NEW OMNIpassTM Service

Credentials Management System

4C Security Solutions Limited (ASX: FCS), today announced the release of BQT Solutions new OMNIpass service. The new service has been developed in Australia as a value-add for all BQT clients.

OMNIpass is a secure, highly structured smart card management service that provides the end user with a 'peace of mind' single credential solution for all applications globally. All customer data is securely registered and maintained by BQT Solutions.

The client retains ownership of their user-selected, unique card format irrespective of the access control system (ACS) manufacturer or the system integrator.

FCS's interim CEO, Geoff Cleaves, said "OMNIpass provides the end user with ultimate control of their card credentials no matter who they appoint as their facilities manager or system integrator allowing for a truly open system to be maintained. The adoption of OMNIpass also assists in keeping general staff out of the equation avoiding the issue that once the credentials are disclosed they can't be undisclosed."

A handwritten signature in blue ink, appearing to read 'Geoff Cleaves', is positioned above the printed name and title.

Geoffrey Cleaves
Interim CEO, Director & Company Secretary
