The Attaching Options have an exercise price of \$0.004 and an exercise period between 1 June 2013 and 30 June 2013. If an Attaching Option is exercised between 1 June 2013 and 30 June 2013, the Attaching Option holder is entitled to receive a Secondary Option exercisable at \$0.004 on or before 30 June 2015. The full terms and conditions of the New Shares, Attaching Options and Secondary Options are set out in Sections 4.1 to 4.3 respectively.

The Company has on issue 1,187,522,664 Shares. The Company also has on issue 305,192,095 listed Options, 49,000,000 unlisted Options and 10,000,000 unlisted Convertible Notes. All holders of Shares in the Company on the Record Date are entitled to participate in the Rights Issue Offer. Option holders who exercise their Options after the date of this Prospectus but prior to the Record Date are entitled to participate in the Rights Issue Offer. The same applies for the Company's sole Note Holder, should it choose to convert its Notes into Shares.

The number of New Shares to which you are entitled as an Eligible Shareholder is shown on the accompanying personalised Rights Issue Offer Entitlement and Acceptance Form.

The Rights Issue Offer is underwritten to an amount of \$6,000,000 by Patersons Securities Limited ("**Underwriter**"), being the first 1,500,000,000 New Shares under the Offer. Refer to Section 5.4.2 of this Prospectus for further details of the terms of the Underwriting Agreement.

The offer of the Underwriter Options is a separate offer pursuant to this Prospectus and only those persons directed by the Underwriter should complete the accompanying personalised Underwriter Offer Entitlement and Acceptance Form.

1.3 Non Renounceable loyalty Bonus Options

All Shareholders registered on the Company's Share register at a date approximately 6 weeks after the Closing Date will be entitled to participate in a proposed non renounceable entitlement issue of loyalty Bonus Options on the basis of one (1) loyalty Bonus Option for every two (2) Shares held ("**loyalty Bonus Issue**"). It is proposed to issue the loyalty Bonus Options under the loyalty Bonus Issue on the same terms as the Attaching Options. Application will be made for quotation of the loyalty Bonus Options.

The terms and conditions of the loyalty Bonus Options proposed to be issued pursuant to the loyalty Bonus Issue will be on the same terms and conditions as the Attaching Options as set out in Section 4.2 of this Prospectus. The loyalty Bonus Issue will be offered under a separate offer document at that time.

1.4 Conditional Offer

The Underwriter Offer (“**Conditional Offer**”) is subject to and conditional upon Shareholders approving the issue of the Underwriter Options (referred to in the Notice of Meeting as the “Commitment Options”) for the purposes of Listing Rule 7.1 at the General Meeting of the Company to be held on 25 August 2011.

quotation of the Securities is not made within seven days after the date of this Prospectus, or ASX does not grant permission for official quotation of the Securities within three months after the date of this Prospectus, the Company will not issue any Securities and will repay all application monies for the Securities within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant official quotation to the Securities is not to be taken in any way as an indication of the merits of the Company or the Securities now offered under this Prospectus.

1.11 Allotment of Securities

Where the number of Securities issued is less than the number applied for, or where no allotment is made under the Shortfall Offer, surplus Application Monies will be refunded without any interest to the Applicant as soon as practicable after the Closing Date.

The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

1.12 Secondary Options

Any Secondary Option issued upon exercise of the Attaching Options or Underwriter Options will not be issued to holders of such Options until such time as the Company has prepared a disclosure document for the purposes of complying with the technical requirements of the Corporations Act in respect of the grant of those subsequent Secondary Options.

1.13 CHESS and Issuer Sponsorship

The Company operates an electronic CHESS sub-register and an electronic issuer sponsored sub-register. These two sub-registers make up the Company's register of Securities. The Company will not issue certificates to investors. Rather, holding statements (similar to bank statements) will be dispatched to investors as soon as practicable after allotment.

Holding statements will be sent either by CHESS (for new investors who elect to hold their Securities on the CHESS sub-register) or by the Company's Share Registry (for new investors who elect to hold their Securities on the Issuer sponsored sub-register). The statements will set out the number of New Shares and Options allotted under the Prospectus and provide details of a Holder Identification Number (for new investors who elect to hold their Securities on the Chess sub-register) or Reference Number (for new investors who elect to hold their Securities on the issuer sponsored sub-register). Updated holding statements will also be sent to each new investor following the month in which the balance of their holding of New Shares and Options changes, and also as required by the Listing Rules or the Corporations Act.

As with any share investment, there are risks associated with investing in the Company. The principal risks that could affect the financial and market performance of the Company and its business model are detailed in Section 2 of this Prospectus. entirety and should consider all factors in light of their individual circumstances and seek appropriate professional advice.

Factors affecting an investment in the Company include drilling and operating risks, resource and reserve estimates, regulation in the Philippines, joint venture risk, insurance risk, stock market fluctuations, competition risks, foreign currency exchange rate fluctuations, economic risks and external market factors, additional requirements for capital and governmental policy regarding environmental protection.

1.15 Overseas Shareholders

The distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws. It is the responsibility of Applicants outside Australia to obtain all necessary approvals for the allotment and issue of the Securities pursuant to this Prospectus. The return of a completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation and warranty by the Applicant that all relevant approvals have been obtained.

1.16 Taxation

It is the responsibility of all persons to satisfy themselves of the particular taxation treatment that applies to them by consulting their own professional tax advisers. Taxation consequences will depend on particular circumstances. Neither the Company nor any of its officers accept any liability or responsibility in respect of the taxation consequences of the matters referred to above or any other taxation consequences connected with an investment in the Securities in the Company.

If you have any questions relating to the Offers, please contact the Company on (08) 9388 6711.

SECTION 2 RISK FACTORS

2.1 Introduction

The Securities offered under this Prospectus should be considered speculative because of the nature of the Company's business.

Whilst the Directors recommend that Shareholders take up their Entitlement, there are however numerous risk factors involved. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Company and cannot be mitigated. Accordingly, an investment in the Company carries no guarantee with respect to the payment of dividends, return of capital or price at which the Securities will trade.

The following is a summary of the more material matters to be considered and should be read in conjunction with specific matters referred to in the Company's announcements and reports. However, the summary is not exhaustive and potential investors should examine the contents of this Prospectus in its entirety and consult their professional advisors before deciding whether to apply for the Securities.

2.2 Specific Risks

A number of specific risk factors that may impact the future performance of the Company are described below. Shareholders should note that this list is not exhaustive.

2.2.1 General Operational Risks

The business of oil and gas exploration, project development and production, by its nature, contains elements of significant risk with no guarantee of success. Ultimate and continuous success of these activities is dependent on, amongst other things:

- the discovery and-or acquisition of economically recoverable reserves;
- access to adequate capital for project development;
- design and construction of efficient development and production infrastructure within capital expenditure budgets;
- securing and maintaining title to interests;
- obtaining consents and approvals necessary for the conduct of oil and gas exploration, development and production; and
- access to competent operational management and prudent financial administration, including the availability and reliability of appropriately skilled and experienced employees, contractors and consultants.

Whether or not income will result from projects undergoing exploration and development programs depends on successful exploration and establishment of production facilities. Factors including costs, actual hydrocarbons and formations, flow consistency and reliability and commodity prices affect successful project development and operations.

There is no assurance that any exploration on current or future interests will result in the discovery of an economic deposit of oil or gas. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically developed.

2.2.2 Required Shareholder Approval

Under the Notice of Meeting the Company is seeking Shareholder approval for the variation of the terms of the Convertible Note. If the Company does not obtain this approval, the Noteholder may by notice in writing to the Company deem the failure to obtain to such approval as an "Event of Default". If an "Event of Default" under the Convertible Note Deed is not remedied, the Noteholder may require the Company to repay the balance of the Convertible Notes which would require the Company to obtain further funds for such repayment.

2.2.3 Drilling and Operating Risk

Oil and gas drilling activities are subject to numerous risks, many of which are beyond the Company's control. The actual costs of drilling a well may be substantially more than the drilling costs estimated prior to spudding the well due to unforeseen circumstances when drilling. Drilling activities carry risk as such activities may be curtailed, delayed or cancelled as a result of weather conditions, mechanical difficulties, shortages or delays in the delivery of drill rigs or other equipment and compliance with government requirements.

Drilling may involve unprofitable efforts, not only with respect to dry wells, but also with respect to wells which, though yielding some petroleum, are not sufficiently productive to justify commercial development or cover operating and other costs. Hazards are incidental to the exploration and development of oil and gas properties such as unusual or unexpected formations, pressures, oceanographic conditions and other factors are inherent in drilling and operating a well and may be encountered by the Company.

Industry operating risks include fire, explosions, blow outs, pipe failures and environmental hazards such as accidental spills or leakage of liquids, gas leaks, ruptures or discharges of toxic gases. The occurrence of any of these risks could result in legal proceedings against the Company and substantial losses to the Company due to injury or loss of life, damage to or destruction of property, natural resources or equipment, pollution or other environmental damage, cleanup responsibilities, regulatory investigation, and penalties or suspension of operations. Damage occurring to third parties as a result of such risks may give rise to claims against the Company.

2.2.4 Resource and Reserve Estimates

Resource estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates that were valid when made may change significantly when new information becomes available. In addition, resource estimates are necessarily imprecise and depend to some extent on interpretations, which may prove to be inaccurate. Should the Company encounter oil and/or gas deposits or formations different from those predicted by past drilling, sampling and similar examinations, resource estimates may have to be adjusted and production plans may have to be altered in a way which could adversely affect the Company's operations.

2.2.5 Regulation in the Philippines

Operations by the Company may require approvals from regulatory authorities, which include renewals of existing Philippines service contracts, which may not be forthcoming or which may not be able to be obtained on terms acceptable to the Company. While the Company has no reason to believe that all requisite approvals will not be forthcoming and while the Company's obligations for expenditure will be predicated on any requisite approvals being obtained it should be understood that the Company cannot guarantee that any requisite approvals will be obtained. A failure to obtain any approvals would mean the ability of the Company to develop or operate any project, or possibly acquire any project, may be limited or restricted either in part or absolutely.

2.2.6 Ability to Exploit Successful Discoveries

It may not always be possible for the Company to participate in the exploitation of successful discoveries made in areas in which the Company has an interest. Such exploitation will involve the need to obtain the necessary licences or clearances from the relevant authorities, which may require conditions to be satisfied and/or the exercise of discretions by such authorities. It may or may not be possible for such conditions to be satisfied. The infrastructure requirements around a successful discovery may also impact on the exploitation of a discovery. Further the decision to proceed to further exploitation may require the participation of other companies whose interests and objectives may not be the same as the Company. As described above, such work may require the Company to meet or commit to financing obligations for which it may have not planned.

2.2.7 Joint Venture Parties, Agents and Contractors

The Directors are unable to predict the risk of financial failure or default by a participant in any joint venture to which the Company is or may become a party or the insolvency or managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity.

2.2.8 Environmental

The Company's activities are subject to the environmental risks inherent in the oil and gas industry. The Company is subject to environmental laws and regulations in connection with operations it may pursue in the oil and gas industry. The Company intends to conduct its activities in an environmentally responsible manner and in accordance with all applicable laws. However, the Company may be the subject of accidents or unforeseen circumstances that could subject the Company to extensive liability.

Further, the Company may require approval from the relevant authorities before it can undertake activities likely to impact the environment. Failure to obtain such approvals will prevent the Company from undertaking its desired activities. The Company is unable to predict the effect of additional environmental laws and regulations that may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or affect its operations on any area.

The Company's operational risks include environmental hazards such as accidental spills or leaks of petroleum liquids or gas, ruptures and the discharge of toxic gases. The occurrence of any such incident could result in substantial costs to the Company for environmental rehabilitation, damage control and losses.

2.2.9 Future capital needs and additional funding

The funding of any further ongoing capital requirements beyond the requirements as set out in this Prospectus will depend upon a number of factors including the extent of the Company's ability to generate income from activities which the company cannot forecast with any certainty.

Any additional equity financing will be dilutive to shareholders, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional funding as needed, it may not be able to take advantage of opportunities or develop projects. Further, the Company may be required to reduce the scope of its operations or anticipated expansion and it may affect the Company's ability to continue as a going concern.

2.2.10 Insurance

Insurance against all risks associated with oil and gas production is not always available or affordable. The Company will maintain insurance where it is considered appropriate for its needs however it will not be insured against all risks either because appropriate cover is not available or because the Directors consider the required premiums to be excessive having regard to the benefits that would accrue.

Although the Company believes that it or the operator of SC54A (Tindalo Project) and SC54B (Gindara Project) will carry adequate insurance with respect to its operations in accordance with industry practice, in certain circumstances the Company's or the operator's insurance may not cover or be adequate to cover the consequences of all events. In addition, the Company may be subject to liability for pollution, blow-outs or other hazards against which the Company or the operator does not insure or against which it may elect not to insure because of high premium costs or other reasons. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the operations of the Company. There is no assurance that the Company will be able to maintain adequate insurance in the future at rates that it considers is reasonable.

2.3 General Risks

The future prospects of the Company's business may be affected by circumstances and external factors beyond the Company's control. Financial performance of the Company may be affected by a number of business risks that apply to companies generally and may include economic, financial, market or regulatory conditions.

2.3.1 General Economic Climate

Factors such as inflation, currency fluctuation, interest rates and supply and demand have an impact on operating costs, commodity prices and stock market prices. The Company's future revenues and Share price may be affected by these factors, as well as by fluctuations in the price of oil or gas, which are beyond the Company's control.

2.3.2 Changes in Legislation and Government Regulation

Government legislation in Australia, the Philippines or any other relevant jurisdictions, including changes to the taxation system, may affect future earnings and relative attractiveness of investing in the Company. Changes in government policy or statutory changes may affect the Company and the attractiveness of an investment in it.

2.3.3 Competition

The Company competes with other companies, including major oil companies. Some of these companies have greater financial and other resources than the Company and, as a result may be in a better position to compete for future business opportunities. Many of the Company's competitors not only explore for and produce oil and gas, but also carry refining operations and market petroleum and other products on a worldwide basis. There is no assurance that the Company can compete effectively with these competitors.

2.3.4 Oil and gas price volatility

The demand for, and price of, oil and natural gas is highly dependent on a variety of factors, including international supply and demand, the level of consumer product demand, weather conditions, the price and availability of alternative fuels, actions taken by governments and international cartels, and global economic and political developments.

International oil and gas prices have fluctuated widely in recent years and may continue to fluctuate significantly in the future. Fluctuations in oil and gas prices and, in particular a material decline in the price of oil or gas may have a material adverse effect on the Company's business, financial condition and results or operations.

2.3.5 Foreign exchange risk

The Company holds interests in operations in the Philippines and the costs of and any revenues from these operations will be in United States dollars. As the Company's financial reports are presented in Australian dollars, the Company will be exposed to the volatility and fluctuations of the exchange rate between the United States dollar and the Australian dollar.

Global currencies are affected by a number of factors that are beyond the control of the Company. These factors include economic conditions in the relevant country and elsewhere and the outlook for interest rates, inflation and other economic factors. These factors may have a positive or negative effect on the Company's exploration, project development and production plans and activities together with the ability to fund those plans and activities.

2.3.6 Reliance on Key Personnel

The Company's success depends largely on the core competencies of its directors and management, and their familiarisation with, and ability to operate, in the oil and gas industry and the Company's ability to find and retain key executives.

2.3.7 Sharemarket Conditions

The market price of the Company's Shares may be subject to varied and unpredictable influences on the market for equities in general and resources stocks in particular.

2.4 Speculative Nature of Investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Securities offered under this Prospectus. Therefore, the Securities offered pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of the Securities.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Securities.

Shareholders should therefore also have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest in the Company.

5.2 Continuous Reporting and Disclosure Obligations

The Company is listed on ASX and its Shares are quoted on ASX under the code "KIK".

The Company is a "disclosing entity" for the purposes of the Corporations Act.
