Dear Sir,

QUARTERLY REPORT FOR THE PERIOD ENDED 30 JUNE 2011

1. EXPLORATION ACTIVITIES

1.1 LAKE MASON URANIUM PROJECT, WESTERN AUSTRALIA

Prime holds 100% of exploration licence (E 57/ 785) located central to the Lake Mason palaeo-drainage.

Previous exploration at Lake Mason has focused on the defined radiometric anomalies within the eastern extremity and northern shore of the main Lake Mason channel. However, radiometric anomalies are only of use for identifying outcropping uranium mineralisation. Given that calcrete-hosted uranium mineralisation forms in the subsurface, Prime must assess the entire licence area for buried mineralisation.

Lake Mason is known to host playa lake style, calcrete-hosted uranium mineralisation within the lake sediments and around its margins. This style of mineralisation is similar to that at Mega Uranium's Lake Maitland project. There is potential for additional mineralisation in a number of locations adjacent to Lake Mason, including the drainages and deltas that feed into the lake.

Various experimental exploration techniques are being considered in order to fully assess the exploration potential of uranium throughout the Lake Mason area. Biogeochemical sampling, whereby vegetation is effectively collected over a broad area, is a proven technique for identifying subsurface uranium mineralization. Prime is presently assessing the licence area in order to tailor such a programme to the local region.

1.2 PROJECT GENERATION

The Directors are continuing their efforts to find a suitable asset to augment the Lake Mason Project. During the quarter, projects located in Western Australia and the Democratic Republic of

Congo were considered in detail, but unfortunately they failed to meet our criteria. Other projects are still under consideration.

Competent Persons Declaration

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Timothy Putt of Exploration and Mining Information Systems, who is a member of The Australasian Institute of Geoscientists and the Society of Economic Geologists. Mr. Putt has sufficient experience that is relevant to the various styles of mineralisation and types of deposit under consideration, and to the activity that they are undertaking to qualify as Competent Persons as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resource and Ore Reserves". Timothy Putt consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Forward-Looking Statements

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Prime Minerals Limited's planned exploration programme and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may", "potential," "should," and similar expressions are forward-looking statements. Although Prime Minerals Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.
