., State Street Bank and Trust Company, Triune Color Corporation, and Tursack Printing Inc.

Disclosure of Complete Portfolio Holdings to Vanguard Affiliates and Certain Fiduciaries Subject to Confidentiality and Trading Restrictions

Vanguard fund complete portfolio holdings may be disclosed between and among the following persons (collectively, Affiliates and Fiduciaries) for legitimate business purposes within the scope of their official duties and responsibilities, subject to such persons' continuing legal duty of confidentiality and legal duty not to trade on the basis of any material nonpublic information, as such duties are imposed under the Code of Ethics, the Policies and Procedures Designed to Prevent the Misuse of Inside Information, by agreement, or under applicable laws, rules, and regulations: (1) persons who are subject to the Code of Ethics or the Policies and Procedures Designed to Prevent the Misuse of Inside Information; (2) an investment advisor, distributor, administrator, transfer agent, or custodian to a Vanguard fund; (3) an accounting firm, an auditing firm, or outside legal counsel retained by Vanguard, a Vanguard subsidiary, or a Vanguard fund; (4) an investment advisor to whom complete portfolio holdings are disclosed for due diligence purposes when the advisor is in merger or acquisition talks with a Vanguard fund's current advisor; and (5) a newly hired investment advisor or sub-advisor to whom complete portfolio holdings are disclosed prior to the time it commences its duties.

The frequency with which complete portfolio holdings may be disclosed between and among Affiliates and Fiduciaries, and the length of the lag, if any, between the date of the information and the date on which the information is disclosed between and among the Affiliates and Fiduciaries, is determined by such Affiliates and Fiduciaries based on the facts and circumstances, including, without limitation, the nature of the portfolio holdings information to be disclosed, the risk of harm to the funds and their shareholders, and the legitimate business purposes served by such disclosure. The frequency of disclosure between and among Affiliates and Fiduciaries varies and may be as frequent as daily, with no lag. Any disclosure of Vanguard fund complete portfolio holdings to any Affiliates and Fiduciaries as previously described may also include a list of the other investment positions that make up the fund, such as cash investments and derivatives. Disclosure of Vanguard fund complete portfolio holdings or other investment positions by Vanguard, Vanguard Marketing Corporation, or a Vanguard fund to Affiliates and Fiduciaries must be authorized by a Vanguard fund officer or a Principal of Vanguard.

Currently, Vanguard fund complete portfolio holdings are disclosed to the following Affiliates and Fiduciaries as part of ongoing arrangements that serve legitimate business purposes: Vanguard and each investment advisor, custodian, and independent registered public accounting firm identified in each fund's Statement of Additional Information.

Disclosure of Portfolio Holdings to Broker-Dealers in the Normal Course of Managing a Fund's Assets

An investment advisor, administrator, or custodian for a Vanguard fund may, for legitimate business purposes within the scope of its official duties and responsibilities, disclose portfolio holdings (whether partial portfolio holdings or complete portfolio holdings) and other investment positions that make up the fund to one or more broker-dealers during the course of, or in connection with, normal day-to-day securities and derivatives transactions with or through such broker-dealers subject to the broker-dealer's legal obligation not to use or disclose material nonpublic information concerning the fund's portfolio holdings, other investment positions, securities transactions, or derivatives transactions without the consent of the fund or its agents. The Vanguard funds have not given their consent to any such use or disclosure and no person or agent of Vanguard is authorized to give such consent except as approved in writing by the Boards of the Vanguard funds. Disclosure of portfolio holdings or other investment positions by Vanguard to broker-dealers must be authorized by a Vanguard fund officer or a Principal of Vanguard.

Disclosure of Nonmaterial Information

The Policies and Procedures permit Vanguard fund officers, Vanguard fund portfolio managers, and other Vanguard representatives (collectively, Approved Vanguard Representatives) to disclose any views, opinions, judgments, advice, or commentary, or any analytical, statistical, performance, or other information, in connection with or relating to a Vanguard fund or its portfolio holdings and/or other investment positions (collectively, commentary and analysis) or any changes in the portfolio holdings of a Vanguard fund that occurred after the end of the most recent calendar quarter (recent portfolio changes) to any person if (1) such disclosure serves a legitimate business purpose, (2) such disclosure does not effectively result in the disclosure of the complete portfolio holdings of any Vanguard fund (which can be disclosed only

in accordance with the Policies and Procedures), and (3) such information does not constitute material nonpublic information. Disclosure of commentary and analysis or recent portfolio changes by Vanguard, Vanguard Marketing Corporation, or a Vanguard fund must be authorized by a Vanguard fund officer or a Principal of Vanguard.

An Approved Vanguard Representative must make a good faith determination whether the information constitutes material nonpublic information, which involves an assessment of the particular facts and circumstances. Vanguard believes that in most cases recent portfolio changes that involve a few or even several securities in a diversified portfolio or commentary and analysis would be immaterial and would not convey any advantage to a recipient in making an investment decision concerning a Vanguard fund. Nonexclusive examples of commentary and analysis about a Vanguard fund include (1) the allocation of the fund's portfolio holdings and other investment positions among various asset classes, sectors, industries, and countries; (2) the characteristics of the stock and bond components of the fund's portfolio holdings and other investment positions; (3) the attribution of fund returns by asset class, sector, industry, and country; and (4) the volatility characteristics of the fund. Approved Vanguard Representatives may at their sole discretion determine whether to deny any request for information made by any person, and may do so for any reason or for no reason. "Approved Vanguard Representatives" include, for purposes of the Policies and Procedures, persons employed by or associated with Vanguard or a subsidiary of Vanguard who have been authorized by Vanguard's Portfolio Review Department to disclose recent portfolio changes and/or commentary and analysis in accordance with the Policies and Procedures.

Currently, Vanguard nonmaterial portfolio holdings information is disclosed to KPMG, LLP, and R.V. Kuhns & Associates.

Disclosure of Portfolio Holdings in Accordance with SEC Exemptive Orders

Vanguard's Fund Financial Services unit may disclose to the National Securities Clearing Corporation (NSCC) the daily portfolio composition files (PCFs) that identify a basket of specified securities that may overlap with the actual or expected portfolio holdings of the Vanguard funds that offer a class of shares known as Vanguard ETF Shares (ETF Funds), in accordance with the terms and conditions of related exemptive orders (Vanguard ETF Exemptive Orders) issued by the Securities and Exchange Commission, as described in this section.

Unlike the conventional classes of shares issued by ETF Funds, the ETF Shares are listed for trading on a national securities exchange. Each ETF Fund issues ETF Shares in large blocks, known as "Creation Units." To purchase or redeem a Creation Unit, an investor must be an "Authorized Participant" or the investor must purchase or redeem through a broker-dealer that is an Authorized Participant. An Authorized Participant is a participant in the Depository Trust Company (DTC) that has executed a Participant Agreement with Vanguard Marketing Corporation. Each ETF Fund issues Creation Units in exchange for a "portfolio deposit" consisting of a basket of specified securities (Deposit Securities) and a cash payment (the Balancing Amount). Each ETF Fund also redeems Creation Units in kind; an investor who tenders a Creation Unit will receive, as redemption proceeds, a basket of specified securities together with a Balancing Amount.

In connection with the creation and redemption process, and in accordance with the terms and conditions of the Vanguard ETF Exemptive Orders, Vanguard makes available to the NSCC, for dissemination to NSCC participants on each business day prior to the opening of trading on the listing exchange, a PCF containing a list of the names and the required number of shares of each Deposit Security for each ETF Fund. (The NSCC is a clearing agency registered with the SEC and affiliated with the DTC.) In addition, the listing exchange disseminates (1) continuously throughout the trading day, through the facilities of the consolidated tape, the market value of an ETF Share, and (2) every 15 seconds throughout the trading day, separately from the consolidated tape, a calculation of the estimated NAV of an ETF Share (which estimate is expected to be accurate to within a few basis points). Comparing these two figures allows an investor to determine whether, and to what extent, ETF Shares are selling at a premium or at a discount to NAV. ETF Shares are listed on the exchange and traded on the secondary market in the same manner as other equity securities. The price of ETF Shares trading on the secondary market is based on a current bid/offer market.

As contemplated by the Vanguard ETF Exemptive Orders, Vanguard and the ETF Funds expect that only institutional arbitrageurs and institutional investors with large indexed portfolios will buy and sell ETF Shares in Creation Unit-sized aggregations because Creation Units can be purchased only in exchange for securities likely to cost millions of dollars. An exchange specialist, in providing for a fair and orderly secondary market for ETF Shares, also may purchase Creation Units for use in its market-making activities on the exchange. Vanguard and the ETF Funds expect secondary market purchasers of ETF Shares will include both institutional and retail investors. Vanguard and the ETF Funds believe that arbitrageurs will purchase or redeem Creation Units to take advantage of discrepancies between the ETF Shares' market

price and the ETF Shares' underlying NAV. Vanguard and the ETF Funds expect that this arbitrage activity will provide a market "discipline" that will result in a close correspondence between the price at which the ETF Shares trade and their NAV. In other words, Vanguard and the ETF Funds do not expect the ETF Shares to trade at a significant premium or discount to their NAV.

In addition to making PCFs available to the NSCC, as previously described, Vanguard's Fund Financial Services unit may disclose the PCF for any ETF Fund to any person, or online at *vanguard.com* to all categories of persons, if (1) such disclosure serves a legitimate business purpose and (2) such disclosure does not constitute material nonpublic information. Vanguard's Fund Financial Services unit must make a good faith determination whether the PCF for any ETF Fund constitutes material nonpublic information, which involves an assessment of the particular facts and circumstances. Vanguard believes that in most cases the PCF for any ETF Fund would be immaterial and would not convey any advantage to the recipient in making an investment decision concerning the ETF Fund, if sufficient time has passed between the date of the PCF and the date on which the PCF is disclosed. Vanguard's Fund Financial Services unit may at its sole discretion determine whether to deny any request for the PCF for any ETF Fund made by any person, and may do so for any reason or for no reason. Disclosure of a PCF must be authorized by a Vanguard fund officer or a Principal in Vanguard's Fund Financial Services unit.

Disclosure of Portfolio Holdings Related Information to the Issuer of a Security for Legitimate Business Purposes

Vanguard, at its sole discretion, may disclose portfolio holdings information concerning a security held by one or more Vanguard funds to the issuer of such security if the issuer presents, to the satisfaction of Fund Financial Services, convincing evidence that the issuer has a legitimate business purpose for such information. Disclosure of this information to an issuer is conditioned on the issuer being subject to a written agreement imposing a duty of confidentiality, including a duty not to trade on the basis of any material nonpublic information. The frequency with which portfolio holdings information concerning a security may be disclosed to the issuer of such security, and the length of the lag, if any, between the date of the information and the date on which the information is disclosed to the issuer, is determined based on the facts and circumstances, including, without limitation, the nature of the portfolio holdings information to be disclosed, the risk of harm to the funds and their shareholders, and the legitimate business purposes served by such disclosure. The frequency of disclosure to an issuer cannot be determined in advance of a specific request and will vary based upon the particular facts and circumstances and the legitimate business purposes, but in unusual situations could be as frequent as daily, with no lag. Disclosure of portfolio holdings information concerning a security held by one or more Vanguard funds to the issuer of such security must be authorized by a Vanguard fund officer or a Principal in Vanguard's Portfolio Review or Legal Department.

Disclosure of Portfolio Holdings as Required by Applicable Law

Vanguard fund portfolio holdings (whether partial portfolio holdings or complete portfolio holdings) and other investment positions that make up a fund shall be disclosed to any person as required by applicable laws, rules, and regulations. Examples of such required disclosure include, but are not limited to, disclosure of Vanguard fund portfolio holdings (1) in a filing or submission with the SEC or another regulatory body, (2) in connection with seeking recovery on defaulted bonds in a federal bankruptcy case, (3) in connection with a lawsuit, or (4) as required by court order. Disclosure of portfolio holdings or other investment positions by Vanguard, Vanguard Marketing Corporation, or a Vanguard fund as required by applicable laws, rules, and regulations must be authorized by a Vanguard fund officer or a Principal of Vanguard.

Prohibitions on Disclosure of Portfolio Holdings

No person is authorized to disclose Vanguard fund portfolio holdings or other investment positions (whether online at *vanguard.com*, in writing, by fax, by e-mail, orally, or by other means) except in accordance with the Policies and Procedures. In addition, no person is authorized to make disclosure pursuant to the Policies and Procedures if such disclosure is otherwise unlawful under the antifraud provisions of the federal securities laws (as defined in Rule 38a-1 under the 1940 Act). Furthermore, Vanguard's management, at its sole discretion, may determine not to disclose portfolio holdings or other investment positions that make up a Vanguard fund to any person who would otherwise be eligible to receive such information under the Policies and Procedures, or may determine to make such disclosures publicly as provided by the Policies and Procedures.

Prohibitions on Receipt of Compensation or Other Consideration

The Policies and Procedures prohibit a Vanguard fund, its investment advisor, and any other person from paying or receiving any compensation or other consideration of any type for the purpose of obtaining disclosure of Vanguard fund portfolio holdings or other investment positions. "Consideration" includes any agreement to maintain assets in the fund or in other investment companies or accounts managed by the investment advisor or by any affiliated person of the investment advisor.

INVESTMENT ADVISORY SERVICES

The Funds receive all investment advisory services from Vanguard, through its Quantitative Equity Group. These services are provided on an at-cost basis from an experienced advisory staff employed directly by Vanguard. The compensation and other expenses of the advisory staff are allocated among the funds utilizing these services.

During the fiscal years ended October 31, 2008, 2009, and 2010, the Funds incurred expenses for investment advisory services of approximately the following amounts:

Fund	2008	2009	2010
Vanguard European Stock Index Fund	\$765,000	\$582,000	728,000
Vanguard Pacific Stock Index Fund	390,000	345,000	417,000
Vanguard Emerging Markets Stock Index Fund	543,000	512,000	1,741,000
Vanguard FTSE All-World ex-US Index Fund	92,000	181,000	497,000
Vanguard Total World Stock Index Fund ¹	2,000	49,000	116,000
Vanguard FTSE All-World ex-US Small-Cap Index Fund ²	—	10,000	59,000
Vanguard Global ex-U.S. Real Estate Index Fund ³	—	—	—

¹ Vanguard Total World Stock Index Fund did not commence operations until June 24, 2008.

² Vanguard FTSE All-World ex-US Small-Cap Index Fund did not commence operations until April 2, 2009.

³ Vanguard Global ex-U.S. Real Estate Index Fund did not commence operations until November 1, 2010.

Other Accounts Managed

Ryan E. Ludt manages the Total World Stock Index Fund, FTSE All-World ex-US Index Fund, and FTSE All-World ex-US Small-Cap Index Fund; as of October 31, 2010, the Funds collectively held assets of \$14.1 billion. As of October 31, 2010, Mr. Ludt also managed eight other registered investment companies with total assets of \$12.6 billion (none of which had advisory fees based on account performance).

Michael Buek manages the Pacific Stock Index Fund; as of October 31, 2010, the Fund held assets of \$4.5 billion. As of October 31, 2010, Mr. Buek also managed ten other registered investment companies with total assets of \$130.4 billion, four other pooled investment vehicles with total assets of \$2.2 billion, and one other account with total assets of \$3.0 billion (none of which had advisory fees based on account performance).

Michael Perre manages the Emerging Markets Stock Index Fund; as of October 31, 2010, the Fund held assets of \$55.3 billion. As of October 31, 2010, Mr. Perre also managed all or a portion of eight other registered investment companies with total assets of \$68.2 billion, and managed two other accounts with total assets of \$2.8 billion (none of which had advisory fees based on account performance).

Gerald O'Reilly manages the European Stock Index Fund and the Global ex-U.S. Real Estate Index Fund; as of October 31, 2010, the Funds collectively held assets of \$8.4 billion. As of October 31, 2010, Mr. O'Reilly also managed seven other registered investment companies with total assets of \$199.8 billion and two other pooled investment vehicles with total assets of \$816 million (none of which had advisory fees based on account performance).

Material Conflicts of Interest

At Vanguard, individual portfolio managers may manage multiple accounts for multiple clients. In addition to mutual funds, these other accounts may include separate accounts, collective trusts, or offshore funds. Managing multiple accounts may give rise to potential conflicts of interest, including, for example, conflicts among investment strategies and conflicts in the allocation of investment opportunities. Vanguard manages potential conflicts between funds or with other types of accounts through allocation policies and procedures, internal review processes, and oversight by directors and independent third parties. Vanguard has developed trade allocation procedures and controls to ensure that no one client, regardless of type, is intentionally favored at the expense of another. Allocation policies are designed to address potential conflicts in situations where two or more funds or accounts participate in investment decisions involving the same securities.

Description of Compensation

Each Fund's portfolio manager is a Vanguard employee. This section describes the compensation of the Vanguard employees who manage Vanguard mutual funds. As of October 31, 2010, a Vanguard portfolio manager's compensation generally consists of base salary, bonus, and payments under Vanguard's long-term incentive compensation program. In addition, portfolio managers are eligible for the standard retirement benefits and health and welfare benefits available to all Vanguard employees. Also, certain portfolio managers may be eligible for additional retirement benefits under several supplemental retirement plans that Vanguard adopted in the 1980's to restore dollar-for-dollar the benefits of management employees that had been cut back solely as a result of tax law changes. These plans are structured to provide the same retirement benefits as the standard retirement benefits.

In the case of portfolio managers responsible for managing multiple Vanguard funds or accounts, the method used to determine their compensation is the same for all funds and investment accounts. A portfolio manager's base salary is determined by the manager's experience and performance in the role, taking into account the ongoing compensation benchmark analyses performed by the Vanguard Human Resources Department. A portfolio manager's base salary is generally a fixed amount that may change as a result of an annual review, upon assumption of new duties, or when a market adjustment of the position occurs.

A portfolio manager's bonus is determined by a number of factors. One factor is gross, pre-tax performance of the fund relative to expectations for how the fund should have performed, given its objective, policies, strategies, and limitations, and the market environment during the measurement period. This performance factor is not based on the value of assets held in the fund's portfolio. For each Fund, the performance factor depends on how closely the portfolio manager tracks the Fund's benchmark index over a one-year period. Additional factors include the portfolio manager's contributions to the investment management functions within the sub-asset class, contributions to the development of other investment professionals and supporting staff, and overall contributions to strategic planning and decisions for the investment group. The target bonus is expressed as a percentage of base salary. The actual bonus paid may be more or less than the target bonus, based on how well the manager satisfies the objectives stated above. The bonus is paid on an annual basis.

Under the long-term incentive compensation program, all full-time employees receive a payment from Vanguard's long-term incentive compensation plan based on their years of service, job level and, if applicable, management responsibilities. Each year, Vanguard's independent directors determine the amount of the long term incentive compensation award for that year based on the investment performance of the Vanguard funds relative to competitors and Vanguard's operating efficiencies in providing services to the Vanguard funds.

Ownership of Securities

Vanguard employees, including portfolio managers, allocate their investments among the various Vanguard funds based on their own individual investment needs and goals. Vanguard employees, as a group, invest a sizeable portion of their personal assets in Vanguard funds. As of October 31, 2010, Vanguard employees collectively invested more than \$2.6 billion in Vanguard funds. F. William McNabb III, Chairman of the Board, Chief Executive Officer and President of

Vanguard and the Vanguard funds; and George U. Sauter, Chief Investment Officer and Managing Director of Vanguard, invest substantially all of their personal financial assets in Vanguard funds.

As of October 31, 2010, Mr. Ludt owned no shares of the Total World Stock Index, FTSE All-World ex-US Index, and FTSE All-World ex-US Small-Cap Index Funds. As of October 31, 2010, Mr. Buek owned shares of the Pacific Stock Index Fund within the \$100,001–\$500,000 range. As of October 31, 2010, Mr. Perre owned shares of the Emerging Markets Stock Index Fund within the \$10,001–\$50,000 range. As of October 31, 2010, Mr. O'Reilly owned no shares of the European Stock Index Fund.

Duration and Termination of Investment Advisory Agreement

Vanguard provides at-cost investment advisory services to the Funds pursuant to the terms of the Fifth Amended and Restated Funds' Service Agreement. This agreement will continue in full force and effect until terminated or amended by mutual agreement of the Vanguard funds and Vanguard.

PORTFOLIO TRANSACTIONS

The advisor decides which securities to buy and sell on behalf of a Fund and then selects the brokers or dealers that will execute the trades on an agency basis or the dealers with whom the trades will be effected on a principal basis. For each trade, the advisor must select a broker-dealer that it believes will provide "best execution." Best execution does not necessarily mean paying the lowest spread or commission rate available. In seeking best execution, the SEC has said that an advisor should consider the full range of a broker-dealer's services. The factors considered by the advisor in seeking best execution include, but are not limited to, the broker-dealer's execution capability, clearance and settlement services, commission rate, trading expertise, willingness and ability to commit capital, ability to provide anonymity, financial responsibility, reputation and integrity, responsiveness, access to underwritten offerings and secondary markets, and access to company management, as well as the value of any research provided by the broker-dealer. In assessing which broker-dealer can provide best execution for a particular trade, the advisor also may consider the timing and size of the order and available liquidity and current market conditions. Subject to applicable legal requirements, the advisor may select a broker based partly on brokerage or research services provided to the advisor and its clients, including the Funds. The advisor may cause a Fund to pay a higher commission than other brokers would charge if the advisor determines in good faith that the amount of the commission is reasonable in relation to the value of services provided. The advisor also may receive brokerage or research services from broker-dealers that are provided at no charge in recognition of the volume of trades directed to the broker. To the extent research services or products may be a factor in selecting brokers, services and products may include written research reports analyzing performance or securities, discussions with research analysts, meetings with corporate executives to obtain oral reports on company performance, market data, and other products and services that will assist the advisor in its investment decision-making process. The research services provided by brokers through which a Fund effects securities transactions may be used by the advisor in servicing all of its accounts, and some of the services may not be used by the advisor in connection with the Fund.

During the fiscal years ended October 31, 2008, 2009, and 2010, the Funds paid the following amounts in brokerage commissions:

Fund	2008	2009	2010
European Stock Index ¹	\$12,260,000	\$884,000	\$768,000
Pacific Stock Index ¹	1,238,000	264,000	296,000
Emerging Markets Stock Index ¹	10,760,000	4,561,000	7,939,000
FTSE All-World ex-US Index	1,172,000	1,147,000	1,464,000
Total World Stock Index ²	48,000	85,000	67,000
FTSE All-World ex-US Small-Cap Index ³	—	69,000	130,000
Global ex-U.S. Real Estate Index Fund ⁴	—	—	—

¹The delayering of the fund-of-funds investments in the fiscal year 2009 resulted in fewer portfolio transactions and few brokerage commissions during the period.

² Vanguard Total World Stock Index Fund did not commence operations until June 24, 2008.

³ Vanguard FTSE All-World ex-US Small-Cap Index Fund did not commence operations until April 2, 2009.

⁴ Vanguard Global ex-U.S. Real Estate Index Fund did not commence operations until November 1, 2010

Some securities that are considered for investment by a Fund may also be appropriate for other Vanguard funds or for other clients served by the advisor. If such securities are compatible with the investment policies of a Fund and one or more of an advisor's other clients, and are considered for purchase or sale at or about the same time, then transactions in such securities will be aggregated by the advisor and the purchased securities or sale proceeds will be allocated among the participating Vanguard funds and the other participating clients of the advisor in a manner deemed equitable by the advisor. Although there may be no specified formula for allocating such transactions, the allocation methods used, and the results of such allocations, will be subject to periodic review by the Funds' board of trustees.

As of October 31, 2010, each Fund held securities of its "regular brokers or dealers," as that term is defined in Rule 10b-1 of the 1940 Act, as follows:

Fund	Regular Broker or Dealer (or Parent)	Aggregate Holdings
Vanguard European Stock Index Fund	BNP Paribas Securities Corp.	\$83,169,000
	Credit Suisse Securities (USA) LLC	55,947,000
Vanguard Pacific Stock Index Fund	—	—
Vanguard Emerging Markets Stock Index Fund	—	—
Vanguard FTSE All-World ex-US Index Fund	Barclays Capital Inc.	37,582,000
	BNP Paribas Securities Corp.	54,100,000
	Credit Suisse Securities (USA) LLC	33,275,000
	UBS Securities LLC	45,740,000
Vanguard FTSE All-World ex-US Small-Cap Index Fund	—	—
Vanguard Total World Stock Index Fund	BNP Paribas Securities Corp.	2,795,000
	Citigroup Global Markets	2,899,000
	Credit Suisse Securities (USA) LLC	1,726,000
	Goldman, Sachs & Co.	3,036,000
Vanguard Global ex-U.S. Real Estate Index Fund	—	—

PROXY VOTING GUIDELINES

The Board of Trustees (the Board) of each Vanguard fund that invests in stocks has adopted proxy voting procedures and guidelines to govern proxy voting by the fund. The Board has delegated oversight of proxy voting to the Proxy Oversight Committee (the Committee), made up of senior officers of Vanguard, a majority of whom are also officers of each Vanguard fund, and subject to the operating procedures and guidelines described below. The Committee reports directly to the Board. Vanguard is subject to these procedures and guidelines to the extent that they call for Vanguard to administer the voting process and implement the resulting voting decisions, and for these purposes the guidelines have been approved by the Board of Directors of Vanguard.

The overarching objective in voting is simple: to support proposals and director nominees that maximize the value of a fund's investments—and those of fund shareholders—over the long term. Although the goal is simple, the proposals the funds receive are varied and frequently complex. As such, the guidelines adopted by the Board provide a rigorous framework for assessing each proposal. Under the guidelines, each proposal must be evaluated on its merits, based on the particular facts and circumstances as presented.

For ease of reference, the procedures and guidelines often refer to all funds. However, our processes and practices seek to ensure that proxy voting decisions are suitable for individual funds. For most proxy proposals, particularly those involving corporate governance, the evaluation will result in the same position being taken across all of the funds and the funds voting as a block. In some cases, however, a fund may vote differently, depending upon the nature and objective of the fund, the composition of its portfolio, and other factors.

The guidelines do not permit the Board to delegate voting responsibility to a third party that does not serve as a fiduciary for the funds. Because many factors bear on each decision, the guidelines incorporate factors the Committee should consider in each voting decision. A fund may refrain from voting some or all of its shares if doing so would be in the fund's and its shareholders' best interests. These circumstances may arise, for example, if the expected cost of voting exceeds the expected benefits of voting, if exercising the vote would result in the imposition of trading or other restrictions, or if a fund (or all Vanguard-advised funds in the aggregate) were to own more than a maximum percentage of a company's stock (as determined by the company's governing documents).

In evaluating proxy proposals, we consider information from many sources, including but not limited to the investment advisor for the fund, the management or shareholders of a company presenting a proposal, and independent proxy research services. We will give substantial weight to the recommendations of the company's board, absent guidelines or other specific facts that would support a vote against management. In all cases, however, the ultimate decision rests with the members of the Proxy Oversight Committee, who are accountable to the fund's Board.

While serving as a framework, the following guidelines cannot contemplate all possible proposals with which a fund may be presented. In the absence of a specific guideline for a particular proposal (e.g., in the case of a transactional issue or contested proxy), the Committee will evaluate the issue and cast the fund's vote in a manner that, in the Committee's view, will maximize the value of the fund's investment, subject to the individual circumstances of the fund.

I. The Board of Directors

A. Election of directors

Good governance starts with a majority-independent board, whose key committees are made up entirely of independent directors. As such, companies should attest to the independence of directors who serve on the Compensation, Nominating, and Audit committees. In any instance in which a director is not categorically independent, the basis for the independence determination should be clearly explained in the proxy statement.

Although the funds will generally support the board’s nominees, the following factors will be taken into account in determining each fund’s vote:

Factors For Approval	Factors Against Approval
Nominated slate results in board made up of a majority of independent directors.	Nominated slate results in board made up of a majority of non-independent directors.
All members of Audit, Nominating, and Compensation committees are independent of management.	Audit, Nominating, and/or Compensation committees include non-independent members.
	Incumbent board member failed to attend at least 75% of meetings in the previous year.
	Actions of committee(s) on which nominee serves are inconsistent with other guidelines (e.g., excessive option grants, substantial non-audit fees, lack of board independence).

B. Contested director elections

In the case of contested board elections, we will evaluate the nominees’ qualifications, the performance of the incumbent board, and the rationale behind the dissidents’ campaign, to determine the outcome that we believe will maximize shareholder value.

C. Classified boards

The funds will generally support proposals to declassify existing boards (whether proposed by management or shareholders), and will block efforts by companies to adopt classified board structures in which only part of the board is elected each year.

II. Approval of Independent Auditors

The relationship between the company and its auditors should be limited primarily to the audit, although it may include certain closely related activities that do not, in the aggregate, raise any appearance of impaired independence. The funds will generally support management’s recommendation for the ratification of the auditor, except in instances in which audit and audit-related fees make up less than 50% of the total fees paid by the company to the audit firm. We will evaluate on a case-by-case basis instances in which the audit firm has a substantial non-audit relationship with the company (regardless of its size relative to the audit fee) to determine whether independence has been compromised.

III. Compensation Issues

A. Stock-based compensation plans

Appropriately designed stock-based compensation plans, administered by an independent committee of the board and approved by shareholders, can be an effective way to align the interests of long-term shareholders with the interests of management, employees, and directors. The funds oppose plans that substantially dilute their ownership interest in the company, provide participants with excessive awards, or have inherently objectionable structural features.

An independent compensation committee should have significant latitude to deliver varied compensation to motivate the company’s employees. However, we will evaluate compensation proposals in the context of several factors (a company’s industry, market capitalization, competitors for talent, etc.) to determine whether a particular plan or proposal balances the perspectives of employees and the company’s other shareholders. We will evaluate each proposal on a case-by-case basis, taking all material facts and circumstances into account.

The following factors will be among those considered in evaluating these proposals.

Factors For Approval	Factors Against Approval
Company requires senior executives to hold a minimum amount of company stock (frequently expressed as a multiple of salary).	Total potential dilution (including all stock-based plans) exceeds 15% of shares outstanding.
Company requires stock acquired through option exercise to be held for a certain period of time.	Annual option grants have exceeded 2% of shares outstanding.
Compensation program includes performance-vesting awards, indexed options, or other performance-linked grants.	Plan permits repricing or replacement of options without shareholder approval.
Concentration of option grants to senior executives is limited (indicating that the plan is very broad-based).	Plan provides for the issuance of reload options.
Stock-based compensation is clearly used as a substitute for cash in delivering market-competitive total pay.	Plan contains automatic share replenishment (evergreen) feature.

B. Bonus plans

Bonus plans, which must be periodically submitted for shareholder approval to qualify for deductibility under Section 162(m) of the IRC, should have clearly defined performance criteria and maximum awards expressed in dollars. Bonus plans with awards that are excessive, in both absolute terms and relative to a comparative group, generally will not be supported.

C. Employee stock purchase plans

The funds will generally support the use of employee stock purchase plans to increase company stock ownership by employees, provided that shares purchased under the plan are acquired for no less than 85% of their market value and that shares reserved under the plan amount to less than 5% of the outstanding shares.

D. Executive severance agreements (golden parachutes)

Although executives' incentives for continued employment should be more significant than severance benefits, there are instances—particularly in the event of a change in control—in which severance arrangements may be appropriate. Severance benefits triggered by a change in control that do not exceed three times an executive's salary and bonus may generally be approved by the compensation committee of the board without submission to shareholders. Any such arrangement under which the beneficiary receives more than three times salary and bonus—or where severance is guaranteed absent a change in control—should be submitted for shareholder approval.

IV. Corporate Structure and Shareholder Rights

The exercise of shareholder rights, in proportion to economic ownership, is a fundamental privilege of stock ownership that should not be unnecessarily limited. Such limits may be placed on shareholders' ability to act by corporate charter or by-law provisions, or by the adoption of certain takeover provisions. In general, the market for corporate control should be allowed to function without undue interference from these artificial barriers.

The funds' positions on a number of the most commonly presented issues in this area are as follows:

A. Shareholder rights plans (poison pills)

A company's adoption of a so-called poison pill effectively limits a potential acquirer's ability to buy a controlling interest without the approval of the target's board of directors. Such a plan, in conjunction with other takeover defenses, may serve to entrench incumbent management and directors. However, in other cases, a poison pill may force a suitor to negotiate with the board and result in the payment of a higher acquisition premium.

In general, shareholders should be afforded the opportunity to approve shareholder rights plans within a year of their adoption. This provides the board with the ability to put a poison pill in place for legitimate defensive purposes, subject to subsequent approval by shareholders. In evaluating the approval of proposed shareholder rights plans, we will consider the following factors:

Factors For Approval	Factors Against Approval
Plan is relatively short-term (3-5 years).	Plan is long term (>5 years).
Plan requires shareholder approval for renewal.	Renewal of plan is automatic or does not require shareholder approval.
Plan incorporates review by a committee of independent directors at least every three years (so-called TIDE provisions).	Ownership trigger is less than 15%.
Plan includes permitted-bid/qualified-offer feature (chewable pill) that mandates a shareholder vote in certain situations.	Classified board.
Ownership trigger is reasonable (15-20%).	Board with limited independence.
Highly independent, non-classified board.	

B. Cumulative voting

The funds are generally opposed to cumulative voting under the premise that it allows shareholders a voice in director elections that is disproportionate to their economic investment in the corporation.

C. Supermajority vote requirements

The funds support shareholders' ability to approve or reject matters presented for a vote based on a simple majority. Accordingly, the funds will support proposals to remove supermajority requirements and oppose proposals to impose them.

D. Right to call meetings and act by written consent

The funds support shareholders' right to call special meetings of the board (for good cause and with ample representation) and to act by written consent. The funds will generally vote for proposals to grant these rights to shareholders and against proposals to abridge them.

E. Confidential voting

The integrity of the voting process is enhanced substantially when shareholders (both institutions and individuals) can vote without fear of coercion or retribution based on their votes. As such, the funds support proposals to provide confidential voting.

F. Dual classes of stock

We are opposed to dual class capitalization structures that provide disparate voting rights to different groups of shareholders with similar economic investments. We will oppose the creation of separate classes with different voting rights and will support the dissolution of such classes.

V. Corporate and Social Policy Issues

Proposals in this category, initiated primarily by shareholders, typically request that the company disclose or amend certain business practices. The Board generally believes that these are "ordinary business matters" that are primarily the responsibility of management and should be evaluated and approved solely by the corporation's board of directors. Often, proposals may address concerns with which the Board philosophically agrees, but absent a compelling economic impact on shareholder value (e.g., proposals to require expensing of stock options), the funds will typically abstain from voting on these proposals. This reflects the belief that regardless of our philosophical perspective on the issue, these decisions should be the province of company management unless they have a significant, tangible impact on the value of a fund's investment and management is not responsive to the matter.

VI. Voting in Foreign Markets

Corporate governance standards, disclosure requirements, and voting mechanics vary greatly among the markets outside the United States in which the funds may invest. Each fund's votes will be used, where applicable, to advocate for improvements in governance and disclosure by each fund's portfolio companies. We will evaluate issues presented to shareholders for each fund's foreign holdings in the context with the guidelines described above, as well as local market standards and best practices. The funds will cast their votes in a manner believed to be philosophically consistent with these guidelines, while taking into account differing practices by market. In addition, there may be instances in which the funds elect not to vote, as described below.

Many foreign markets require that securities be "blocked" or reregistered to vote at a company's meeting. Absent an issue of compelling economic importance, we will generally not subject the fund to the loss of liquidity imposed by these requirements.

The costs of voting (e.g., custodian fees, vote agency fees) in foreign markets may be substantially higher than for U.S. holdings. As such, the fund may limit its voting on foreign holdings in instances in which the issues presented are unlikely to have a material impact on shareholder value.

VII. Voting Shares of a Company that has an Ownership Limitation

Certain companies have provisions in their governing documents that restrict stock ownership in excess of a specified limit. The ownership limit may be applied at the individual fund level or across all Vanguard-advised funds. Typically, these ownership restrictions are included in the governing documents of real estate investment trusts, but may be included in other companies' governing documents.

A company's governing documents normally allow the company to grant a waiver of these ownership limits, which would allow a fund (or all Vanguard-advised funds) to exceed the stated ownership limit. Sometimes a company will grant a waiver without restriction. From time to time, a company may grant a waiver only if a fund (or funds) agrees to not vote the company's shares in excess of the normal specified limit. In such a circumstance, a fund may refrain from voting shares if owning the shares beyond the company's specified limit is in the best interests of the fund and its shareholders.

VIII. Voting on a Fund's Holdings of Other Vanguard Funds

Certain Vanguard funds (owner funds) may, from time to time, own shares of other Vanguard funds (underlying funds). If an underlying fund submits a matter to a vote of its shareholders, votes for and against such matters on behalf of the owner funds will be cast in the same proportion as the votes of the other shareholders in the underlying fund.

IX. The Proxy Voting Group

The Board has delegated the day-to-day operations of the funds' proxy voting process to the Proxy Voting Group, which the Committee oversees. Although most votes will be determined, subject to the individual circumstances of each fund, by reference to the guidelines as separately adopted by each of the funds, there may be circumstances when the Proxy Voting Group will refer proxy issues to the Committee for consideration. In addition, at any time, the Board has the authority to vote proxies, when, at the Board's or the Committee's discretion, such action is warranted.

The Proxy Voting Group performs the following functions: (1) managing proxy voting vendors; (2) reconciling share positions; (3) analyzing proxy proposals using factors described in the guidelines; (4) determining and addressing potential or actual conflicts of interest that may be presented by a particular proxy; and (5) voting proxies. The Proxy Voting Group also prepares periodic and special reports to the Board, and any proposed amendments to the procedures and guidelines.

X. The Proxy Oversight Committee

The Board, including a majority of the independent trustees, appoints the members of the Committee who are senior officers of Vanguard, a majority of whom are also officers of each Vanguard fund.

The Committee does not include anyone whose primary duties include external client relationship management or sales. This clear separation between the proxy voting and client relationship functions is intended to eliminate any potential conflict of interest in the proxy voting process. In the unlikely event that a member of the Committee believes he or she

might have a conflict of interest regarding a proxy vote, that member must recuse himself or herself from the committee meeting at which the matter is addressed, and not participate in the voting decision.

The Committee works with the Proxy Voting Group to provide reports and other guidance to the Board regarding proxy voting by the funds. The Committee has an obligation to conduct its meetings and exercise its decision-making authority subject to the fiduciary standards of good faith, fairness, and Vanguard's Code of Ethics. The Committee shall authorize proxy votes that the Committee determines, at its sole discretion, to be in the best interests of each fund's shareholders. In determining how to apply the guidelines to a particular factual situation, the Committee may not take into account any interest that would conflict with the interest of fund shareholders in maximizing the value of their investments.

The Board may review these procedures and guidelines and modify them from time to time. The procedures and guidelines are available on Vanguard's website at *vanguard.com*.

You may obtain a free copy of a report that details how the funds voted the proxies relating to the portfolio securities held by the funds for the prior 12-month period ended June 30 by logging on to Vanguard's internet site, at *vanguard.com*, or the SEC's website at *sec.gov*.

INFORMATION ABOUT THE ETF SHARE CLASS

Each Fund offers and issues an exchange-traded class of shares called ETF Shares. Each Fund issues ETF Shares in large blocks, known as "Creation Units." To purchase or redeem a Creation Unit, you must be an Authorized Participant or you must transact through a broker that is an Authorized Participant. An Authorized Participant is a participant in the Depository Trust Company (DTC) and has executed a Participant Agreement with Vanguard Marketing Corporation, the Funds' Distributor (the Distributor). For a current list of Authorized Participants, contact the Distributor.

Investors that are not Authorized Participants must hold ETF Shares in a brokerage account. As with any stock traded on an exchange through a broker, purchases and sales of ETF Shares will be subject to usual and customary brokerage commissions.

Each ETF Fund issues Creation Units in kind, in exchange for a basket of securities that are part of—or soon to be part of—its target index (Deposit Securities). Each ETF Fund also redeems Creation Units in kind; an investor who tenders a Creation Unit will receive a basket of securities that are part of the Fund's portfolio holdings (Redemption Securities). The Deposit Securities and Redemption Securities may include American Depositary Receipts (ADRs). As part of any creation or redemption transaction, the investor will either pay or receive some cash in addition to the securities, as described more fully below. Each ETF Fund reserves the right to issue Creation Units for cash, rather than in kind. As of the date of this Statement of Additional Information, cash purchases and redemptions will be required for securities traded in Brazil, Chile, India, Malaysia, Peru, South Korea, and Taiwan.

EXCHANGE LISTING AND TRADING

The ETF Shares have been approved for listing on a national securities exchange and will trade on the exchange at market prices that may differ from net asset value (NAV). There can be no assurance that, in the future, ETF Shares will continue to meet all of the exchange's listing requirements. The exchange may, but is not required to, delist a Fund's ETF Shares if: (1) following the initial 12-month period beginning upon the commencement of trading, there are fewer than 50 beneficial owners of the ETF Shares for 30 or more consecutive trading days; (2) the value of the target index tracked by the Fund is no longer calculated or available; or (3) such other event shall occur or condition exist that, in the opinion of the exchange, makes further dealings on the exchange inadvisable. The exchange will also delist a Fund's ETF Shares upon termination of the ETF Share class.

The exchange disseminates through the facilities of the Consolidated Tape Association an updated "indicative optimized portfolio value" (IOPV) for each Fund as calculated by an information provider. The Funds are not involved with or responsible for the calculation or dissemination of the IOPVs, and they make no warranty as to the accuracy of the IOPVs. An IOPV for each Fund's ETF Shares is disseminated every 15 seconds during regular exchange trading hours. An IOPV has an equity securities value component and a cash component. The equity securities values included in an IOPV are based on the real time market prices of the Deposit Securities for a Fund's ETF Shares. The IOPV is designed as an estimate of a Fund's NAV at a particular point in time, but it is only an estimate and it should not be viewed as the actual NAV, which is calculated once each day.

CONVERSIONS AND EXCHANGES

Owners of conventional shares (i.e. not exchange-traded shares) issued by an ETF Fund may convert those shares to ETF Shares of equivalent value of the same Fund. *Please note that investors who own conventional shares through a 401(k) plan or other employer-sponsored retirement or benefit plan may not convert those shares into ETF Shares.* Vanguard Brokerage Services (Vanguard Brokerage) does not impose a fee on conversions from Vanguard conventional shares to Vanguard ETF Shares. However, other brokerage firms may charge a fee to process a conversion. Vanguard reserves the right, in the future, to impose a transaction fee on conversions or to limit or terminate the conversion privilege. ETF Shares, whether acquired through a conversion or purchased on the open market, cannot be converted to conventional shares. Similarly, ETF Shares of one fund cannot be exchanged for ETF Shares of another fund.

Investors that are not Authorized Participants must hold ETF Shares in a brokerage account. Thus, before converting conventional shares to ETF Shares, an investor must have an existing, or open a new, brokerage account. To initiate a conversion of conventional shares to ETF Shares, an investor must contact his or her broker.

Converting conventional shares to ETF Shares generally is accomplished as follows. First, after the broker notifies Vanguard of an investor's request to convert, Vanguard will transfer conventional shares from the investor's account with Vanguard to the broker's omnibus account with Vanguard (an account maintained by the broker on behalf of all its customers who hold conventional Vanguard fund shares through the broker). After the transfer, Vanguard's records will reflect the broker, not the investor, as the owner of the shares. Next, the broker will instruct Vanguard to convert the appropriate number or dollar amount of conventional shares in its omnibus account to ETF Shares of equivalent value, based on the respective NAVs of the two share classes. The Fund's transfer agent will reflect ownership of all ETF Shares in the name of the DTC. The DTC will keep track of which ETF Shares belong to the broker and the broker, in turn, will keep track of which ETF Shares belong to its customers.

Because the DTC is unable to handle fractional shares, only whole shares will be converted. For example, if the investor owned 300.250 conventional shares, and this was equivalent in value to 90.750 ETF Shares, the DTC account would receive 90 ETF Shares. Conventional shares worth 0.750 ETF Shares (in this example, that would be 2.481 conventional shares) would remain in the broker's omnibus account with Vanguard. The broker then could either (1) take certain internal actions necessary to credit the investor's account with 0.750 ETF Shares rather than 2.481 conventional shares, or (2) redeem the 2.481 conventional shares at NAV, in which case the investor would receive cash in lieu of those shares. If the broker chooses to redeem the conventional shares, the investor will realize a gain or loss on the redemption that must be reported on his or her tax return (unless the shares are held in an IRA or other tax-deferred account). Investors should consult their brokers for information on how the brokers will handle the conversion process, including whether they will impose a fee to process a conversion.

The conversion process works differently for investors who opt to hold ETF Shares through an account at Vanguard Brokerage. Investors who convert their conventional shares to ETF Shares through Vanguard Brokerage, will have *all* conventional shares for which they request conversion converted to the equivalent dollar value of ETF Shares. Because no fractional shares will have to be sold, the transaction will be 100% tax-free.

Here are some important points to keep in mind when converting conventional shares of an ETF Fund to ETF Shares:

- The conversion process can take anywhere from several days to several weeks, depending on the broker. Vanguard generally will process conversion requests either on the day they are received or on the next business day. Vanguard imposes conversion blackout windows around the dates when an ETF Fund declares dividends. This is necessary to prevent a shareholder from collecting a dividend from both the conventional share class currently held and also from the ETF share class into which the shares will be converted.
- During the conversion process, an investor will remain fully invested in the Fund's conventional shares, and the investment will increase or decrease in value in tandem with the NAV of those shares.
- The conversion transaction is nontaxable except, as applicable, to the limited extent previously described.
- If an investor has used the average cost basis method of accounting for conventional mutual fund shares prior to converting them to ETF Shares, the investor is required to maintain the average cost basis method of accounting for the converted ETF Shares, unless the investor first obtains permission from the IRS to use a different method. However, since January 1, 2010, any new ETF Shares that an investor purchases may be eligible for another IRS-approved method.

- During the conversion process, an investor will be able to liquidate all or part of an investment by instructing or the broker (depending on whether the shares are held in the investor's account or the broker's omnibus account) to redeem the conventional shares. After the conversion process is complete, an investor will be able to liquidate all or part of an investment by instructing the broker to sell the ETF Shares.

BOOK ENTRY ONLY SYSTEM

Vanguard ETF Shares are registered in the name of the DTC or its nominee, Cede & Co., and deposited with, or on behalf of, the DTC. The DTC is a limited-purpose trust company that was created to hold securities of its participants (DTC Participants) and to facilitate the clearance and settlement of transactions among them through electronic book-entry changes in their accounts, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. The DTC is a subsidiary of the Depository Trust and Clearing Corporation (DTCC), which is owned by certain participants of the DTCC's subsidiaries, including the DTC. Access to the DTC system is also available to others such as banks, brokers, dealers, and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (Indirect Participants).

Beneficial ownership of ETF Shares is limited to DTC Participants, Indirect Participants, and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in ETF Shares (owners of such beneficial interests are referred to herein as Beneficial Owners) is shown on, and the transfer of ownership is effected only through, records maintained by the DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of ETF Shares. The laws of some jurisdictions may require that certain purchasers of securities take physical delivery of such securities in definitive form. Such laws may impair the ability of certain investors to acquire beneficial interests in ETF Shares.

Each Fund recognizes the DTC or its nominee as the record owner of all ETF Shares for all purposes. Beneficial Owners of ETF Shares are not entitled to have ETF Shares registered in their names, and will not receive or be entitled to physical delivery of share certificates. Each Beneficial Owner must rely on the procedures of the DTC and any DTC Participant and/or Indirect Participant through which such Beneficial Owner holds its interests to exercise any rights of a holder of ETF Shares.

Conveyance of all notices, statements, and other communications to Beneficial Owners is effected as follows. The DTC will make available to each ETF Fund, upon request and for a fee, a listing of the ETF Shares of the Fund held by each DTC Participant. The Fund shall obtain from each DTC Participant the number of Beneficial Owners holding ETF Shares, directly or indirectly, through the DTC Participant. The Fund shall provide each DTC Participant with copies of such notice, statement, or other communication, in form, number and at such place as the DTC Participant may reasonably request, in order that these communications may be transmitted by the DTC Participant, directly or indirectly, to the Beneficial Owners. In addition, the Fund shall pay to each DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to this transmittal, subject to applicable statutory and regulatory requirements.

Share distributions shall be made to the DTC or its nominee as the registered holder of all ETF Shares. The DTC or its nominee, upon receipt of any such distributions, shall immediately credit the DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in ETF Shares of the appropriate Fund as shown on the records of the DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of ETF Shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Fund has no responsibility or liability for any aspects of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such ETF Shares, or for maintaining, supervising, or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

The DTC may determine to discontinue providing its service with respect to ETF Shares at any time by giving reasonable notice to the appropriate Fund and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Fund shall take action either to find a replacement for the DTC to perform its functions at a

comparable cost or, if such replacement is unavailable, to issue and deliver printed certificates representing ownership of ETF Shares, unless the Fund makes other arrangements with respect thereto satisfactory to the exchange.

PURCHASE AND ISSUANCE OF ETF SHARES IN CREATION UNITS

Except for conversions to ETF Shares from other conventional shares, the ETF Funds issue and sell ETF Shares only in Creation Units on a continuous basis through the Distributor, without a sales load, at their NAV next determined after receipt, on any Business Day, of an order in proper form. The ETF Funds will not issue fractional Creation Units.

A Business Day is any day on which the NYSE is open for business. As of the date of this Statement of Additional Information, the NYSE observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day (Washington's Birthday), Good Friday, Memorial Day (observed), Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

Fund Deposit

The consideration for purchase of a Creation Unit from a Fund generally consists of the in-kind deposit of a designated portfolio of equity securities (Deposit Securities) and an amount of cash (Cash Component) consisting of a Purchase Balancing Amount (described below) and a Transaction Fee (also described below). Together, the Deposit Securities and the Cash Component constitute the Fund Deposit.

The Purchase Balancing Amount is an amount of cash equal to the difference between the NAV of a Creation Unit and the market value of the Deposit Securities (Deposit Amount). It ensures that the NAV of a Fund Deposit (not including the Transaction Fee) is identical to the NAV of the Creation Unit it is used to purchase. If the Purchase Balancing Amount is a positive number (i.e., the NAV per Creation Unit exceeds the market value of the Deposit Securities), then that amount will be paid by the purchaser to the Fund in cash. If the Purchase Balancing Amount is a negative number (i.e., the NAV per Creation Unit is less than the market value of the Deposit Securities), then that amount will be paid by the Fund to the purchaser in cash (except as offset by the Transaction Fee).

Vanguard, through the National Securities Clearing Corporation (NSCC), makes available after the close of each Business Day, a list of the names and the number of shares of each Deposit Security to be included in the next Business Day's Fund Deposit for each ETF Fund (subject to possible amendment or correction). Each Fund reserves the right to accept a nonconforming Fund Deposit.

The identity and number of shares of the Deposit Securities required for a Fund Deposit may change from one day to another to reflect rebalancing adjustments and corporate actions, or to respond to adjustments to the weighting or composition of the component stocks of the relevant target index.

In addition, each ETF Fund reserves the right to permit or require the substitution of an amount of cash—referred to as “cash in lieu”—to be added to the Cash Component to replace any Deposit Security that may not be available in sufficient quantity for delivery, may not be eligible for transfer, or may not be eligible for trading by an Authorized Participant or the investor for which an Authorized Participant is acting. Trading costs incurred by a Fund in connection with the purchase of Deposit Securities with cash-in-lieu amounts will be an expense of the Fund. However, Vanguard may adjust the Transaction Fee to protect existing shareholders from this expense.

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility, and acceptance for deposit of any securities to be delivered shall be determined by the appropriate ETF Fund, and the Fund's determination shall be final and binding.

Procedures For Purchasing Creation Units

To initiate a purchase order for a Creation Unit, an Authorized Participant must submit an order in proper form to the Distributor and such order must be received by the Distributor prior to the closing time of the regular trading session on the NYSE (Closing Time) (ordinarily 4 p.m., Eastern time) to receive that day's NAV.

The date on which an order to purchase (or redeem) Creation Units is placed is referred to as the Transmittal Date. Authorized Participants must transmit orders using a transmission method acceptable to the Distributor pursuant to procedures set forth in the Participation Agreement.

The Distributor shall inform the Fund's Custodian of the order. The Custodian will then inform the appropriate foreign subcustodians. Each subcustodian shall maintain an account into which the Authorized Participant shall deliver, on behalf of itself or the party on whose behalf it is acting, the relevant Deposit Securities (or the cash value of all or part of such securities, in the case of a permitted or required cash purchase or cash-in-lieu amount), with any appropriate adjustments as advised by Vanguard. Deposit Securities must be delivered to an account maintained at the applicable local subcustodians.

The Authorized Participant must also make available on or before the contractual settlement date, by means satisfactory to the Fund, immediately available or same day funds estimated by the Fund to be sufficient to pay the Cash Component next determined after acceptance of the purchase order. Any excess funds will be returned following settlement of the issue of the Creation Unit.

Neither the Trust, the ETF Funds, the Distributor, nor any affiliated party will be liable to an investor who is unable to submit a purchase order by Closing Time, even if the problem is the responsibility of one of those parties (e.g., the Distributor's phone or e-mail systems were not operating properly).

If you are not an Authorized Participant, you must place your purchase order in an acceptable form with an Authorized Participant. The Authorized Participant may request that you make certain representations or enter into agreements with respect to the order, e.g., to provide for payments of cash when required.

An order to purchase Creation Units is deemed received on the Transmittal Date if (1) such order is received by the Fund's designated agent not later than Closing Time on such Transmittal Date, and (2) all other procedures set forth in the Participant Agreement are properly followed. If the appropriate parties do not receive the Deposit Securities and Cash Component by the settlement date (T+3 unless otherwise agreed), the Fund shall be entitled to cancel the purchase order and/or charge the purchaser for any costs (including investment losses, attorney's fees, and interest) sustained by the Fund as a result of the late delivery or failure to deliver.

Except as provided herein, a Creation Unit will not be issued until the transfer of good title to the Fund of the Deposit Securities and the payment of the Cash Component have been completed. When each subcustodian has confirmed to the Custodian that the required securities included in the Fund Deposit have been delivered to the account of the relevant subcustodian, and the Cash Component has been delivered to the Custodian, the Distributor shall be notified of such delivery, and the Fund will issue and cause the delivery of the Creation Unit.

An ETF Fund may issue Creation Units before receiving some or all of the Deposit Securities in reliance on the Authorized Participant's undertaking to deliver the missing Deposit Securities at a later date. Such undertaking shall be secured by the delivery and maintenance of cash collateral (Additional Cash Deposit) in an amount determined by the Fund in accordance with the terms of the Authorized Participant Agreement.

Rejection of Purchase Orders

Each of the ETF Funds reserves the absolute right to reject a purchase order. By way of example, and not limitation, an ETF Fund will reject a purchase order if:

- the order is not in proper form;
- the investor(s), upon obtaining the ETF Shares ordered, would own 80% or more of the total combined voting power and number of shares of all classes of stock issued by the Fund;
- the Deposit Securities delivered are not the same (in name or amount) as disseminated through the facilities of the exchange for that date;
- acceptance of the Deposit Securities would have certain adverse tax consequences to the ETF Fund;
- acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful;
- acceptance of the Fund Deposit would otherwise, at the discretion of the ETF Fund or Vanguard, have an adverse effect on the Fund or any of its shareholders; or
- circumstances outside the control of the ETF Fund, the Transfer Agent, the custodian, the subcustodian(s), the Distributor, and Vanguard make it for all practical purposes impossible to process the order. Examples of such circumstances include natural disasters; public service disruptions or utility problems such as fires, floods, extreme weather conditions, and power outages resulting in telephone, telecopy, and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the

aforementioned parties, as well as the DTC, the NSCC, or any other participant in the purchase process, and similar extraordinary events.

The Distributor shall notify the prospective purchaser of a Creation Unit, and/or the Authorized Participant acting on the purchaser's behalf, of its rejection of the purchaser's order. The ETF Funds, the Trust, the transfer agent, the custodian, the subcustodian(s), the Distributor, and Vanguard are under no duty, however, to give notification of any defects or irregularities in the delivery of a Fund Deposit, nor shall any of them incur any liability for the failure to give any such notification.

Transaction Fee on Purchases of Creation Units

Each ETF Fund imposes a Transaction Fee (payable to the Fund) to compensate the Fund for costs associated with the issuance of Creation Units.

When an ETF Fund permits or requires a purchaser to substitute cash in lieu of depositing one or more Deposit Securities, the purchaser will be assessed an additional charge on the cash-in-lieu portion of its investment. The amount of this charge will vary as determined by the Fund at its sole discretion, but will not be more than is reasonably needed to compensate the Fund for the transaction costs including, if applicable, the estimated market costs of purchasing the relevant Deposit Securities. The Transaction Fees for purchases are listed in the following table. This table is subject to revision from time to time.

Fund	Transaction Fee on Purchases	Maximum Additional Variable Charge for Cash Purchases¹
Vanguard MSCI Europe ETF Shares	\$ 9,600	2.00%
Vanguard MSCI Pacific ETF Shares	7,200	2.00
Vanguard MSCI Emerging Markets ETF Shares	9,300	2.00
Vanguard FTSE All-World ex-US ETF Shares	22,000	2.00
Vanguard Total World Stock ETF Shares	15,000	2.00
Vanguard FTSE All-World ex-US Small-Cap ETF Shares	28,000	2.00
Vanguard Global ex-U.S. Real Estate ETF Shares	9,000	2.00

¹ As a percentage of the cash in lieu amount invested.

REDEMPTION OF ETF SHARES IN CREATION UNITS

To be eligible to place a redemption order, you must be an Authorized Participant. Investors that are not Authorized Participants must make appropriate arrangements with an Authorized Participant in order to redeem a Creation Unit. For a current list of Authorized Participants, contact the Distributor.

ETF Shares may be redeemed only in Creation Units; a Fund will not redeem ETF Shares tendered in less than Creation Unit-size aggregations. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of ETF Shares to constitute a redeemable Creation Unit. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Redemption requests received on a Business Day in good order will receive the NAV next determined after the request is made.

Unless cash redemptions are available or specified for a Fund, an investor tendering a Creation Unit generally will receive redemption proceeds consisting of (1) a basket of Redemption Securities; plus (2) a Redemption Balancing Amount in cash equal to the difference between (x) the NAV of the Creation Unit being redeemed, as next determined after receipt of a request in proper form, and (y) the value of the Redemption Securities; less (3) a Redemption Transaction Fee (described below). If the Redemption Securities have a value greater than the NAV of a Creation Unit, the redeeming investor would pay the Redemption Balancing Amount in cash to the Fund, rather than receiving such amount from the Fund.

Vanguard, through the NSCC, makes available after the close of each Business Day, a list of the names and the number of shares of each Redemption Security to be included in the next Business Day's redemption basket (subject to possible amendment or correction). The basket of Redemption Securities provided to an investor redeeming a Creation Unit may not be identical to the basket of Deposit Securities required of a investor purchasing a Creation Unit. If an ETF Fund and a redeeming investor mutually agree, the Fund may provide the investor with a basket of Redemption Securities that differs from the composition of the redemption basket published through the NSCC.

Each ETF Fund reserves the right to deliver cash in lieu of any Redemption Security for the same reason it might accept cash in lieu of a Deposit Security, as discussed above, or if the Fund could not lawfully deliver the security or could not do so without first registering such security under federal or state law.

Neither the Trust, the ETF Funds, the Distributor, nor any affiliated party will be liable to an investor who is unable to submit a redemption order by Closing Time, even if the problem is the responsibility of one of those parties (e.g., the Distributor's phone or e-mail systems were not operating properly).

Transaction Fee on Redemptions of Creation Units

Each ETF Fund imposes a transaction fee (payable to the Fund) to compensate the Fund for costs associated with the redemption of Creation Units.

When an ETF Fund permits or requires a redeeming investor to receive cash in lieu of one or more Redemption Securities, the investor will be assessed an additional charge on the cash-in-lieu portion of its redemption. The amount of this charge will vary as determined by the Fund at its sole discretion, but will not be more than is reasonably needed to compensate the Fund for the transaction costs including, if applicable, the estimated market costs of selling portfolio securities to raise the necessary cash. The Transaction Fees for redemptions are listed in the table below. This table is subject to revision from time to time.

Fund	Transaction Fee on Redemptions	Maximum Additional Variable Charge for Cash Redemptions¹
Vanguard MSCI Europe ETF Shares	\$ 9,600	2.00%
Vanguard MSCI Pacific ETF Shares	7,200	2.00
Vanguard MSCI Emerging Markets ETF Shares	9,300	2.00
Vanguard FTSE All-World ex-US ETF Shares	22,000	2.00
Vanguard Total World Stock ETF Shares	15,000	2.00
Vanguard FTSE All-World ex-US Small-Cap ETF Shares	28,000	2.00
Vanguard Global ex-U.S. Real Estate ETF Shares	9,000	2.00

¹ As a percentage of the cash in lieu amount redeemed.

Placement of Redemption Orders

Redemption requests for Creation Units must be submitted to the Distributor by or through an Authorized Participant on a Business Day between the hours of 9 a.m. and 4 p.m., Eastern time.

An order to redeem a Creation Unit is deemed received on the Transmittal Date if (1) such order is received by the Fund's designated agent prior to Closing Time on such Transmittal Date; and (2) all other procedures set forth in the Participant Agreement are properly followed. If a redemption order in proper form is submitted to the transfer agent by an Authorized Participant prior to Closing Time on the Transmittal Date, then the value of the Redemption Securities and the Cash Redemption Amount will be determined by the Fund on such Transmittal Date.

If on T+3 an Authorized Participant has failed to deliver all of the Vanguard ETF Shares it is seeking to redeem, the Fund shall be entitled to cancel the redemption order. Alternatively, the Fund may deliver to the Authorized Participant the full complement of Redemption Securities and cash in reliance on the Authorized Participant's undertaking to deliver the missing ETF Shares at a later date. Such undertaking shall be secured by the delivery and maintenance of cash collateral (Additional Cash Deposit) in an amount determined by the Fund in accordance with the Authorized Participant Agreement. In all cases the Fund shall be entitled to charge the redeeming investor for any costs (including investment losses, attorney's fees, and interest) sustained by the Fund as a result of the late delivery or failure to deliver.

Each ETF Fund reserves the right, at its sole discretion, to require or permit a redeeming investor to receive its redemption proceeds in cash. In such cases, the investor would receive a cash payment equal to the NAV of its ETF Shares based on the NAV of those shares next determined after the redemption request is received in proper form (minus a Transaction Fee, including a charge for cash redemptions, described above).

If a redeeming investor (or an Authorized Participant through which it is acting) is subject to a legal restriction with respect to a particular stock included in the basket of Redemption Securities, such investor may be paid an equivalent amount of cash in lieu of the stock.

A redemption request is considered to be in “proper form” if (1) an Authorized Participant has transferred or caused to be transferred to the Fund’s transfer agent the Creation Unit being redeemed through the book-entry system of the DTC so as to be effective by the exchange closing time on a day on which the exchange is open for business and (2) a request satisfactory to the Fund is received by the Distributor from the Authorized Participant on behalf of itself or another redeeming investor within the time periods specified above.

Upon receiving a redemption request, the Distributor shall notify the Fund and the Fund’s transfer agent of such redemption request. The tender of an investor’s ETF Shares for redemption and the distribution of the cash redemption payment in respect of Creation Units redeemed will be effected through the DTC and the relevant Authorized Participant to the beneficial owner thereof as recorded on the book-entry system of the DTC or the DTC Participant through which such investor holds ETF Shares, as the case may be, or by such other means specified by the Authorized Participant submitting the redemption request.

In connection with taking delivery of shares of Redemption Securities upon redemption of a Creation Unit, a redeeming Beneficial Owner or Authorized Participant acting on behalf of such Beneficial Owner must maintain appropriate security arrangements with a qualified broker-dealer, bank, or other custody provider in each jurisdiction in which any of the Redemption Securities are customarily traded, to which account such Deposit Securities will be delivered.

Deliveries of redemption proceeds by the Funds relating to those countries generally will be made within three business days. Because of the schedule of holidays in certain countries, however, the delivery of in-kind redemption proceeds may take longer than three business days after the day on which the redemption request is received in proper form. For each country relating to a Fund, Appendix A identifies the instances where more than seven days would be needed to deliver redemption proceeds. The Funds will deliver in-kind redemption proceeds within the number of days stated in Appendix A.

If neither the redeeming Beneficial Owner nor the Authorized Participant acting on behalf of the redeeming Beneficial Owner has appropriate arrangements to take delivery of the Redemption Securities in the applicable foreign jurisdiction and it is not possible to make other such arrangements, or if it is not possible to effect deliveries of the Redemption Securities in such jurisdiction, the Fund may at its discretion exercise its option to redeem such shares in cash, and the redeeming Beneficial Owner will be required to receive its redemption proceeds in cash. In such case, the investor will receive a cash payment equal to the NAV of the Creation Unit redeemed after the redemption request is received in proper form (minus a Transaction Fee and an additional variable charge for cash redemptions specified above, to offset the Fund’s brokerage and other transaction costs associated with the disposition of Redemption Securities of the Fund). Redemptions of Creation Units will be subject to compliance with applicable United States federal and state securities laws and each ETF Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Fund could not lawfully deliver specific Redemption Securities or could not do so without first registering such securities under federal or state law.

Although the ETF Funds do not ordinarily permit cash redemptions of Creation Units, in the event that cash redemptions are permitted or required by a Fund, proceeds will be paid to the Authorized Participant redeeming shares on behalf of the redeeming investor as soon as practicable after the date of redemption (within seven calendar days thereafter, except for the instances listed in Appendix A hereto where more than seven calendar days would be needed).

Information concerning a Fund’s current procedures for use of collateral under these circumstances is available from the Distributor. The only collateral that is acceptable to the Fund is cash in U.S. dollars. The Fund’s current procedures for collateralization of missing ETF Shares require, among other things, that any cash collateral shall be in the form of U.S. dollars in immediately available funds, and that the fees of the custodian and any subcustodians in respect of the delivery, maintenance and redelivery of the cash collateral shall be payable by the Authorized Participant. The Authorized Participant Agreement permits the Fund to purchase the missing ETF Shares or acquire the Redemption Securities and the Cash Component underlying such ETF Shares at any time and subjects the Authorized Participant to liability for any shortfall between the cost to the Fund of purchasing such ETF Shares, Redemption Securities, or Cash Component and the cash collateral or the amount that may be drawn under any letter of credit.

Because the Redemption Securities of a Fund may trade on the relevant exchange(s) on days that the exchange is closed, stockholders may not be able to redeem their shares of such Fund, or to purchase or sell ETF Shares on the exchange, on days when the NAV of such Fund could be significantly affected by events in the relevant foreign markets.

Suspension of Redemption Rights

The right of redemption may be suspended or the date of payment postponed with respect to any ETF Fund (1) for any period during which the NYSE or listing exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the NYSE or listing exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the shares of the Fund's portfolio securities or determination of its NAV is not reasonably practical; or (4) in such other circumstances as the SEC permits.

Precautionary Notes

A precautionary note to retail investors: The DTC or its nominee will be the registered owner of all outstanding ETF Shares. Your ownership of ETF Shares will be shown on the records of the DTC and the DTC Participant broker through which you hold the shares. Vanguard will not have any record of your ownership. Your account information will be maintained by your broker, which will provide you with account statements, confirmations of your purchases and sales of ETF Shares, and tax information. Your broker also will be responsible for distributing income and capital gains distributions and for ensuring that you receive shareholder reports and other communications from the fund whose ETF Shares you own. You will receive other services (e.g., dividend reinvestment and average cost information) only if your broker offers these services.

A precautionary note to purchasers of Creation Units: You should be aware of certain legal risks unique to investors purchasing Creation Units directly from the issuing fund.

Because new ETF Shares may be issued on an ongoing basis, a "distribution" of ETF Shares could be occurring at any time. Certain activities that you perform as a dealer could, depending on the circumstances, result in your being deemed a participant in the distribution, in a manner that could render you a statutory underwriter and subject you to the prospectus delivery and liability provisions of the Securities Act of 1933. For example, you could be deemed a statutory underwriter if you purchase Creation Units from the issuing fund, break them down into the constituent ETF Shares, and sell those shares directly to customers, or if you choose to couple the creation of a supply of new ETF Shares with an active selling effort involving solicitation of secondary market demand for ETF Shares. Whether a person is an underwriter depends upon all of the facts and circumstances pertaining to that person's activities, and the examples mentioned here should not be considered a complete description of all the activities that could cause you to be deemed an underwriter.

Dealers who are not "underwriters" but are participating in a distribution (as opposed to engaging in ordinary secondary-market transactions), and thus dealing with ETF Shares as part of an "unsold allotment" within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act.

A precautionary note to shareholders redeeming Creation Units: An Authorized Participant that is not a "qualified institutional buyer" as defined in Rule 144A under the Securities Act of 1933 will not be able to receive, as part of the redemption basket, restricted securities eligible for resale under Rule 144A. (For this reason, Vanguard ETFs do not intend to include 144A securities in their redemption baskets.)

A precautionary note to investment companies: For purposes of the Investment Company Act of 1940, Vanguard ETF Shares are issued by registered investment companies, and the acquisition of such shares by other investment companies is subject to the restrictions of Section 12(d)(1) of that Act, except as permitted by an SEC exemptive order that allows registered investment companies to invest in the issuing funds beyond the limits of Section 12(d)(1), subject to certain terms and conditions.

APPENDIX A—ETF SHARES: FOREIGN MARKET INFORMATION

The ETF Funds generally intend to deliver Redemption Securities on a basis of "T" plus three Business Days. The Funds may effect deliveries of Redemption Securities on a basis other than T plus three to accommodate local holiday schedules or under certain other circumstances. The ability of the Funds to effect in-kind redemptions within three Business Days of receipt of a redemption request is subject, among other things, to the condition that, within the time period from the date of the request to the date of delivery of the securities, there are no days that are local market holidays that are Business Days. For every occurrence of one or more intervening holidays in the local market that are not holidays observed in New York, the redemption settlement cycle will be extended by the number of such intervening

local holidays. In addition to holidays, other unforeseeable closings in a foreign market because of emergencies may also prevent the Funds from delivering securities within three Business Days.

The securities delivery cycles currently practicable for transferring Redemption Securities to redeeming investors, coupled with local market holiday schedules, will require a delivery process longer than seven calendar days in certain circumstances, during the calendar year 2011. The holidays applicable to each Fund during such periods are listed as follows, as are instances where more than seven days will be needed to deliver redemption proceeds. Although certain holidays may occur on different dates in subsequent years, the number of days required to deliver redemption proceeds in any given year is not expected to exceed the maximum number of days listed below for each Fund. The proclamation of new holidays, the treatment by market participants of certain days as “informal holidays” (e.g., days on which no or limited securities transactions occur, as a result of substantially shortened trading hours), the elimination of existing holidays, or changes in local securities delivery practices, could affect the information set forth herein at some time in the future.

Redemption. A redemption request over the following holidays would result in a settlement period that will exceed seven calendar days (examples are based on the days particular holidays fall during the calendar year 2011). The longest redemption cycle for MSCI Emerging Markets ETF Shares is a function of the longest redemption cycles among the markets whose stocks make up this Fund.

Barclays Capital makes no representation or warranty, express or implied, to the owners of Vanguard ETFs or any member of the public regarding the advisability of investing in securities generally or in Vanguard ETFs particularly or the ability of the Barclays Capital Index to track general bond market performance. Barclays Capital hereby expressly disclaims all warranties of merchantability and fitness for a particular purpose with respect to the Barclays Capital Index and any data included therein. Barclays Capital's only relationship to Vanguard and Vanguard ETFs is the licensing of the Barclays Capital Index which is determined, composed, and calculated by Barclays Capital without regard to Vanguard or the Vanguard ETFs. Barclays Capital is not responsible for and has not participated in the determination of the timing of, prices of, or quantities of Vanguard ETFs to be issued. *CFA®* and *Chartered Financial Analyst®* are trademarks owned by CFA Institute.

THESE FUNDS ARE NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI INC. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS DIRECT OR INDIRECT INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY VANGUARD. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE OWNERS OF THESE FUND OR ANY MEMBER OF THE PUBLIC REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THESE FUNDS PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THESE FUNDS OR THE ISSUER OR OWNER OF THESE FUNDS. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUERS OR OWNERS OF THESE FUNDS INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THESE FUNDS TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE CONSIDERATION INTO WHICH THESE FUND ARE REDEEMABLE. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE OWNERS OF THESE FUNDS IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THESE FUNDS.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES WHICH MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY LICENSEE, LICENSEE'S CUSTOMERS OR COUNTERPARTIES, ISSUERS OF THE FUNDS, OWNERS OF THE FUNDS, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN IN CONNECTION WITH THE RIGHTS LICENSED HEREUNDER OR FOR ANY OTHER USE. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO ANY MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.
